On the other hand it is not fair to add demurrage charges or losses through breakage. In the first instance, the charge is due to negligence on the part of the dealer himself and cannot rightly be charged up to the goods. Breakage cannot be added to the cost of the goods; such a course would demoralize the dealer's whole price system. Suppose that he gets in two consignments of glass of equal value. One arrives safe and sound but the other is damaged to the extent of $20. If he adds the $20 on to the cost of the goods in the second consignment, he will have two different charges on glass of the same value. Breakage charges must be looked after under the head of business expenses. The dealer must estimate an amount to cover the breakages during the year and add that to his overhead expenses, thus spreading it over his whole stock in trade.

Overhead Expenses.

Having determined the cost of the goods, the next step is to arrive at the cost of doing business. This is an extremely important phase of business management. The dealer must reckon on every possible expense which he will be compelled to meet during the year He will have to be guided largely by past experience, for many of the items can be estimated only. He knows, for instance, what his rent is, what he pays each member of the staff, and what the telephone bill is going to be. But he cannot tell to a cent what his office supplies will cost him, what his lighting and fuel bills will total or what the total of breakage losses will amount to. These items can be estimated with more or less exactitude by referring to the books of past years and taking into account the expansion of the business.

It is important that all expenses should be accounted for. Under the head of business maintenance cost comes Rent; salaries to clerk, bookkeeper and driver; extra help during the busy seasons; taxes, if any; light, heat, water and ice; telephone charge, long distance calls, telegrams; office supplies and stationery; advertising; donations; insurance; association fees; breakage losses; depreciation on stock, fixtures and properties; bad accounts; proprietor's salary and incidentals. Some items may have been omitted but that list covers the important charges.

Some of the items may require a little explaining. Many dealers, for instance, do not allow themselves a salary. This is misguided philanthrophy. The merchant earns and deserves a salary as much as anyone else. The profit he makes over and above all is seldom larger than he has a right to expect in the way of interest on his investment. If he contents himself with that and does not allow himself a salary, he is losing the benefit either of his investment or of his personal efforts.

It is important that a fair amount should be allowed to cover depreciation and bad debts. A certain amount of stock is bound to lose its selling worth in the best kept-up stores; and the fixtures depreciate steadily, necessitating substitution in due time. A certain percentage of bad debts are also bound to creep in no matter how closely the proprietor may watch.

The next step is to estimate the probable amount of business which will be done during the year. This can be arrived at by comparing past records and watching the trend of trade closely. If the locality is averagely thriving, a dealer can reasonably count upon a certain increase in his turnover each year.

Now suppose that a certain hardwareman did a $35,000 business last year with running expenses of $7,000. The town is growing, however, and he is continually seeing new faces in the store. He feels justified in counting upon an increase in business and estimates that he will do a $40,000 trade during the present year. To arrive at a correct estimate of expenses, he must allow for a certain expansion there also. The head clerk deserves a raise. That will cost an extra $100 a year. Taxes will be a little higher. Altogether, he decides that it will cost him about $200 more to run the store than it did last year, making the total $7,200. In other words, his cost of doing business is just 18 per cent. of his yearly sales. Quite apparently, then, this 18 per cent. must be figured in when fixing the selling price of goods.

What is Fair Percentage?

There is a wide divergence of opinion on the subject of the cost of doing business. Some dealers declare that it costs them as high as 28 per cent., while others stoutly asseverate that they can get along on as low as 7 per cent. Expenses will differ, of course, according to the location, the nature of the business and the methods followed. It is impossible, therefore, to set a percentage which would apply to all stores, but it is quite safe to assert that the dealer who lets his expenses creep up as high as 28 per cent. of his yearly sales is skating on thin ice, while the man who figures on 7 per cent. is either out in his figures or is running his business on a cheap and penurious scale which eliminates all hope of expansion.

Finding Selling Price.

The dealer has now found the cost of the goods and has estimated his cost of doing business. How is he to use the figures at his disposal in order to arrive at the selling price?

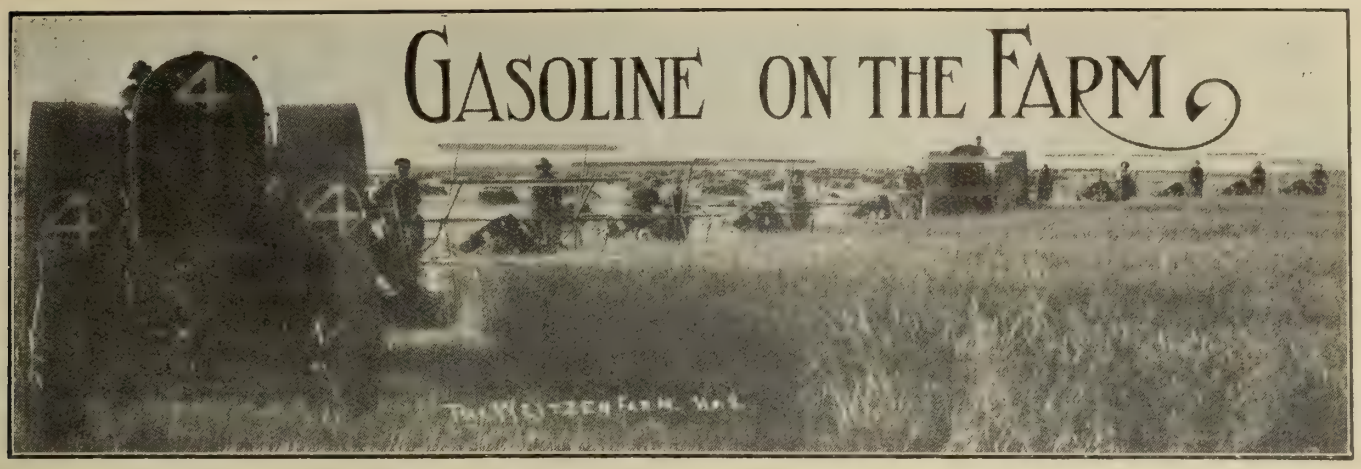
Suppose for purposes of demonstration that he has an article which has cost him $1. He has decided that it is costing him 18 per cent. to carry on business and that he is entitled to 10 per cent. over and above everything for profit. Should he mark the goods to sell at $1.28? We trow not.

The proper method to pursue is to add the percentages for cost of doing business and profit together (28 per cent), and deduct from the 100 per cent. which represents the selling price. What is left will represent the percentage that the cost price of the goods must bear to the selling price. In this instance $1 will represent 72 per cent. of the selling price. The selling price is, therefore $1.38.

Application of the Rule.

No rule can be followed rigidly in the conduct of a hardware store. In the matter of the selling price of goods, a difficulty at once presents itself. There are some staple lines which custom has decreed must be sold at a low figure. There are a few lines which the hardwareman sells on which he does not make a red cent. If he figured the selling price of these goods on the basis outlined above, his sales would be few and far between, for the simple reason that people would be able to buy much cheaper elsewhere. It is clear, therefore, that until hardwaremen get together and decide to ask a fair profit on everything they sell, there will be some goods which will have to be figured on a basis of their own. This brings up another point. The scales must be balanced somewhere. If certain lines are sold without the margin of profit which is required to insure the dealer a fair financial return, the loss must be made up in another direction. Most dealers balance it up by charging more for other goods on which a better price can be asked. This is a matter which every merchant must adjust for himself.

GASOLINE ON THE FARM



Threshing by traction engine on a 10,000-acre ranch, which boasts of only four horses.

A New Force Which is Solving the Knotty Problems of Agriculture on a Large Scale—A New Link Between the Hardwareman and the Farmer—The Experience of One Western Hardware Dealer.

A TEN thousand acre farm and only four horses on it. To the easterner, who has been accustomed to see ploughs drawn by teams; produce brought to market and wheat taken to the barns by the same means, such a condition is hard to understand. Yet there is a ten thousand acre farm in Saskatchewan which has but four horses upon it. That farm, and others like it, has opened a new field for the hardwareman of the West. It is a new kind of agriculture out there. It is a new kind of hardware business which furnishes the farmers with the necessary supplies.

The real old time easterner, who has never strayed far from the back fifties, will be inclined to scratch his head in disbelief at this statement that there is a 10,000 acre farm upon which only four horses are kept. He will scratch his head and quote, "How can them things be." Even the traveled easterners, who have seen something of the new methods, will be surprised. Gasoline, they know, has taken the place of horse flesh to a great extent; yet few have thought of its being so all sufficient.

Largest Wheat Farm in World.

It is near Rosetown that this great farm is situated. It is said to be the largest grain farm in the world; is owned by The Weitzen Land and Agricultural Company; comprises sixteen sections, or 10,240 acres, over 5,000 of which were under cultivation last year.

And the work of this farm—the word seems inadequate to describe such a place—is done almost entirely by gasoline. Gasoline It is the moving force of the new agriculture. It is to the farm what electricity is to the manufactury. It is the white coal of the fields.

Can they thresh by gasoline? will be asked. They can. Moreover, they do. In the West the farmers are mindful of that ancient saying, "If the mountain won't come to Mahommet, Mahommet will go to the mountain." The threshing outfit goes to the grain. Traction engines move the threshers. Steel granaries are drawn to the spot by traction engines; and in these steel granaries the wheat is stored.

Traction Engines Draw Binders.

But they can't cut the grain by gasoline, it will be said. Again the answer is yes. This is the method which is becoming more and more general. To traction engines the binders are harnessed. Not by horses are they drawn, but by horse power. The odor of gasoline has pervaded the land. Where horses would draw one binder the traction engines draw several. They go steadily along, mowing down the golden wheat, the number one hard of the West.

But the ploughing. Yes, that is being done by gasoline, too. Great motor

Scenes from a land of growth and contrast. 1—The main street of Rosetown. 2—A general store in a new territory. 3—Ploughing by gasoline. L. F. Heartwell is the figure in shirt sleeves.

ploughs have been installed. With these the difficult work of breaking land is done. With these, land once put under cultivation is returned.

And the marketing—for it, too, gasoline is used. The horses seem necessary only for the "chores" now. They do the light work. The odd jobs. But as for taking goods to market—well what impression could four horses make upon the product of 5,000 acres. No, the grain must be taken to the railways, fast, and the means of transportation is the traction engine which has power to draw many heavily laden wagons.

A study in contrast—Ploughing by oxen with a $14,000 modern schoolhouse in the background.

Huge Sales of Accessories.

It is a great change this—a change which has come suddenly; and, as has been said, it has necessitated a change in the western hardware business. Accessories which are needed on these motor-run farms are now in great demand. Why, in Rosetown—a place which was not, in 1909, but which now boasts 600 inhabitants—L. F. Heartwell, a dealer in hardware, sold, last season, 30 cars of gasoline. Thirty cars! Why in the old days a man in a place of 600 inhabitants would have considered he was doing fairly well if he had sold 30 gallons. Times have changed indeed.

But gasoline is not the only thing. There is belting, too. Belting must be supplied for all those traction engines, and lacing for the belts. So these lines have to be stocked and stocked largely by the hardware merchant. He must carry other things also, parts, and tools with which repairs may be made. Then he needs the smaller motors, for gasoline is not limited to the fields. It is used about the houses. They are coming to do nearly everything by gasoline in the West.

A Land of Contradictions.

Yet it is a strange country. Within a few miles of Rosetown there is to be seen a little mud hut—a general store it is, and one in which those who know it say a fair business done. In Rosetown itself, a new $14,000 school house has just been erected; yet on a homestead near this fine modern building a yoke of oxen do the drawing.

A land of contradiction this, yet a land that is taking the lead in many ways. In the east, gasoline is being used more and more daily. But out there it is rather a case of other means of operation being used less and less. The traction engine, the gasoline plough, are coming to be the thing.

The Rapid Recovery of Cochrane and its Hardware Stores

How Hardwaremen Have Helped to Build Up the Fire-Swept Town—Recuperative Power Shown is Typical of the West—Good Stores Built in Record Time.

TO one acquainted with the country known as the Canadian West, nothing seems quite impossible. The spectacle of towns growing up to thriving proportions in a few months, of whole new tracts being opened up and settled in a season, is becoming common. Railroads are shoving ahead into new territory with wonderful rapidity. Business is growing by leaps and bounds.

The great recuperative power of these western towns has never been so strikingly demonstrated as in the case of Cochrane. Strictly speaking Cochrane is not a western town but it lies in the northwestern belt of Ontario where development is quite as active as in the provinces beyond the Great Lakes. The chronicles of Cochrane do not date far back but they contain records of no fewer than three big fires, the last one of which wiped the town right off the map.

For about two weeks only. As soon as the smoke had cleared away, those hardy pioneers were at work building up again. In a few days they had temporary buildings erected. In a couple of weeks the work of reconstruction was on in full blast. In seven

Scenes in the "come back" town of Cochrane—A view of the place two we eks after the fire and two of the hardware stores—Frank Child shown in centre.

weeks, the town was back again, looking quite as lively and thriving as ever.

The hardware merchants of Cochrane showed that they possessed to the fullest degree the "come back" qualities which have made Cochrane famous. Frank Child was doing business in tents one week after the fire swept through the town. The intervening seven days had been spent in getting the tents and the new stock into Cochrane. He was one of the first to start rebuilding and about two months after that date, was moving into his new store building.

The Geo. Taylor Hardware Co. started in business immediately after the fire, also getting their store put up in remarkable time.

The hardware business has been brisk and these dealers have probably been rewarded for their energy. The upbuilding of a town means a heavy call for tools, building and contracting supplies. The sale of stoves in and around Cochrane has been something enormous since the conflagration

The accompanying illustration shows some scenes in Cochrane. The central figure is Frank Child. The top scene is a photograph of Railroad street looking west just two weeks after the fire. Buildings were starting to grow up on all sides. To the left is seen the store of the Geo. Taylor Hardware Co., and to the right that of Mr. Child. Both are stores of good size and large stocks are carried.

The Child store is 32 feet by 60, and is equipped with all the latest devices. It contains store ladders, modern fixtures and oil tanks and is lighted by electric light. It is, in fact, more complete than will be found in many stores in old established districts.

Early Days On The Road

Reminiscences of a Pioneer Salesman.

D. A. Kennelly Travelled Over New Territory Many Years Ago—Went to the Rockies and to Edmonton Several Years Ahead of the C. P. R.—Arduous Experiences on the Road—Carried a Stove as Sample to the Maritime Provinces.

An old-time scene in the west—A caravan of hardware and provisions arriving at Portage la Prairie in 1879.

ONE hears much of the hardships of the traveling man's life. He is depicted as rising at an unearthly hour every morning to catch trains, making impossible connections, lugging huge grips, eating his meals at railway lunch counters; we picture him devising expedients to gain interviews with crusty individuals and vieing with cunning competitors; and so on, ad infinitum. Far be it from us to affirm that the picture is not true in every essential respect; but we desire to state that, when one stops to consider what the traveling man of fifty years back had to endure, the conclusion is reached that the salesman of to-day is in clover. He travels in a parlor coach instead of by buckboard and team; telegraph and telephone enable him to make appointments ahead of time and to keep in touch with headquarters; he travels a well-defined route and his work is part of a capably directed system. But what of the traveling man of yesterday?

No one is in a better position to speak of traveling conditions as they were when the Dominion of Canada was in the swaddling clothes stage than A. D. Kennelly, Toronto manager of the McClary Mfg. Co. Mr. Kennelly was one of the first travelers to go on the road for McClary's, and for a long time he acted in the capacity of "pioneer man." Like Joshua, who was sent to spy out the chosen land, Kennelly would be called upon to make the initial trip into any territory, which the company decided to invade. He would have to map out his own routes, find out for himself the likely customers, the best hotels, the local likes, dislikes and prejudices and the "colloquialisms of trade"—if such a term be permissible—in that section. The way of the pioneer is hard; as any traveler who has made the first trip into new and unexplored territory will attest.

Crossed the Continent.

One of his early trips was to the West to open up that territory for the Winnipeg branch. If we were writing this sketch from purely a romantic standpoint, we would undoubtedly head this phase of his experience, "Cross Continent on a Buckboard." He beat the C.P.R. into most sections of the West by several years, going as far West as the Rockies and as far north as Edmonton. It required a Spartan nerve to travel in those days, for the roads were never good and frequently impassable. It was not hard to lose the way, especially in winter when the snow drifted across the trail and made direction purely a matter of individual opinion

All Night on Prairie.

Many's the night that he spent on the prairies, sometimes alone, more frequently in company with other belated traveling men. When the trail was lost and night close at hand, they would know it was useless to hope to reach shelter and would proceed to make the best of it. They would turn the horses adrift and crouch down under the heavy robes in the bottom of their sleigh. Sleep would be out of the question, of course; and sometimes they found it pretty hard to fight off the fatal drowsiness. Those long waits through the intense cold were an experience that few men would care to pass through; but it was a frequent occurrence in those early days on the road.

Drank Drug Samples.

Mr. Kennelly tells of one experience which has its funny side now; though it was grim earnest at the time. He was stalled for the night just out of Brandon with three other travelers. It was bitterly cold. The mercury had fallen so

A. D. Kennelly, who had some interesting experiences on the road in the early days.

low that it could hardly have gone any lower without crawling out of the bottom of the glass altogether, (a mere figure of speech insomuch as they hadn't a thermometer with them). The need for inner nourishment was keenly felt and, as one of the party was a grocery traveler, they soon demolished his samples. One of the other men traveled for a drug house and he had bottles in his case, containing nearly every known drug. During the night, the party drank everything that he would guarantee was not poison. Their wholesale libations helped warm them up and had no evil effects, for the party managed to get into Brandon the next day little the worse for wear.

Mr. Kennelly estimates that he swallowed enough medicine that night to safeguard him against every disease on the medical calendar and a few hitherto undiscovered ailments and complications as well.

Good Territory Then.

The West was good territory even then. The western dealers bought freely and, we presume, sold just as freely. Certainly the traveler who covered the prairie route deserved all the business he got, however.

Mr. Kennelly was the first man to travel through the Maritime Provinces for any western (Ontario was the "West" in those days) stove firm. He went on his intial trip with a full sense of the difficulties that lay before him. Down in the Maritime land, they had not at that time very much appreciation of "Canadian" goods. They handled English and American imports to a great extent. Most of the cities had a fixed license fee for traveling salesmen. When Mr. Kennelly struck Quebec City he had to enrich the civic coffers to the extent of $60 before showing a sample. Other cities had the same welcome for the commercial man. It cost money to solicit the trade in those days.

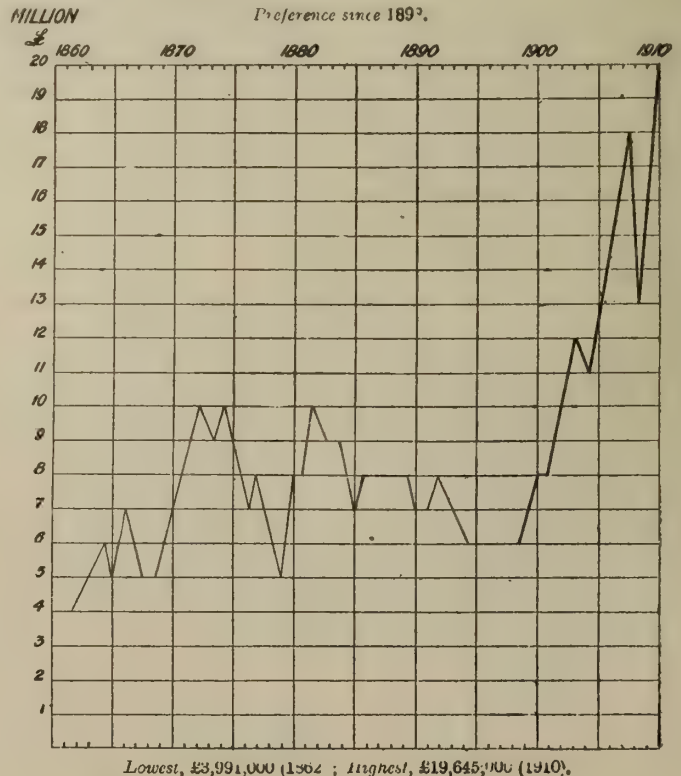
As samples, Mr. Kennelly carried several trunks of tin, and enamelware and a stove—a full size, full weight base burner! Think of it, ye traveling salesmen, who sell from catalogues, think of shipping a stove from place to place, loading and unloading, carting it from station to store, in those days of primitive railroading! This was the first, last and only time, we believe, that an actual stove was carried along as a sample by a stove salesman.

It was a heavy burden but it accomplished its purpose. The dealers throughout the Maritime provinces became convinced that a man who would come hundreds of miles to see them, pay their heavy commercial taxes and actually bring one of his stoves along with him, must have a proposition worth presenting. Mr. Kennelly's knack of deftly presenting his goods went a long way, but that stove was a clincher; it was the one convincing argument that broke down the Bluenose skepticism.

When in a reminiscent mood, Mr. Kennelly can give many interesting anecdotes of those early days. He tells of the "stages," then a regular fixture on all sections, and the wayside hostelries, identical in every way with those famous old stopping places where Dickens' "bagmen" put up. Traveling was laborous work but it had one or two advantages which do not exist now. On reaching a town the salesman did not find three or four representatives of rival houses ahead of him. He had to contend against the obstacles of the road rather than trade opposition. Perhaps, who knows? he did not have it much harder, except in a physical sense, than the man of to-day, who finds his district worked over with the fine tooth comb of modern commercial thoroughness.

British Imports Into Canada

The accompanying chart shows the amount of manufactured products from the United Kingdom imported into Canada since 1860. It will be noted that in 1910, British imports were largely in excess of any previous year. The principal commodities in 1910 were:—Woolen and worsted piece goods, £2,632,000; iron, iron and steel manufactures, £2,493,000; cotton piece goods, £1,683,000; woolen and worsted manufactures, £933,000; cottons, miscellaneous, £798,000; apparel, £568,000; machinery, £534,000; British and Irish spirits, £463,000.



Lowest, £3,991,000 (1862 ; Highest, £19,645,000 (1910).

Veteran Figures in the Hardware Field

No. 12.—Aaron Sweet, Winchester.

IN the evening, after work was done, a coterie of Winchester young men were wont to gather in Rennick & Broder's store, and there enter into competition to see who could kick the highest—the measurements being made upon a post which stood in the centre of the store. In these contests a lad—Aaron Sweet, by name—usually came off victorious. He touched the highest point on the post—inches above his nearest competitor.

All this was many years ago, but the point of interest is that later events have seemed to indicate that there is some relation between high kicking and climbing—for Aaron Sweet, the high kicker, has climbed somewhat too.

Mr. Sweet, all travelers know, is one of the leading merchants of Winchester. He is, perhaps, the largest buyer, and sells in large quantities. He handles practically every line, but is particularly fond of hardware.

Aaron—the name has a biblical sound. But such names, it would seem, run in the Sweet family. Recently Mr. Sweet went to Montreal on a visit, and when he was registering at the hotel he noticed the names of Moses Sweet and Solomon Sweet. This surely looked like a gathering of the clans. Mr. Sweet, of Winchester, thought that these otner biblical characters must be some relations of his, so he set out to find them.

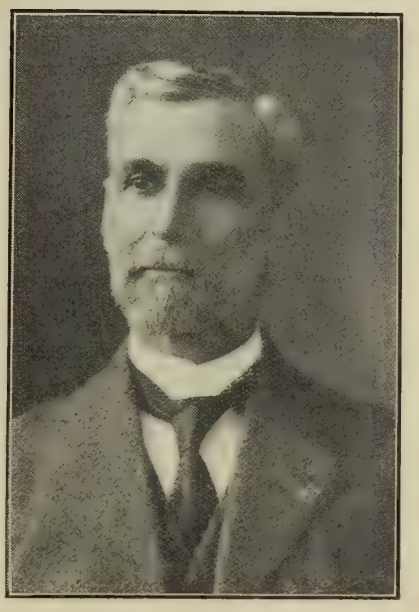
But alas there was no relationship at all. Aaron Sweet, who is a staunch Methodist, was somewhat grieved to find Moses a Scotch Presbyterian. Solomon proved to be a customs house officer. Probably the Government thought that as namesake of the man with the many wives he should be onto the smuggling ways of women.

There is another story which Mr. Sweet, of Winchester, enjoys telling. The event occurred a summer or two ago when he was in Vancouver. He had been invited to a friend's house, and there a new acquaintance said: "By the way, Mr. Sweet, are you any relation of the Sweets who live here?"

"I don't think so," replied the Winchester man, "but what are their names?"

"Paul and Silas," came the reply; and again, though Mr. Sweet found there was no relationship, he came to the conclusion that there is a divinity which shapes the front names of all Sweets in a biblical groove.

Mr. Sweet has been in Winchester



There is Some Relation Between High Kicking and Climbing, for Aaron Sweet, the High Kicker, Had Climbed Somewhat Also.

something over 42 years. It was in 1870 that he moved there from Morrisburg, starting work with the firm of Rennick & Broder. This was about the time that the kicking contests were the events of the evening.

Later, the firm changed to Broder & Brother, but Mr. Sweet remained in the store. Then in 1877, there came another change, the firm becoming Broder & Sweet. A new mark had been made on the kicking post.

But things were to change again before long, and in 1883 Mr. Sweet took over the store himself, operating it since that time under the name of A. Sweet & Co.

This store is both Mr. Sweet's business and his hobby. He is ever on the watch for new lines which he may profitably add. Recently he has started carrying factory and motor supplies. The result already has been satisfactory. There are a number of small factories in the district, and for these, belting, lacing and engine valves are often wanted. Motors are getting common on the farms There are batteries and fittings needed for these, and Mr. Sweet can supply them. The very fact that he can supply them brings him trade in other lines.

But Mr. Sweet has not confined all his attentions to his store. Municipal politics have attracted him. He was the Reeve of Winchester the first year that it was incorporated. He has bee in the council since.

A movement—hardly political, yet creating a stir greater than that caused by many political campaigns—came recently in Winchester. Local Option was carried. Now Mr. Sweet had not been certain what effect the passing of the measure would have. But the measure once carried, he determined—with many others in the town—to do what he could to make it a success. Nor was it long before there was need of some action—for fires occurred, as the result of which both the hotels in the place were burned to the ground.

This left Winchester practically hotelless, and everyone knows that a town without a good hotel is a town shunned of traveling men—a town more or less cut off.

Obviously there was need of speedy action, and a number of the business men got together, subscribed $28,000 stock, and built a new house. For this they secured a manager, and since that day a good hotel has been running—a hotel in which a good table and the law is kept.

This hostelry has a board of directors to see that all is properly done. On this board is Mr. Sweet. He and his fellows have done their work so well that the house is paying good interest on the money invested. It was not started as a money-making concern; but it has developed that those who stood by the town in its hour of need, determined that it should not be cut off from the world because of poor accommodation, will not suffer any financial loss by reason of their loyalty.

By the way, it was in 1870 that Mr. Sweet came to Winchester. Say he was seventeen or eighteen at the time, he must be nearly sixty now. No one would think so from his appearance—nor even from the likeness reproduced above. But no one believes in the Osler theory anyway, not even Osler himself, who says he never said it. Why a man at sixty—if he be the right sort of man—is in his very prime. He has both experience and vision, and in the particular case in question, he has also a great old biblical name—a name which dates back to the days when a man was considered somewhat of a youth at one hundred and twenty.

EFFICIENCY
IN
THE STOVE DEPARTMENT

Keep Stoves in One Part of Store

The Wisdom of Maintaining a Stove Department, Instead of Scattering the Stock all Through the Store—The Experience of Geo. Mathewson, of Toronto—Some of the Advantages Enumerated.

A GREAT deal depends upon the location of the stove department in the store. The effectiveness of a dealer's campaign can be, and very frequently is, seriously impaired by the lack of proper facilities in the store for display. Lack of room compels many dealers to place their stoves any old place they will fit in. You find a range here, serving perhaps as a counter for a variety of articles; a heater farther back; a row of gas stoves lined up against a rear counter. The effect is bad, to put it mildly.

In some cases it is not the dealer's fault. He has not sufficient room to enable him to set aside a large section of the store to be used for the display of a good stock of stoves; and he lacks, perhaps, the capital to move into larger quarters or to extend. Every effort should be made, however, to get all the stoves together. It should not be a difficult matter, except in very exceptional cases, to effect a rearrangement of the interior which would centre the stoves in one place. In any case, the practice of placing other goods on top of stoves should be discontinued. It gives the store the appearance of a junk shop, and it makes it considerably harder to effect a sale. The prospective customer cannot feel any desire to own a store which is encumbered with stew pans, package goods and kegs of nails.

The best position of all for the department, perhaps, is at the rear of the store, and on a higher level than the front. There is a double advantage in this. The goods can be displayed to the best advantage. The average customer likes plenty of time to talk over and consider a stove purchase. This cannot be done when the stock is placed near the front of the store, with people bustling in and out and more or less confusion the whole time. When the salesman can get the customer off in a quiet place and talk the matter over without interruption, he has a much better chance of making the sale.

Some dealers even go to the length of putting their stove stock on the floor above the main store. A few put them in the basement. The object in each case is the same: to give customer and salesman an opportunity to discuss terms without interruption.

A western dealer emphasizes the importance of having a section of the store devoted exclusively to stoves. "It gives the salesman double the chance," he explains. "If the goods are scattered through the store, people look them over carefully and you cannot tell if they are interested or not. If you question them, they frequently put you off. Now, my department is placed at the rear of the store up three steps. When a person goes up there, it is a sure sign that they are interested. We go after them hard, and the steps cut off their retreat. They can't edge away."

Geo. Mathewson, Queen Street East, Toronto, decided last fall that he needed more space. An extension was built at the rear, a raise of several feet being put in. The stove stock was then moved back to the new section.

A view of the stove department in the store of Geo. Mathewson, Toronto.

The accompanying illustration shows the stove department as at present arranged. Mr. Mathewson keeps only a few samples of each line on the floor. The rest of the stock and the second-hand stoves are in the basement.

The problem which faced Mr. Mathewson was pretty much the same as that which most dealers are called upon to solve, in housing their stove stock. He states that the new arrangement has been satisfactory in every respect. It not only gives him a splendid opportunity to display his stove stock, but it greatly improves the rest of his store as well. The elevated section serves the purpose of a stove showroom to best advantage. It is possible to show the stoves from every angle and to demonstrate their advantages.

Put in Elevator.

Another innovation made at the time the addition was built on was an elevator at the rear of the stove department. This has since been found invaluable for the handling of goods. "Don't see how I ever got along without it before," comments Mr. Mathewson.

Methods of a Successful Stove Dealer

How W. C. Stearman, of Vancouver, Has Built Up a Splendid Trade—He Specializes on Stoves and Advertises Strongly—To Satisfy the Customer is His Great Aim and Object—Fairness to Other Dealers is Striven for.

SPECIALIZE in stoves. Though a sale is the temporary aim, make the satisfaction of the customer the ultimate object. Adopt a standard of dealing and live up to it. Don't knock your fellow-dealer; remember every one may not prefer your stove. These are some of the mottoes W. C. Stearman, of Vancouver, has before him in handling the stove trade. That he has managed to make a record not only for Canada, but almost for the States, indicates the common sense of his fundamental rules.

Last year Mr. Stearman sold 982 ranges in all. Early in March, he had sold over 3,000 ranges in the aggregate. He hopes by the end of the present year to have reached the 4,000 mark. To show his belief in his own ability and that of his staff, he has placed an order for twenty carloads to be delivered in 1912. Each car holds from 56 to 62 ranges.

How does he do it? Mr. Stearman frankly states he has no secret of success, his various rules being simply an amplification of a basic fair dealing.

After the range is placed, the buyer is told that if it is not satisfactory, money will be refunded. This has happened but once, but the firm is ready at any time to show their good faith. No exchange is made, for all the stoves are alike, and the money is forthcoming immediately.

Money Was Refunded.

Three years after the purchase of a stove, the buyer came into the store and asked Mr. Stearman if he would do what he said. Without any hesitation, the man was assured that that was the first policy of the store. "Well," he said, "I bought a range three years ago, and I have to change my place of residence. I have not time to offer it second-hand any place. You told me you would give me $35 for it, three years after I bought it."

That afternoon the range was in the firm's warehouse. It was cleaned up and sold a few days later to a buyer who wanted a second-hand stove. Perhaps only a dollar or two was made out of it, but nothing was lost, and the goodwill of a buyer was gained.

Not many second-hand stoves are available though. This is shown by the fact that there is a waiting list for these, with four names on the list at present. Sometimes a second-hand range is picked up in odd places, and it is overhauled and sold at the least possible reasonable profit.

A Good Advertiser.

Advertise! Advertise! Stoves are advertised by the whole Stearman store staff. Advertisements are placed in all the papers and principal publications that reach the crowd. Mr. Stearman reasons that there is no use having a good thing if its merits are not made known. The statements made in his advertising matter are straight, explicit and brief. Evidently they impress, for the store has been able to sell eleven ranges in one day. That he gets stoves on the minds of people who want something in that line was shown by the first clerk at the store one morning finding a man seated on the step at the front door.

"I'm waiting to buy a range," the early bird announced.

Perhaps it is as much of the man as his method that the staff are enthused and the people interested. Still, the elements of success are the same, and may be adopted by any one. Application of these fundamentals need not be limited to special lines, but the same principles may be used in general dealing. There is only one way to get success and that is, see that the customer is satisfied.

In this connection the story is told of a young man starting up business, with small capital. He had to borrow and went to the bank. He was promised consideration. That afternoon, the manager of the bank, unknown to him, bought a small article in the store, and going outside ripped it with his knife. He took it back and pointed out the defect. The young business man saw at once that it could not have been like that when it left his store, but without question he gave the money back. That afternoon he was told that he could have all the money he wanted, and never knew for a long time after just why the banker was impressed. He was told that if he had haggled over the goods he would not have got his loan.

Be fair to other dealers is another rule of Stearman dealing. If a man wants another kind of stove he is directed to the place where it may be bought. A woman one day traveled many blocks in the heat only to find that she had got the wrong place. Her disappointment was apparent on her tired face. She was told to rest a minute, and in a few moments a taxicab was at the door to carry her to the store she wanted. She went to the other store, looked at the goods and though there was really nothing against them she returned to the first place to buy. Such an act is the inspiration of the moment, but it is always a winner. These inspirations come to the man who starts in with the determination to be thoroughly and constantly alert. Continued thought along certain lines is productive of ideas.

W. C. Stearman was formerly with McLennan & McFeely & Co. He formed a partnership with R. C. Hodgson and this continued until a couple of years ago, when Mr. Hodgson started up for himself in the sheet metal and furnace business. Both are successful men. Mr. Hodgson is one of the most prominent figures in the civic life of South Vancouver. He was defeated for the reeveship, but was re-elected president of the board of trade. This year, Mr. Stearman was able to spend seven weeks' holidays in California. He may not have an automobile yet, but a lengthy holiday in an expensive tourist section would lead to the belief that the honk honk is not far away. Even in holidays, Stearman specializes. When in the South, an enterprising man with a patent washing machine found that a leading hardwareman from Vancouver was about and solicited an interview to display the merits of his apparatus. The reply was "to see me in Vancouver; no business here."

Gas Stove Salesmanship a Live Subject

Spring the Great Season in This Line—Windows Are Being Used With Good Results—Satisfactory Demonstration Rendered Possible by Having Stoves Connected With Gas Mains—Price a Great Question.

FOR weeks the manufacturers have been disposing of their gas stoves. Now it is the retailers' turn. They, up to the present, have been stocking on faith. They have not felt any demand for the ranges. But now the householders are beginning to make their wants known. The dealer can see that he has not stocked in vain, and the manufacturer can perceive where he will get further orders.

Spring is perhaps the busiest season of all in gas stoves. In other ranges, fall rivals if it does not surpass spring—but not so with the gas models. They are essentially designed for summer. The reduce heat to a minimum, and they enable the housekeeper to obtain the desired results very rapidly.

Using the Windows.

This, then, is the season when the hardwaremen handling gas stoves may well bring them to the front. This is the season when the dealers may well plan how they are best to explain the advantages of the particular models which they handle. This is the season when gas ranges are finding their way into the store windows, and when they are being shown prominently on the floor.

One dealer in Montreal has planned an attractive window display, using not only a gas range, but a variety of aluminum ware pots. The range is set up as in a kitchen. The aluminum ware is to be seen in the oven, and on the top of the stove. The window is not over-crowded. It is made to appear as much as possible like a kitchen in a well ordered house, and as such it is inducing people to go inside and inquire prices. It is interesting many in aluminum ware as well as in gas stoves.

"Hitching Up" Stoves.

But there are many good window displays of gas stoves at the present time. Some merely show the various patterns to be purchased inside. These are what is wanted by those who have gone down town to see about gas stoves; but a more unique display would probably be better to attract the attention of those who are not quite sure whether they need a gas range or not.

Windows, however, are not the hardwareman's only care. He who would sell a number of stoves must have the inside of his store so arranged that the customers can be shown the strong features of the various models. In one store the possibility of a careful demonstration has been improved by "hitching up" some samples. These can be actually lighted. The prospective purchaser sees how the match is applied. If it is a model where there is a special device to prevent danger of an explosion this can be shown.

Then the burners on the top of the range can be well explained if they are burning. Their distance from the kettle or frying pan can be shown. Their temper can be explained. Reference may be made to the "Cherry Red" test. Few purchasers know of the great heat to which these parts are subjected before they are put upon a good stove—all will be interested and impressed to hear the truth.

Judging a Customer.

Then there is tthe question of price and model. Some makers are turning out their stove in two or three different styles—some in a still wider variety. The dealer, therefore, has to decide what will best suit each customer—what will best meet the needs in the kitchen, and what will best meet the needs of the purse. There are some people who look at a $50 or even a $75 gas range without a quiver. Lucky people. They would hardly appreciate being shown a $25 range. On the other hand there are many who come after gas stoves—perhaps the majority—with whom expense is a very real consideration.

Lo, the Poor Freshman.

People who have had this experience know how the college freshman felt when he went to the boarding house which had been recommended him by some kind-hearted Sophomores. "Fifteen dollars a week," gasped the freshie after being told the price of rooms by the proprietress. Then an inspiration came. "Have you a garage?" he inquired. The answer was in the negative, and the Freshman left sorrowfully, not because of the high rent, of course, but because of the lack of a garage to store his imaginary motor car.

Yes, it is very necessary for a salesman to size up the customer. He must estimate about what he would be willing to pay and then show that class of goods. But he may pass by some models, which are a little more expensive. By showing the advantages of these—showing where they will same time, labor and gas, he can often effect a sale.

The orders for gas stoves have started to come in now. Those who are expecting to take up house-keeping are having their stoves put in. Those who are moving to new houses are determining that they will seize this opportunity to add a gas range to the kitchen equipment. Many who are not moving have decided that they can make the kitchen more pleasant during the summer by installing a gas stove. They do not intend to wait until the hot weather comes before they buy, so they are now making inquiries of the stove men. One man who has just added gas stoves to his line has already had a good number of inquiries, and his stoves have not been in two weeks. Those who have a connection—built up as the result of years' work—have already sold a number of models. But brisker business is coming. To the man who carefully plans his course of procedure the majority of the business will go.

Hardware Letter Box

Manufacturers of Aluminum Goods.

Nobert & Lymburner, Trois-Rivieres.—"Can you give us names of manufacturers of aluminum goods?"

Northern Aluminum Co., Toronto; Household Convenience Co., Toronto; British & Continental Agencies, Ltd., Toronto; Steffens & Nolle, Montreal, Que.

Hollow Steel Drum Lawn Rollers.

Johnson & Co., Brandon, Man.—"What firms manufacture hollow steel drum lawn rollers?"

EFFICIENCY
IN
INTERIOR ARRANGEMENT

A Suggestion for a Model Store

One Hardwareman's Idea of How to Arrange the Interior of the Store to Get Best Results— A Suggested Lay-out for Each Department of the Hardware Business.

ONE of the problems which every hardwareman faces continually is that of arranging his store space so that he will be able to display his extremely varied stock to the best advantage. It is a difficult problem in most cases, for hardwaremen generally have about half as much space as they could conveniently use.

In order to secure some idea of what a model store (if such be possible) would be like, Hardware and Metal asked a prominent dealer to give his idea of it. The answer that he gave and the sketch of his plan for a model store interior arrangement are appended.

"You have set me a difficult task," he writes. "I doubt if it is possible to plan a perfect store. In the first place, there are so many different sizes and shapes. Stores vary from about 18 feet wide to 50 feet. Then some merchants carry lines which others do not touch, and it would be impossible to design an interior arrangement which would suit all cases.

"I suppose others will disagree with my ideas, but I have laid out a plan which, in my experience would best suit the requirements of an up-to-date hardware business. My own store was built a few years ago, and I spent much time planning out the arrangement. Some of the ideas worked out in my store are embodied in the plan I am giving you, but there are many changes which have come to mind since—ideas which I would put in a store if I were building again.

"The plan submitted is for a store somewhat wider than the average. It is 32 feet by 80 feet. It is designed for the conduct of business along the established lines—hardware goods, cutlery, enamelware, paint, sporting goods, stoves, etc. I would prefer a wider store myself, but must remember that this is supposed to be an average establishment.

"In the first place, the windows should have back casings. Good displays are much easier made in that way.

HINTS IN A NUTSHELL.

Keep attractive goods to the front.

Utilize tables for display of 5, 10 and 15 cent goods.

Have paint stock on view free from obstruction.

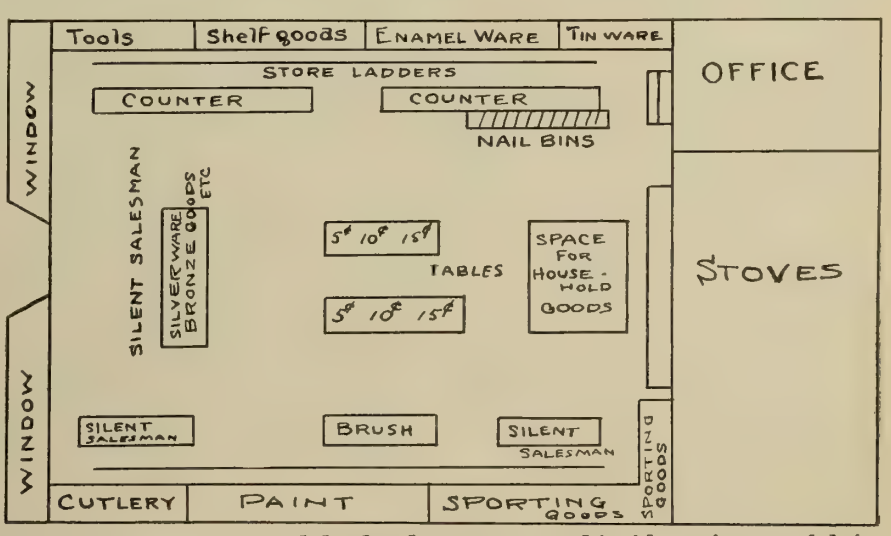
Have stove department at rear and above the level of the front.

Do not use ceiling for display purposes.

"To the left, on entering, the wall is filled with shelves for tools, shelf hardware, enamelware, tinware and such goods. A store ladder runs the full length. I have placed counters almost the full length of this side of the store, my idea being that at intervals the counter space could be used for display stands, cash register, etc. The nail bins are under the rear counter. The tool section is placed at the front.

"The shelves along the right side of the store are given over to cutlery, paints and sporting goods. Silent salesmen are placed in front of the cutlery section at the front. I have placed only a small brush counter in front of the paint section, as I believe that it pays to expose the full stock to view, with as little obstruction as possible. The sporting goods are at the end. This, I believe, is a wise move, as the purchasers of athletic supplies like to handle the stock, and, as a general rule, test the quality of the article. It would be much better if the sporting goods could be housed in a separate or partitioned off section of the store, but in a very large majority of cases this is not feasible.

"Now, for the centre. At the front and facing the entrance, I would have one or two silent salesmen containing an assortment of cutlery, silverware, brass goods, clocks, cut glass and such lines. These goods should be featured prominently, and certainly you could not find any way of featuring them more conspicuously than the method I have suggested. Behind the showcases, there are a couple of tables placed lengthwise with the store, for the display of 5, 10 and 15 cent goods. I am a firm believer in the wisdom of this method of selling off the multitude of small lines which the hardwareman handles. Exposed to view and priced in this way, the articles sell much more rapidly. Furthermore, the trouble of handling and storing is minimized. You can keep an almost complete



Lay-out of store suggested by hardwareman as his idea of a model interior.

assortment on these tables, and do not have to find places for keeping such lines as mouse traps and toasters. And that is an important point.

"Behind that again I have blocked off a space for the display of household goods. I would show here such articles as refrigerators, lawn mowers, ice cream freezers, vacuum cleaners, screen doors, go-carts, churns, washing machines and other articles of a more or less bulky nature. Goods here could be changed to suit the seasons. In the fall and winter, for instance, part of the space could be used for showing blankets, rugs and snow shovels. In the spring, it could be used for rakes, spades, hose, rolls of roofing, sprayers and so on.

Stoves at the Back.

"The stove department should be at the rear and raised above the level of the rest of the store. I am very much in favor of this idea. A stove customer wants the time to look around without interruption. The steps cut the department off from the rest of the store and give customers a certain freedom from restraint. I would have a chair or two placed around for the convenience of customers.

Electrical Goods.

"If the dealer handles electrical fixtures—I do myself—they could be kept in the stove department. Suspended from the ceiling, they would add to the attractiveness of that section of the store. The two lines would not clash at all. A line of mantels and grate supplies could be shown along one side of the stove department also.

The Ability to Change.

"I am a believer in changing stock around to fit the seasons. If a line of goods is found to be selling particularly well, I believe in shoving it to the front. The store arrangement I have suggested makes this quite possible. If needs be, the whole centre of the store could be temporarily cleared and the space used for the display of a certain line. This plan could be followed at Christmas time for instance.

"Finally, I do not believe in hanging goods from the ceiling, except in the case of electrical fixtures. I prefer to keep stock in the warehouse or cellar rather than to thus keep out the light and mar the appearance of the store."

Undoubtedly there are many good points in the above. It may be that other dealers could suggest improvements or objections to the ideas suggested. The width of the store being wider than the average makes the arrangement one which could not be followed out to the letter in a large number of cases. But, on the whole, a store planned along these lines would be well fitted for business and would combine attractiveness with utility.

The Rest Room as a Business Getter—Its Place in the Hardware Store

Said a man, speaking on salesmanship: "The dealer who can invent the most features to attract people to his store is the dealer who is going to get the most trade."

Every hardware merchant must admit the force of this statement. A man or woman once within the store door—whether having come to make a purchase or not—is likely to see something of which he or she feels the need. The article once seen and a sale is in sight. The great thing now-a-days is to bring people face to face with the goods. The goods—in many cases—will sell themselves.

Perhaps it was the knowledge of this which lead James & Reid, of Perth, to establish a rest room in their fine store. Whether they had this in mind or not this room has been responsible for a large number of sales.

Every one who has been in market towns knows how women have to sit about waiting for their husbands to finish their business. They will go from store to store—buying a little here, a little there. The waiting is hard on them and not exceedingly good for business. It is these women who take advantage of the room prepared for their convenience in this Perth hardware store. They can go up to it for a rest. There they can write letters. They can read the papers which are left on the table. They can converse with one another. The room, indeed, is a rendezvous. Many a man leaves his wife, saying he will meet her at James & Reid's. He knows she will be comfortable there.

Naturally, those taking advantage of this room get an opportunity to see the various lines shown in the store. Their husbands, coming for them later on, see the stock, too. If they want any article it is there they get it, and passing through, they find they want many things, the need of which they had not felt before.

This rest room, a corner of which is shown in the accompanying cut, is situated on the second storey. To reach it, the women must mount a flight of stairs, but the way is pointed out to them. A sign bearing the words, "This way to the Rest Room," hangs just at the foot of the steps. By means of rope and pulleys this is attached to the side door, and every time it is opened and closed the sign lowers and rises. Thus, attention is attracted. All see the sign, and whether they use the room or not they must feel pleasure at the thought that their comfort is regarded.

Corner of rest room in James & Reid's Perth store.

VENTILATION OF RESIDENCES.

In a recent letter to the St. Louis Post-Dispatch, Valentine A. Fath says:

"Where the house is heated with a warm-air furnace and the cold air is taken from outdoors and heated by the furnace and the warmed air is discharged into the rooms, and where the rooms have ventilating registers in the baseboards near the floor line and the foul and impure air, which falls to the floor, is then drawn into these ventilating flues and carried up and discharged out through the roof, such a heating plant is an ideal system of heating and ventilation combined.

"Now, if such a house is well weatherstripped it not only makes the house more comfortable, but also more economical to heat, and really is a good thing."

ELECTRIC OVENS.

Electric ovens for bread baking are beginning to make their appearance in some of the large cities of Europe, and the central electric stations are promoting their use. The Vienna electric plant is making arrangements with the bakers' syndicate to have electric ovens adopted widely throughout the city, and it offers to supply the current for this use at special reduced rates. As the bakers' ovens run all night this provides an outlet for current during the hours when the load is normally low. There will soon be a trial oven put in operation in order to test the method.—Scientific American.

A Model Interior Store Arrangement

A Description of the Store of Emerson & Fisher, St. John, N.B.—Handsome Fixtures Are Used With a Special Eye to Effect—Stove Department Raised at Rear—Store is Departmentized.

THE idea of not only being up-to-date in every particular, but of being as much ahead-of-date as is conveniently allowable, is a characteristic of the hardware firm of Emerson & Fisher, which has been a feature of their policy, tending to bring them the distinct standard of success they have attained during the years they have been in business in St. John, N.B.

Their handsomely furnished premises in Germain street have been improved from time to time, and pains have been taken with the object of installing only the latest suggestions in fixtures, showcases, lighting, etc., for the purpose of properly and temptingly displaying their goods. On entering the large store from the front, one obtains a glance without obstruction to the very rear, the view embracing a varied assortment of lines ranging in nature from the small wares on the "5 and 10 cent counters" to the commodious stove department elevated to a level with the suite of offices in the back portion of the store.

The interior arrangements of the premises are carefully attended to and an intending, or prospective, purchaser on going into the shop is at once impressed with neatness and exactness of detail, and the striking view of goods presented to the eye in elaborate wall and floor fixtures. Along the length of the walls there are nicely furnished fixtures with sliding doors of glass and suitable backgrounds for presenting the various lines, and these are attractively and appealingly displayed on the shelves ranging inside, the bottom to the top, each well filled with goods calculated to catch the eye of the visitor. Sliding ladders are placed on either side of the store along the front of the wall-fixtures with the shelves inside and these are an important factor in lessening the work as well as in aiding to quickness and ease in attending to the wants of a purchaser.

Colors Carefully Considered.

As regards the colors used, the woods are nicely stained, while the silverware in the more valuable grades presents an attractive spectacle, richly displayed beside the brownish hues of the wooded finishings, and to a certain extent mounted on a background of dark touching. In this way the firm displays its superior standards of silverware such as silver services, tea sets, butter coolers, sugar bowls, trays, and other articles of this nature, reserving for the purpose several of the many rows of distinct fixtures. This is on the left hand side on entering, while here are also to be seen the better lines of clocks nicely displayed and with care as regards the colorings used in featuring them. For instance a clock finished in dark colors is shown on a background of a much lighter hue so that the outline and shades are more striking apparent than would be the case, if a darker touch were used in the groundwork. Some other lines in the higher class goods are presented towards the rear in the fixtures referred to on this side of the store, a fine display of enamelled ware being noticed towards the back.

Stove Department Raised.

In the rear of the lower floor of the store the stove department is situated, and the floor space reserved for displaying and demonstrating these very necessary articles is elevated slightly from the main body of the premises, so that the stoves are seen immediately on entering the front of the store. While quite a number of stoves are shown in this department there are also a number on the second floor of the building, but it is on the main floor that the selling and demonstrating are chiefly conducted.

Arrangement of Tools.

On the right hand side of the store are fixtures quite similar to those in position on the opposite side and these are well stocked with sundry articles, ranging in variety from carpenters' and builders' tools, to locks and other wares, finally reaching the front part of the store where a particluarly striking display of sporting goods is shown. In the centre of the store are numerous silent salesmen, showcases, etc., in addition to other floor fixtures, many in bracket form, as well as a fairly liberal featuring of show cards scattered throughout.

A view of the interior of the store of Emerson & Fisher, St. John, N.B.—Efficiency in interior arrangement and fittings is presented here.

The stove department in the store of Emerson & Fisher, St. John. N.B.—It is at the rear of the store, and is elevated above the level of the front.

A Departmentized Store.

Because the firm of Emerson & Fisher are strong believers in the plan of departmentalizing a store many of the numerous lines carried in stock are grouped in charge of one of the clerks. For instance one of the staff has control of the silverware, cut glass, clocks, etc., or what are known as the finer lines, while another is placed over the sporting goods, another over the builders' materials, another in the paint and glass department, and another is given control of the stoves. In this way, the writer was told, better results are obtained, for the interest is much keener among the clerks, the responsibility is divided, and the sales are much steadier. The firm is well pleased with the results already not only in the increase in sales, but in the efficiency of the clerks as well.

Featuring Sporting Goods.

Of late years the house has been promoting sporting goods until they have developed their lines to quite an extent. Up-to-date ideas in sporting wares are kept in stock and special attention is paid to interest those actively engaged in sporting life. The returns from the sporting goods department last year were particularly inducive to developing this branch of the business in future.

A feature of the policy of creating sales with this firm is the frequent changing of window displays. Much care is exercised in attending to this matter. Special sales in many lines are conducted in slack seasons and when this is done the lines which are specialzed upon are shown to advantage in the large windows in Germain street, with the discount prices plainly exhibited. The space in the newspaper which is a medium of their advertising much used by the firm is devoted entirely to "boosting" the goods and the advantages of making a cheap and reliable purchase. During January and February, particularly, these special sales are conducted in lines in which an overstock is noted, and this serves to makes the returns much more than they would ordinarily be if extra inducements were not offered.

Price Tags Are Used.

On all the goods carried in stock price tags are attached, or in ninety-five per cent. at least. This is considered advantageous in many ways. When on one counter there are a number of the same kind of articles exhibited a show card is suspended above with a suggestive lettering and it is the instrument by which the price is given, that is the individual price tag is not used, the price being shown on the card.

Conferences Are Held.

Conferences are held quite often with the clerks and from these excellent results are obtained. An hour or so is occupied in this way, and one familiar with a certain line on which it is desired to particularize dwells at length upon its uses, the arguments for selling, its qualities, etc., so that the other clerks become more intimate with it than might otherwise be the case. For instance just a short time ago the firm became interested in "pushing" a kitchen cabinet upon the market and at a conference of the clerks, its uses were explained, and many points concerning it shown, while the same idea is adopted in connection with other lines, such as paints, roofing, etc.

Original Methods of Displaying Goods

Store Kinks Adopted by Ingenious Dealers—new Methods Found of Storing Certain Lines of Goods—How Defects in Store Arrangement Are done Away With.

EVERY hardware dealer has his own store kinks. There is an ever present necessity for some method to enable the dealer to store his goods in a way which will economize on space and yet show the article to the best advantage. Many ingenious devices are worked out from this cause, for truly "necessity is the mother of invention."

Talking about efficiency, brings to mind many novel ideas which hardware dealers have put into effect to improve the arrangement of their goods.

Convenient Arrangement of Tools.

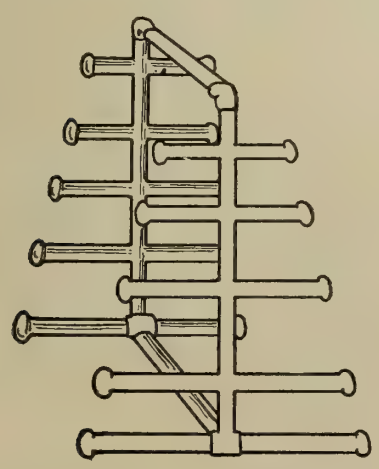
To get the best out of the tool trade, it is necessary to display all lines of tools prominently, and yet keep them free from dust and exposure.

There are many good ways of doing this, among others the method adopted by D. W. Douglas, of Campbellford. Mr. Douglas does not altogether believe in having his tool samples shown behind glass. He thinks it is better to have them in an open rack, from which a tool may readily be taken down and shown to an eager customer.

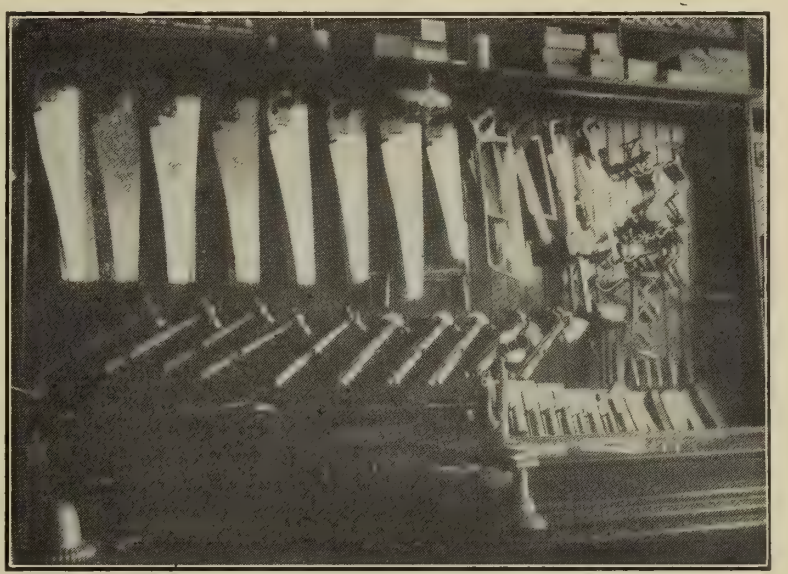
The case shown in the accompanying cut is set in the wall, and stands near the front of the store. The tools, apparently, are regularly kept in the orderly style shown, for the picture was taken by a Hardware and Metal representative who dropped in unexpectedly. The way in which the saws, hammers, bits and trowels are arranged is worth study. Planes, bits, and other lines, are shown in shelves below the hammers; but these do not stand out very well in this picture which was taken by a rather poor light, late in the evening.

Used Old Pipe.

An economical use for a number of odd lengths of lead pipe, which had accumulated around the premises, was found by P. H. Finkle, Queen street west, Toronto. By using them in the manner shown in the accompanying illustration, he constructed a rack for the storing of different sized rolls of poultry netting. Other racks were constructed on much the same plan with lead pipe, among others being a stand for axes.



Rack made by P. H. Finkle, Toronto, out of odd lengths of pipe.



An economical arrangement of tools in store of D. W. Douglas, Campbellford.

Display Prevents Unsightliness.

Many dealers there are who complain of their stores. They would like to arrange them well—to have good floor space and effective methods of display—but how, they ask, can this be done in the room they have at their disposal? Now Clarke & Lewis, of Smith Falls, while their store is large and up-to-date, yet have one difficulty to contend with. The way that they have faced this may give some of the dissatisfied retailers a valuable suggestion.

In the centre of this store is placed the hoist on which heavy goods are carried to and from the cellar, and to and from the floor above. This hoist might be somewhat unsightly, but to avoid this a careful arrangement of paint samples has been made. Shelves have been erected on three sides of the hoist. Upon these cans of lead, mixed paints, and varnish are arranged. This display immediately attracts the attention of customers entering the store. They never notice the hoist. They see only the paint department. They are attracted by it, and many sales are secured as a result.

The picture here reproduced gives some idea of the manner in which this hoist is hidden. It does not show, however, the open space left at the rear by which ready access may be had.

The picture also gives a hint of the back part of the store. The manner in which the spades and cross-cut saws are brought prominently forward, yet without taking up any space, is worthy of attention. But it is the paint department which offers the most hints to

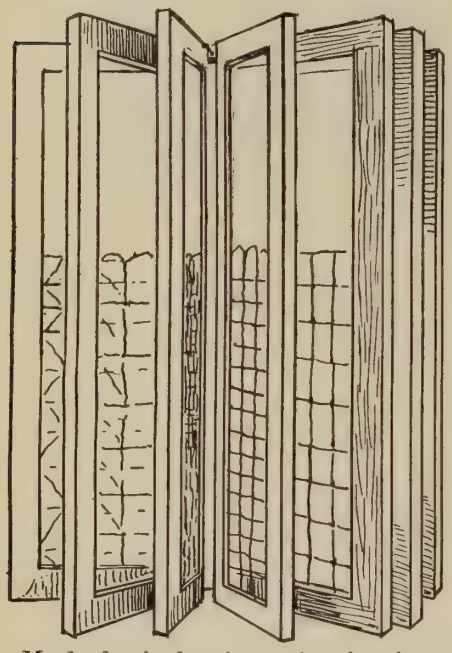
Paint department used to cover hoist, which otherwise might have a bad appearance in the centre of the store.

other retailers. Paint of course is a covering, but here it is used to cover in a different sense.

Showing Wire Fencing.

How can wire fencing be conveniently stored and how can it be displayed? Here is a method that serves very well.

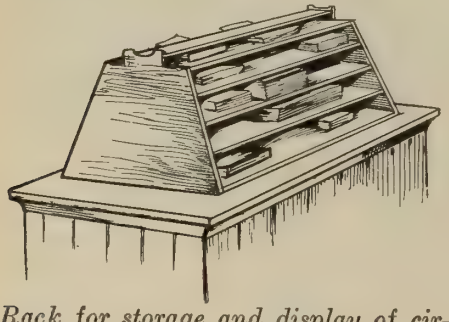
The accompanying illustration shows a method pursued by an American firm. This rack will accommodate every style of fence that may be carried in stock. It is constructed of wood 5 feet long, 2 feet wide and 6 feet high. It is possible to swing any number of doors on this frame, swinging them on hinges placed on each side, so that the doors open from the centre. Furthermore, this rack can be placed on casters, so that it can be moved from any part of the store to another.



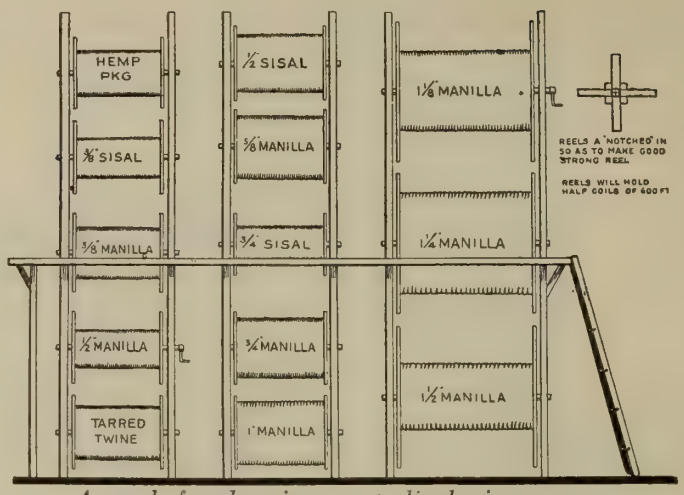
Method of showing wire fencing.

Storing Advertising Matter.

Here is a good idea. Most dealers believe in the efficacy of distributing advertising matter supplied by the manufacturers and of having supplies on hand, so that customers in the store can help themselves. Few have any definite way of effecting this, however. Here is one method.



Rack for storage and display of circulars and reading matter.



A rack for keeping and displaying rope.

The accompanying illustration shows a rack which could be used for the storage and display of advertising matter. It consists of a number of shelves built in pyramidical formation, which can be placed on any counter or in any position. A card could be placed above this rack, inviting customers to help themselves.

Farm Tool Racks.

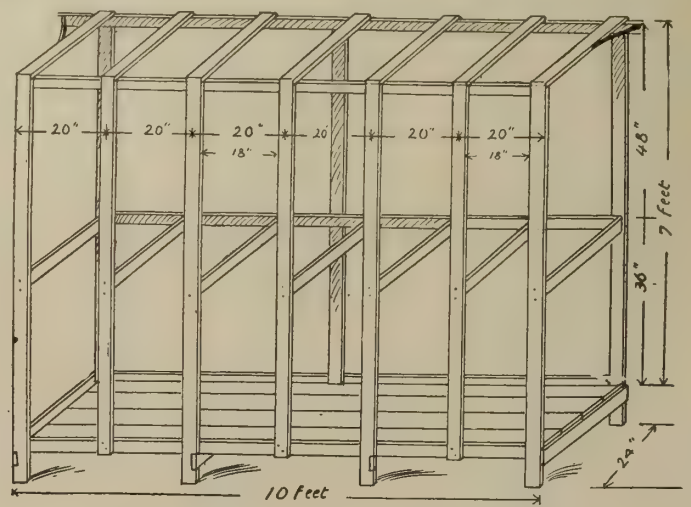
The Hardware Dealers' Magazine shows the following simple but useful device for showing farm tools: Rakes, hoes, pitchforks, brooms and long handle shovels, are hung upside down from the top, while scoops, D-handled shovels and spades stand on the floor of rack. There is a total capacity of several dozen each. The rack is 10 feet wide by 24 inches deep and 7 feet high. The net space between uprights is 18 inches. The rack can be placed against a wall or put most anywhere in the store, as conditions may warrant.

Rack for Storing Rope.

The same journal gives the following description of a method for getting over a very common difficulty:

"Without a rack or special arrangement, rope around the hardware store takes up a lot of room and is inconvenient to handle. Last year E. B. Roberts, with the Anniston Hardware Co., Anniston, Ala., got up the rope rack as shown in the accompanying illustration. The floor space occupied is 5x12 feet, somewhat less than it takes to carry rope in coils. It is in the rear of the store. The cost of material for the entire rack did not exceed $10, and the time occupied by Mr. Roberts and an assistant was but two days. He states that now the convenience of the rack is so evident they wonder how they got along with the former inconvenient and time-taking method of handling rope.

"Everyone knows that rope 'runs' when opened from the right end and someone throws the coil upside down before the entire coil is sold. By this method few remnants are left. The assortment of sizes vary with almost every store, but the popular sizes are placed near the floor, as the reels run from floor to ceiling, a distance of twelve feet. The lath yarn is carried on the lower reel as it is more convenient to cut. Along the floor or aisle there is



A rack to be used for farm tools.

laid out a measure so that any length of rope can be readily run off and cut. The capacity of the rack is thirteen reels; three reels, 12 pieces 2x4 inches, 36 inches; and 12 pieces, 2x2 inches, 40 inches. Ten reels, 40 pieces, 2x4 inches, 24 inches; 40 pieces, 2x2 inches, 22 inches. In the construction of the rack there are used six pieces, 2x6 inches, x 12 feet of dressed lumber. Twenty-six blocks, 2x4 inches, 8 feet, 26 floor flanges, 1¼ inches. One hundred and four carriage bolts, ¼x2½ inches. Fifty-two 1¼x4½-inch nipples. One crank made of one malleable ell, one nipple 1x7 inches, one malleable ell 1½ inch and one nipple ½x6 inches. At a point 5 feet 6 inches from the floor a platform is erected, made of 1x12-inch, 12-foot lumber. This platform should extend across entire front of rack so that the salesman can stand on same when winding reels. The platform is readily reached by the ladder shown at side. The make-up of such a rope rack can be readily varied to suit the individual requirements of a store."

Practical Way of Showing Garden Tools.

In the Kingan Hardware Company, Peterboro', the manager, W. O. Labelle, has introduced a splendid method of showing shovels, forks, and other garden tools and equipment needed on the farm. In the early spring these are in great demand, Mr. Labelle, therefore, does not feel that he can be content with a small display. Neither does he believe it advisable to give up too much space to this class of goods. How, then, to show a variety without too great use of floor space has been the problem.

In this store the answer has been found in two racks. These enable forks and spades of all the styles carried to be hung in such a way that they may readily be seen. The purchaser may look over the entire stock in a few moments. He will be hard to satisfy, indeed, if he does not find the exact implement which he wants.

Another good point about this rack arrangement is that only a few yards of floor space are required at any time, and the racks being movable are relegated to the background after the big trade in gardening and farm tools is over. When refrigerators, lawn mowers and similar lines are being pushed the way can easily be cleared for them.

Racks used in the Kingan Hardware Company's store in Peterboro, to bring garden tools prominently before purchasers.

Jail-like, Yet a Fine Store

Sanders, Soule & Castleman's large one-storey store. Managers claim this peculiar construction has many advantages.

The jail, they used to call the store of Sanders, Soule & Castleman when it was being built in Chesterville. And indeed, the appearance, before the large windows were put in, must have been jail-like—a resemblance which the bricked wall behind would not spoil. But jail-like or not, on the outside, this store leaves little to be desired within.

The fire which burned out a good part of Chesterville recently made rebuilding necessary. Then the question of the style of store which should be erected came up. There was some talk of a two or three-storey building; but the final decision was against this. It was held that there is nothing to be gained by shooting a building in the air where land is cheap. The upper storeys can only be used as store rooms or lodge rooms. As such, in a place of moderate size, they may hardly pay for the heating and lighting.

The lack of store rooms above, the managers of the various departments in this store claim to be a distinct advantage. Goods have not a chance to accumulate. When the end of a season approaches, a sale is started, and if cost is secured for the remnants, all are satisfied.

There are stores of many kinds in different places, but it seems that somewhat strange looking building is admirably suited for business in this district. It would appear, though, that a sign bearing the firm's name might well be shown on the building. Doubtless, the owners feel that they are so well known that this is unnecessary; yet, Shakespeare to the contrary, there is much in a name. The firm name should be kept to the front.

PAID $25,000 FOR TACKS.

A dispatch from Sharon, Pa., says that just because he was unable to purchase a certain kind of tacks, Claude Reznor has purchased the Bodamer hardware store, the biggest store of its kind in Sharon, and will operate it in connection with his other enterprises.

Mr. Reznor walked into the store and asked for the brand of tacks he needed.

"We do not keep them in stock," politely replied the proprietor. "Well, if I had a store of this kind I would keep them on hand," replied Mr. Reznor. "Why don't you buy the store and lay in a supply?" he was asked.

"Name your price and I'll take the store off your hands," he replied.

Twenty-five thousand dollars was the price agreed upon at once. The new proprietor has ordered a large supply of the tacks he couldn't get.—American Artisan.

EFFICIENCY
IN
RETAIL ADVERTISING

Planning a Spring Advertising Campaign

An Early Start is Very Essential—All Spring Sellers Should be Given Attention in the Advertising Columns — Draw up a Schedule in Advance—Talk Quality and Service.

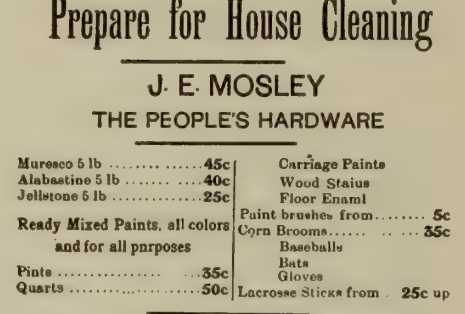
IN the hardware business the spring trade is of first importance. It is the big buying season of the year. Winter's fetters removed, industrial and agricultural activity is resumed. The mechanic needs tools, the contractor lays in supplies and the farmer has to stock up for his year's work.

It follows, then, that the hardwareman should make a special effort during the spring of the year; and, in addition to other special steps, conduct a live advertising campaign.

Spring advertising can be made unusually effective. There is a strong buying movement and advertising is not needed so much to create demand as to stimulate it. The demand is already there.

The publicity campaign should be started early. Many dealers wait until spring has actually arrived before they begin. Very frequently they are caught unprepared, for spring has an awkward habit of either arriving unexpectedly ahead of time or unduly postponing its arrival. It always indulges in a few false starts, however, and in that way inaugurates the buying movement. The hardwareman cannot do better than start to advertise his spring lines in March and keep it up right through. This will serve the valuable purpose of preparing people's minds and land their trade when the season becomes sufficiently advanced for the full tide of spring trade to set in.

The demand being of a widely diversified nature, advertising copy should be changed often. In this way only will it be possible to do justice to all the goods carried in stock. Consider for a moment all the goods which will require attention if the advertising propaganda is to



J. E. Mosly, Huntsville, is already advertising spring paints.

be complete. There are all variety and manner of farm tools and supplies, mechanics' tools, contractors' supplies, garden utensils, household goods, paint, housecleaning specialties, stoves, and so on almost without end. All are brisk selling spring lines, and all, therefore, demand attention at the hands of the man who prepares the advertising copy. It can safely be taken for granted that the advertising man is going to have his hands full. It is equally certain that daily changes of copy will be necessary during certain parts of the season at least.

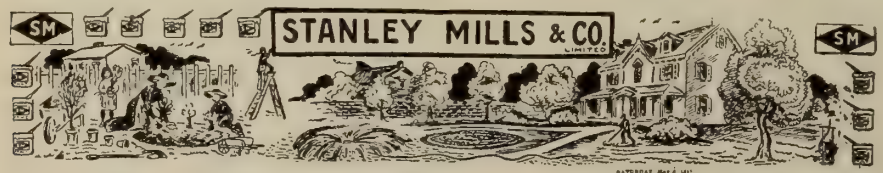
Draft up Schedule.

The writer is of the opinion that, to insure best results, it would be advisable to draft up a regular schedule of the dates when each article is to be used in the advertising space. For instance, arrange one week as follows; Monday, vacuum cleaners; Tuesday, mechanics' tools; Wednesday, paints; Thursday, housecleaning utensils, such as carpet beaters, etc.; Friday, farm tools, wire fencing and cordage; Saturday, roofing. The next week other articles could be brought in. The importance of dealing with a specific article or articles in each insertion is dealt with in another article. Suffice it to say, therefore, that the system outlined above would result in giving all lines the necessary publicity and would obviate the risk of neglecting any. The frequency with which the different lines were brought to the front would depend largely upon the class of trade done. In a country district, for instance, it would pay to dwell upon wire fencing, farm tools, implement repair tools, carriage and barn paint. In a city, household goods and factory supplies should bulk largely in the advertising.

Quality and Service.

Two points should be urged and emphasized in spring advertising matter—quality and service. As stated before, the demand is always in evidence. The farmer knows that he needs wire fencing, pitch forks and carriage paint and he intends to buy. What the advertiser must do, then, is to convince that farmer that a certain kind of wire fencing or a particular brand of carriage paint is just the thing that he needs. It is this kind of argument he is looking for and he is open to be convinced. It pays, therefore, to talk quality from first to last, filling the advertisements with the strong points of the goods carried in stock. With an article which will not be in general demand, it is necessary to direct arguments along the channel of creating the demand for an article of that nature. But with most spring lines, this would be quite superfluous.

Talk service. In many lines there is no distinct difference in the quality of various makes. A customer can get just as good an article from the opposition store as he can get from you; and he knows it. In such cases, it is service that counts — intelligent attention, prompt delivery and willingness to oblige. A store which builds up a reputation for good service has a priceless asset. Talk service in your advertising, therefore. It will bring customers to your store. And if you have made your store methods in keeping with the claims you have advanced, the customers will stay with you.



For the Men and Women Who Delight in Lovely Lawns and Gardens

And Who Want to Enjoy All Home Comforts This Summer: Your Requirements Are Here in Abundant Varieties, and Monday Will Be the Best Day to Buy

A clever and attractive heading for spring hardware advertising.

Hardware Store Publicity

Chapter 5--Seasonable and Specific Advertising.

TO be thoroughly effective, an advertisement must be both specific and seasonable. It must deal with some article or series of articles and must also be specific in the matter of price. It is equally important that the advertisement deal with goods which are most likely to interest at that season of the year.

How futile is the stereotyped advertisement so frequently seen which states the bald fact that "Smith & Brown sell shelf hardware, tools, stoves, paint, etc." If it is merely intended to insert a business card, that sort of thing is alright, but how often is it found that merchants will use large space to merely state that they carry "everything in hardware!" People reading an advertisement of this general nature are not reminded of any need, they are not impressed with the desirability of any article or convinced of the fact that Smith & Brown are the people to deal with. They are informed instead of the fact which they already knew; viz., that Smith & Brown handle hardware. To cull a phrase from the sporting pages, this kind of advertising "lacks the punch."

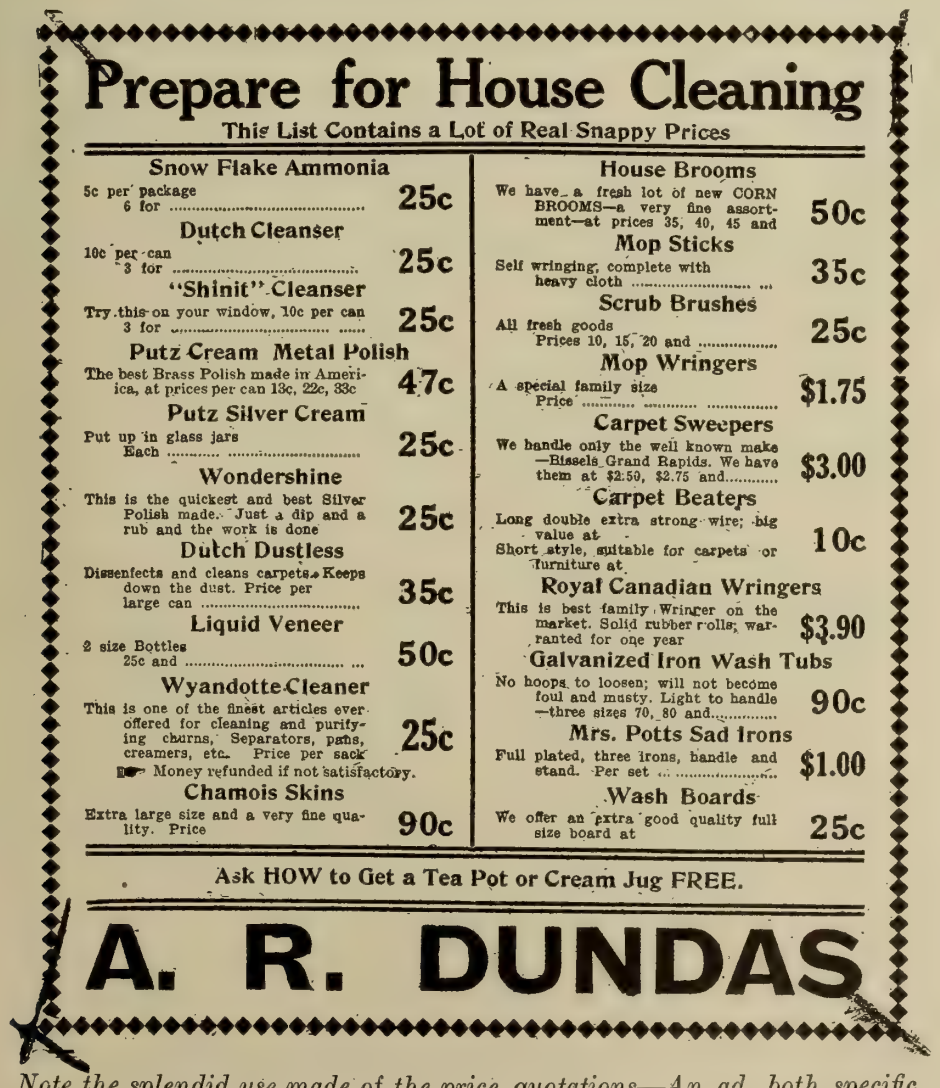
If a hunter desires to bring down the game, he does not blaze away at random. He trains his gun on one particular spot. The advertiser must do the same. He must select the vulnerable spot and direct the battery of his arguments in that direction. Around Christmas time, for instance, he aims to land the trade in cutlery, silverware, brass goods, skates and similar goods. In the spring he turns his attention to spades, rakes, fencing and the many other lines sold at that season. Another point arises here. In the spring there are so many goods which are seasonable that, in order to keep his advertising specific, the hardwareman must pick out certain lines for each insertion and specialize on them. One day, for instance, he devotes his attention to wire fencing, the second day to paints, the third day to lawn mowers and garden utensils. By following this method, it is possible to concentrate on the lines selected and to drive the arguments home. When the advertiser endeavors to run the whole gamut of his stock-in-trade in one advertisement, he cannot give enough space to any one article.

An advertisement which deals specifically with certain articles.

The accompanying illustration shows the better method of the two. Recognizing the fact that spring is near at hand, the Frazer Hardware Co., of Vancouver, have devoted their space to lawn mowers and garden supplies. People interested in goods of this description—and every householder is at this season—would be attracted at once by this "specialized" appeal.

The Procrastinator.

The procrastinator is a common type among advertisers. Dealers neglect to look after their copy, with the result that they let the old ads run until the type becomes worn and the matter sadly out of date. The writer has before him a number of ads. clipped from Canadian newspapers. One was used December 16, and was devoted to the interesting but scarcely seasonable topic of



Note the splendid use made of the price quotations—An ad. both specific and seasonable.

hammocks. Another is dated Jan. 16, and deals with Christmas goods, urging early buying! These are but two samples of a curious collection of somewhat similar mistakes in advertising which have been gathered up. An advertisement which lacks seasonability becomes a joke with all who see it.

Carter Bros. of Picton, are firm believers in seasonable advertising. The writer has before him a collection of advertisements used by this firm dating over a period of two months. The goods featured in each ad. reflect the change in the season with an accuracy which speaks for the close attention that Carter Bros. pay to this phase of their business.

The Value of Quoting Price.

Be specific. An advertisement which tells its story and tells the price is going to count. The most successful of all advertisers, the departmental stores, give prices for everything. They find it the most potent argument they have. People desire to know all there is to know about the article they contemplate buying, and they want to know what it costs more than all. The enclosed advertisement of A. R. Dundas, of Cobourg, is a splendid sample of specific advertising; and of seasonable advertising also for that matter. The prices stand out and the descriptions are brief and pointed. The housewife has the information required for her housecleaning purchases here in a nutshell.

Writing Readable Advertising Copy

A Plain, Businesslike Style is Always Most Effective—Avoid Exaggeration and Forced Humor—The Value of Good Illustrations.

The Way the Midale Farmers will Come to Town after the Bumper Crops

A good illustration catches the eye.

AN efficient ad.-writer is one who turns out readable copy. An advertisement is of no value unless it is read; and it will not be read unless it is worth reading.

What makes an advertisement readable? There are many things which go to make up this much-desired quality. An attractive lay-out will frequently do it. An offer of special price inducements is generally effective. A joke will sometimes serve the purpose, or an allusion to a current event of more than passing interest. But a dealer who presents his arguments to the same public day in and day out must depend upon something deeper and more permanent than any of these to capture and hold steady readers.

The fundamental secret of writing readable copy can be divided into two heads: First, have a proposition to present; second, present it in plain, businesslike terms.

It is highly necessary, of course, to have a proposition of some kind to present in the first place. People read advertisements in search of information which they can turn to their own account.

The more direct the proposition is broached the more effective it will be. Businesslike terms cannot be improved upon for presenting a matter of business. The advertiser who indulges in windy persiflage or who crowds his space with an exaggerated lingo punctuated with superlative adjectives, may carry readers to his last sentence, but he will fail to arouse their business interest. They may admire his aptness with words, but they may at the same time suspect the sincerity of the proposition he has clothed in such ornate manner. And the object of an advertisement, do not forget, is not to win encomiums on the literary style of the writer. An advertiser is a man with something to sell, not a short story writer.

There is the facetious ad.-writer who believes the sure way to win trade from a customer is to win a smile first. He may be right as a matter of abstract principle, but his mode of execution is usually so pitifully weak. Listen to this:

"Our old hardware joint is here unchanged, still with the same old mugs to throw you guff."

This was copied from the advertisement of a Canadian hardware dealer. Such jargon produces exactly the opposite effect to that intended. Most people resent this sort of "jollying." Those who may smile do so in a tolerant way.

THIS?

"The Government has changed, the weather has also taken a flop, but our old hardware joint is here unchanged, still with the same old mugs to throw you guff.

"In addition, we have imported direct from the factory a carload of stoves and ranges, the largest shipment of the kind ever dumped here. These we are offering at rock bottom prices for cash (don't forget, cash) no butter, eggs or cow skins taken in trade."

OR THIS?

"We give you good value, good price and good service. . . . A new carload of stoves and ranges has been received, the largest shipment of the kind ever made here. As we do business on a strictly cash basis, we can offer these to you at lower prices than can be obtained elsewhere."

But the jokesmith is harmless compared to the exaggeration fiend who looks upon the average person as credulous in the last degree and plays upon that imagined credulity with the most daring of assertions. Some advertisements are masterpieces of bombastic exaggeration. They claim a pre-eminence in stock and price inducements which exists only in a fertile imagination. There is something colossal about such barefaced statements as, "These values cannot possibly be secured elsewhere," "These goods are absolutely beyond compare," "You can buy here twenty per cent. cheaper than anywhere else." And such assertions are quite common.

Exaggeration does not make readable reading matter.

A plain statement of fact, written forcefully, directly and simply, is the most readable kind of advertising matter. A writer of copy should strive to tell his proposition in as few words as possible, introducing no extraneous matter and striking right to the point.

The Value of Illustrations.

An advertisement can be rendered doubly attractive by the use of illustrations—good illustrations. A picture catches the eye. A store with a neat front has an advantage over the shabbier establishments surrounding it. An advertisement with an attractive cut stands out from the pictureless ads. in the same section of the paper.

Good illustrations are effective always, but weak art attempts are a drawback. Battered and antiquated wood cuts do not add strength to copy. Rather they bespeak antiquated methods on the part of the dealer using them. A chain is no stronger than its weakest link and a business man is judged no better than any weak feature of his campaign for trade.

It should be borne in mind also that the cut used should have some bearing on the reading matter. An illustration without sufficient bearing or point to justify its use has no practical value.

Advertising in Hebrew for Jewish Custom

This Plan Adopted by L. J. A. Surveyor of Montreal, Brought Gratifying Results—It was not so Much that the Jews Could Not Read the Store's Advertisements Printed in the English and French Dailies, But They Felt it a Courtesy to Have Their Needs Brought Home in Their Own Mother Tongue—Special Appeals of this kind are of Great Value—They Establish That Feeling of Proprietorship in a Store Which is a Great Asset to a Dealer.

To reach the people. To tell them about something for which they have a need. To show them where they can get this. Such is the aim of retail store advertising.

It sounds simple, the above, doesn't it? Yet in cities of to-day it is not an exceedingly simple matter to reach the people, for there are so many different kinds of people. Some have a need for one thing, and some for another, while those whose needs are similar need to have these brought home to them in a different way. It is a recognition of this fact which has led L. J. A. Surveyor of Montreal to advertise in Yiddish. Yes that is what the advertisements represented below are. Scholars call it Hebrew, but the men who do the printing say it is Yiddish and surely the men who do the printing ought to know.

In Montreal, it must be understood, there are upwards of 40,000 Jews. Ten years ago there was but a small percentage of that number. But these people have grown rapidly, and indications are that their numbers will swell still more in the coming years. Some of these Jews live in the outskirts of the city—in the suburbs and in the fine residential sections. But the great majority have their places of habitation right down town, within a stone's throw of Mr. Surveyor's store on St. Lawrence Boulivard.

Jews are Good Buyers.

Now the Jews, as every one knows who has dealt with them, are good buyers. They buy largely of hardware as of other things, and so Mr. Surveyor determined that it would be wise to make a determined bid for their business.

"You see," remarked Hector A. Bernier, Mr. Surveyor's manager, "We advertise in English to show the English speaking people what we are selling. We advertise in the French papers for the information of the French speaking. So it occurred to us that it would be good policy to advertise in the Hebrew paper to tell the Jews about our goods. On several occasions we have done this, and the result has been good."

Advertisement used to secure the trade of Montreal's Jewish population, which now is considerably in excess of 40,000 *people.*

Looking at the advertisements reproduced here—advertisements which are among those which have been used from time to time—it is not hard to see how they brought trade. To the reader of this article they will not be very enlightening. He will only understand the pictures, and, yes, the name at the bottom of the ad. But if he thinks, he will also understand that a Jew—one whose native tongue is Hebrew—will feel it in the nature of a compliment to read an advertisement in the familiar language. Many of the Montreal Jews read French. Many more read English. They take French and English papers. Perhaps they read the advertisements in these. Undoubtedly they do. It may be, indeed that they have read Mr. Surveyor's ads. in these English and French papers, yet that reading will not have the effect upon them that will a glimpse at the ad in Yiddish. The very fact that it is printed in Yiddish is a graceful compliment. It shows the advertiser to be in sympathy with the Jews. He may differ with them on points of religion, but he likes him as a citizen and he is anxious to have dealings with him.

The Psychological Effect.

These things must appeal to the Jew reading the ad. of the French-Canadian hardwareman in the Hebrew language. They not only have it brought to their attention that this man carries certain classes of goods which they will want. But they also see that he wants their trade. He has come to them in their language, and they are led to go to him with their money. It is human nature all through. People like to think that they are receiving special consideration.

There are only a few cities and towns in Canada where the population is so mixed that it is necessary to employ more than one language in the pursuit of trade. But in every city and town the principle that lies behind these Hebrew advertisements applies. In every city there are people who like individual attention. That is what makes special sales so attractive. They appeal to special classes. A sale of brooms, carpet beaters, curtain stretchers—appeals to the women contemplating housecleaning. Sales of fishing tackle, of garden hose and garden tools appeal to the boys and to the men whose interest centres in their homes. An advertisement of automobiles accessories, or an announcement that gasoline is carried for the convenience of automobilists, attracts the interest of the class who own motors. It gives them a feeling that the store is their store. It is that kind of feeling which brings business. Not only do the sales of the particular lines pay, but they mean the securing of other lines.

There can be no doubt a special appeal can be made in many ways. It need not be through the use of an unaccustomed language. It must just be some step which shows a certain class that the store owner has them in mind—that he is planning to supply their need. This is what creates the sense of proprietorship in a store, and that sense of proprietorship is the thing perhaps most of all worth cultivating.

Special Advertising Prevents Dull Season

Bringing One Line at a Time Prominently Forward Meant a Good Winter's Business for the Hardware Department of a Montreal Department Store—Immediate Results Seen—Manager Emphasizes the Necessity of Planning Ahead.

Many dealers declare that advertising is a good thing, but lament that they cannot tell exactly how good, owing to the difficulty of determining whether it was the ad. or some other thing which brought people to the store. Here is the story of a hardware department in which the direct results of advertising did appear:

J. A. Jackson, who is in charge of the hardware department of Goodwin's store, Montreal, is a believer in advertising. "Oh, he might well be," some will say, "since he does not have to pay for the space used." Softly, softly, Mr. Critic. Mr. Jackson does not have to pay hard cash for the space he uses, but this is charged against his department. It is deducted from the earnings. It is a liability against which the manager must show more than corresponding assets. So Mr. Jackson does not go in for advertising recklessly, as one who does not have to pay; but thoughtfully, as one who is willing to make an outlay to gain a more than proportional profit.

One Ad., One Subject.

Perhaps the reason Mr. Jackson is able to tell the ads. from which he secured the results, is because he does not say a little about one line and a little about another on the same day. He hammers on one thing. A business letter, it has been said, should treat of but one subject. This rule, Mr. Jackson believes, applies equally to advertising.

The same opinion, it might be men tioned, is shared by others who have made advertising a specialty. W. J. Carter, of Picton, a man who has proved the results of newspaper advertising in a small place, declares that he always features one class of goods. He sometimes mentions others in a line at the bottom of the space used, but never more than that.

Lays Plans Ahead of Time.

January, all dealers will admit, is often a slow month. Mr. Jackson feared that it might be so with him, so to guard against this he laid his plans away back in October. New Year's came around and the quiet days seemed imminent; but then Mr. Jackson brought into effect some of the schemes he had laid weeks before. He advertised a special sale of graniteware, putting on his tables lines bought at an exceedingly advantageous market. As a result of that ad., over 2,000 pieces of this ware were sold.

Then Mr. Jackson advertised brass goods, displaying them prominently as he had the graniteware. The ad. appeared in the evening, and the first hour the next morning 300 pieces of brass goods

—Basement.

An advertisement which brought 300 *sales in one morning.*

were sold. There does not seem any reasonable reason to doubt that it was the advertisement which drew that trade. Moreover, the remarks of many purchasers proved this beyond all possibility of disbelief.

Not a Dull Month.

Sales like these were continued in this store all through January, the newspaper advertising regularly emphasizing one line and one line only. The result was that January was saved from being a dull month. The business done, indeed, while not nearly as good as December, was yet somewhat better than that of November—and November is not regarded as a particularly slow month.

Later in the season Mr. Jackson determined to hold a sale of stoves. He advertised this, telling something of the stove to be disposed of and something of the price at which the models would go. The result was a little surprising. The very morning that the advertisement appeared, ten stoves were sold. Not one had been purchased the day before. It was not a heavy stove buying time, but the ad. had attracted the attention of those who felt the need of a range.

Bathroom Accessories Move.

Bathroom accessories was another line which proved a business-getter in the dull season. Several days a sale in these was advertised. The prices were attractive. The goods, illustrations of which were given, seemed first-class. The people were made to feel the need of these, and they visited that hardware department in large numbers. One day 300 accessories were sold, but this does not be gin to illustrate the results that particular advertisement, and others like it, brought.

Mr. Jackson declares that one great thing in advertising is to plan ahead. A man cannot, he says, sit down and in an hour map out a week's procedure which will be the means of bringing the best possible results. It is well to consider weeks in advance what people will be needing at a certain season, then to plan to bring that class of goods prominently forward. There seems much wisdom in this course.

MARK SELLING PRICE.

Mark the selling price on all your goods. To err is human—proprietors may err, clerks may err.

If the custom of marking goods is once established it will be little trouble; in the largest stores there is not one article which is not priced before going on the counter or on the shelf.

It takes time to do this, to be sure, but it takes more time to look up a price, while a customer is waiting, or the clerk must ask the proprietor, "How do you sell this article?"

It may occur that you are not in when some one comes to purchase, and your clerk may sell something too cheap.—St. Louis R.D.A. Monthly Bulletin.

PAINT FROM SMOKE!

The arrest has taken place of the promoter of an American concern known as the Universal Paint Co. The company was incorporated for the object of separating a material from coal smoke that would take the place of paint. Hundreds of investors in the eastern part of Pennsylvania bought stock from this promoter on the handsome prospects he prom. A prospectus issued recently states that "a conservative estimate of the profits from July 1, 1911, to July 1, 1912, on a basis of only one hundred plants in the entire United States on which our device has been placed is $900,000." He evidently had intentions of revolutionizing the paint industry, but complaints from the stockholders in his company caused his arrest.

EFFICIENCY
IN
WINDOW DRESSING

Two Essentials of Successful Display

System and Attention to Detail Are Necessary in Trimming Windows—Draw Plan of Windows First—How One Hardwareman Systemizes Results—Success Attained by Thoroughness in Detail.

SYSTEM and attention to detail are the rules laid down by a well-known window dresser for those who desire to achieve success in this work. It is quite true that artistic perception and originality of conception figure largely in the making of good displays, but behind that again is the great necessity of systematic work. A man may have an abundance of bright and original ideas and yet prove only a mediocre window dresser because he lacks the thoroughness required to carry the ideas out. The writer has seen many displays embodying unique ideas which have been flat failures nevertheless, because the necessary time and care had not been taken to work out the details and perfect the background. They were incomplete. On the other hand, we see every day window displays founded on hackeneyed and commonplace ideas which are eminently successful because they are made complete in every detail.

The window dresser should first plan out the general idea of his display. He should then get pencil and paper and work it out. The preparation of a plan enables him to decide matters of detail and precludes the possibility of carelessness later. Further than that, it enables the dresser to evolve more elaborate plans. Suppose that he is arranging a display of tools. He gets the general idea in his mind but if he gets out pencil and paper, a dozen new ideas for arranging the goods will suggest themselves as he works. He knows the dimensions of his window space and can figure out accurately what can be done. Having his ideas before him on paper gives him a clearer picture than he can possibly carry in his mind.

The accompanying plan was drawn by A. T. Black of the Bond Hardware Co., Guelph, in preparing the extremely handsome display which won a prize in Hardware and Metal's Christmas window. The display entered in the contest was in the left window. In the right, was shown a mammoth display of wagons, sleighs, skates, toboggans and similar lines. By following this careful method of preparation, Mr. Black was able to make his two displays absolutely complete. There was "a place for everything and everything in its place."

Keeps Book Records.

System in window dressing can be carried still further. The object of displays is, of course, to make sales. How then can the store windows be used to bring the most business at all times of the year?

The manager of a Western Ontario store has solved this problem. He compiles records of all window displays. A book is kept for this purpose and full details of each window are entered— all goods shown, the nature of the arrangement, the length of time that it was left in the window, the state of the weather during that period and the actual sales made on those articles during the time and for a week after. It means plenty of work but look at the possibilities of the idea. The actual worth of that window can be judged almost to a twenty-five cent piece. It is shown to what extent the display stimulated business. The relative value of different forms of display can be arrived at. By looking over his records, this energetic hardwareman can tell what goods are best to feature at certain times of year. He has, in fact, information at his disposal which enables him to plan his window campaign with a degree of certainty and exactitude not possible without such information.

Why not try this system?

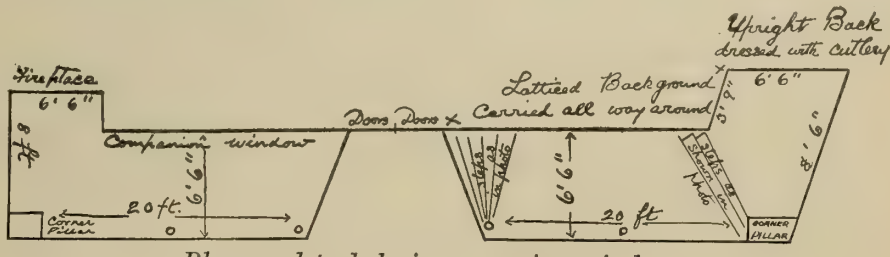
The Value of Thoroughness.

With regard to that other highly essential quality in window dressing, thoroughness, too much cannot be said. As stated before, an elaborate central setting loses at least 50 per cent. of its effectiveness if the minor details are neglected or carried out hastily. Some men use up all their energy and patience in devising a part of their display, and then finish the job off carelessly. In the opinion of the writer, a few square inches of rough board showing in the sides, rear decorations carelessly hung or price cards of doubtful neatness, detract most considerably from the value of a window.

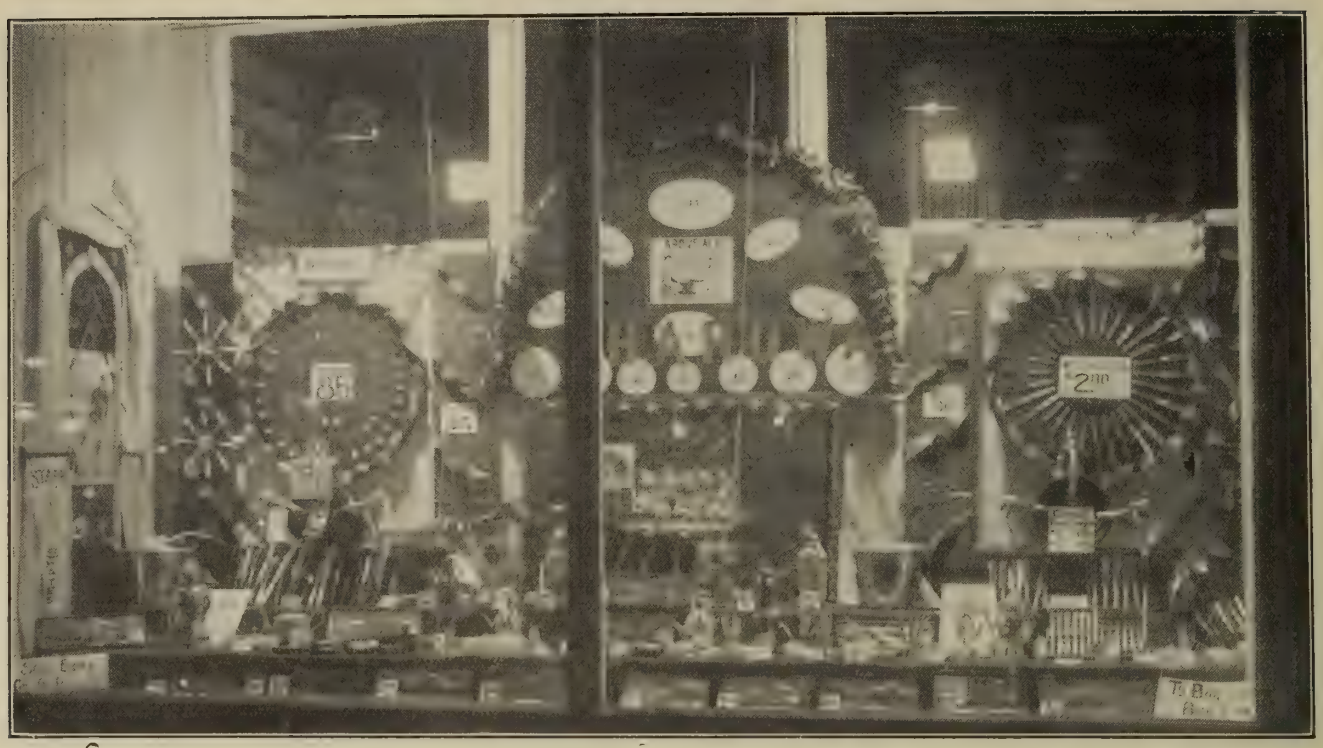
Detail of a Clever Display.

The accompanying illustration is of a display in the store of the Kingan Hardware Co., Peterboro. Its merit will be conceded by all. It will be interesting to follow the detailed system by which H. J. Hammell "built up" this window.

First as to the background. It was made of four one-inch boards (10 feet by 10 inches), and covered amply with crepe paper. A piece of white moulding was tacked at the top of each and green paper was twisted laterally across, thus representing four pillars from the front. The two end pillars each supported a circle 36 inches in diameter and covered with red crepe paper. Knives were arranged on one end circle and spoons on the other. In the centre a half circle, five feet across, was placed. It showed asbestos table mats with a card in the centre to remind the housewife to "above all protect your table." Below this again was a large plate made



Plan used to help in arranging window.



Careful attention to detail was show n in the arrangement of this splendid display.

by fastened together four one-inch boards, 4 feet by 10 inches, and covered with crepe paper with a green border. The centre was removed, leaving a space 12 inches by 16 inches which was filled in with white writing paper. Behind the paper an electric globe was placed. This was lighted at night and thus made an illuminated sign, throwing out the words "The Season's Greetings to all." Around this sign scissors and shears were arranged.

Building Up Window.

The window was 21 feet wide, 4½ feet deep and 12 feet high. It was built up with two rises, both 8 by 16 inches. On the base or floor of the window carving sets were placed to the left and fish sets to the right of the central pillar. Cards were placed in each corner. On the first rise were placed carving sets, percolators, tea pots, knives and forks, spoons, razors and safety razors. The second rise was used for the display of asbestos irons, sad iron sets, bread mixers, cake mixers, carving knives and forks. On the two ends were placed empty cartridge boxes and a peck measure in the centre, all three being carefully covered and used for the display of food choppers. It proved a splendid method, by the way, for the handles were so placed that they prevented rolling.

In the centre of the window was a hanging glass shelf with scissors, razors and shaving materials displayed thereon.

The inside wall was draped and skates and hockey sticks were arranged as shown in the photo. The color scheme of the window was red and green. Red crepe paper and green edgings were used.

It is by following out every detail in this way that the very best results are obtained.

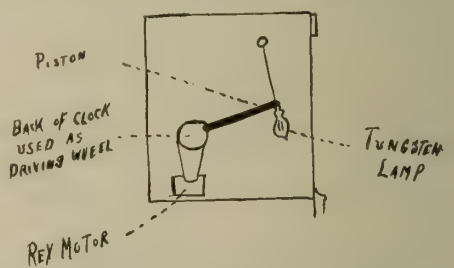
Put Proof in His Store Window

Device Was Used to Convince Public That Certain Style of Lamp is Not Readily Breakable—An Ingenious Idea Carried Out.

Much has been said about the saving in electrical current which can be effected by the use of the Tungsten lamp. Much has also been said about the fragile nature of these lamps. Some people seem to have the idea that they will break if they are given the least touch. This idea has had some result on the sales, and to show that breakages are not as common as some have supposed. C. F. Ready recently arranged a display in the window of R. Hawkins' Smith's Falls store. Mr. Hawkins handles these Tungsten lamps largely. Mr. Ready has been selling them, and so often hearing of their fragile nature, he determined to arrange a display which would make all the people of Smith's Falls see this light as it really is.

He put a two-watt lamp in the window, and using an old Clauss scissor hanger as a frame, attached to this the back of a clock, which was made to serve as a driving wheel. To the top of the Tungsten lamp, and to one edge of the improvised driving wheel, a piston rod was attached. Thus, when the back of that old clock revolved, the piston worked back and forth, shaking quite violently the Tungsten lamp in the window.

The next thing was to get power to move the driving wheel. Mr. Ready remembered that Mr. Hawkins had given his little boy a small Rex motor for Christmas. Wonderful to relate, nothing had happened to the toy motor. It was borrowed for the time being; and a string belt, attached to this and running around the grooved driving wheel,



Device used to demonstrate durability of lamp.

gave the necessary motion. All, therefore, that was necessary was to turn a switch and the back of the clock revolved, moving the piston rod and shaking the Tungsten lamp.

All evening, for several nights, this ingenious device was allowed to run. The Tungsten lamp, shaking every minute, stood the strain. All evening it gave off its clear, bright light.

Prize Winners in Christmas Contest

Window Displays Which Were Judged to Have Superior Merit — Descriptions Supplied by the Dressers—Price Cards Were Used in all Displays — An Extremely High Standard Set.

THE window displays which were judged to be of first merit in Hardware and Metal's Christmas window contest are herewith reproduced. The general excellence of the displays has been commented on in previous issues. After seeing the windows all will agree with what has been said, viz.: that hardware window dressing has of late years been set on a new and distinctly higher plane. It should be borne in mind that there were fully a score of other window displays entered which had almost as much merit as the prize winners, the margin being in many cases very close indeed.

Descriptions of the six winning displays, supplied in accordance with the terms of the contest, are appended.

P. Hymmen & Co.

First prize for places over 5,000 went to R. H. Thornhill, with the P. Hymmen Co., Berlin. It is described as follows:

"Window is 12 feet wide and 7 feet deep. The ceiling is covered with white pleated cheese cloth and sprays of holly are attached to it. The background is pleated green cheese cloth, and on this shears are arranged in circles with tinsel edge. Large pillars are at the back, to which shelves are attached, and on these shelves nickel and brassware is displayed. Above the background, below the ceiling is a trestle painted white, on which holly and tinsel are entwined. At each end of the trestle are two large covered rings, to which are fastened forks and holly sprays. In the centre of these rings is an electric light enclosed in a fancy shade.

"From the ceiling are suspended large covered rings, to which are fastened different priced pocket knives. From about the centre of the bottom of the window towards the back, steps are built. These steps, as well as the bottom of the window are covered with red cheese cloth. On the steps are displayed carvers in cases, brassware, nickel plated ware, etc. On the foreground silverware, sewing sets, manicure sets, safety razors, etc., are shown. Eight small pedestals were used to good advantage for display as also was one large one in the centre of window. Each article in the window had a neat price ticket attached to it."

USE OF PRICE CARDS.

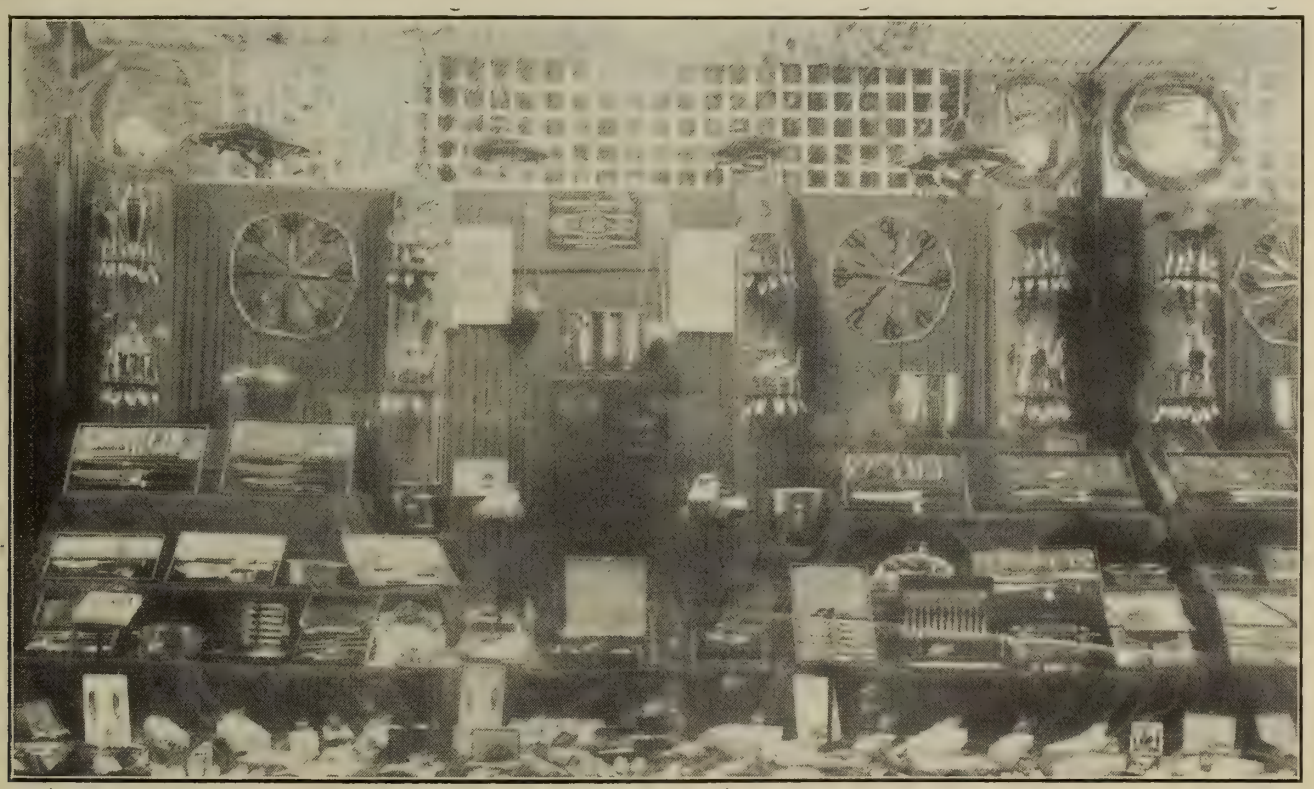
One of the outstanding features of the contest was the fact that the windows entered, almost without exception, contained plainly marked price cards. The window dressers paid strong tribute to the results obtained by this means. It seems to be now pretty generally accepted that the value of a display is brightened by the use of price cards.

Bond Hardware Co.

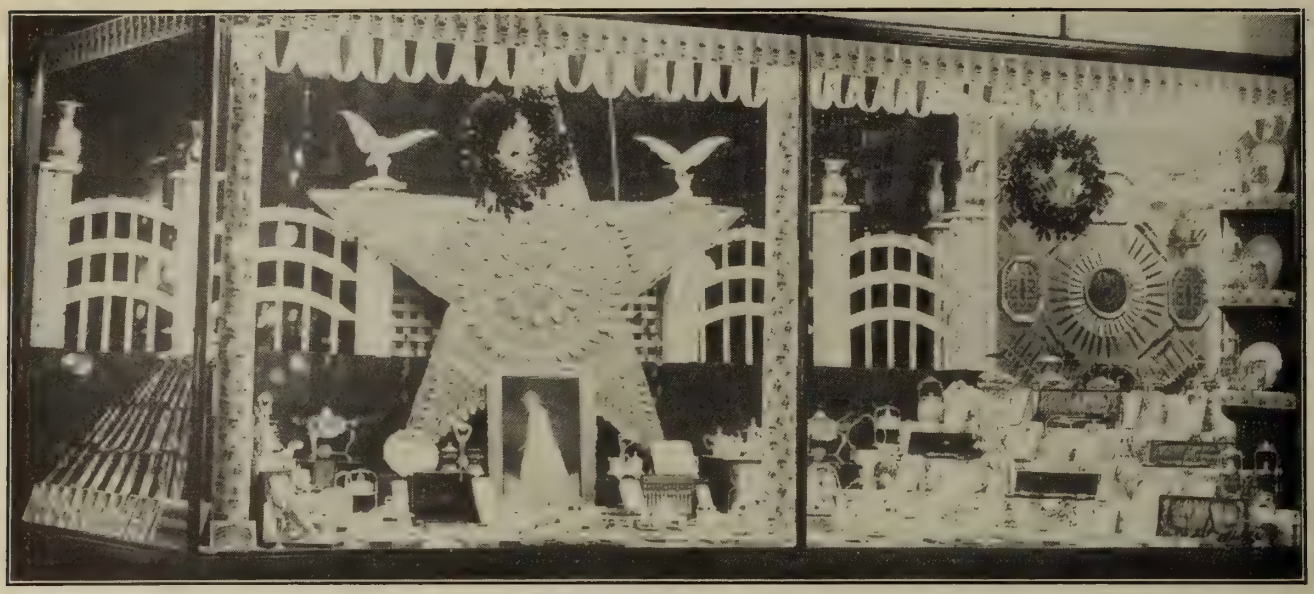
Second prize in this contest went to A. T. Black, with the Bond Hardware Co., Guelph. Mr. Black's description reads as follows:

"As will be noted, the window dresser was confronted with the obstacle which is the stumbling block in a good many windows, the matter of background, as our windows have only a low railing about 30 in. in height.

"Around this was constructed an arched fence and lattice work, the pillars, arches and uprights all being wound with crepe holley paper streamers, which material was also used in wind-



Window dressed by R. H. Thornhill, with the P. Hymmen Co., Berlin—Awarded first prize for places over 5,000.



Display arranged by A. T. Black, with the Bond Hardware Co., Guelph—Awarded second prize for places over 5,000.

ing around the iron pillars in the window front and draping from the ceiling.

"The lattice work, of which very little shows from behind the large star, is finished in gold bronze; the large star, measuring eight feet from tip to tip, is covered with green crepe paper, and outer edge is wound with silver tinsel garland. The end of the window, 6 ft. 6 in. width by 8 ft. in height, is covered with the same material with an edge of holly paper. Across the top of this end is worked in silver tinsel "Christmas greetings," the cutlery on this star and background show to the best advantage on this color. Electric bulbs in the centre of same add great brilliancy to these displays. The lower part of the

Window dressed by Harold Cook, with the Northern Hardware Co., Edmonton — Awarded third prize for places over 5,000.

Window dressed by Peter McNaughton, with Geo. W. Ecclestone, Bracebridge—Awarded first prize for places under 5,000.

Window dressed by Blake Phillips, for Sutherland & Stelck—Awarded second prize for places under 5,000.

background is covered with rich crimson crepe paper and the floor and end steps are covered with holly paper (red and green on white ground).

"As the base of the window is only about 15 in. above the sidewalk level the goods are all quite discernible.

"Two photos would really be necessary to show this window to the best advantage, as the window really faces two streets, and the goods in the base and on the shelves in the end section do not show at all in this photo, which was taken from the front.

"The front of the window was entirely devoted to the display of silverware, both hollow and flat, fine cutlery and cut glass in a well assorted and discriminately arranged manner. The end part of the window somewhat separated from the front by a diagonal stand running across the corner with steps down either side, was devoted to lamps, nickel ware. brass goods, bread boards, asbestos table mats, carpet sweepers and the more ordinary lines of cutlery.

"A row of miniature Santa Claus lithos extend around the entire upper part of the window glasses. The two central pillars in the background are surmounted by two white doves, the emblems of peace, and the great Christmas message extends between the two 'On Earth Peace, Good Will Toward Men.'

"Large holly wreaths are suspended and show in the centre of each window plate.

"At time of the photo being taken the Christmas motto and also the conspicuous price cards, which were later used to good effect, do not appear."

Northern Hardware Co.

Third prize was awarded to Harold Cook, with the Northern Hardware Co., Edmonton, Alta. The description is as follows:

"The base of the window is covered with cotton batting, sprinkled with silver flitter. Cotton batting was also used to cover the pedestals, which were made with three decks in the shape of a cross.

"From the top a number of articles were suspended, including the sign with 'Christmas Gifts' printed on it. An attractive effect was secured by hanging the tea pots in the centre of floral wreaths.

"The goods shown included all varieties of cutlery, silver and nickel ware and brass goods. Everything was priced on cards, bearing pictures of holly and Yuletide wreaths."

Geo. Ecclestone.

First prize in the contest for places under 5,000 went to Peter McNaughton, with Geo. W. Ecclestone, Bracebridge.

"The top is made up of white and green tissue paper twisted. The side is covered with plate mirrors, which added greatly to the lighting of the window. The background is three arches made of strips with nail keg hoops cut in two and covered with white paper. As seen, the arches are covered with holly. In the centre arch is a shape made of roofing covered with cloth, on which is wired tea, dessert and tablespoons, knives and forks. On either side in the two arches is displayed carving sets in wire holders made by myself.

"The front part of the window on the bottom is on a slope back about 28 in. with a raise of 6 in. Back of this I used glass and other packing boxes. Packing box boards were used in the construction of the window throughout.

"In the front is displayed flatware such as coffee, orange, sugar, berry and baby spoons, cold meat forks, butter, fruit and pie knives, safety razors, shaving brushes and soap, and also stropping outfits. Back of this is seen the hollowware such as butter, pudding, lemon, bread and cake dishes, silver coffee and tea pots, cream and sugar sets, casserole custard dish, biscuit jar, china and silver flower vases, silver tray, chaffing dishes, pearl handled knife and fork sets, also portable electric lamps.

"Each article was price ticketed."

Sutherland & Stelck.

Second prize was awarded to Blake Phillips, with Sutherland & Stelck, Dauphin, Man. The description follows:

Window dressed by Charles Byford, for G. A. Binns, Newmarket—Awarded third prize for places under 5,000.

"There is no casing at the back of the window, so it was found necessary to build it up some feet. The background, sides and floor of the window were covered with cheese cloth, as also were the pedestals and boards used for the display of cutlery, scissors, etc. Holly and mistletoe was used liberally throughout to give a Christmas air to the display.

"The goods shown included all varieties of cutlery, silverware, cut glass and brass goods. Each article was price marked in plain, large figures."

G. A. Binns.

Third prize went to Charles Byford, with G. A. Binns, Newmarket. The window is described as follows:

"The background was draped and pleated with green cloth and openings trimmed with white cloth, tinsel and holly. Small half circle shelves, stands, half moons, displaying knives, razors and scissors, were fixed on the background. In the bottom of the window with steps ranging to the back, was a covering of green cloth, with cotton batten and ground mica on the edges, which relieved the dullness of the green to a remarkable extent, and gave a bright appearance.

"A splendid variety of silverware, cut glass, carvers, safety razors, lamps were shown.

"In the centre was a windmill, which was set in motion by a small electric motor attached to the electric light.

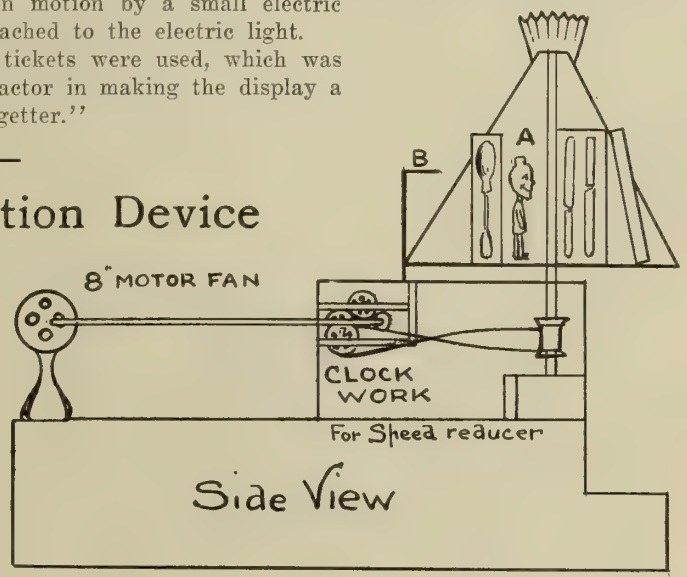
"Price tickets were used, which was a great factor in making the display a business getter."

A Clever Window Motion Device

THE first thing that a window display must be capable of doing is to attract attention. Once the passerby has been halted, other considerations arise. The display must interest and arouse the desire of possession. But the first consideration is an important one.

One of the most effective methods of gaining attention is to arrange a motion device of some kind. Something moving will arouse the curiosity of everyone, old and young, rich and poor, sufficiently to cause them to pause. People will sometimes hurry past the most elaborately and artistically arranged window displays without the passing tribute of a second glance. But put an effigy in the window that wags its head or a door that swings—even the most simple of devices—and everyone will pause. They may hurry right on again, but if they do it is the fault of the rest of the display. The moving device had done its work. It had focussed attention on the window in the first place.

One of the most clever arrangements of this kind that has come to the notice of the writer for some time was a device shown in a window of the Geo. A. McMurtry Co., hardware dealers of St. Thomas a few months ago. It was planned and made by Russell A. Hill, a budding young Edison, gifted with considerable ingenuity and a taste for mechanics.



How the device was operated—All the "works" were cleverly concealed.

A pyramid was constructed in the window which turned regularly, displaying a different line of goods with each side. On one side was a miniature figure of Happy Hooligan. The head was kept constantly in motion. The "works" of the device were skilfully concealed and it had, therefore, a double interest for everyone who passed. People studied it intently and wondered how it worked. Incidentally their gaze wandered to the rest of the window and took in the fine assortment of articles on display.

How It Worked.

This was how it was done. An eight-inch electric fan was rigged up in the rear, the fan attachment having been removed. The motor was then attached to clock works to reduce the speed and then to the pedestal of the revolving pyramid. The system used is shown in the accompanying sketch. The pyramid is marked X and the figure A is the miniature of Happy Hooligan. At the rear a stiff wire, marked B, was fixed, the top being bent out so that at every revolution the head of Happy Hooligan touched the end. This kept the head constantly nodding.

The window as it appeared from the front—The photograph does not show the pyramid clearly.

Lesson 11--Course in Card Writing

Flat Stroke Fancy Lettering, an Easily Executed Condensation of Old English, as Taught by the Edwards Short Cut Course—How to Make Illuminated Letters.

There are times when a fancy letter is desirable in show card writing, yet no fancy letter should be used at any time which cannot be easily read at a glance. The Old English letter in its original or correct form is not only hard to make, but is so decorative as to cause the average person some trouble to make out what it is intended for.

Absence of Frills.

The flat stroke fancy lettering as illustrated in the accompanying plate (No. 11) has the elements of the Old English with the absence of the frills or superfluous fine lines and ornamentation, which are not only unnecessary, but impractical.

This alphabet consists of a series of cymas, half cymas and crescents, with very few straight lines. This greatly facilitates speed.

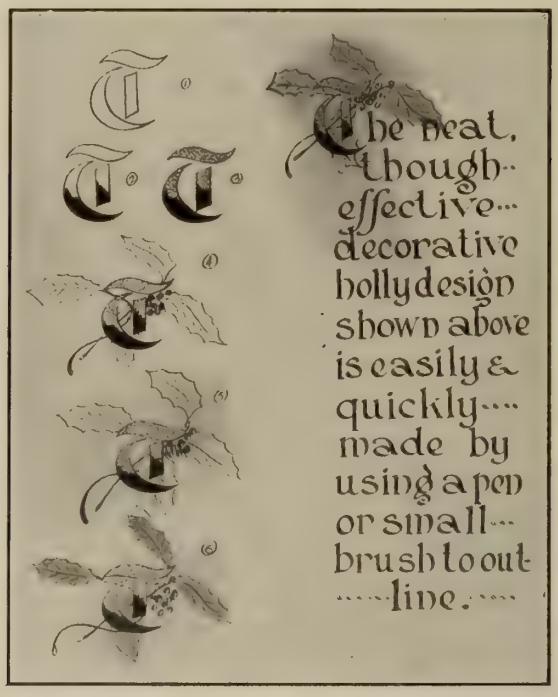
Where to Use This Letter.

Flat stroke fancy letters, like Old English, must not be used to any extent on any card, for it is not readable enough. At no time must a word be spelled in full in capitals. The capital letters are used only at the beginning of the word or as a fancy capital to be used at the beginning of a paragraph of Roman lower case lettering as is illustrated in the accompanying card. The lower case letters, which will be dealt with in the next lesson, are very much more legible and can be made with more or less speed.

An otherwise very plain card may be made attractive by the use of an Old English capital letter worked into a design at the upper left hand corner, as shown in the above card.

How to Make Illuminated Capitals.

The attached series explains fairly well how the design is carried out. In the first place, the letter is made in outline, as shown in No. 1. The second move is to fill in the lower portion of the letter in solid color, in this case black. Then the upper part is stippled or dotted with a pen or the end of a very small, pointed brush. The design is then sketched in in outline, being careful not to run over the face of the letter.



The illustration to the left shows the method employed in executing the illuminated capital designs as used in the accompanying card.

The design is a holly spray, with the veining of the leaves shown. It is very simple and quickly done. The next operation is the rubbing in of a dry color to give a shaded relief background. The dry color may be secured at any hardware store or paint shop. Either yellow, green or a mild shade of blue may be used to advantage. Dip a piece of cotton batting in the dry color and rub it out on another piece of card or paper to get it well into the batting before trying it on the show card. Then rub gently until the desired depth of shade is arrived at. Do not get too deep a shade, but a nice, even tint.

After you have rubbed the tint in well apply a stronger tint of green on the leaves by mixing the dry green with a little mucilage and water. If a different shade of green is desired, add a touch of yellow. Practice will tell you more than a pen can—blue and yellow make green. Try different proportions until you get the desired shade.

When you have the shade you think is most natural to the holly, apply it evenly, letting the veinings show through, then mix a little red for the berries in the same way. You will find that with practice you can get a very nice effect, which will illuminate a card and take off the plain appearance.

In some cases the first word may be made entirely of this fancy letter, using the capital and lower case.

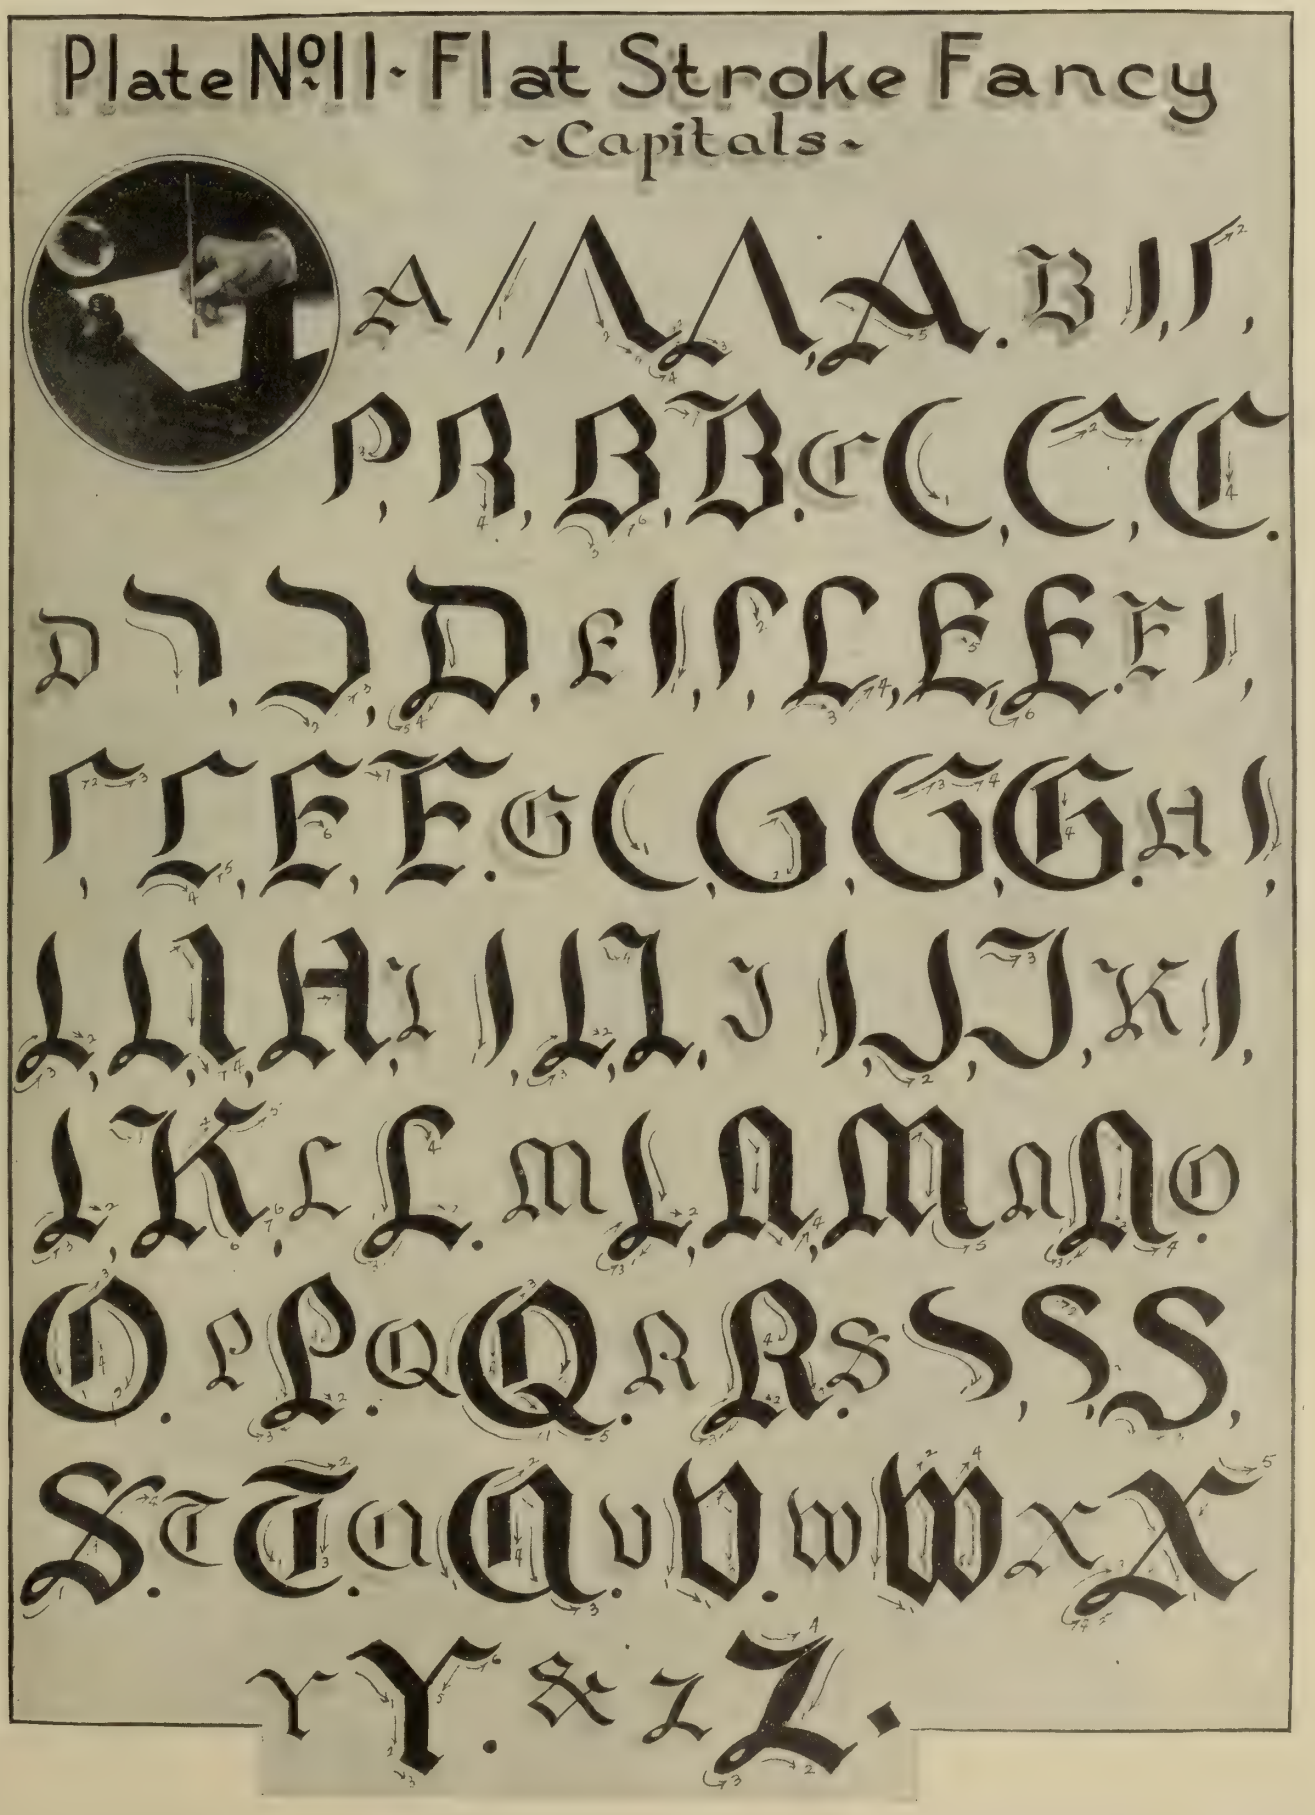
The Brush to Use.

A No. 7 red sable flat brush in albata is the brush used in lettering plate No. 11, which, of course, was about twice the the size of the reproduction here shown or a little less. Very little explanation is needed, as the arrows and numbers give a very correct idea how to proceed.

We might suggest the advisability, however, of practising the cymas and half cymas to quite an extent, as this style of letter is made up almost entirely of them. The cyma, as you know, is such a stroke as No. 5 in A, No. 4 in D, No. 1 in E, No. 1 in H, I, J, K, L, M, N, P, R, S and Z, and No. 2 in T; the half cymas is such a stroke as 3 in A, 5 in B, 3 in F, 4 in G, 3 in C, and so on. Every stroke is made with a flat stroke of the brush, except such strokes as 1 in A, 2 in B, 6 in B, 2 in F, 3 in G, etc. They are made with the edge of the brush, terminating in most cases with a half cyma, as in C. This is one of the simplest alphabets there is to make, though it looks difficult.

A little practice in keeping the brush always rubbed out flat, giving the stroke of the letter the full width of the brush, and ending with a sharp, clear cut point, will soon show itself in pen work.

For further information re brushes, outfits, etc., write to the editor of this paper, 143 University Ave., Toronto.



The flat stroke fancy lettering illustrated here has the elements of Old English, with the absence of the frills. It is a speedy letter when carefully practised.

EFFICIENCY
IN
TINSHOP MANAGEMENT

Tinshop Put to a Practical Test

C. F. Fawcett, of Tweed, Has Determined to Find Just What Profit this Department Brings Him — The Indirect Benefit Which is Claimed Can Hardly be Measured, But the Introduction of a Proper Cost System Will Enable Definiate Knowledge Being Secured of Operating Expenses and Earnings—How the Scheme Works Out.

Operating a tin shop in connection with a hardware store is, by some, considered an unwise proceeding. There are others who believe this to be in the best interests of the store. At the Ontario Convention of 1911, the question was considered at length, but the hardwaremen then meeting in Peterboro' were unable to reach a conclusion, though, perhaps, the majority of those who spoke were against the tin shop.

Now, C. F. Fawcett, of the Fawcett Hardware Company, Tweed, is taking steps to discover definitely just what the tin shop does mean to him. Mr. Fawcett, let it be stated right away, is one of those who believes the benefits accruing from carrying on this department more than counterbalance the disadvantages. But the statements of other dealers have caused him to consider, and he is now determined to ascertain the truth.

Some Advantages Hard to Measure.

It must be remembered that some of the advantages claimed by those who believe in the tin shop can hardly be measured. Mr. Fawcett, for instance, states that one way in which he believes the tin shop helps the hardware store, is that it enables a man to secure business in other lines. For instance, if a householder gives a firm a contract for putting an eavetrough on his roof, he is also likely to give that firm a contract for painting the woodwork and for supplying the builders' hardware. This is undoubtedly a benefit which comes from the tinsmithing department, yet it is a benefit which is hard to determine, or to accurately set down. But the expense of operating the tin shop, and the revenue derived from it, can be accurately ascertained by the introduction of an up-to-date cost system; and it is such a system that Mr. Fawcett has recently established.

His plan may be briefly set down.

A PRACTICAL TEST.

There are many questions facing the hardwareman involving questions of profit and loss, which could be solved if an attempt were made to secure accurate figures and facts. This is one of them. Does it pay to run a tinshop with a hardware store? C. F. Fawcett has decided to find out and is putting his tinshop to a strict test. Would it not pay hardware dealers to systematize their business so that they could tell the real value of each department?

As soon as stocktaking was over, Mr. Fawcett ascertained the exact amount of stock which there was in the tin shop. This was charged to the shop. Note was also taken of the tools used there, and of the plant. This, too, was put down as a charge upon the tinsmithing department. A rent is charged for the building used. All goods bought for the tin shop are set down against it, and all earnings made by that shop are credited to it.

The Problem to be Solved.

Here, then, will be the sum which must be figured at the end of the year. Have the earnings been sufficient to pay the rent of the building used? Do these earnings cover the wages of the men employed? Do they cover the cost of the material used? Do they cover a fair allowance for depreciation in the value of the plant? Do they cover the cost of new tools added during the year? Do they provide for a fair profit?

As here set down, the problem does not seem one which would be difficult to work out; but in practice there will have to be great care exercised. Moreover, the answer cannot be reached until stock is again taken—not until the amount of stock on hand is ascertained and credited to the tin shop; not until the tools in hand have been credited too. But careful account being kept of these things, a statement may be formed which will give Mr. Fawcett a definite idea of the benefit which his tin shop is to him. It will not, as has been said, account for the extra business drawn to other departments by the tin shop; but it will show exactly the cost of operating that shop and the returns which it has brought.

How Shall Charge be Made.

Yet there is still another question which has to be considered. The tin shop will, during the year, buy a good deal of material from the hardware store. This will be charged against the tin shop. Seems simple, doesn't it? But how will it be charged? Will the tin shop get the goods at cost price or will it give the hardware department a profit?

Mr. Fawcett did not reach a conclusion upon that point hurriedly. In many ways it seemed that the hardware department was justified in expecting a profit. Its earnings are to be judged as well as those of the tin shop, and had it a voice one might easily imagine it saying, "Here, why does the tin shop get these things from me at cost? I could sell them elsewhere at a profit."

But allowing the tin shop to speak for itself also, would it not say, "If the hardware store does not want to give me these goods at cost I will buy them somewhere else. I am a large consumer. I could get as good or almost as good a price elsewhere. Why, if I did not use so much of this class of goods the hardware store would have to pay more for similar articles which it sells to others."

Buys on a Cost Basis.

That is the argument, and after considering it both from the standpoint of the hardware store and the tin shop, Mr. Fawcett has determined to charge the tin shop only with the cost price of all goods secured from the hardware department. He does not think this will place either department at a disadvantage, believing that both are really benefiting by the lower purchasing price

Complete Course in Sheet Metal Work

By L. W. KOSER---Number 6

We will now leave the ornamental line for a while and take up pipe work and practical tinsmith problems.

We will now develop the pattern for a two-piece square elbow as shown by problem 1, plate 11.

We will say the elbow is for a 3 inch. pipe. The size of the pipe, however, makes no difference as the principle is the same for any size of pipe, either round or elliptical.

Draw a circle 3 inches in diameter, this represents a plan. See Fig. 1.

Above the plan and in line with it draw the elevation Fig. 2, which is an outline drawing of the elbow showing how it will look when put together. It also shows the angle of the elbow. The spaces A.B. and D.E. must be the same width as the diameter of the circle, viz. 3 inches.

Draw the line F.C. which is the mitre line or joint.

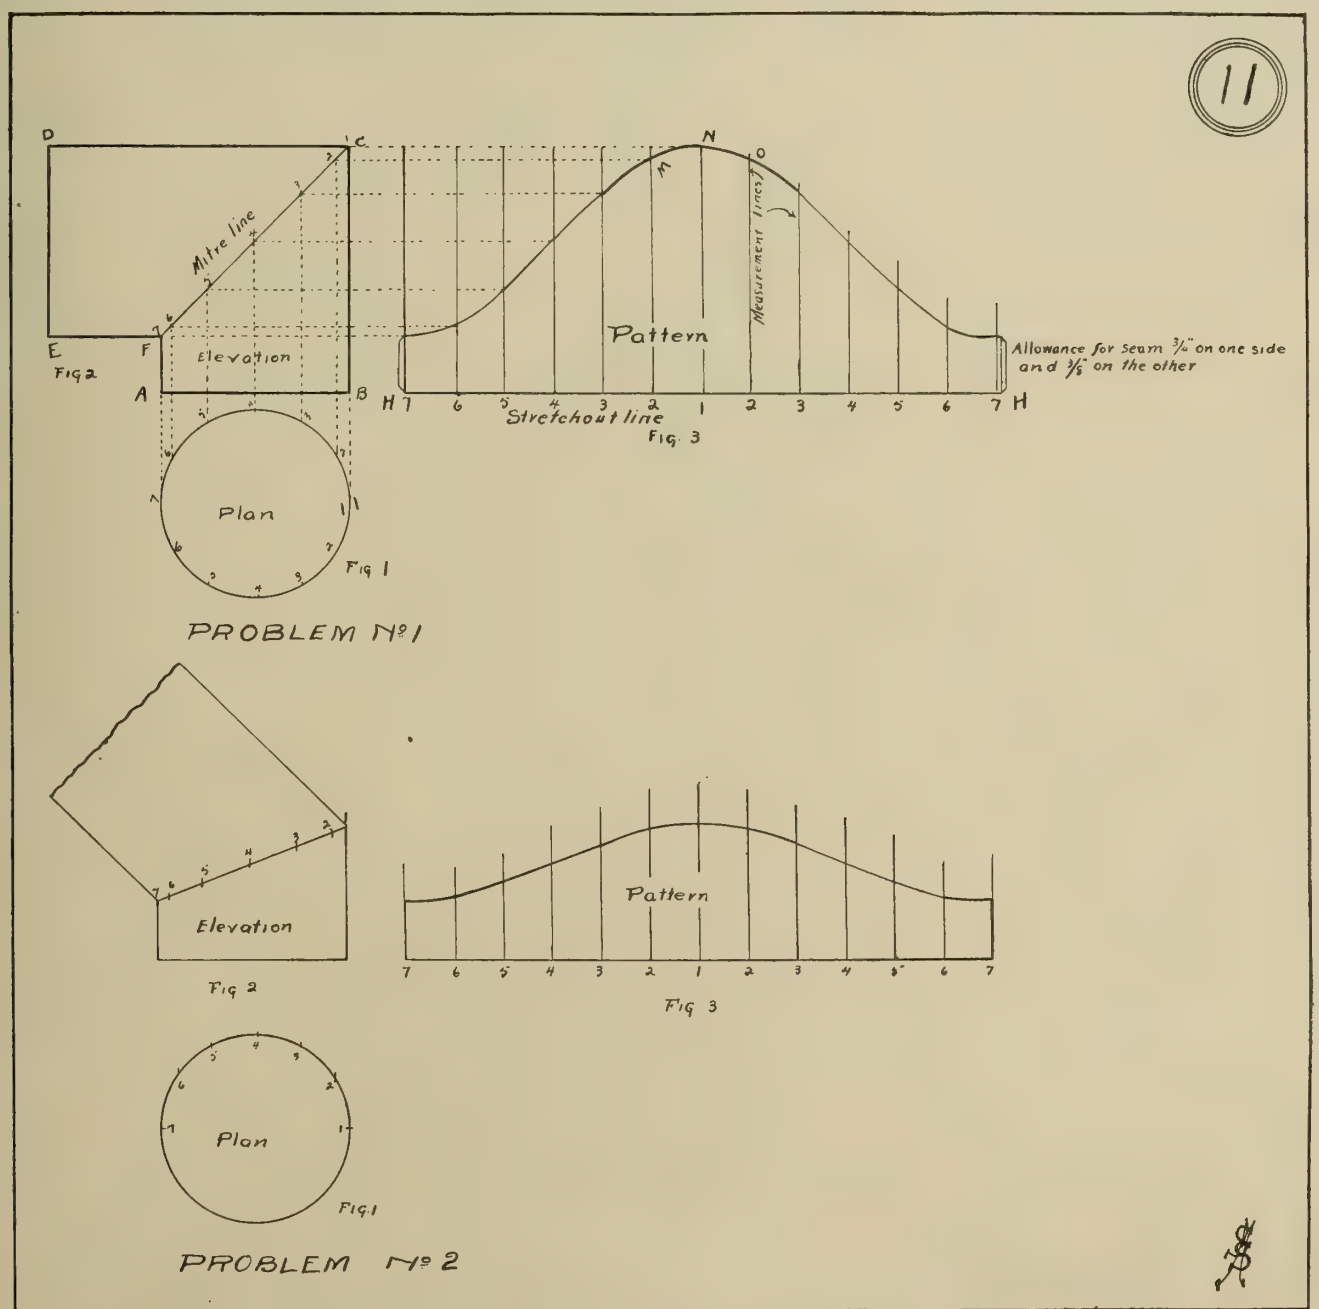
Off to one side and in line with A.B. draw a line H.H. which represents the stretchout line.

Now with the dividers step off one-half of the plan Fig. 1 into any number of equal spaces (in this case six) and number each point 1, 2, 3, 4, etc., as shown. It is only necessary to space off one-half of the circle as both sides of the elbow mitre are the same.

Now transfer the spaces on the plan to the stretchout line. H.H. Transfer twice the number of spaces stepped off, or the complete girth of the circle, and number these spaces the same as on plan. Start with No. 1 in the centre and number each way. Draw the usual measurement line through each number.

Now return to the plan Fig. 1, draw a dotted line from 7 on the plan to F on the elevation or else place the T-sqr. parallel to the line B.C. and carry each point on the plan to the mitre line F.C.

Then place the T-sqr. parellel to D.C. and carry these points out to the corresponding measurement lines and make a mark through each.



A line then traced through these points gives the desired pattern.

Problem No. 2.

Draw a square mitre for a 2-in. and 4-in. pipe.

Problem No. 2 is another two-piece mitre, the only difference being that the elbow is at an angle of 45 degrees instead of being at right angles. It will be noticed here that we do not draw the dotted lines from one point to another, we merely place the side of the T-sqr. against the number and make a small stroke through the point we wish to cut, thereby saving time and making the work simpler.

Draw two patterns for elbows of different angles.

Let us now take problem 3, plate 12. This is a 3-piece pipe elbow.

First draw the plan Fig. 1, then the elevation Fig. 2. The pattern for the parts A and B are developed the same as explained for problems 1 and 2, so they need no further explanation.

What we want to know now is how to develop the pattern for the gore piece B.

Having drawn the plan and elevation divide the plan into an equal number of spaces and number each.

Carry lines to the mitre line B.C. and mitre line A.D. by drawing lines parellel to D.C. Now draw the stretchout line N.M. at right angles to the line D.C.

Transfer the spaces from the plan to this line, number same and draw the usual measurement lines.

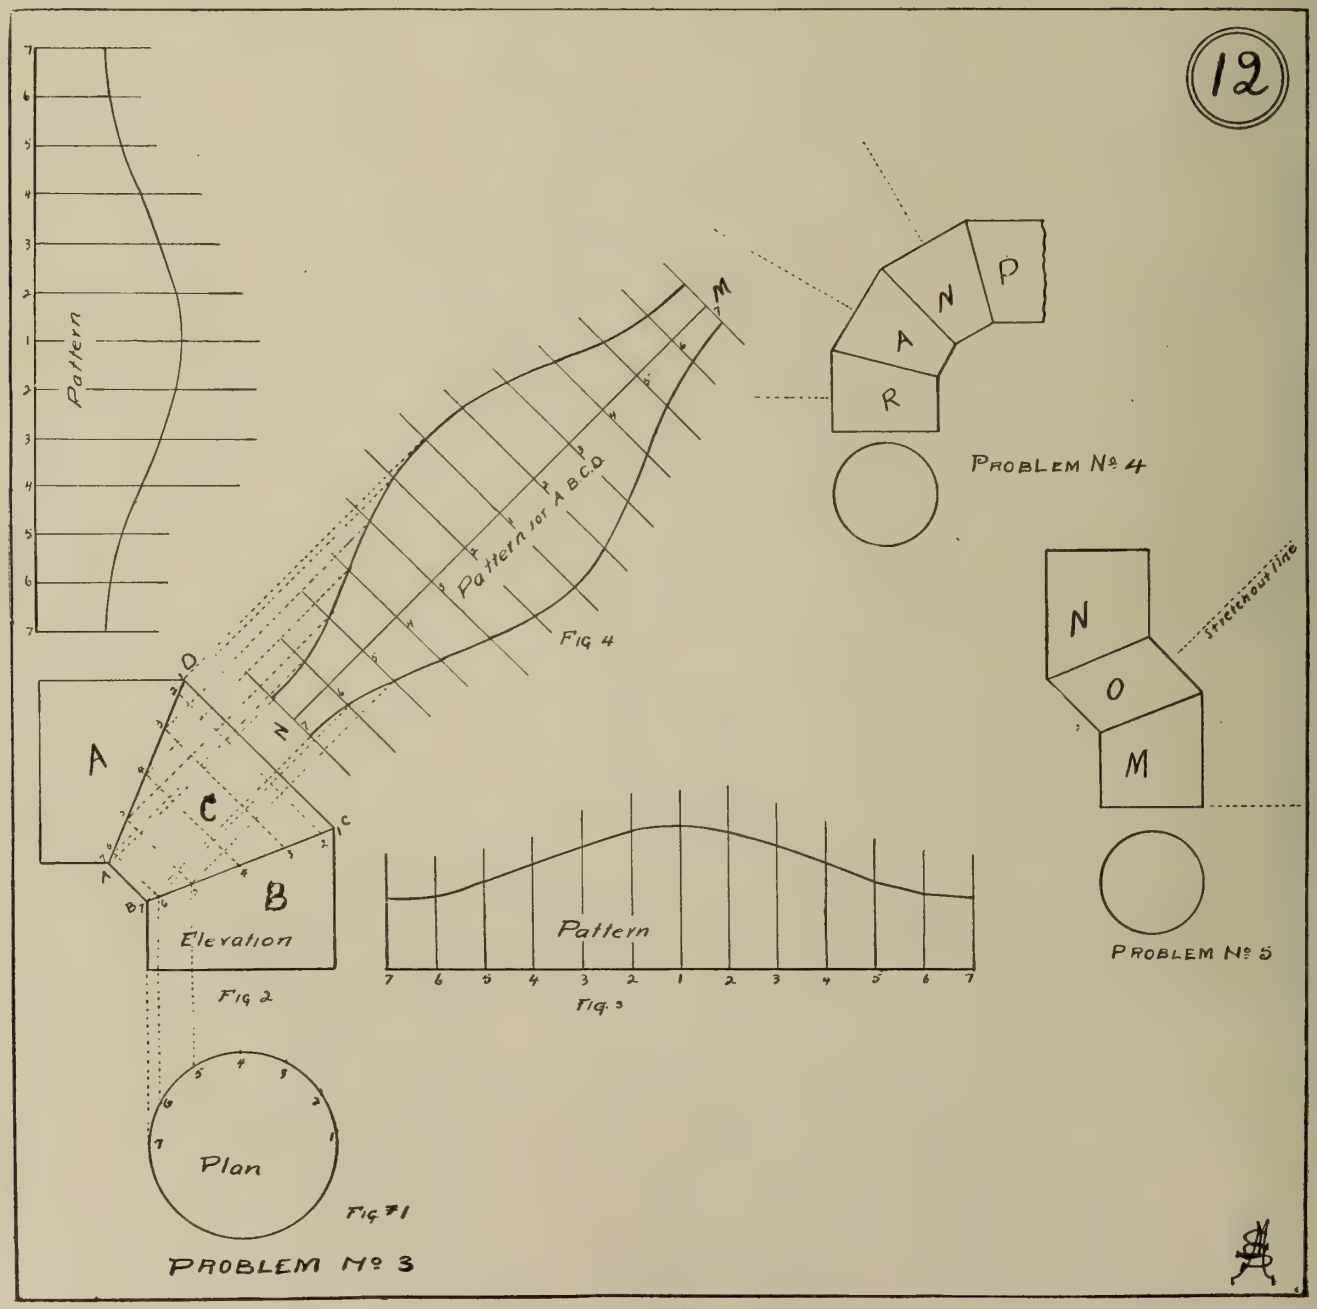
Now place the T-sqr. or side of the triangle against the T-sqr. so that its edge will run parellel to the line N.M. and carry each one of the points from the mitre lines A.D. and B.C. out to the measurement lines having the corresponding number. A line traced through these points gives the desired pattern.

Draw a pattern for a three-piece elbow 4 inches in diameter.

Problem No. 4 shows a four-piece elbow. The end pieces R and D are developed the same as explained for problem 1 and 2. The gore pieces A and N as explained for problem 3, draw a four-piece elbow for a 3-inch pipe.

Problem 5 shows a jog or off-set in the pipe. The parts N and M are obtained the same as explained for problems 1 and 2. The piece O. forming the off-set is obtained the same as the gore piece B, in problem 3 but the shape of the pattern itself is different.

Draw the patterns for an off-set for a 2-inch and 4-inch pipe.



EFFICIENCY
IN
RETAIL SALESMANSHIP

Planning the Spring Sales Campaign

The Many Lines to be Featured—How One Dealer Improved His Cement Business—The Metallic and Ready Roofing Business—The Field Has Widened—Feature Garden Tools and Household Goods.

ALTHOUGH March has not yet run its course, there are plentiful signs that spring is near at hand. Nature is beginning to throw off the shackles of winter. That indefinable spring feeling is in the air. The days of the overcoat, the muffler, the furnace and the snow-shovel are numbered.

All of which are so many signals to the hardwareman that he must start to "get busy." Spring means much to the dealer in hardware. Active trade begins with the melting of the snow, and continues right through until the arrival of warm weather.

Particular attention should be paid at this juncture to the farm trade. The needs of the farmer when the spring opens are many. He requires carriage and implement paint, nails for repairs from winter damage, pitchforks, shovels, implement repair parts. He requires seed—and there is no reason why the hardwareman should not supply him with this as well as the other goods he buys. In fact, before starting in to till the soil, Mr. Farmer has to stock up in a great many lines. His trade goes naturally to the hardwareman.

Some dealers are inclined to scoff at "outside salesmanship," prefessing to believe that it does not pay to go after business. It does pay. The hardwareman who had the hardihood to make excursions out into the rural districts during the first two months of the year, when there was not enough business doing to make his presence at the store imperative, will reap the benefit now. The acquaintances he made on his trips are ready to do their spring buying, and it is a safe wager that they will all pay him a visit.

It follows that Saturdays will be particularly busy days, and steps should be taken to insure good service. Some dealers make an effort to bring the city trade at other times of the week, concentrating their advertising on certain days with that object in view. Undoubtedly it pays to leave the Saturdays clear as far as possible for trade with the farmers, but it is not possible to break city people entirely of their Saturday shopping habit.

Cultivate the Contractors.

One of the surest signs of spring is the activity of the builders and contractors. Building work, delayed through the winter months, is now being resumed. Gangs are at work breaking the ground for new buildings. The rapid growth of the country is never so clearly evidenced as at the present time of the year, when industrial and building operations begin full blast.

This has a deep significance for the hardwareman. Building supplies will be needed steadily from now on. It is important to get early trade, for the contractors are likely to place their business with the same firm right through the season, provided that satisfaction is given. The dealer who secures the first order has a splendid opportunity to get the repeats.

The writer believes implicitly in canvassing the builders and contractors early. Persuade them to place an initial order and depend upon the quality of your goods and the efficiency of your service to keep them in line.

A good trade is done during the spring in building paper. A case is recalled where a young western hardwareman made a tour of inspection of the city, and stopped at every place where building work was being done. He canvassed either the owner or the contractor for building paper, and sold over $300 worth in less than a month. In addition to that, he picked up orders for other goods.

Feature Cement.

Cement will also be heavily in demand. Hardwaremen are commencing to awaken to the splendid possibilities of this line.

"Two years ago I sold 24 barrels of cement," said an Eastern Ontario hardwareman to the writer a few weeks ago. "Last year I disposed of over 800 barrels."

"That was quick work. Where did the difference come in?"

"A change of tactics. The first year I carried cement; the second year I featured it. It made all the difference in the world.

"The first year I had the cement in my warehouse at the rear of the store, and sales were made when anyone called in and asked for it. I realized last spring that there was a tremendous amount of cement being sold in town, but that I was not getting much share in it. So I decided to really push that line. I began to talk cement to customers and to advertise it. The contractors soon began to realize that I was carrying cement, and as I had a first-class connection with them in other lines, my sales doubled, trebled, quadrupled and so on right through the season."

There is a big difference between "carrying" and "featuring"—the same difference that there is between no profit and big profit. If you are a carrier of cement, make yourself a featurer this spring and watch the difference in sales.

The Roofing Trade.

The ready roofing idea is taking root. There is a rapidly growing demand in all parts of the country. The roofing manufacturers are conducting energetic campaigns of an educational nature, and are very effectively demonstrating the value of their products to the general public. The hardware dealer can assist the work materially, and can benefit himself by taking advantage of the manufacturers' campaigns.

Arrange a window display of roofing. It may not seem at first thought to be very well adapted for display purposes, but with a small expenditure a very creditable window trim can be arranged. One of the best methods is to put a miniature house or barn in the window, showing the roof and walls covered with roofing material.

Push Metallic Sheets.

There is a still larger field for the sale of metal ceilings, sidings and shingles. The owner of every building is a possible prospect. You know the faults every plaster ceiling has. It cracks, crumbles,

small particles fall down and do damage to furniture, materials in dry goods stores, groceries, etc. It needs repairs often and there is always danger that it may fall down on the heads of those working under it.

Now figure on the steel material. There is no possible way for it to crack and crumble. When it is put up it is there to stay. It can be washed each season and will look as good as new—and it is as good as new. They will outlast the building you put them in. They are the cheapest in point of service. They are fire-proof. We know of cases where fire has gutted an entire room, but went no further on account of the metal wall coverings.

Most people would be glad of the chance to have this same kind of wall coverings for their stores, their homes, office buildings, schools, halls, etc., if they knew of the great advantages it has over the plaster. It devolves on the hardwareman to see that every prospective customer is put in possession of these facts.

It is going to take some work but the orders will be like a bottle of olives—it is hard to get the first one, but after that they come easy. One satisfied customer will bring another. Others will bring many more. And every one can be satisfied. Manufacturers to-day have thousands of beautiful designs which can be used in most any kind of a room. The material is so made that it fits exactly and any carpenter can erect it.

There is in every man a desire for a plot of ground which he can use for gardening. It is the primitive instinct creeping out. All men were once tillers of the soil. The desire to tinker away with a few square feet of sod awakens regularly every spring and, although it may not last long in the face of discouraging results, blistered hands from the labor, etc., it lasts long enough for the amateur gardener to invest in the necessary tools.

A special effort should be made, therefore, to sell gardening tools at this season. The hardwareman should go a little further. The average city man likes to enjoy all the outdoor comforts that are possible in the city in summer time. This suggests hammocks and garden seats. How many garden seats have you sold in past seasons? Not half as many, we will warrant, as you could dispose of if you really went out with the object of selling them.

The subject of gardening suggests many articles which should be brought forward at once. Lawn mowers will be large sellers right through the spring and summer. Hose may not be very much in demand now but it does not take many days of warm weather to bring them to the front. Wire fencing and poultry netting are selling now and will continue active for some time.

Passing from the lawn to the interior of the house, numerous necessities present themselves. Window screens, refrigerators, ice cream freezers, electric fans, vacuum cleaners. Most of the articles named are summer goods but the retailer should get his supplies in bright and early.

Vacuum cleaners will be needed for housecleaning; and so will a multitude of other articles. As housecleaning is a question of the immediate future, the hardware dealer should turn his attention to these lines at once.

Plans for Selling Aluminum Ware

The Cochrane Hardware Co. Demonstrated the Merits of the Goods Very Successfully—Good Permanent Position in the Store Should be Granted to Aluminum Goods.

IT is a fact that in practically every phase of living conditions the luxury of yesterday, is the necessity of to-day. This is probably one of the real reasons for the high cost of living. People pay as a matter of course for things which a few years before they would not have purchased under any compunction.

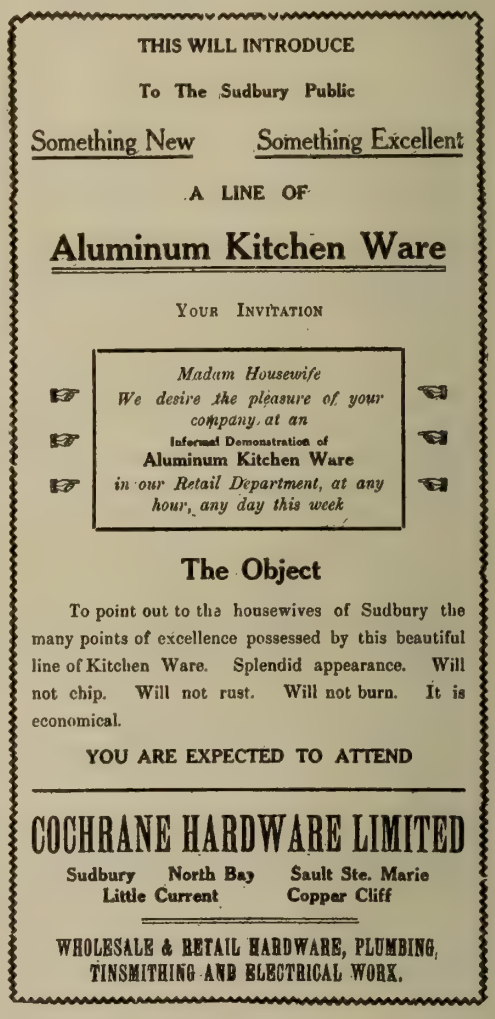
Price, is not necessarily any impediment now when people feel that the article in question is worth it. Pursuing the thought further, one feels certain that many articles now comparatively new will, before many years have passed, become regular features of the average home.

Aluminum kitchen utensils are gradually coming into favor. Hardwaremen who handle them invariably state that they have found a good market and furthermore that the demand is broadening out. Some dealers report that they have not found it necessary to devise special means of selling aluminum ware; that the goods have sold themselves. Others state that, while many of their customers have been induced to buy through the attractiveness of the ware, they have found it advisable to take steps to feature their aluminum stock. All new lines, no matter how attractive and how sure of finding favor, need clever exploitation in order to attain general use.

One of the best methods to employ in featuring aluminum ware is to conduct demonstrations. The demonstration has reached a wide vogue in modern merchandizing. It is a tangible appreciation on the part of the dealer of the Missourian in all of us; the desire to be "shown." People will take an interest in a thing, and reach a belief in the particular qualities ascribed to it, when they see it and have those qualities demonstrated to their satisfaction. The layer of skepticism which incrusts the average person can be pierced quickest in that way.

Demonstrated Aluminum

The experience of the Cochrane Hardware Co., Sudbury, is worth noting in this connection. Having laid in a stock of aluminum ware early this year, they decided that it would be necessary to take some course to acquaint the people of that section of the merits of the goods. The demonstration idea was decided upon but it was arranged to make this a permanent sales plan rather than to set any particular day or days aside



Two-column advertisement used to create an interest in aluminum ware.

for a demonstration. A general invitation was issued to the women of Sudbury, through the medium of the advertisement herewith reproduced, to call in at the store and see how the utensils could be used. No time was set, the invitation being for any day or any hour which suited each individual best.

This plan was followed with a satisfactory measure of success at the Sudbury and Sault Ste. Marie stores of the Cochrane Hardware Co. All women who responded to the invitation were shown practical tests to prove that the goods would do all that was claimed. It was demonstrated that the ware heated quickly, did not burn (either the food or the utensil) and did not crack or chip. Despite the fact that the line was a comparatively new one with them, they succeeded in selling quite a large amount.

Display Properly.

Another point to be borne in mind is that goods of this nature should be displayed to advantage. A permanent position of more or less prominence should be given in the store. Window displays are also an essential feature of efficiency in the sale of aluminum ware.

Making the Most of the Tool Trade

Do Hardwaremen Realize to the Fullest the Great Possibilities in This Line?—The Results Obtained by One Window Display—Goods Should be Kept Flawless—Salesmen Must be Well Informed to be Efficient.

IF efficiency is aimed at in the selling end of the business, attention must be given to all lines. Some men who have won reputations as crack salesmen are specialists purely and simply. They study methods of selling certain lines, and neglect more or less the regular goods which go to make up the hardware stock. Now, this kind of salesmanship is all right in its place, but it is neither efficient nor profitable in the average store. A good salesman recognizes the prime necessity of moving straight hardware lines as well as specialties.

Let us for a moment consider tools. What better line would a salesman desire for the display of his ability than tools? A good tool is just full of "talking points." There is a continuous demand. Any man with a mechanical turn has a deep-rooted interest in everything pertaining to the subject. He will study a show of tools with quite as much interest as his wife will take in a particularly fine display of millinery and, although he may not be led to anything like the extravagances that his better half may indulge in, he is just the same a fit subject for a bright tool salesman.

In the opinion of the writer, a great many hardwaremen do not pay as much attention to tools as they should. They have not realized just what a splendid opportunity this branch of the trade presents. Here is an example of what can be done:

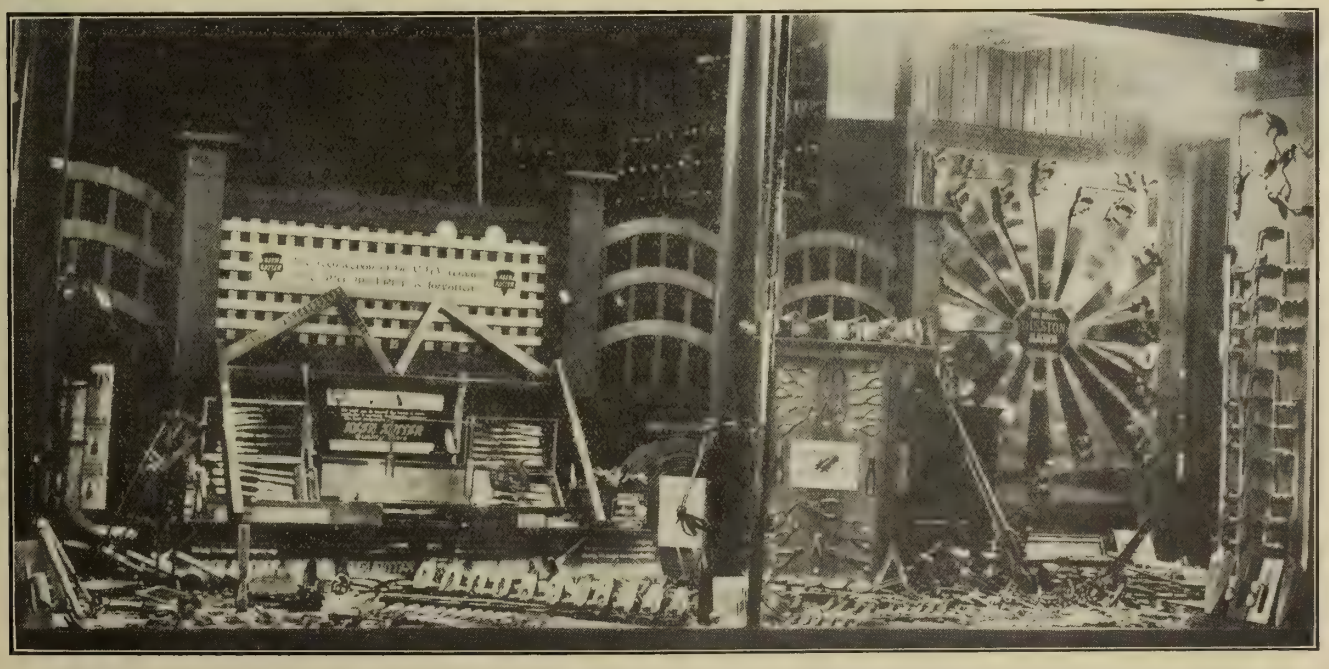
On the Friday preceding convention week, the Bond Hardware Co. used one of their fine, large windows for a display of tools. The trim was left in for the convention, and it aroused a singular amount of interest among the visiting hardwaremen. It was pretty generally conceded to be about the best tool window that any of the visitors had seen. But that is not the point. As stated before, the window was dressed on Friday, and the public took immediate notice. Saturday night saw a heavy demand for all variety of tools. In fact, the sale of tools constituted seventy-five per cent. of the total sales for the evening.

This is a striking evidence of what can be accomplished when an effort is made to feature tools in accordance with their real importance. It is worth thinking over.

Methods of Featuring.

A front position in the store should be given over to the tool stock. The goods should be kept neat and bright. A mechanic appreciates neatness, and he insists on the tools that he buys being flawless and speckless. If possible, all tools should be kept under glass or in casings of some kind. It takes at least 50 per cent. more effort to sell a dusty tool.

Window displays should be arranged frequently. If the store has two windows or more, one display a week should be devoted to tools. Window dressers frequently prefer to use other goods, believing that they can get better results.



A window display which brought tool sales up to 75 per cent. of total sales, and which attracted the attention of every male passer-by.

This is a delusion. Displays both elaborate and original can be evolved by the use of tools, and they can be depended upon to attract the maximum of attention. Fix up a tool display of special merit. Then stand at some place where it is possible to watch the passers by. If you take the trouble of counting the men who pass, you will find that every man will glance at the window with interest, while nine out of every ten will stop. This is not a mere idle assertion. It has been proven by test.

The writer devoted fifteen minutes during the noon hour one day in convention week to test out the window display previously referred to. Those who passed were men of all classes, with a preponderance perhaps of mechanics.

Sixty-five men passed during the fifteen minutes.

All glanced at the window but one. He had his head buried in a morning newspaper.

Fifty-four stopped and glanced over the display.

There was not one moment during the quarter of an hour when there were less than four men looking in the window.

Seven of them entered the store before passing on. It may have been to buy tools. We don't know.

You cannot have too many tool displays. A man's interest in them is always fresh.

Know the Goods.

At least half of efficiency in tool salesmanship is in knowing the goods. Every tool has points about it which must be understood. There are questions of temper, edge and construction. Watch a customer considering the purchase of a tool. He weighs it in his hand, holds it up and eyes it from numerous angles and minutely examines each part. Information volunteered on the different points that have quite apparently arisen in that customers' mind would go a long way toward selling the tool. The fact of the matter is that a man takes pride in his tools, and he won't purchase until he has been convinced that he is getting the proper thing. The salesman has to know enough about the line to convince him.

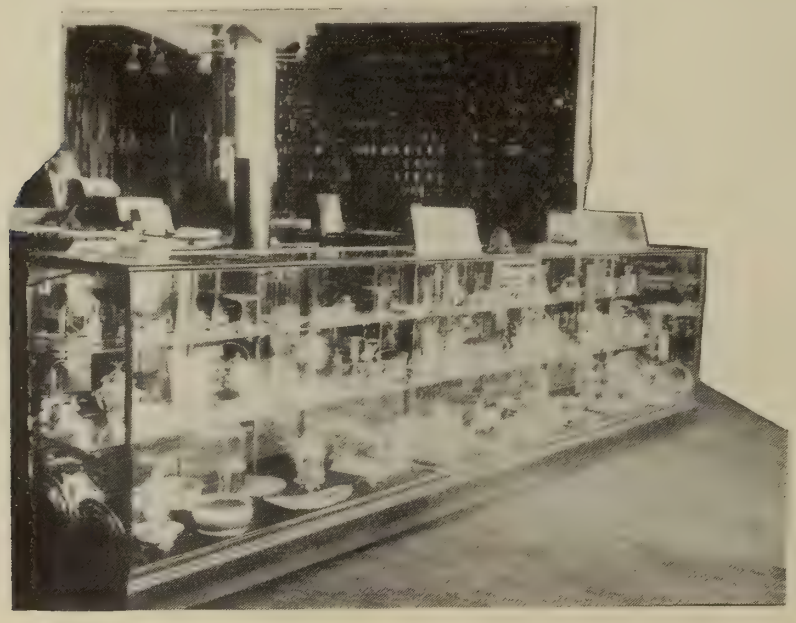
The spring is a particularly brisk time in this branch of the business. Every progressive dealer should begin, therefore, to feature his tool stock now, and to work for the large sales which it is always possible to secure.

Featuring Cutlery and Silverware

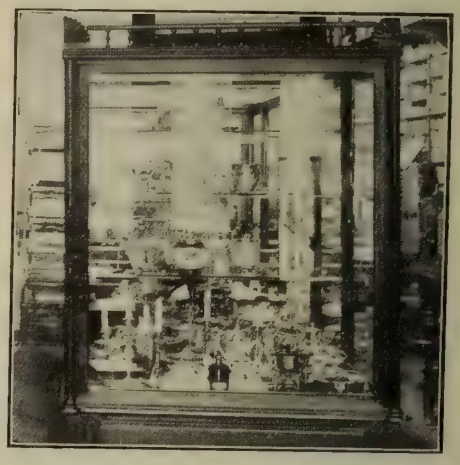
The Rapid Strides Made by the Hardware Trade in Handling These Lines—Hardwaremen Now the Chief Medium of Distribution—Some Effective Measures of Display—Make Campaign an All-Year-Around One.

CUTLERY and silverware are being sold more extensively in the hardware business to-day than ever before. In fact, the trade in these lines is becoming centralized in hardware stores. This may seem like a sweeping assertion to make but undoubtedly the facts point that way.

One of the largest firms in the manufacture of cutlery and silverware distributed sixty per cent. of their output a few years ago, through the jewelery trade and forty per cent. through the hardware trade. The figures are reversed now. A couple of years ago the manager of a manufacturing concern, specializing on dollar watches, paid a visit to Winnipeg and sold three orders of $5,000 each. One was to a jewelry wholesale house, one to a dry goods wholesaler and one to a hardware wholesaler. The jewelry house sold their $5,000 worth of watches. The dry goods firm succeeded in selling $2,500 worth only. The hardware jobber came back for more and disposed of $15,000 worth altogether.



The most effective method of displaying cutlery and silverware—A long silent salesman facing the front door.



Huge silent salesman used by the Peterboro Hardware Co. the year round to display silverware.

These figures are significant. They prove the selling power of the hardware dealer most convincingly. In every place, no matter how small, there is need for a hardware store and there are scores of villages and small centres which boast a hardware establishment but do not possess a jewelry store. The hardwareman, therefore, is the only medium for such lines.

Unprecedented Gains.

In the larger places where the competition is keen, the hardware dealer is

coming to the front also. Reports indicate that the Christmas trade of the hardwareman last year showed an unprecedentedly large gain. One dealer writes to Hardware and Metal as follows:

"Our business in some of these lines has not only been doubled, but trebled in many instances and, although our Christmas order in flat and hollow ware was the largest ever taken out of ———, we found it necessary to supplement it by two others almost half as big."

Another firm writes: "Our sales were the largest on record, exceeding those of a year ago by 100 per cent." A dealer in a small town declares that "Our Christmas trade this year was a record for us and much better than ever before." An Ottawa hardwareman declares that "Our business this year was a great deal better than last. The hardware store is the place for Christmas shopping, as the buying public are finding that the hardware people are giving them quality."

Follow the Example.

What these firms have done, others can do. Every hardware dealer can improve his sales in cutlery and silverware if he goes about it the right way.

The first essential is to properly display the goods, to bring the stock prominently before the people intent on shopping. This aim is accomplished in the store of the Peterboro' Hardware Company by means of a great silent salesman standing in the centre of the floor. Other schemes are employed too. Silverware finds a prominent place in the windows, and is not forgotten when advertising is being done; but pretty well the year round it is displayed in the great show case shown in the accompanying illustration.

"That display brings results," declared H. P. Morgan, manager of the store. "We did a great business in silver goods this Christmas. I think we did more than all the jewellers in town put together."

"Trade in silverware is not all at Christmas time or about June," added Mr. Morgan. "It continues with us the year through, and we find it pays us well to give this whole case, as well as other room, to this line."

The other illustration shows perhaps the most effective method possible of displaying the goods—a long silent salesman facing the front door. In many stores, this arrangement will be found and the reports received are invariably favorable.

Feature Cutlery Now.

The chief fault to be found with the methods employed by many hardwaremen in handling their cutlery and silverware lines is that they are not consistent. They push the goods hard around Christmas time and make good sales. They do not realize, however, that the goods can be sold the whole year around. It is not a one or two season stock. Proper attention and attractive display will maintain a steady demand.

Once this truth has been hammered home, the hardwareman can be depended upon to keep his average of sales up steadily.

With a trade growing so rapidly, the hardwareman has now realized the full importance of his silver department. He does not now look upon it as a profitable but rather difficult side-line. Instead. he has come to understand that a big field lies before him and that he has the opportunity of selling a line which has a wide distribution and carries with it a good margin of profit.

Outside Salesmen For Builders' Hardware

Robert Mulhall, of Ottawa, Says It Pays Well to Have Specialist Go Out to Interview the Architects and Contractors—Such a Man Can Suggest What is Needed for Each Room—He is of Real Assistance to Builders, and Gets Orders Readily—Cement a Line of Builders' Hardware for Which a Selling Campaign Should be Made Early.

As surely as the spring comes around there comes an increased activity in builders' hardware business. The fall may be a better time for selling this line, yet much of the goods then delivered and installed are ordered in the early months of spring. It is the early order seeker, indeed, who gets the lion's share of the business.

At this time, therefore, it behooves those who count upon the builders' hardware trade—and what wide-awake hardwareman does not?—to plan his spring campaign. Various men will have to bear in mind various things. Some dealers of great initiative are doing business in places which have little or no building operations. One of the best stores in Ontario is in a place where not one new house was erected last year. The owner of that establishment would be extremely foolish to prepare for a great building boom, yet he, and others like him, need not allow builders' hardware to earn him nothing. This class of goods can be sold to others than to those who are doing new work. Where there is little building it will generally be found that the houses in which the people are living are old. Some have been erected for many years. They need new equipment, and if the hardwareman in the district goes about his work in the right way, he will sell a great deal of builders' hardware. The owners are proud of their old places. They like to keep them as they have been, but they like also to have them equipped with modern conveniences, and they are only too willing to spend money on more up-to-date locks, door handles, swing door hinges, door fasteners and the like.

Important in the Cities.

But undoubtedly the builders' hardware trade is of greater importance to the man doing business in a centre where much building is being done—in some of the larger places of Ontario, Quebec and the East, and in the get-big-quick towns and cities of the West. Here large orders are to be had; and the great question which faces the hardware dealer is how best to get them.

As on many points of salesmanship, so here, opinions differ. Some men propose one course, some another. Possibly what would be the right method of procedure in one place would be absolutely wrong in another. Local conditions and local likes and dislikes must be considered. There are a number, however, who advocate going boldly after this builders' hardware business. They claim the extra expense which this course of procedure necessitates is more than made up by the extra business secured, and by the certainty which advance knowledge of these sales gives. They claim that it is about as necessary for retailers to have outside salesmen in this line, as it is for wholesale houses to be so served. There is food for careful thought in these opinions, and it may be well here to set forth some of the ideas which Robert Mulhall of Ottawa, has formed on this subject. Mr. Mulhall has worked up a big business in builders' hardware, and surely knows whereof he speaks.

An Expert Needed.

"I find," said Mr. Mulhall, in speaking of this question of builders' hardware, "that it not only pays to have a man outside looking up prospective buyers and taking orders, but that it also pays to have this man an expert in building hardware—a man who can give suggestions—who is capable enough to look over an architect's plans and give a good idea of what will be wanted."

"Many architects who have this building work in hand," continued the Ottawa dealer, "have only a general knowledge of builders' hardware. They have not considered this phase of the work particularly. They are leaving it until the main part of the job is finished. But if a man goes to them and is able to say—you will need this and that, for that room you will need a certain kind of lock and door knob—you will need this style of hinge, and that variety of window clasp—such a man will get large orders. Many architects are only too willing to have have an expert go over their plans room by room, and while they may not agree with all that he suggests, they will yet have confidence in him, and working with him will make out an order for all that they require.

"What is true of architects applies somewhat similarly to contractors," continued Mr. Mulhall. "These men perhaps understand builders' hardware better than the architect. But they are busy men. They have several jobs on their hands, and they are only too willing to be saved work. If an expert comes to them to discuss what they will need for their various houses, they will take the question up gladly. They will suggest certain things and listen to what the salesman has to say about them. They will object to certain of his proposals. Too expensive—they will remark. Then the salesman will either have to show that the cost of this high class fixture would not really be great, or he will have to suggest some other line—cheaper in price and yet of a grade which will give satisfaction.

Should Carry Samples.

"There have been cases," admitted Mr. Mulhall, "where the contractor preferred to come to the store and select what he wants. But more often he is quite willing to give his order in advance."

"Do you have your outside salesman carry samples?" Mr. Mulhall was asked.

"I think," he replied, "that is a good plan. Talk to a man about a certain lock or hinge and he will listen. Show him the lock or hinge and he will pick it up and examine it closely. Samples undoubtedly bring orders. That is another advantage of having an expert on this kind of work. When he first sees a building he can estimate approximately what it is to cost. He will know, therefore, about what class of fixture will be needed. He can pack up samples of this class of goods, and can show the builders the exact articles which he can supply him. Oh, undoubtedly samples are a fine thing."

In every community where building is being extensively carried on, there are private individuals who are having homes erected for themselves. They have engaged the services of some builder, but it is they who are deciding what is to be put into the house. They may be building a comparatively small house, and may yet want everything in it of the very best order. It is with such men that the outside salesman of builders' hardware find a particularly good business.

Go to Private Builders.

"My salesman," remarked Mr. Mulhall, "finds out from the builder who is the owner of the house which he is putting up. Then the salesman goes to that man, and quickly finds out what class of goods are wanted. He says he will bring some of the lines he has in stock. In practically every case the amateur builder is only too willing to look at these. He asks about the various makes. Perhaps he consults with the builder. He decides what he will want, and places an order. The goods may not need to be delivered for months but the order is secured and then all we have to do is to prepare to fill it."

The result of this early campaign is evident. It helps both buyer and seller. It guards against delay. If goods are ordered in May or June there should be no trouble about delivering them in August. The inside finishing therefore will not be held back at all, nor will the dealer have to lay in a great stock of these lines without having some idea of the quantities he is likely to need.

Go After Cement Trade Early.

There is another class of goods for which orders may well be taken early—a class which is not always considered as belonging to builders' hardware, but which is yet used in practically every building. This is cement. Early in the operations this is needed. Dealers who handle this line, therefore, have almost to anticipate the work of the contractors. They have to get after this business before excavations for the foundation are being made. Some men make this bid for business by personal canvass among the contractors. Many send out letters. All should remind those who bought this class of material from them the year previous that they are able to supply them again.

A Progressive Scheme.

There is great business to be done with the farmers in this line also, and the question of how to secure their trade is worth considering. An Eastern Ontario dealer, has done much to promote his sales of cement by putting his clerks in a position to explain its use. Recently this dealer moved his safe from the ground floor of his store to the basement. He wanted it placed upon a concrete bottom; wanted the walls to be made of concrete; and wanted a concrete run-way made from the hoist to the safe, so that the books might easily be wheeled into the strong box every evening. Some of the clerks were eager to do this work. The dealer r?adily complied, and those young men, who had never before done any thing with this material, turned out a job which would do credit to experts.

"How do you mix this cement?" a farmer will ask.

Every one of the young men who helped fix that safe chamber is ready to explain fully. Sales have been made already because of this ability to tell about the material. More sales will be made; for there is nothing which induces a man to buy cement like seeing what others, with no greater experience than himself, have been able to do with it.

There is a possibility that a canvass of the farmers might bring business in this line. Perhaps the work of securing the orders would offset the benefit derived from them. That is a question which each dealer must decide for himself. But certainly all handling this material would do well to advocate its use. They would do well to learn about it, so that they can intelligently explain how it is handled.

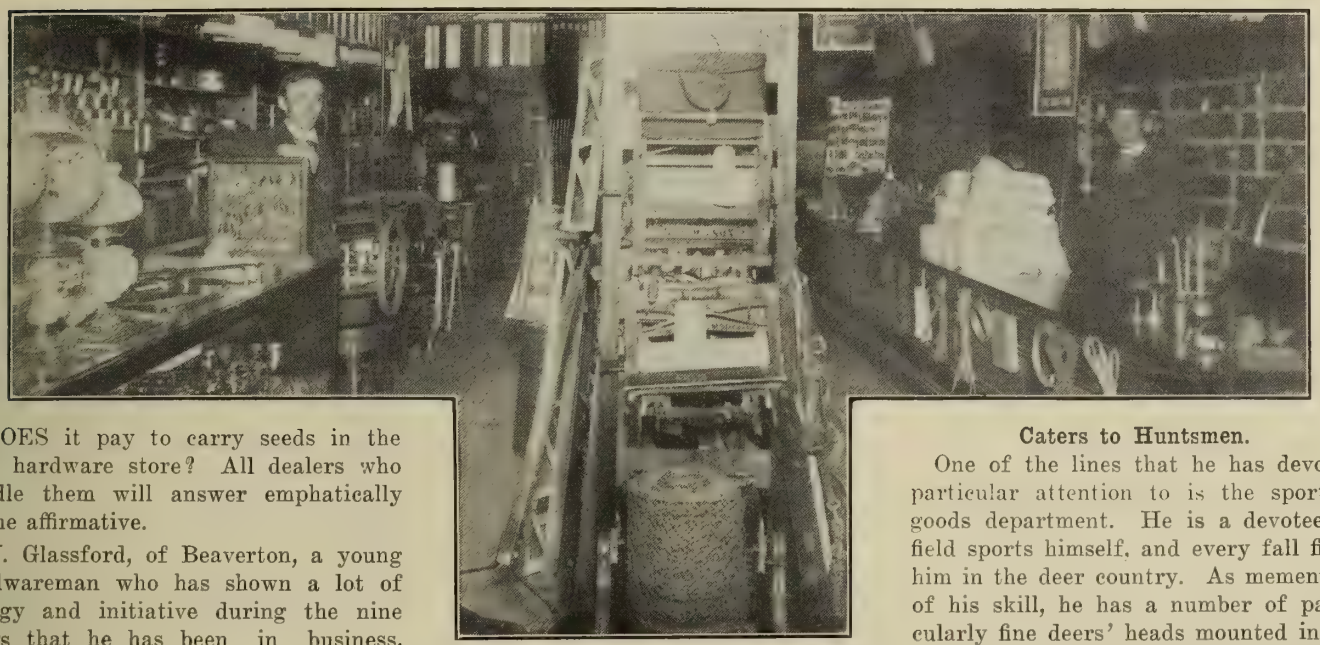
ASBESTOS IN SARDINIA.

Asbestos has been lately found in some quantities in Sardinia as a result of a geological examination, so that a good supply could be obtained there. The region containing the mineral lies around Mt. Aspro.

A game of squeeze—From the Montgomery Ala. Adventurer.

Some Advantages of Selling Seeds

A Successful Way to Bring Farmers to the Store for Spring Requirements—The Experience of W. Glassford, of Beaverton—He Also Does a Good Trade in Bicycles and Repairing.



An interior view of the store of W. Glassford, Beaverton, Ont.

DOES it pay to carry seeds in the hardware store? All dealers who handle them will answer emphatically in the affirmative.

W. Glassford, of Beaverton, a young hardwareman who has shown a lot of energy and initiative during the nine years that he has been in business, handles package seeds to a considerable extent. He has found it profitable from several standpoints. In the first place, there is a good profit in seeds and, in the second place, it helps to sell other lines. The seed trade centres pretty largely in the spring, and that is the time of year, of course, when the farmer [illegible] does the bulk of his hardware purchasing.

Handling seeds serves, therefore, as a means of bringing farmers to the store. They drop in to buy seeds and stay long enough to buy other articles; a scythe, perhaps, or some wire fencing or a keg of nails. It has been the experience of Mr. Glassford that the carrying of a stock of seeds is one of the surest methods of attracting the farm trade.

He carried also a number of lines of a somewhat similar nature, all having a special bearing on the question of farm trade—live stock and poultry tonics among others. As will be seen from the accompanying illustration, he keeps these goods in a prominent part of the store where they can always be seen. He has worked up a good connection, and sells in large quantities.

The chief advantage of carrying seeds in a hardware store lies in the fact that, by so doing, it is possible to supply practically all the spring needs of the farmers. They do not have to go to other stores to get supplies. Consequently, there is no inducement for them to transfer their custom in goods which they have always purchased from the hardware store.

Bicycle Repair Business.

Mr. Glassford has adopted measures in other departments which show energy and initiative. He has gone extensively into the bicycle repair business. There are excellent roads around Beaverton and "wheeling" is a favorite pastime. Everybody, that is everybody who is anybody, possesses a bicycle and there is, in consequence, a steady business in the repair line. Mr. Glassford devotes much of his spare time to it and finds that it pays him well. He carries a complete line of bicycle parts and repairs.

Skate Sharpening.

In some lines repair work is quite as profitable as selling goods. Skates, for instance, have to be sharpened at more or less regular intervals. Mr. Glassford decided that there was no reason why he should not reap the benefit of it, and he, accordingly, put an electric motor in and started in the sharpening line. It proved a good venture. There is always a certain amount of time during the winter when there are no customers in the store, and the hardwareman has nothing special to look after. The installation of the motor solved the problem for Mr. Glassford, and provided him with a steady occupation for every idle moment.

Caters to Huntsmen.

One of the lines that he has devoted particular attention to is the sporting goods department. He is a devotee of field sports himself, and every fall finds him in the deer country. As mementoes of his skill, he has a number of particularly fine deers' heads mounted in his home. He knows every hunter in the district, and, consequently, when they want a new rifle or a supply of ammunition, they just naturally drift over to Glassford's. In the sporting goods department, he carries baseball goods, lacrosse sticks, fishing tackle, tennis goods and a very large stock of hunters' supplies.

SOME FLAXSEED POINTERS.

Prof. C. P. Bull, of the Minnesota State Agricultural College says there is danger that American farmers will not sow flax as largely this year as they did last year. He sounds a note of warning to all crushers and others who are interested in seeing the market plentifully supplied with flax seed from the next crop to take such steps as they did last year to induce farmers to sow a great deal of flax seed. He says the fact that flax seed that is picked out for seeding purposes cost as much as $3 a bushel is likely to make many farmers disinclined to put in flax this year. He remarks that the total amount of flax seed produced last year by Minnesota and North and South Dakota was smaller than the combined crushing capacity of the Minneapolis oil mills. One idea that he would like to see instilled into the minds of the North-western farmer is that the common report that flax seed speedily exhausts the soil and that flax seed can be successfully grown only on virgin soil is entirely erroneous.

Chinaware and Cut Glass Prove Profitable

The Old Order in Hardware Stores Has Largely Changed—Had Rip Van Winkle Been a Hardware Dealer Twenty Years Ago, He Would Find Many Strange Lines Upon Returning From His Protracted Snooze—China and Glass Now Used to Attract the Women—These Lines Especially Good at Special Seasons.

SUPPOSE Rip Van Winkle had been a hardware man instead of a no-account loafer; suppose he had fallen asleep in some of the Canadian mountains, suppose he had but recently awakened from his twenty-odd year snooze, and had returned to his former place of activity; what a shock would be his. "Why," would say Rip, as he entered his old store, "there must be a mistake here. This is not my old hardware establishment. Look at the old shelves. Those are not the goods that I showed when I went away. Look at the brassware, and the cut glass, and the china. Alack, they have changed the store entirely. It is no longer a hardware store although I do see some of the good old lines I used to carry."

But Rip would be wrong. The store would still be a hardware store, only a better one than he had known. During the twenty odd years that he had been sleeping, the ideas of what might well be sold in a hardware store had broadened, that would be all. On close examination Rip would find that the old class of goods were still carried, and in improved patterns; only there would be other lines too—lines which he had never thought of giving a place on his shelves or his counters.

Change in Hardware Stores.

Indeed there has been a change in the hardware stores in the past two decades. Enter almost any establishment and this is to be seen. There are still some stores which handle only what are known as shelf hardware lines, but these lines have so multiplied and improved that an old-timer would be helplessly confused looking over them. Yet shelf hardware, in the great majority of stores, is but one of many lines. From it good profits are secured, but there are other goods which also repay careful display. Indeed the tendency of modern times has been to stock a variety of articles, so that such a thing as a really dull season will be something unknown. One line appeals only to one class of people, and often it appeals to them only at a certain season. Many lines mean that the store is made attractive to many in the community; and while business in one class of goods is quiet, there will be activity in other lines. So the business of the whole year is tremendously improved.

No Christmas Trade in Past.

In those old days, before the hardware Rip Van Winkle lay down for his somewhat protracted nap, such a thing as Christmas trade in the hardware store was well nigh unknown. The spring season, with its many weddings, also meant little to the hardware dealer. He let other merchants reap the benefit of the buying which went on in those seasons. But little by little—more rapidly of late—the change has come. Now no establishment presents more attractive features at Christmas time than does the hardware store; and no store offers more attractive and appropriate wedding presents than does the hardware store. Not only is cutlery to be secured there, and silverware and brass goods, but in many stores the ever popular cut glass is to be found prominently displayed, and a large number have undertaken the handling of china.

Silent salesman used to show cut glass in the Fawcett Hardware Company's store, Tweed.

There will be dealers who will shake their heads at this. "Nothing in it," they will say. "Better stick to the old lines." Perhaps. Perhaps that is the best course in their community, but there are other districts where other things are true. J. S. Mitchell of Sherbrooke, for instance, has been handling china for some time now. With him this has not been a foolish move. It has brought him large returns, and moreover has helped to make his store more attractive to the women. A great actress—if memory serves it was Clara Morris—remarked, "Only those plays last which please women." Possibly the same assertion would not hold true of a hardware store, yet it must be conceded that the hardware store which pleases women has a great advantage over the one which merely appeals to the men. Men want something and come for it. Women see something, decide they want it, and then buy. A woman inside a store is more likely to make a second

Array of china and kitchen accessories, as prominently displayed in the Fawcett Hardware Company's store, Tweed.

purchase, of which she had not thought when entering, than is a man.

Specialties Draw Patronage.

So Mr. Mitchell has found his china, cut glass, and silverware department, pays well—not only in the profits which it gives, but in the extra business it draws to the other departments.

Sherbrooke is a good sized city, it may be said. These lines would naturally be good there if the competition is not too keen. But it would be a different thing in a small town. Well Tweed is not of any tremendous size, and yet there C. F. Fawcett, manager of the Fawcett Hardware Co., has handled china and cut glass extensively, and has found them paying lines. "They bring very large profits at Christmas time," says Mr. Fawcett, "but they are good at other seasons too, especially in the spring when people are housecleaning, and when they come to see more clearly than at other times what new china they need."

There is a good deal, of course, in the way these lines are displayed. Put them in a back corner and they will do a back corner business. Mr. Fawcett has found it advisable to show them prominently in the front part of his store. His place of business is roomy, so that he has been able to devote one side to the more recognized hardware lines, and the other to china, cut glass and specialties. In a large silent salesman he has some especially attractive glass lines shown. Behind, and stretching back further into the store, the china is arranged, on shelves, and on a counter especially made for such a display.

Spring a Good Season.

In this store, the china and glass is given this place of prominence practically the whole year through. In others this might not seem a wise course; but it would appear that it may well be brought to the front at special seasons—and spring is one of these.

A Brandon merchant has had a peculiar and satisfactory experience with cut glass. He did not think that it would prove a profitable line for him; but one day he gave ear to a good salesman who convinced him that it would be worth his while to give the glass a fair chance. "You have a case here," said the salesman, "which is practically lying idle now. Let me put some goods in that."

Gave Glasses a Chance.

The hardwareman still protesting that he wouldn't have enough sales to make this worth while, consented. A month or two later the traveler called again, and found the stock which he had left almost exhausted. The goods had sold rapidly, and the merchant placed a good order—an order which but the first of many.

Somewhat similar have been the experiences of many merchants. A man who has handled the regular hardware lines for years finds it a little against his inclination to carry these goods which he regards as specialties. Sometimes he is wise not to do this. On the other hand there are many dealers who declare it is from the specialties that they make their money. The advisability or inadvisability of a man adding these lines is a question which each must consider carefully; but it is certainly a question which an up-to-date merchant cannot afford to disregard.

Motor Accessories Prove a Profitable Line

Those Using Automobiles on the Road, Motor Boats on the River, or Stationary Engines on the Farm Need Repairs—In west and east this is true—The Business is One Which Will Grow From Year to Year—Profits are Being Secured from Handling Gasoline, Too.

THE multiplying of the automobile has brought about some changes. In some localities it has necessitated the adoption of means to lay dust. In every locality it has been responsible for the introduction of speed laws. It has been the force which has lead to the purchase of tacks by some irate farmers. Many changes have come with the automobile, and among others there have come some changes in the hardware stores. These now derive a good income from the drivers of these motors.

Touring is the fashion at present. Parties start out in their roadsters and cover several hundred miles before they return. They need gasoline along the road, and for the gasoline they give good coin of the realm—or coin of the country to the south. Here is one source of income to the hardware dealer. A number have arranged to supply automobilists with this "gas"; and from this trade they declare they get good returns.

Gasoline Worth Handling.

Alf. Outram, of Port Hope, has been handling gasoline for automobilists for some time. He has profited. There is some opposition, but the cars are going through Port Hope at all hours of the day, and Mr. Outram gets his share of the business. Nor has carrying gasoline necessitated his paying a higher insurance rate. That can be avoided by establishing a proper gasoline tank.

W. W. Bennet, in Gananoque, has for some time been doing a big business in gasoline, though his is more with those operating motor boats than with drivers of automobiles. His tank is placed near the river. A man is left in charge of this, and throughout the whole summer a good business is done. Mr. Bennett also finds it pays him to carry a good line of motor-boats accessories. There are hundreds of crafts on the river. Breakages are occurring daily, and the

The store of L. F. Heartwell in the new town of Rosetown, which already boasts many automobiles.

owners are delighted to get the parts necessary to make the needed repairs so near at hand. Business in this line, it must be remembered, comes from quite a distance. One man has something go wrong with his motor and tells his neighbor where he got the part to make the needed repairs. This neighbor sees a friend with a faulty carburetor, or with a worn-out spark plug, and he advises him where be can replace these. There is a fraternal feeling among the operators of motor-boats and motor-cars. They have joys and sorrows in common, and they are always glad to give one another a hint.

Accessories in the West.

Out in the west, too, these accessories are being largely sold. In Rosetown—one of the youngest of the mushroom growths—L. F. Heartwell has established quite a business in these lines. He is now thinking of handling automobiles, for the accessories have proved so profitable.

There are a number of cars in Rosetown, and the surrounding country, but it is not for these only that accessories are needed. Many of the land owners

also have large trucks. Gasoline engines are to be found on practically every farm. For all of these machines it is necessary to keep supplies. Let a part be wanted, and the man who wants it wants it at once. He can not allow that machine or car to remain idle until the new part arrives from the east. This was the need, which Mr. Heartwell met, and he has reaped good profits as a result of his initiative. Gasoline is a tremendous business out there in the west, but the trade in accessories seems of almost equal importance.

Parts Bring Remunerative Trade.

On a smaller scale, but still somewhat similar, is the business being done in accessories in Eastern Ontario. There, too, the exhaust of the gasoline engine

W. W. Bennett, Gananoque, who does a large gasoline trade.

is to be heard on the farm. There, too, parts will get out of order; and there, too, immediate repairs are desired. Some owners of gasoline engines keep some spare parts, but few have anything like an adequate stock; so there is a good chance for the hardware dealer to build up a remunerative trade.

Aaron Sweet, of Winchester, is one merchant who has done this. Mr. Sweet has no place where he could well keep gasoline. and fearing fire, he determined not to handle this line. But he knew there were a large number of automobiles passing through the town. He knew there were many gasoline engines on the farms. He knew that the number of these is a growing number, so he decided there would be good business in handling the accessories.

An Increasing Trade.

And carrying these parts has been the success that was expected. They are continually in demenad, Mr. Sweet says, and the call for them is increasing steadily—increasing because the engines for which they are needed are increasing, and because it is becoming more and more generally known that the needed repairs are to be secured from Mr. Sweet.

James & Reid, in Perth, also handle these accessories, and find them a profitable line. Indeed, in this store gasoline engines themselves are sold in good numbers. It is probable, moreover, that the business in this line is only partially developed. Only recently have the farmers become aroused to the great use which they can make of these engines, which do not cost them any tremendous sum.

The coming of the motor—whether it be the automobile, the motor-boat the stationary engine or the traction engine, has undoubtedly made a great difference on the farm, and will undoubtedly make a greater difference still in the next few years. What changes conditions on the farm is of importance to the hardware man. It behooves him to observe closely and to see what he can learn from his obseravtions. He must keep his ear to the ground, and if he does this at present it would seem that he must hear distinctly the chug-chug of the motor. Small wonder that some of the most progressive dealers are grasping the opportunity which they see, and are stocking with the accessories which are wanted now, and for which the demand is going to be increasingly great.

Where Prejudice Interferes with Profits

A Few Dealers Think of Wall Paper With Disfavor, and Thereby Stand in the Way of Their Own Best Interests—If the Opposition is Not Too Keen, This is a Line Which Hardwaremen May Well Handle—Experience Has Amply Proved This—Supposed Obstacles Have Been Overcome Time and Again.

THERE is a homely old injunction which runs something like this: "Don't bite off your nose to spite your face."

It would seem that none would be so foolish as to do this, yet such proceedings are taking place daily. Nor are all hardwaremen heedful of this advice. Many are doing the very thing against which they are cautioned. They are letting some little prejudice stand in the way of their financial benefit.

Prejudice is one of those things which is a little hard to understand. It is like the Nile before the days of Livingston—its source is unknown. The finish of prejudice is not known either; yet it usually means some one's finish.

Is Wall Paper Hardware Line?

For some reason—source unknown—some hardwaremen have contracted an antipathy to handling wall paper. This, they say, is not a hardware line. True, some hardware men are making money out of it, but they personally do not think they would be repaid for adding such a department. Perhaps these men may be right. If they are in a place where some other stores have been carrying wall paper for years, and have come to be generally regarded as the place to buy wall paper, it would not be wise, perhaps, to start handling this class of goods. Yet if there is a good chance to take up these goods a dealer is foolish in the extreme if he allows anything to stand in the way.

Some Excuses.

It is strange what excuses men will make for not carrying these goods—and at the same time another man in a neighboring place will be overcoming similar difficulties and securing, as a result, good profits.

Lack of space. That is one of the causes most often given for not carrying wall paper. Dealers admit that they have an opening in this line, but declare they have not the room to carry the goods. These should examine some of the stores in which wall paper is sold extensively, and yet, where there is little space given to it. A long list of such could be given. Clarke Lewis, of Smith's Falls; James & Reid, of Perth; Taylor Bros., of Carleton Place. These are three concerns which make good profit out of wall paper, and which hardly show any on the floor of their store. Sometimes, about this season, they arrange window displays; but the samples are shown up stairs—not always in rooms easily accessible either.

Advantages to Poor Position.

Mr. Lewis contends that there are advantages in having the wall paper in an out of the way place. Thus those considering a purchase can be more isolated. No one will interfere and criticise their selection just as the sale is to be concluded.

Thus one objection seems to be rather inconsequential. Some dealers have been able to carry wall paper profitably

in what would seem poor space, why then can not others?

But there are dealers who declare that there is a lot of waste in wall paper.

It is true rolls will be left over if no care is shown, but a wise salesman will so present his goods that very few rolls are lost in this way. Then there is a big profit in this class of goods. The little waste is but a small fraction of the profit—indeed the odd rolls even may often be put in a special sale and sold for something more than cost. That has been done time and time again by hardware men who take wall paper seriously, as of course it should be taken.

Where Clerk Objected.

There is a dealer in Eastern Ontario who has a head clerk to whom he allows a good deal of license, because that clerk is a good man and takes a real interest in the business. But this clerk objects to wall paper, and in that one regard the dealer pays no attention to his wishes. The clerk would abolish paper from the store, not for any good reason, but simply because it is a line which does not appeal to him. The store owner will not listen to this because the wall paper brings good profits, and good profits do appeal to him.

"You know," remarked this dealer, "John doesn't like this wall paper. It required a good deal of care and he would rather put the work on other lines. All the same I'm going to buy some new stock. The paper pays me well, and as long as it does that I am not going to make a change. Any way I like the paper myself. I would as soon show it to a customer as any thing else. It brings the women into the store, too, and that is a good thing. Once get a woman inside the door and there is no telling what she will buy."

Prefer to Stoves.

There are districts, as has been indicated, where wall paper might not be a good branch to a hardware business. The opposition always has to be considered. On the other hand there are places where dealers prefer to carry it to some other well-known class of goods.

This line of goods is becoming more and more popular with the hardware dealers. They are judging it upon their merits, and are giving it a place in their stores.

Current News of Hardware Trade

Wants Western Site.

Winnipeg.—A. H. Coplan, general manager of A. H. Coplan Co., Ottawa, brass founders and manufacturers of steel castings, is in the city with a view to securing a location for a western branch.

New Saddlery Factory.

Walkerton, Ont.—At a well attended meeting of the Board of Trade a resolution was passed asking the council to submit a by-law to the people as soon as possible, giving "The Canada Saddlers' Hardware and Steel Goods, Limited," a free site, exemption from taxes (except for school purposes) for ten years, and free water for five years.

To Occupy Store Soon.

Eburne, B. C.—Gordon & Son, dealers in hardware and furniture, expect to move into their new quarters in the Gordon block in a week or two.

Given Gold Watch.

St. John, N. B.—The fellow employes of Harry S. Mundee, in the hardware store of W. H. Thorne & Co., honored him this week, on his leaving the employ of that firm by presenting to him a valuable gold watch chain and locket as a token of esteen and friendship. The presentation was made by Stanley Fisher, manager of the retail stores. Mr. Mundee is leaving this week for Kentville, N. S., where he will enter the employ of W. W. Rockwell, hardware dealer.

New Warehouse Erected.

Akron, Que.—The Herman Young Co., hardware dealers, have erected a warehouse on their St. Roch Street property. The new building is of three stories, specially designed, constructed and laid out for the receipt, storage and shipment of hardware goods. Among many other conveniences there is an electric elevator in the centre of the building and stairways at either end, passing to the upper floors; also telephonic communication with the main establishment, which is located a short distance farther down on the same street. A new labor-saving device, in the way of an overhead trolley, for handling heavy goods, has also been installed.

Business Changes.

Simcoe, Ont.—Schaefer Bros., New Hamburg, have purchased the hardware business of J. D. Murdock.

Napinka, Man.—Jack & Woods have bought the hardware store formerly owned by De Wett Bros.

Stewart, Sask.—A hardware business has been started here by Joseph Callahan.

Liberty, Sask.—D. and H. F. Smith are starting in the hardware business here. They expect to open up soon.

Regina, Sask.—The firm of Dunlop & Marshall, hardware dealers, has been dissolved. Wm. W. Munro has acquired the interest of Mr. Marshall, and the business will be continued under the firm name of Dunlop & Marshall.

Staff Changes.

Mr. Harper, formerly of Lenton & Hall, Calgary, has now joined the staff of J. T. McDonald, also of Calgary.

Montreal.—Duncan Campbell, hockey player, referee, Veteran of the Boer War and several other things is moving to Calgary to take charge of the Western business of Mussens Limited.

Personal Notes.

A. D. Cantin, formerly with Simonds Canada Saw Company, has joined the sales staff of Lewis Bros. He will travel through Beauce County.

ROPE ADVANCES TWENTY-FIVE CENTS A CWT.

Montreal, March 20.—The price of rope has been advanced, and hereafter dealers will have to pay 25 cents a hundredweight more for a number of the lines.

"This advance was absolutely necessary," said the head of one rope concern to a Hardware and Metal representative. "We have been paying more for our raw material of late. Indeed, many rope fibres have been costing us from a cent to a cent and a half more a pound. We cannot put that into rope and sell it at the old figures."

A number of the old hemp contracts expired at the first of the year. It was then the makers were required to pay increased prices for the fibre. That was the time the necessity for advancing the price of rope became apparent, but as the consumption was not large during the winter the manufacturers waited until yesterday before they struck the higher figure.

EFFICIENCY
IN
THE PAINT DEPARTMENT

Maintaining a Separate Paint Department

The Method Adopted by Ingram & Davey, of St. Thomas, with Splendid Results—They Find it Possible to Concentrate More on Paints and Specialties—Expert in Charge of Department.

THE placing and arranging of the paint department are prime considerations. The tendency to "maroon" the paint stock in some neglected corner of the store is unfortunately too general. The inevitable result is a loss of business.

To get best results, it is necessary to house the paint stock properly and to see that the department gets proper attention. One of the best arrangements, both as to location and management, that could be devised is that followed by Ingram & Davey, of St. Thomas. The reputation of the firm of Ingram & Davey is so high that one would expect them to handle so important a line as paint in creditable manner; and the expectation is not disappointed.

The outstanding feature of their treatment of paint is the fact that the department is separate from the rest of the store. It is walled off from the main store in both basement and ground floor, and has a separate entrance on Southwick street. There is, of course, direct communication with the store, so that customers can enter in that way also. The department is 40 feet long by 15 feet wide, and thus gives ample scope for the featuring of all paint lines and specialties. Every foot of the space is utilized to best advantage.

The inside wall is used for paint shelving, which runs to the ceiling and extends over the entrance into the main store. In front is a counter and silent salesman—the latter being used for the display of such lines as brushes.

On the other wall nine Bowser self-measuring oil pumps are placed, each having a tank capacity of 100 gallons. In the southeast corner is an electric freight elevator. Selling helps and printed lithographs are hung around and tend to add brightness to the appearance of the department.

A view of the paint department in t he store of Ingram & Davey—It has a separate entrance on street.

Big Success Scored.

This arrangement was first made three years ago. It has been found an unqualified success. The experience of Ingram & Davey has been that it pays to run the department separate rather than to mix the stock with the other goods in the main store. They have found that there are many advantages in the system. It is possible to keep the stock sorted up and displayed in better shape. Customers have a better opportunity to look the goods over. In fact, it becomes possible to concentrate on paints. There is one part of the store where nothing but paint, varnish and kindred lines are shown, where every square foot can be utilized with the one object in view of pushing paint sales.

A Department Manager.

The department has been for three years under the management of a member of the store staff, C. A. Hood. The advantages of this system are quite apparent. Mr. Hood is able to concentrate all his energies on the one line. He has become, as a result, a highly specialized salesman of all paint goods, and has worked up a big connection with the paint trade. Having given considerable time and study to the subject, he has become recognized as an authority, and his advice is continuously sought on matters pertaining to the use of stains, the harmonizing of colors and such like. Customers can depend on learning from him just how the material they have purchased should be applied to get best results.

This is an important point, a strong argument in favor of putting the paint department on a separate basis. The average person knows practically nothing about the handling and use of paints, varnishes and stains. They require a certain amount of instruction, and the store which has someone who can be relied upon to supply the necessary information is bound to work up a splendid connection. Now, it is not an easy matter to coach all members of the staff in the technical sides of paint. But if one man is placed in charge of that department, he has the opportunity to become thoroughly schooled and to thus insure that the goods he is selling are going to give satisfaction; for good varnish and paint will not give the results, if through ignorance on the part of the user, they are applied wrong.

Talk Quality.

Ingram & Davey attribute a good share of their success in the paint business to the fact that they believe in pushing quality goods. When customers call for something cheap, they endeavor to point out the false economy of this. They show that the poor paint will not stand the severe tests of time and exposure, and that it will be necessary to repaint much sooner than if a good variety of ready prepared paint were used in the first place.

This is a point which should never be lost sight of in paint salesmanship. Painting is a process which must be repeated often. The man you are selling to will be needing more before long. Satisfy him and he will come back to you when that time comes. Fail to satisfy him and he will go elsewhere; and, what is more, he will probably give a black eye to a dealer on every occasion that may arise. It follows then that it is exteremely necessary to promote satisfaction among paint customers. If you sell cheap stuff, the price will satisfy the customer in the first instance, but dissatisfaction will come later.

Ingram & Davey have found that it is highly essential to establish a reputation for selling paint which lasts and gives satisfaction and they bring all their energies to bear on that point. Quality is the keynote of their campaign. Another big advantage is that they can guarantee the goods when sales are made on a quality basis.

Displaying Paints in the Store

Manufacturers Want the Customers Dealer's Shelves—Dealers Who Have Given These, and Given Them in a Good Part of the Store, Have Been Well Repaid—One Man's Business in Paint Increased Thirty-Five Per Cent. Immediately After He Gave the Department a Better Position.

"What we want to get," remarked the sales manager of one of the largest paint companies, "is the shelf room of the hardwareman."

Of course this man was speaking somewhat figuratively. He did not mean that shelf room is the only thing to be considered. He is in a position to realize the need of the retailer's co-operation—the need of the merchant's progressive salesmanship. But what he did mean was this, that if the hardware dealer will consider paint worthy of a prominent place on his shelves, all these other necessary things will follow naturally.

Cellar Position for Paints.

And indeed there is much in that. "I remember reading the signs over some hardware stores," remarked a speaker on paints at the Guelph convention. "They used to run something like this, 'John Doe, Hardware, Metals, Stoves, roofing'—then down below, in small letters would be, 'dealer in paint, oils, etc.' That cellar position of the paint notice always struck me as appropriate for upon going inside the store I usually found that the 'paint, oils, etc.,' were kept in the cellar."

This is the thing the paint manufacturers are trying to avoid, and this, too, is what the best dealers are avoiding as much as is possible. Paint is both an attractive and a profitable line. It deserves a good place in the store, and it brings returns to the man who will give it that place.

Probably there is hardly a dealer from Halifax to Vancouver who will deny this. Experience has proved it to be so; yet even to-day there are a number of merchants, who put their paint line in an inconspicuous place. There the paint is, and he who asks for it will be supplied; but he who does not ask is not likely to have the desire for this class of goods stirred within him.

No Need to Mention the Exceptions.

However little need be said of these stores—stores which seem to serve the god of things as they ought not to be. A far more interesting and more profitable thing it is to devote some attention to places where the dealers have met the wishes of the manufacturers, have placed the paint in a prominent position. It would be impossible to mention more than a few cases where this has been done. There has been a great change in the handling of this line in the last few years. Dealers by the hundred are playing up their paint. They are making attractive displays of it. They are arranging it tastefully inside the store. To mention the names of those doing this would be like giving the names of those present at banquet tendered the merchants of all the Dominion. Many would be in the roll call. But it is possible to cite a few instances. Perhaps they differ hardly at

all from others which might be quoted, but they serve to bring out a great point—that the dealer as well as the manufacturer is benefited by giving real prominence to his paint department.

Whole Trade Benefits.

Owen & Birmingham, in Campbellford, carry on business in a store which is not of great size. Their shelf room is limited, yet they have found it wise to give their line of paint, room at the very entrance to the store. It is not there in spring only, when the greatest demand for this commodity is felt. The cans are thus prominently arrayed the year round. What is the result? Why large sales of course. In fact this firm, the manufacturers of the paint carried say, is numbered among their best accounts from places of moderate size. Nor does the large sales secured here mean small sales for the other dealers in the place. That is a peculiar point about Campbellford. There are four good hardware stores there, and every one of them does a remarkably fine paint business. All make good displays, and so a demand has been aroused throughout the whole district which has resulted in a splendid business for all.

Shows Benefit in Per Cent.

Max Hill, manager of the James Walker Hardware Company, Montreal, is one who has proved in per cent. that it is good business to place paint in a prominent position. The store over which Mr. Hill holds supervision has been recently altered and improved. Before the change was made it was impossible to put the paint department as much to the front as was wished. But since the enlargement this part of the stock has been arranged near one of the entrances. A show window has been set aside largely for paint. A man has been put in complete charge of this branch. Result—why the only result which might properly be expected. The new system had hardly been established when the sales improved. In the first three months Mr. Hill says the paint business increased thirty per cent.

T. S. Tait & Sons, of Campbellford, also have found that prominence pays profits. In 1910 their paint business was good. In 1911 it was better; and 1912, so far, has been well ahead of 1911. This is leap year and it is the profits which are leaping.

Mr. Tait has always had fine success with paint, and undoubtedly he owes much of that success to the fact that he has always given the paint a chance to speak for itself. There has been no cellar position for this department in his store. He has kept his front shelves full of cans. He has used selling helps. He has had the stock to hand so that he could point it out to the farmers who come to the store for other goods. In this way many who had not thought

Part of paint display in T. S. Tait's Campbellford store. The well filled shelves are near the front door, not in a far off corner.

This section of the Maritime Paint & Varnish Company's store in Halifax shows how attractive a paint display may be made if space is no consideration. The idea of showing brushes in the very midst of the paint is worth noting.

of painting have been made to see that they might profitably expend some money in this way.

Display Brushes With Paint.

The Maritime Paint and Varnish Co. of Halifax, is, as its name implies, devoted practically exclusively to the sale of paint. Here, therefore, those in charge have an exceptional opportunity to make a fine display; and they have taken advantage of the chance, as the accompanying picture of one part of the establishment will show.

There are other sections in this store in which varnish, paint brushes and wall paper are shown. But it will be noticed brushes are brought prominently to the attention of those visiting the mixed paint section. A man buying some paint is not likely to go elsewhere for the brush which he needs to apply it.

Window Displays are Always Effective

Dealers Should Use Them to Assist in Educating Property Owners Away From Penny-Wise Pound-Foolish Policy—Good Results Obtained by One Man Who Arranges One Paint Display Every Month in the Year.

THE dealer who hopes to build up a large paint trade must make good use of his store windows. A well-arranged display is one of the most effective measures that could be adopted.

Paint lends itself readily to window displays. Attractive arrangements can be planned and, if good use is made of the printed matter and the lithographs supplied by the manufacturers, the window can be constructed on such a striking plan that it will literally compel attention. The writer has seen many such displays recently and has noticed that they invariably attract instantly. Color catches the eye and in no other line can better color effects be obtained than by the use of paint.

Need to be Educated.

"The retail dealer cannot overestimate the importance of the window display as a factor in making paint sales," states a paint manufacturer. "To my mind it cannot be overdone. The trouble is that so many dealers neglect the matter entirely. We have some hardwaremen on our lists who have never, to our knowledge, put a can of paint in their windows."

"Now, this does not pay," he continued. "People need to be educated in the matter of paint. You can see houses wherever you go, rotting for want of paint. The owners are losing money because they have not learned that paint is the greatest preservative possible and the cheapest kind of insurance. These people must be educated away from their penny-wise, pound-foolish policy. The dealer can do a great deal toward their education. He can do a great deal through the medium of his store windows."

Once a Month.

An ever increasing number of dealers have awakened to this fact to the extent of using their windows pretty regularly for paint displays. One dealer makes it a rule to put in one display every month. This plan he follows the whole year around.

"I had the idea once," this man explains, "that paint couldn't be sold during the off seasons. Certainly I had never sold any to speak of during the winter time. The firm whose line I handled kept after me to run displays right along and I finally decided to try this system. During the winter I made up one display a month, using varnishes and interior stains pretty largely. Each display was left in for a week. I was frankly skeptical at the start but my doubts gradually vanished. I sold quite a little paint during the weeks when the displays were in the windows and a smaller quantity in between. The amount sold was not particularly heavy, of course, but it was large enough to more than pay for the trouble taken.

"I found also that this system helped me during the busier seasons. The continuous all-year-around work had taken effect. I was so convinced of the wisdom of it that I have kept up the idea ever since."

The accompanying illustration is of a paint window arranged during the present season by J. C. McFadden, Queen St. East, Toronto. It was a very effective window, bringing splendid results despite the fact that it appeared when the snow was still on the ground. A feature of this display was the careful manner in which overcrowding had been avoided.

Mr. McFadden found that it attracted much favorable notice. People passing, stopped and scrutinized the stock with quite apparent interest.

An early paint display in the store window of J. C. McFadden, Toronto.

Live Methods of a Paint Salesman

How H. Stainton Has Worked up a Big Trade — Visits all New Buildings, Calls on Householders, Displays Paints Prominently, Talks Paints, Believes in Paints and, Lastly, Publishes a Newspaper.

THIS is a story with a moral. And the moral is that it pays to push the sale of paints for all one is worth.

H. Stainton, hardwareman of Wychwood, has been in business about three years and has, during that time, worked up a good connection. A large share of the credit is due to the fact that he has specialized strongly on the sale of paints. The term "live wire" has become hackneyed through over use, but it is the only phrase which describes Mr. Stainton. He is a live wire paint salesman.

Wychwood is one of those suburban centres which real estate men describe as "delightfully situated within easy distance of the city but offering all the advantages of country life." At any rate the advantages of Wychwood are being recognized, for plenty of Toronto people are moving out there and it is growing fast. Houses are springing up all over and it thus becomes patent that there are exceptional advantages for a hustling hardwareman.

Just as soon as a contractor starts to peg off the ground for a new building, H. Stainton arrives on the scene. He has a proposition to offer—building paper, builders' hardware, tinning work and supplies and, above all else, paint. Is the contractor supplied with all these lines? He probably hasn't thought of them yet. Then why not buy from this energetic young fellow who saves you the trouble of bothering about them at all? He probably does.

Mr. Stainton does not limit his paint campaign to new buildings. He goes after the old ones as well. He makes calls himself and sends out literature as fast as the manufacture supplies it. Sometimes he does not send this literature through the mails but has it distributed by one of his staff—a doubly effective method when possible. The effect of so active a campaign can easily be imagined.

An Inside Campaign.

But, after all, this outside work is only one phase of a live paint campaign. Mr. Stainton believes in "inside" work as well. The paint stock predominates in his store. The shelving to the front of the right hand side is given up entirely to paint and varnish. A table in the centre is used to display brushes and specialties. At the rear it is all paint. You seem to see tins wherever you look. He is engaged at the present time in enlarging and remodeling the store and when this has been completed, he intends to devote all one side of the store to his paint and varnish lines.

H. STAINTON, The People's Hardware

44 VAUGHAN ROAD PHONE COLLEGE 837

A small newspaper published by a hardwareman and two other Merchants.

Mr. Stainton has two rules which he always follows in making a paint sale. "I always ask if they know how to apply the paint and I sell them a brush," he explains. "It is surprising how few people know anything about the way to paint floors or to apply varnish and stains. The average person will spoil the job and then perhaps blame it on the goods. So I always endeavor to make sure that they know what they intend to do."

"Now as to the brush proposition," he continued. "I generally manage to sell one with every paint transaction. People forget that they need a brush and in many cases they thank me saving them a second trip."

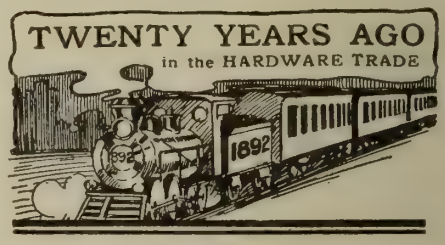
This applies to people who come in to buy paint. Mr. Stainton does not limit his campaign to that class by any means. He talks paint on every occasion to customers. Here is a story which illustrates the point:

A certain manufacturer of paint had occasion to visit the store for some article of hardware. "Are you in need of any paint?" querried Mr. Stainton, not knowing who his customer was. "No, can't say that I am," said the manufacturer. "It would pay you to paint your house this spring," continued the hardwareman. "Now I have a line here which"—and so on. The manufacturer tried to argue the matter but was met on every point. Finally—he tells the story himself—he had to grab his parcel and get out or he would have been inveigled into adding a can of paint to his other purchases.

Mr. Stainton probably owes his success to the fact that he is an enthusiast. He believes in paint and in painting. He infuses this enthusiasm into his customers. And when this feeling is shared even in the smallest degree by the customer, a sale inevitably results.

Issues a Newspaper.

As stated before, Wychwood is a suburb. One of the disadvantages of suburban life is that the suburbanites have things—newspapers among others. Mr. merchants decided that they would overcome this disadvantage and accordingly the "Wychwood News" sprang into existence. It is a two-leaf paper published once a week containing the news of the town and the advertisements of the three merchants together with such other advertising as comes in. The three merchants are the editors. They contribute the news items and write the ads. The news is sent into every home in Wychwood and consequently proves a good advertising medium for the enterprising dealers who carry it on.



The following items are taken from the issue of March 19, 1892:—

"The new wire nail works of James Pender & Co., St. John, N. B., are completed, and the manufacture of nails in a few days will commence."

The firm referred to rank to-day among the foremost manufacturers in the Maritime Provinces.

* * *

"By the time this letter reaches you and is placed before the readers of "Hardware," the coal industry of this country will be struggling with the most severe difficulty which it has yet had to encounter.—Since the autumn of 1888, the miners of Yorkshire, Lancashire, Derbyshire and adjacent counties have compelled the colliery owners to grant an increase in wages amounting to 40 per cent. There is a movement on foot to prevent a strike now by means of keeping up prices, so that the employers can keep on paying present wages."—Extracts from a London letter.

Editor's Note.—It is a coincidence that Britain should be at the present time in the grip of an even more formidable complication which threatens the coal supply.

Weekly Market Report --- Metals

STOCKS ARE LIGHT.

The feature of the situation is the shortage which has developed in some lines. Supplies are particularly scarce in spelter.

Anxiety is felt on the score of the probable effect of the strike in the Old Country, but so far, the markets have shown no signs of weakness.

MONTREAL.

Montreal, March 20.—Those who need good stocks of tin, copper, or lead, would do well to think of making heavy purchases just now. It is wise to buy while the buying is good, and if the buying is not good it is wise to buy before it gets any worse—that is, of course, if indications are that a worse state of affairs will arise. At present, the signs seem to point toward higher prices in these three metals at least, so it would appear that those who need supplies would do well to secure them at once.

Lead Advances Slightly.

The strike, of course, is the thing which is making the higher price level seem inevitable. Lead has been advanced slightly already, and the word from the handlers is that there must be other increases. They look for these to come rather suddenly.

Still metals are scarce locally. The condition has been slightly relieved with regard to spelter, but lead is still exceedingly difficult to secure. Antimony, too, is hard to obtain, but fortunately there is little demand at the present time.

Tin.—Prices on the primary market have tended rather to drop than to advance. The tin plate mills are quiet. Several other concerns where tin is largely used have been forced to close down on account of lack of coal. There is, therefore, no great demand for spot tin. In Canada the supplies are fair. It is not likely that any cessation of production will occur here, but prices are not at all certain to remain at the present figure.

Copper Remains Steady.

Copper.—Those behind this market seem to have been exerting themselves to keep the tone up. There has been increase, rather than a decline in prices. Consumption is hardly as good as it has been for some little time, yet in this respect the strike has probably affected copper as little as any metal.

Locally, the demand continues satisfactory, and the supplies on hand are far from being short. They are none too large, perhaps, yet there is no likelihood of the handlers being forced to curtail.

Antimony.—Here stocks are low, and as no fresh supplies are expected immediately there may be some resulting inconvenience. At present, however, the demand is light and no great difficulty is anticipated.

Short Supplies of Lead.

Lead.—Here there is a call for supplies and but little supply to meet it. Lead is scarce. It shows a tendency to rise in price, too, having advanced 4 cents a cwt. on Tuesday. This was hardly sufficient to affect the local market, yet it shows which way the wind blows. Lead is one of the metals which seems almost certain to touch a higher level before a great while.

Spelter.—Whether the users in the States have carried out their threats to reduce production and thus force down the price of spelter cannot be certainly said; but it is sure that something has made spelter more plentiful. The greater supply across the border is naturally relieving the situation here to some extent.

Iron.—This metal shows but little change. Supplies are getting lower and lower but a cargo is on its way, and unless something interferes with this there will be plenty of iron in Canada by April.

TORONTO.

Toronto, March 20.—The situation has not changed to any extent since last writing. The main topic of conversation on the metal markets is the mining strike in the Old Country and its probable effect on business here. It is agreed that the situation is grave and that trade may suffer to no inconsiderable extent if the strike continues.

Strangely enough, however, business has not suffered yet. Metals continue to show strength and the markets are very active. It is a strong tribute to the real strength of industrial conditions that the demand should continue strong despite the disturbing news from the Old Country.

Tin.—There has been no direct effect felt on the tin market yet. There have been fluctuations in the price but as yet no absolute signs of a distinct downward trend have been noticed. Locally, the price is the same as last week and there is a good demand.

Lead is Firmer.

Lead.—There is a stronger tendency in pig lead. Fractional gains have been reported on the primary markets and, while the local price has not been advanced here, the effect is shown in extreme firmness. Stocks are not heavy but the jobbers have not started to worry yet.

Copper Remains Firm.

The price of copper remains firm and there have been no signs of receding from the high level set last week. It is peculiar that the strike situation has not so far had any appreciable effect on copper. An active tone is reported on the primary markets and the same condition obtains here.

A pretty general feeling of confidence is expressed in the immediate future of copper and, strike or no strike, trade continues much brisker than would have been deemed possible a few months ago.

Spelter is Scarce.

The situation with regard to spelter remains unchanged. There is so little spelter in stock, or in sight for that matter, that a virtual famine has set in. Prices continue the same but they are purely nominal. Few transactions are reported this week and in every case where a sale has been made it has been due to dire necessity.

Just where new supplies can be obtained from is puzzling metal men, but they have not given up hope entirely.

Another Shortage Feared.

Plates and Sheets.—A shortage is feared in plates and sheets also. The strike threatens to play hob with the sheet industry. Already, according to reports, some of the tinplate mills have been compelled to close down.

Difficulty is being found in securing new supplies and local stocks are none too large. In face of this, the demand continues heavy.

Pig Iron Unchanged.

The situation in pig iron is unchanged. Sales continue steady for the time of year. Prices are as follows: Canadian foundry No. 1, $19, and No. 2, 50 cents a ton less. Old Country iron is quoted at $19.50 for Middlesboro No. 3, and $20.25 for Clarence No. 3. Summerlee No. 2 is $22, and Cleveland No. 1, $20.50. Jarrow and Glengarnock irons are at $20 and $22 respectively.

Weekly Market Report --- Hardware

THE RUSH IS ON.

The spring rush is on. There can be no doubt about that. The jobbing houses are shipping goods out now with a vengeance and the retailers are starting to clamor for delivery. The impression seems pretty general, in fact, that spring has at last arrived.

Some anxiety is being felt as a result of the effect of the mining strike on the English cutlery industry.

MONTREAL.

Montreal, March 21.—This week has seen the real commencement of the spring trade. There have been good orders for spring lines before, but only now is the demand for this class of goods becoming general.

Apart from the increased ordering, the feature of the hardware situation at present relates to cutlery. The Sheffield concerns have been among the first to feel the effect of the coal strike. They have been closed down, and as there is a good steady demand for cutlery, both here and in England, it appears this cessation of production will have its effect. At present, the Canadian handlers have good stocks.

Good Time to Buy Cutlery.

It would seem, indeed, that this is a good time for dealers to lay in their stock of cutlery. The price will certainly not go lower, and indications are that a considerable advance may come as the result of the strike.

There seems some likelihood that the travelers will have difficulty getting through the country in a week or so. The roads are commencing to break up, and it is certain that when the thaw really sets in, driving will be impossible.

This condition, which will tie up business to some extent, will hardly be of long duration this year. There is a lot of snow on the ground, it is true, but this is rather loose. It will melt quickly.

Spring Goods.—Still the orders for spigots, and such other lines as are needed in the sugar bush are coming in, but the dealers for the most part have their supply of these now. They are principally occupied with selling the goods to the farmers.

St. Patrick's Day the Start.

Refrigerators are beginning to move. That trade, one retailer stated, usually starts on St. Patrick's Day. People intending to move into new houses apparently hail the seventeenth as the start of spring.

Builders' Hardware.—Here the business is becoming better and better. The season has never really ended, and now that spring is coming the dealers are hurrying to get in their stock. All the big lines are needed now—the hinges, the locks, the nails and bolts. Then specialties such as closet pegs, window fasteners and such lines are in demand.

Specialties.—This is a season when goods which are used in the interior of a home are especially in demand. One local house reports the largest order for curtain pole ends that it has ever had. The curtain poles are needed in the new houses and the manufacturers must have the ends. Brass tubing, such as is used largely for curtains, is also selling well. Jobbers are receiving orders for this almost daily, and the dealers state that there is already a good retail demand. It is a line for which the call increases greatly as May approaches.

Electrical Lines Moving Well.

Electrical goods are selling remarkably well. They are likely to move even more briskly. Retailing is especially heavy about the wedding season, and it is confidently expected that the dealers will lay in good supplies of these goods in preparation.

Sporting Goods.—For the time being, indoor games are the thing. There is little else for the sport lovers to do. But the weather will soon change, and in anticipation of this the dealers are buying baseball, golf, tennis and boating goods. They are also laying in a good stock of fishing tackle. With these lines, windows are being dressed, and thus is the thought of summer sports being brought home to the people. Let the warm weather once come and there will be no long wait for the demand.

TORONTO.

Toronto, March 20.—Business is exceptionally good in all lines. The favorable weather conditions have created a feeling that spring goods will be in demand from now on and the dealers are losing no time in stocking up. Deliveries are heavy; quite a little heavier than usual at this time of year. Local jobbing houses are well pleased with the business done up-to-dae and a quiet spirit of optimism prevails.

Seasonable Lines.—There is an active demand for spring goods. Axes, spades, shears, rakes, lawn mowers, sprinklers, hose, screens and wire fencing are among the lines now moving out in largest bulk. Many of the orders received are for immediate delivery; others stipulate that the goods be sent on within a period of two weeks.

A Steady Tone.

Builders' Hardware.—Orders are coming in on every mail and the travelers are booking up briskly. There is a regularity to the demand, in fact, which is indicative of singular activity in building operations. It is apparent that a great amount of building is being done already, for retail dealers state that they are selling quite a little builders' hardware.

There has been, as well, a good movement in tools.

Heavy Hardware.—There is a good seasonable demand in all lines of heavy hardware. Nuts, bolts and rivets are moving and wire is showing activity. Present quotations are:—Discounts on carriage bolts, ⅜ and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7½. Wire nails of all sizes are much in demand.

Household Goods.—Enquiries are coming in for all variety of household goods and booking is pretty brisk. Already a number of large orders have been placed for refrigerators and a few shipments —on request—have been made. Housecleaning goods are being sent out in large bulk. Everything from brass tacks to vacuum cleaners is selling now. There is also a good demand noted for specialties such as brass tubing, curtain poles and rings, brackets, casters, furniture knobs, etc.

Cutlery.—The situation with respect to cutlery is being closely watched. The strike in the Old Country is likely to paralyze the English cutlery industry, and this would undoubtedly have a serious effect on conditions here. With the time drawing close at hand when supplies will be needed to meet the wedding present trade, which is always heaviest in June, the strike assumes dangerous proportions in its bearing on cutlery.

Sporting Goods—Interest is rapidly rising in sporting goods and orders are "picking up." It requires a bright sun and that indefinable feeling of spring to turn the thoughts of the sport lover towards baseball, fishing and shooting supplies. Now that the weather man is showing a tendency to supply just this kind of weather, the dealers are beginning to see the necessity of stocking up. Orders, as a result, are now pouring in.

Weekly Market Report---Stoves

THE SPRING AWAKENING.

Activity is now noted in all lines. There is a particularly good demand for sugaring and dairy supplies. Stoves are also starting to move and the furnace industry is coming to life.

MONTREAL.

Montreal, March 21.—Of late, while there has been great activity in certain spring lines, the orders for stoves have not been exceedingly large. It begins to appear, however, that this condition is to be quickly changed. Stoves are now being ordered—some lines especially are in demand.

Nor are furnaces inactive. Building operations have changed greatly during the past few years. The present plan is to keep busy all winter, and this means that many houses are being completed at this season. The contractors are rushing them, so that they may be ready for renting on May 1—the great day here. This of course means that furnaces have to be installed.

Possibly the biggest line at present, outside of kitchen utensils and sugar camp necessities, is gas stoves. The season for these is commencing, and the orders are already beginning to come in.

Spring Goods.—The majority of dealers now have their supplies of milk cans and sap buckets. A few sorting orders are yet being received for these, but nothing more. There has been no further change in prices, though it is freely stated by the manufacturers that there will have to be another advance if the strike is not soon terminated. Metals are none too plentiful here now—let the sheet metal mills remain closed down much longer and there will be a scarcity which must cause a considerable advance. Some who use sheets in quantities are ordering largely new. It would seem they are wise. They can hardly lose, and they may quite possibly gain largely.

Ranges, Heaters and Furnaces.—The ordering has not become heavy yet, but a number of dealers are letting their wants be known. They are not asking for immediate delivery, but want to be sure they will get the stove when they need it.

Gas Stoves.—"Yes business is beginning now," remarked one retailer. "We have had our gas ranges on the floor for some time, and now they are beginning to sell. The people as a whole are buying good stoves. They seem to be awake to the fact that a few dollars extra is not much when the life of a stove is considered.

Kitchen Furnishings.—This is the season for these. Now housecleaning is being started and the needs of pots and pans is being noted. The dealers are keeping their ware to the front. Some are showing aluminum ware. Others have windows of graniteware. All are finding a ready sale.

Manufacturers are meeting a demand from the West and the East, too. In both places an early spring is expected, and therefore these goods are selling even more rapidly than in Montreal where the snow is still piled high.

There seems to be little or no trouble with collections. Many retailers are taking the thirty days' discount. They seem to have the money.

TORONTO.

Toronto, March 20.—The near prospect of spring has caused a marked stimulation in the stove trade and more particularly in such lines as dairy and sugaring supplies.

Sap will be running any time now and dealers are stocking up in readiness for this event. Sap buckets and boilers are very much in demand. Several large orders were shipped out this week. The favorable weather conditions have created a livened demand also for stoves of all lines.

Retailers Now Insistent.

Spring Goods—For these lines the orders are flooding in. Every mail brings quantities of letters to the manufacturers, for the promise of an early break in the weather has brought those who have sugar bushes to the stores. They are ordering sap bits, sap buckets and similar lines, and the dealers who have not secured a good enough stock of these are insistent in their demands upon the manufacturers. They are calling for immediate delivery of their goods, and this the manufacturers are finding a little hard to give.

Milk cans continue to move well. The slight increase in the prices noted last week has not had any tendency to reduce the ordering.

Oil Heaters Selling Well.

Ranges, Heaters and Furnaces—Ranges are beginning to move for the spring business, although the demand has not yet grown to anything like its full proportions. For heaters there is very little call just at present, and practically no activity is shown in furnaces. Later some of these will be installed, in houses which have been rushed along through the winter and which are just now reaching completion, but for the time being few sales are being made.

It is for oil heaters and oil cooking stoves that the demand is now good. Dealers in the west are ordering these largely. They are also wanted by eastern merchants. As soon as spring really starts there will be a good call for these and the dealers are preparing to meet the call.

Good Sales of Gas Stoves.

Gas Stoves—Hardwaremen in this district are having gas stoves brought prominently to their attention just at present. The makers are working hard to book up trade early, and the travelers are urging immediate purchases. Good results are being obtained by the campaign, too. The dealers are having good offers made them, and they are readily placing their orders. Indications are that the gas stove trade this year will be brisk. Already a large number of stoves have been sold from the retail stores.

Kitchen Furnishings—From all parts of the Dominion orders for graniteware and other styles of cooking utensils are being received. An even heavier demand is expected, for the merchants are now getting the benefit of a price which must be raised if the English strike continues for any great length of time. It would seem, in deed, that graniteware, tinware and such lines are a good buy now.

STOCK TRANSACTIONS.

February's total transactions of 7,091,192 shares on the New York Stock Exchange were the smallest for that month in any year since 1897, when the first years of the McKinley administration were being reflected in the market's recovery from a long period of slack interest. The trading was smaller by 3,817,673 than January's poor showing, and was 3,080,416 less than the February total of 1911. In the bond list, too, totals were small, though the diversity of the issues appearing indicated a fair investment interest in this department. The aggregate of the bond sales was $51,823,000 par value, the smallest since January, 1907, and less than half the total for January, which, of course, is usually a banner month because of the heavy supply of reinvestment funds. Compared with February, 1911, last month's bond sales showed a decline of $20,460,000.

Weekly Western Market Report

Spring Ordering is Now at its Zenith—A Brisk Tone is Noted in all Sections of the West and Building Work is well Under Way—Shipments Are Heavy.

Winnipeg, March 19.—Business is now going with a rush and there is a brisk tone to the market. Spring trade is opening up exceptionally well and prospects for a splendid year are considered assured. The demand runs particularly to farmers' supplies and the favorable weather has helped a great deal in this respect. The farmers are already getting started on their spring work and are laying in the necessary supplies.

Spring ordering, in fact, is now at its zenith. Building operations are under way and great progress is anticipated in this work in all sections of the West. There is, as a result, a very heavy demand for builders' hardware. Tools are also reported to be selling in large bulk.

Building permits issued here already amount to the large sum of $1,750,000, and the greater part of this represents dwelling houses of from $1,000 to $10,000, a class of building that consumes proportionately very much more builders' hardware than would be consumed by the building of large fireproof structures, representing the same amount of capital invested.

An active building season is generally forecasted throughout the west.

Rope Values Higher.

There is a general advance in the prices of rope and a further advance may be anticipated. This is accounted for by the fact that the binding twine manufacturers have practically cornered the supply of raw material and it will be scarce and dear until a new crop comes on the market. Retailers would probably do well to stock up before prices go higher.

Axe Handles Advance.

Another line that has made a sharp advance is axe handles. This is not noticeable in the handles of best quality but all lower grades are about 25 per cent. higher. Further advances may be looked for as the supply of suitable timber is reported to be much depleted.

Railroad Contractors Buying.

Railway contractors have been heavy buyers during the past week preparatory to starting on the season's campaign and as the season's plans are very extensive a good trade in all lines required for this class of work may be anticipated.

The trade in paints and painters' supplies shows improvement consequent on exceptionally fine weather.

Winnipeg Hardware Quotations.

Ax Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.40; 2, $1.95; s.g. oak, $2.90.

Augur Bits—"Irwin" bits, 47½; other lines 70 and 10 per cent.

Bolts—Carriage, ⅜ and smaller, 65; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3; small lots, 2½; stove bolts, 77½.

Bar Iron—Bar iron, $2.50; Swedish iron, $4.25; sleigh shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $8.50; Jessop, $15.

Blocks—Steel, 50 per cent.; wood, 60 per cent.

Cut Nails—$3.15 per keg base.

Wire nails, base, $2.80 Winnipeg; $2.35 Fort William.

Copper—Sheet and planished copper, 30c per lb. Tinned, 24c. Copper wire, 3-inch gage, 24c, to 20-inch gage, 29c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87; 26 gauge, $4.18; pressed standing seamed roofing, 28, painted, $2.84; 26, $3.24.

Canada Plates—Firm. Half polish, 6 and 7-inch, $3.65; 8-inch, $3.90; full polish, 6 and 7-inch, $4.40; 8-inch, $4.65.

Clevices—7½c per lb.

Enamelware—Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white, 70 and 5; diamond, 50; granite, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron—Apollo, 16 gauge, $3.80; 18, $3.85; 20, $3.90; 22 and 24, $4; 6, $4.20; 28, $4.60; 30 gauge or 10¾ oz., $4.80; Queen's Head, 20, $4; 24, $4.20; 26, $4.60; 28, $4.80.

Galvanized Iron Pipe—⅜ in., $3.25; ½ in., $4.05; ¾ in., $5.00; 1 in., $7.20; 1¼ in., $9.80; 1½ in., $11.80; 2 in., $15.30.

Galvanized Ware.—37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90; No. 2 and larger, $4.65; snowshoes, No. 0 to No. 1, $5.15; No. 2 and larger, $4.90; steel No. 0 to 1, $5.35; No. 2 and larger, $5.10; featherweight, $6.50.

Horse Nails—"M.R.M." cold process —No. 3, $4.30; 4, $3.80; 5, $2.75; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 per cent.

Hinges—Light T and strap, 65 per cent.

Hooks—Brush, heavy, per dozen, $8.75; grass, $1.70.

Iron Washers—Full box, 40 per cent.; smaller lots, 35 per cent.

Iron Pipe, Black—⅛ in., $3.15; ¼ in., $2.30; ⅜ in., $2.35; ½ in., $3.15; ¾ in., $3.80; 1 in., $5.45; 1¼ in., $7.45; 1½ in., $8.95; 2 in., $11.55; 2½ in., $18.40; 3 in., $24.15; 3½ in., $32.25; 4 in., $36.75; 4½ in., $42.50; 5 in., $47.50; 6 in., $61.50; 7 in., $95.50; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.

Poultry Netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.75.

Lead Waste—$6.75.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope—Sisal, 8¾; pure Manila, 10¾c; British Manilla, 9c.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops, 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $28 per cwt.

Screws—Flat head, iron, 87½, brass, 77½; round head, iron, 82½; brass, 72½; coach, 67½ per cent.

Staples—Bright wire per cwt., $2.50 at Fort William, $2.90, Winnipeg.

Stove Pipe—6 inch., $8.70 per 100 lengths; 7 inch., $9.30 per 100.

Terne Plate—I.C., $9.75; I.X., $11.75.

Tinplates—I.C., 20x28, $5.50 per half box; $10.25 per full box; I.X. half box $6.50, full box $12.95.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 35.

Wrenches Agricultural—70 with 10 p.c. discount.

C. Edgar Wood, of Peck, Stowe & Wilcox, Southington, Conn., called on a number in the trade last week.

Weekly Market Report --- Paints

ADVANCES ARE MADE.

The paint market is active and firm. There has been a big demand all week, and it now seems assured that the spring rush has started.

An advance of 10 cents in white lead is noted. Turpentine is higher in Toronto, and rumors of other advances are heard.

MONTREAL.

Montreal, March 22.—Every mail this week has brought in large orders for paint. All the makers report that. The dealers are evidently taking time by the forelock and putting in their requisitions early. The call is for all classes of paints, and for putty, white lead, paris green and glass. There is not a single product—unless it be turpentine—for which the call is not large.

One change in price was effected last week after the market report had been written. The grinders of white lead met together, and then they decided that they would have to advance the price 10 cents. It, therefore, is generally quoted at $6.85, some of the special products, of course, being considerably more costly.

The cause of this advance is the increased price of the raw material. The manufacturers felt they must put the price of their product up to counterbalance the advance in the pig.

Seed Being Moved Now.

Linseed Oil—No change is noted here this week. The strike is being watched, but it is hardly likely to necessitate any immediate change in price, though if it continues an advance is almost certain to be made. The seed is being brought from the west better now, and it is hardly likely that there will be any great local shortage. Prices remain at the figures quoted for the past fortnight, 91 for raw and 94 for boiled oil.

Turpentine—Still this market is inactive. There is a plentiful supply at Savannah, and no reason for any advance. The general quotation is 70.

White Lead—The demand for this, in common with mixed paint, has incerased greatly in the past few days. The advance in price does not seem to have made any difference. Those who want the lead are ordering it. They are naturally sorry that they did not secure their supply before the increase came, but they recognize that there is not a great chance of prices dropping in the immediate future.

Guaranteeing Their Supply.

Putty—Orders are being received daily. Some of these call for prompt delivery, but more are from dealers who wish to be sure of their supply. They ask that the putty be laid down about May. The great retail demand will not commence much before that date, though the orders for this product have kept up remarkably the year through.

Glass—No change in the price has come yet. Nor is it likely that there will be immediate action; yet the handlers are carefully watching conditions in England. Upon the trend of events there depends to a great extent the future of glass in Canada.

A number of dealers evidently believe there will be an advance in price. They are ordering largely now, expecting thus to be at an advantage later on.

Paris Green in Demand.

Prepared Paints—The only notable feature here is the growing size and the growing number of the orders. They come from railways and contractors, from manufacturers and from retailer. They come from all parts of the country.

Paris Green—Orders for this product have been coming in largely since the prices were quoted a week or two ago. It is not only that these prices—which are a little lower than those asked last year—are drawing trade; but there is a general increase in the demand for this product. Literature setting forth the advantages of spraying has been scattered widespread of late, and it has done much to awake the farmers to the need of protecting their trees and their plants against insects and other pests.

TORONTO.

Toronto, March 20.—The signs of spring which have been so plentiful during the past week have brought out activity in paint lines. Not only are the orders pouring in, but a demand is making itself felt for immediate delivery. Shipments, therefore, have started with a rush. The manufacturers and jobbers are being kept busy as a result.

There is a firmer tendency noted in practically all lines. Following the advance in white lead, a small increase was put into effect in turpentine, and there is now some talk of an advance in linseed oil. Rumors are also heard that the price of glass may be boosted before long.

White Lead—As announced last week, an advance of 10 cents has been declared in white lead. This was due primarily to the increased cost of pig lead. It is significant that since the white lead advance was declared last Friday, a further increase has been made in pig lead. Everything seems to point to continued firmness.

The advance in white lead was not as large as many had expected, in view of the very marked rise in the cost of the raw material. While there is no talk heard of further increases, it is fully expected that the market will remain firm.

Increase Rumored.

Linseed Oil—While the local quotations are still 92 cents for raw oil and 95 cents for boiled, those who follow the situation are not at all convinced that the same figures will be long maintained. It is stated to-day that the crushers have advanced their prices 2 cents. While this may not immediately affect the jobbers' price, it may result in an advance before the end of the week. At any rate, it indicates a continuance of firmness in the oil market.

"There will be an advance in oil," declared one jobber to-day. Others do not go as far as this, but they state that such a development would not surprise them.

Turpentine Up.

An advance of 1 cent has been declared in turpentine, making the local quotation 70 cents. This price in one sense is a nominal one. One jobber states that he does not feel inclined to sell at 70 cents, as there is no profit whatever at that figure. He estimates that it costs about 66 cents to lay it down in Toronto.

Some of the jobbers state that they have experienced a fairly good demand, but others report that business in "turps" has been dull.

It is hard to say what the future holds out in regard to turpentine. There has been a steady upward trend at Savannah, and demand is said to be showing improvement.

The Glass Situation.

Rumors are heard of impending changes in glass. All that can be said is that any changes made will be toward a higher level. Conditions seem to be conspiring to force an advance in glass quotations.

There is a fairly active movement now and good spring shipments are being made.

CURRENT MARKET QUOTATIONS

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate. Retailers desiring to get in touch with firms selling any articles on which quotations are made can do so by writing the editor.

SHERWIN-WILLIAMS

The Sherwin-Williams Agency Proposition is one that should interest every merchant handling Paints and Varnishes. Forty years' experience has perfected our merchandising methods. We can help you line up a larger paint and varnish business in your locality if you work with our plans.

The S-W Proposition includes a complete line of paints and varnishes whose satisfactory quality is well known to the buying public throughout Canada, a persistent, forceful campaign of publicity has made S-W products the best known of their kind.

Prices are consistent with best quality; real co-operative service works with the merchant, attracts new business, increases the old business and allows a satisfactory margin of profit on all lines. Our warehouses and offices at important distributing points throughout the Dominion insure prompt and careful attention to shipments of goods. This is the outline of the S-W Agency Proposition which has built up the largest and most successful paint and varnish making organization in the world.

100% PURE

The arrow on a weather-vane points the direction of the wind. The arrow in this advertisement points the direction to profit for the Paint Dealer. And just as sure as the wind blows, just so sure is it getting in its work of destruction — unless it is blowing against a surface protected by

MARTIN-SENOUR PAINT 100% PURE

Wind is only one of the destroying elements that paint must constantly combat. But wind shows the *quality* of the paint — wind dries out paint — if it is not made right it checks and chalks off, and the Paint Dealer gets the blame. The makers of **Martin-Senour Paints** put into theirs, material that helps to resist the wind and the weather — that means long life and years of satisfaction to paint users. That is the way to profit.

Write today for the agency before someone else gets it.

It Takes *Time* to Tell What a *Varnish* is Worth

Talk is no *test*—claims *prove* nothing. *Exposure is the* thing that *tells*. The *calendar* writes the *real* story of quality. When a varnish has stood *dampness* and *heat –humidity* and *frost–then* the consumer is in a position to know whether you have sold him the right goods.

Glidden's M.P. (Master Painters) Durable Exterior

is *guaranteed* not to *whiten*, *crack* or *peel*. Any varnish that *makes good* on *ships* and *yachts*, buffeting the raw elements, will make good *anywhere*. The *first choice* of *ship-builders* all over the *country*—they *know*. As elastic as rubber and as easy flowing as oil. Sets dust-free in four to five hours and dries perfectly, according to the thermometer and the barometer.

Do You Sell The Glidden Line?

If not, why not find out where and how you can increase your trade and your profits with these goods?

The Glidden Varnish Company

Cleveland, Ohio — Toronto, Ont.

Branches: New York - Chicago

3 SPECIALTIES That are Making Sales Records

Hundreds of dealers throughout the Dominion are pushing C. P. Paints and Varnishes, and increasing their business year after year. Here are three specialties making money for the dealers selling them.

ELEPHANT GENUINE WHITE LEAD

Is fine in texture, is easy working, has good spreading capacity, and is durable in service. Elephant White Lead is corroded according to the best English methods, and has maintained its leadership among the best leads for nearly fifty years.

MAGNETIC IRON OXIDE 93

Made from Canadian Bog Iron Ore from our own mines, recognized as the best iron oxide in the world. This product enjoys enormous sales, not only in Canada, but in Great Britain and the United States. The demand grows as it becomes better known. A splendid finish for metallic shingles, roofs, fences, bridges, machinery, elevators, tanks, etc. Put up in dry, paste and liquid form.

SUN VARNISH

A strong, hard Copal Varnish for all exterior and interior work requiring good appearance and long service. It dries dust free in a few hours and gives satisfactory wear under the most severe conditions. You can safely back up every can of Sun Varnish with your personal guarantee. It's a sales repeater.

BY-THE-WAY, MR. DEALER

Don't let the dollar get the best of you.

Don't economize falsely.

Don't be too quick to make a dollar if you are apt to lose two dollars later.

The shrewd paint dealer, who makes a big success of his business, is the man who responds **cheerfully** and **confidently** with the article and says a good word spontaneously for it, thereby commanding the customers' permanent patronage.

It isn't the profit you make on one sale that swells your income, but it's the continuous demand that counts. Make good with every customer, sell him paint that you positively know

WEARS BEST LOOKS BEST GOES FARTHEST

then you will hold him every time, and ever after when he wants **good paint**, he's going to come direct to you.

MARTIN-SENOUR PAINTS

make good every time—more than that, they far exceed the customer's expectation in quality, brilliancy and durability. That's one reason why our dealers are holding their trade, and blazing the way for more business. If you are not perfectly satisfied with the profits from your paint stock, give us an opportunity to serve you—just once, a trial is all we ask. We'll assign you exclusive territory, and co-operate with you by numerous effective methods in creating business; furthermore, we are prepared to take care of business for early Spring delivery.

THE MARTIN-SENOUR CO., Limited

PIONEERS OF PURE PAINT

MONTREAL CHICAGO WINNIPEG

The Story of a Great Campaign

How Pratt & Lambert Tripled White Enamel Sales

You! what did you say last Fall when we promised to triple sales on Vitralite, The Long-Life White Enamel, in three years? You knew we did it with "61" Floor Varnish. But did you say "Well, floor varnish is different. Besides, trade conditions are bad—why, other manufacturers are withdrawing their support—it's going to be a bad paint and varnish season. I'll hold off. *Now you'll be interested to know just how that decision affected your profits.*

50%—100%—150%—200%

That's how dealers' sales on Vitralite began climbing.

Profits for dealers

And more, this advertising, specializing on Vitralite and "61" Floor Varnish, carried the whole Pratt & Lambert Line. A general Pratt & Lambert varnish demand was created—not merely a "specialty" demand. Pratt & Lambert "38" Preservative Varnish, Spar Finishing Varnish, Alcolac Liquid Wood Filler, Pratt's Patent Liquid Dryer—and all the rest for every conceivable purpose—they were all selling.

Demand increases — Dealers Re-order—Factory Works Nights—New Four-Story Building Erected.

Meanwhile Vitralite sales increased like a flood tide—orders poured in—dealers had to re-order—the factory was working nights to keep up with the tremendous demand—a new four-story building was erected for the manufacture of Vitralite.

A Promise Made Good

The Three Years Mark Reached in Six Months.

And the sales barometer rose—it kept on rising—each day higher and higher. And it came. Surely—steadily. The mark was reached. Virtalite sales were tripled in six months. And all this in the face of adverse conditions.

Now This Spring

What are you going to do about it? Pratt & Lambert advertising can sell varnish for you has been proven by actual accomplishment. This Spring these same methods of campaign will be continued—but on a larger scale—and with conditions with us—with everything favorable for a large paint and varnish trade. Get aboard.

The Campaign in Action After The Painter For You

The painter trade—the very backbone of your varnish business—is being reached four times this Spring through *Varnish Talks,* the Pratt & Lambert Painters' Magazine—also through a big campaign of advertising in the painters' papers.

Getting the Great Public to Your Store

Then we're going after that varnish buying public of yours through the great magazines. It's the largest varnish advertising campaign in existence. And all this advertising is hitched right to your own store by elaborate window and store display matter—with booklets, slips, newspaper electros, etc.

Right on Your Firing Line

But we don't stop here. Our Advertising Department will help you right on your own firing line—will plan local campaigns for you—write all your special advertising literature.

Getting Those New Building Orders

Then our Architectural Department is in action to get the architects in your town to specify P. & L. Varnishes on all new building work—right in your town—to get you those big orders.

Are You Going to Fill the Demand?

You must decide this question now for yourself. If you don't your competitor surely will. What were your varnish profits last year? How much increase? How much increase do you look forward to this year? Your varnish department is but part of your business. But the success of your business depends on the success of each individual department. That varnish department of yours must be made to pay you profits. *If you held off last Fall,* when we promised tripled sales in three years, *you lost.*

There is no longer any question of the tremendous sales of Pratt & Lambert Varnishes. That has been conclusively proven by our last great campaign. And right now—on the eve of another great campaign—when the whole varnish selling mechanism for the Pratt & Lambert Dealer is in action—*investigate—find out.* It will put you under no obligation to us. Just use the coupon.

AMERICAN CANS

IN selecting your paint and varnish cans use the same careful judgment and criticism that you exercise in all other purchases. "American Cans" court such a test. Cans are not all alike even if they do seem similar and look alike as "two peas in a pod." Satisfy every angle of your needs in size, weight, manufacturing detail and appearance; then consider price, promptness of delivery and possibility of a continuous supply without interruption. —on the above basis, we will take a chance on securing at least a part of your business.

GET READY
TO MEET

BIG DEMAND FOR THIS MACHINE

HOUSEKEEPERS are learning more thoroughly every year the possibilities of the Enterprise Cherry Stoner. Where one was sold five years ago ten are sold to-day. And where one is sold to-day ten will be sold five years hence.

The fact that the Enterprise Cherry Stoner is an indispensable household machine makes it indispensable to your stock. The name

ENTERPRISE

on these Cherry Stoners, as in every article that leaves the Enterprise plant, stands for the best obtainable service.

ENTERPRISE CHERRY STONERS do rapid and effective work. They are far easier to adjust than other machines, and the jaws absolutely retain their position when set. The parts of these machines are interchangeable.

It is an absolute certainty that you can readily make sales for these sterling machines among your trade. The fact that every family should have them makes them ready sellers.

In every respect they are up to the high quality of Enterprise Meat and Food Choppers, Sad Irons, Sausage Stuffers, Coffee Mills, etc.

The Enterprise line is the most profitable for you to handle, because Enterprise quality has made it the most popular—the most called for.

MONTREAL :: CANADA

Cutting the Costs

the big element in profit-making

¶ In many lines of merchandising, distributing as well as manufacturing, the only remaining way to increase profits is by reducing costs.

¶ Opportunities for surprising savings in office expense are frequently overlooked.

¶ The Underwood series of Special Purpose Typewriters for bookkeeping, accounting, recording, and statistical work may enable you to reduce your office expense 50% or more.

¶ The Multiple Unit Order Machine will write your orders—from five to twenty departmental copies as required, at one writing. The perfect legibility guards against errors, and discrepancies in the various copies are, of course, impossible.

¶ The Underwood Condensed Billing Typewriter writes the Invoice, and at the same time the Sales Book Entry. The entries being condenced, all waste space is eliminated. The sales sheet may have any number of disintegration columns for classifying sales. This machine will save its cost in three or four months in any busy office.

¶ The Underwood Retail Bill and Charge Typewriter and System is the greatest time and labor-saving device ever introduced to the retail trade. It enables a Merchant to give the Customer a complete, detailed, up-to-the-minute statement of his account any day in the month. He retains the carbon copy, an absolute facsimile, made at the same writing. There can be no discrepancy, no dispute.

¶ These are three important members of the Underwood series of over twenty Special Purpose Typewriters. Our system experts have installed machines and devised associated systems for hundreds of the largest firms in the country.

¶ If you have writing to do, records of any kind to keep, it will pay you to familiarize yourself with the Underwood machines.

An enquiry at any of our offices
will bring you valuable suggestions.

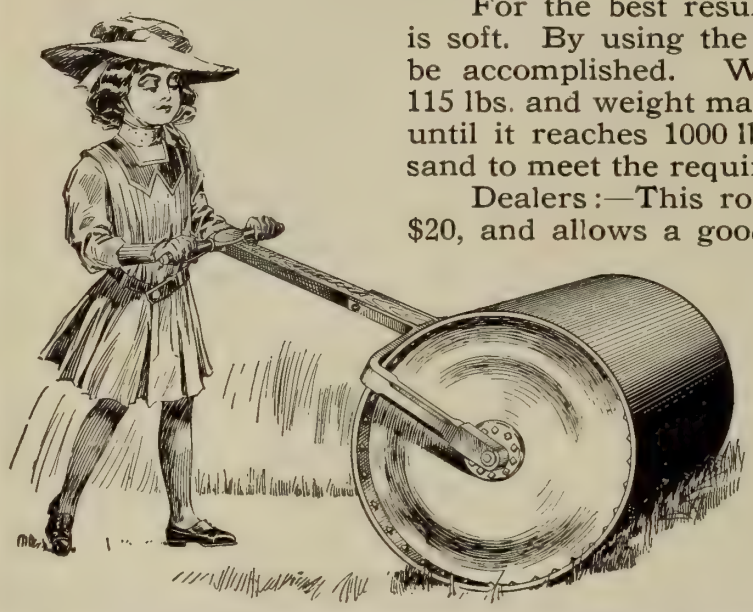
Push This Lawn Roller—Every Householder Can Afford It

OUR ADJUSTABLE WEIGHT LAWN ROLLER



is a necessity to people who aim at keeping their lawn beautiful.

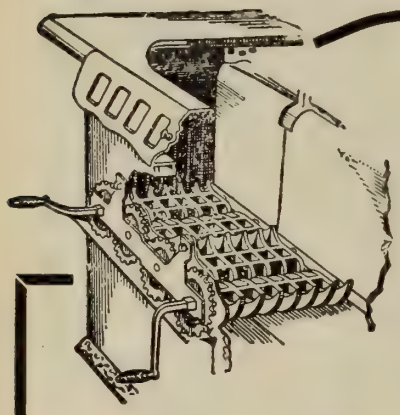
For the best results begin rolling when the ground is soft. By using the adjustable weight roller, this can be accomplished. When empty the weight is only 115 lbs. and weight may be added as the ground hardens until it reaches 1000 lbs. Can be loaded with water or sand to meet the required weight.

Dealers:—This roller can be retailed at from $15 to $20, and allows a good profit.

Nicely finished with aluminum and attractively striped.

Ask your jobber for further information or write us direct.

THE
ERIE IRON WORKS,
LIMITED
St. Thomas, Ontario, Canada



A Wonderful Value

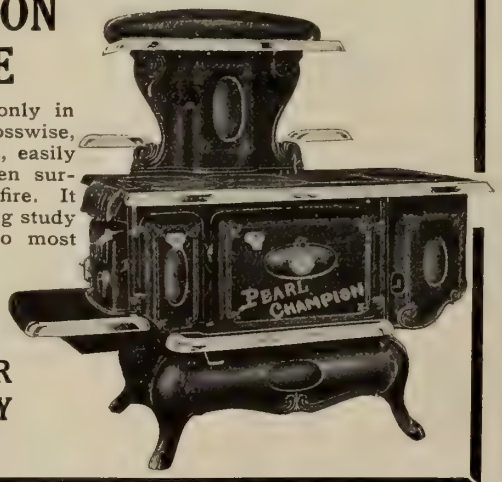
always prevails in the

CHAMPION RANGE

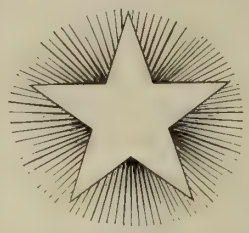
It sells on sight to prospective buyers and is guaranteed to give absolute satisfaction and long service.

THE
CHAMPION GRATE

which is found only in this range, is crosswise, non-warping bars, easily shaken, more open surface and a clean fire. It is the result of long study and is superior to most grates.



D. J. BARKER & COMPANY
PICTON, ONT.



Enamel Ware Assortments

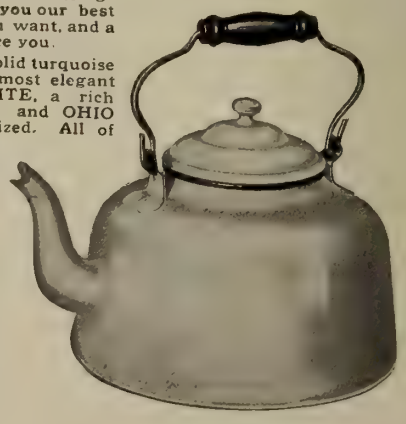
Our lines of enamel ware are well known. They are not made by using any substitutes for the recognized materials of porcelain, but we have worked out the best and most economical formulas, and by making all our own shapes, we have the very best wares at low prices to offer to those who must *sell at low prices.*

Let us quote you on our new line of WHITE STAR, a white-white ware, better in shape and equal in quality to the very best of imported lines. Why not buy at home and get it as you need it? Our reputation is back of this and we guarantee every piece.

We are also furnishing White Star ware in 10c, 25c and 50c assortments, which leave a handsome profit for the dealer.

Let us have your assortments to figure on. We will give you our best figures on just what you want, and a trial order will convince you.

We have CORONA, a solid turquoise blue, white lined, the most elegant line made; AZURELITE, a rich dark blue marbleized, and OHIO Venetian blue marbleized. All of these are triple coated over the heaviest of seamless steel shapes, electrically welded



The
Enterprise Enamel Co.
Bellaire, Ohio

Condensed or "Want" Advertisements

Those who wish to sell or buy businesses or stocks, obtain competent help, connect with satisfactory positions or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL

It is the central market place of the hardware trade throughout Canada.

There is always someone somewhere looking for just such proposition as you have to offer.

MISCELLANEOUS

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

ACCURATE COST KEEPING IS EASY IF you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employes' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalogue. International Time Recording Company of Canada, Ltd., office and factory, 29 Alice Street, Toronto.

BUSINESS GETTING TYPEWRITTEN LETters and real printing can be quickly and easily turned out by the Multigraph in your own office—actual typewriting for letter-forms —real printing for stationery and advertising, saving 25% to 75% of average annual printing cost. American Multigraph Sales Co., Ltd., 129 Bay Street, Toronto.

COUNTER CHECK BOOKS — ESPECIALLY made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for binders and monthly account systems. Business Systems, Limited, Manufacturing Stationers, Toronto. (tf)

YOU CAN BUY A REBUILT TYPEWRITER from us. We have about seventy-five typewriters of various makes, which we have rebuilt and which we will sell at $10.00, $15.00 and $20.00 each. We have also a large stock of better rebuilts at slightly higher figures. Write for details. The Monarch Typewriter Co., Ltd., 46 Adelaide St. West, Toronto, Canada. (tf)

SITUATIONS WANTED

HARDWARE LINES WANTED ON A COMmission basis, covering western provinces. Canadian Specialty Co., Suite 307, Travis Blk., Calgary, Alta. (14)

GENERAL HARDWARE — HANDY YOUNG man with four years' experience desires position. Not afraid of work. View of advancement. Total abstainer. Good references. Box 645, Hardware and Metal, Toronto. (12)

AMBITIOUS YOUNG MAN WISHES POSItion as traveling salesman in hardware; has six years' experience, possesses both languages, has followed a course in salesmanship, and can give the best references as to his ability, etc. Write Box 651, Hardware and Metal. Province of Quebec preferred. (12)

MISCELLANEOUS

COUNTER CHECK BOOKS—WRITE US to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

COPELAND - CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson Co., Ltd., Toronto and Ottawa. (tf)

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS ARE DEVISED to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

FIRE INSURANCE — INSURE IN THE Hartford. Agencies everywhere in Canada.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

MOORE'S NON-LEAKABLE FOUNTAIN pens. If you have fountain pen troubles of your own, the best remedy is to go to your stationer and purchase from him a Moore's Non-Leakable Fountain Pen. This is the one pen that gives universal satisfaction, and it costs no more than you pay for one not as good. Price, $2.50 and upwards. W. J. Gage & Co., Limited, Toronto, sole agents for Canada.

PENS—THE VERY BEST PENS MADE ARE those manufactured by William Mitchell Pens, Limited, London, England. W. J. Gage & Co., Limited, Toronto, are sole agents for Canada. Ask your stationer for a 25c. assorted box of Mitchell's Pens and find pen to suit you.

THE MONEY YOU ARE NOW LOSING through not having a National Cash Register would pay its cost in a short time. Write us for proof. The National Cash Register Co., 285 Yonge St., Toronto.

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto. (tf)

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

We Are the Hockey Stick Specialists

By concentrating on the manufacture of hockey sticks we have been able to turn out a class of goods far superior in design, material and finish, to any competing line. Hockeyists know they will get best service from sticks carrying our brand, because every step in their manufacture is watched by specialists.

Our factory was built specially for the manufacture of hockey sticks. We use only thoroughly seasoned and carefully selected stock. Our sticks have the "Sure Grip" and "Anti-Blister" handle when so ordered. The special care in branding makes our sticks attractive and easy to sell.

Here's a Washer That Will Sell!

The housewife can see in a minute, why the "THERMO" works so easily. It combines a fly wheel with a lever motion, and requires only about half the power of an ordinary washer.

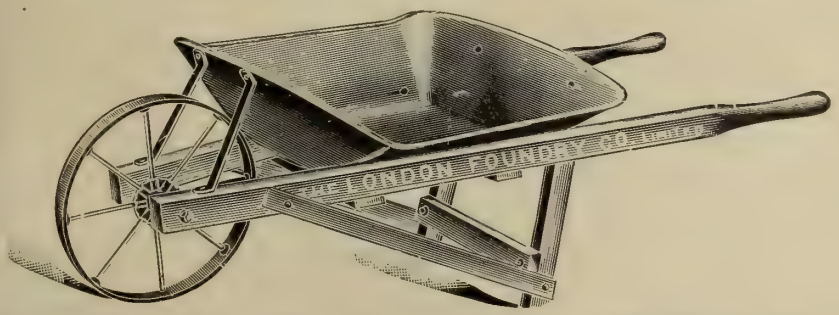
The "THERMO" Washer can be used with forward and backward, or up and down motion, by simply changing the lever. Notice the two lever sockets in the cut.

You can safely recommend the "THERMO" WASHER to give lasting satisfaction. It is stoutly built, and all working parts are so simple as to cause little wear. The legs are cross-braced, and are absolutely rigid.

Get a sample "THERMO" WASHER on your floor and see how many you can sell this Spring.

The "Pan Canadian" Steel Barrow

is the most substantial low cost barrow yet manufactured. With its heavy steel tray and steel spoke wheel, it will stand up under the most exacting usage.



Do you stock the "Pan Canadian"? If not, write for our Catalogue. You'll be surprised at the close price we can quote you.

Would You Pay $250.00 a Week for a Salesman?

We mean a salesman who has made good. An experienced, energetic fellow who can sell more goods and draw more trade to your store than all the other clerks in your employ combined.

A REAL BUSINESS BUILDER—A HUSTLER!

Well, we have the very chap, and will give you the exclusive use of his services in your town for **$1.25 per week.** He comes in the form of

A new 1912 Newspaper ad. service for Hardware Dealers, which COMBINES THE FORCE OF SALESMANSHIP AND BUSINESS BUILDING.

A service that is composed of splendidly illustrated, logical, sales-promoting ads. for every week in the year—covering your entire lines.

The reduced fac-similes reproduced above and below will give you an idea of their attractiveness.

Let us send you the service complete—at our expense—for your inspection.

Act To-day, for our selling campaign is only planned for one Hardware Merchant in each town.

The Pagé Neverdrop Hook Co. of Canada Limited

have put on the market a new hanger or hook having a third bent branch or crook in form of a hook and all articles hung thereon, hats of all descriptions, coats, etc., cannot be removed without interference.

This new hook, patented in six countries, Canada, United States, England, France, Germany and Belgium, has found favor on all sides, and has obtained legitimate success.

No other system can rival

The Pagé "Never Drop" Hook

It is specially adapted for churches, hotels, private houses, religious houses, cloak rooms of public places, etc. It answers the need everywhere.

When in a public building, you hand your coat and hat to an attendant, it is not surprising that you occasionally find it covered with dust or dirt in some way, as a simple push has caused it to fall to the floor.

With the Pagé "Never Drop" Hook

this difficulty is eliminated, you preserve your garments, because once they are attached to this hook

THEY CANNOT FALL OFF

All merchants should suggest **THE PAGÉ "NEVER DROP" HOOK** to their customers. It is serviceable, practical, and is the only safety hook made. Once a trial is given it, it is sure to be adopted.

THE PAGÉ "NEVER DROP" HOOK is made of brass, nickel, bronze, copper, oxydized, and is made in eight different sizes.

ALABASTINE

The Only

Pure, Permanent and Sanitary Wall-coating

People who study the wall-covering problem aren't satisfied with kalsomine. They know the trouble it is to prepare and how soon it decays, rubs and scales off.

This is where you come in. If you stock **Alabastine,** you can offer them a cement which is easily applied—only requiring to be mixed with cold water—and which hardens on the walls and does not decay or rub off. When it is time to do the room over again, all that is needed is to put coat number two on top of the first one—no scraping or washing off needed. Let us hear from you.

We know you can do a good Alabastine Business, so don't delay but think of that Spring Rush and Order Now, direct or through your jobber

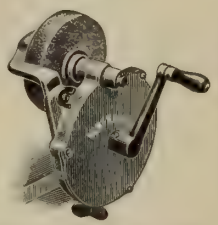
PERFECTION GRINDERS

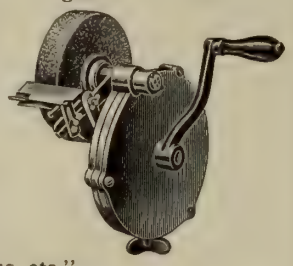
And their Relation to Dealer's Profit



Perfection Grinders cut costs—maintenance costs. They have patented gears that take up wear and lost motion, with consequent lengthening of life—twice that of inferior grinders.

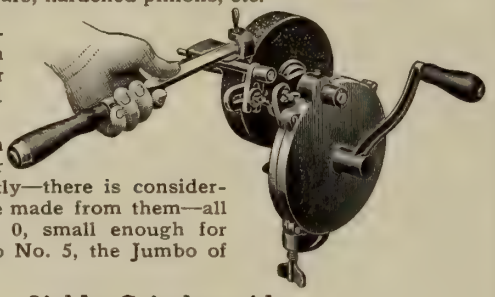
That means Grinder perfection—and demand—Perfect Grinder Demand.

Turning this demand into sales and profits is merely a matter of stocking, and calling attention to Perfection Grinders. Point out the convenient adjustable rests and guides that mean so much in tool grinding. All grinding wheels are of Corundum unless otherwise specified. This material is found in Canada, and is supposed to be the hardest mineral known, next to the diamond.



"Perfection Grinders are made under a patented construction, which makes it possible to manufacture them at a small cost, besides giving many advantages in the way of adjustable gears, hardened pinions, etc."

Our experience has shown it to be superior for tool grinding.



Perfection Grinders cover the field perfectly—there is considerable profit to be made from them—all sizes from No. 0, small enough for one's pocket, to No. 5, the Jumbo of the lot.

Order from Your Jobber

It's a Man's Rifle at a Boy's Price—

The New **Model 29** *Marlin* Repeater

It's an up-to-date .22 caliber repeater that handles without change or adjustment the .22 short, .22 long and .22 long-rifle cartridges of all makes and styles, yet sells at a surprisingly low price, with a good profit for the dealer.

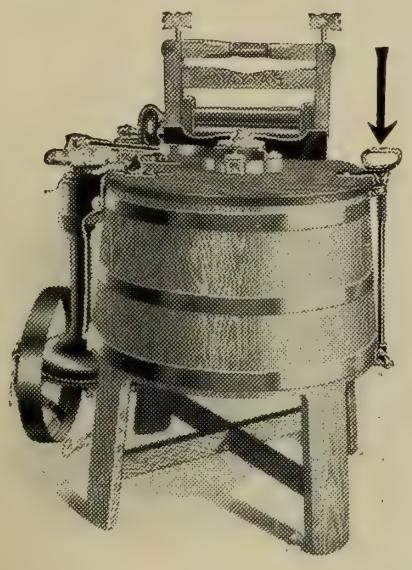
Write for Catalog, Prices, Posters, etc.

¶ The Model 29 is similar in general construction to the well-known ***Marlin*** Model 20. ¶ It is a **take-down,** convenient to clean quickly and thoroughly, and can be packed in a small space. ¶ It has the **popular trombone action,** quick and easy in operation. ¶ The modern **solid top, side ejection and closed-in breech** insure greatest safety, comfort and convenience.

¶ It has a **barrel long enough for all requirements;** it shoots **all .22 short, long and long-rifle cartridges,** including the hunting cartridges with mushroom bullets; it is a **thoroughly accurate and efficient** armfor rabbits, squirrels, hawks, crows, foxes and all small game, and for target work. ¶ **Guaranteed in accuracy and reliability.**

The Marlin Firearms Co. 91 WILLOW ST. NEW HAVEN, CONN.

The Maytag Power Washing Machine



One Operating Handle controls Washer, Wringer and Reverse. You can't go wrong.

Simple, Durable, Quiet, no Weight on lid.

No working parts exposed.

The Machine for Live Dealers.

The Smallest Gasoline Engine will run it and have power to spare.

The Wringer shown in the Power Washer is an extra good one. It is a part of the Washer and cannot be removed. Same power that runs the Washer turns the Wringer. It is a Wringer that sells at retail for about $7.00. The tub is made in the same substantial way as the "Pastime"—Is identically the same except it is equipped to run by any available power instead of by hand. This Power machine is, we believe, as near a Perfect Washer as is possible to make.

We Want The Retail Hardware Dealers Of Canada To Read This Advertisement.

We want you to know that without any travelling men on the road, we have sold direct to the dealers during the past three years more than ten thousand of our Washing Machines. This should mean something to you. If you want to join the army, write for prices, terms, etc. We want you to know also that our entire business is done through the retail dealers, to whom we refer all inquiries received from the consumer.

In addition to the hand and Power Machines, we make an Electric. It is a dandy.

All orders for British Columbia should be sent to McLennan, McFeeley Co., at Vancouver, and all for Alberta to The Merchants' Hardware Specialties, Ltd., at Calgary. Both of these wholesale houses buy in carload lots. All orders for Manitoba and Saskatchewan to the Maytag Co., Ltd., at Winnipeg, Man.

We positively guarantee that the three Washing Machines we make are the best that are sold in America to-day.

THE PASTIME WASHER

DROP US A CARD TO-DAY FOR FULL PARTICULARS

WARRANTY

We guarantee the Pastime Washing Machine to wash the Clothing QUICKER, CLEANER, and to OPERATE EASIER than any other hand power Washer on the market.

We further guarantee it to be well made and o good material throughout.

Any child that can reach the handle can do the washing.

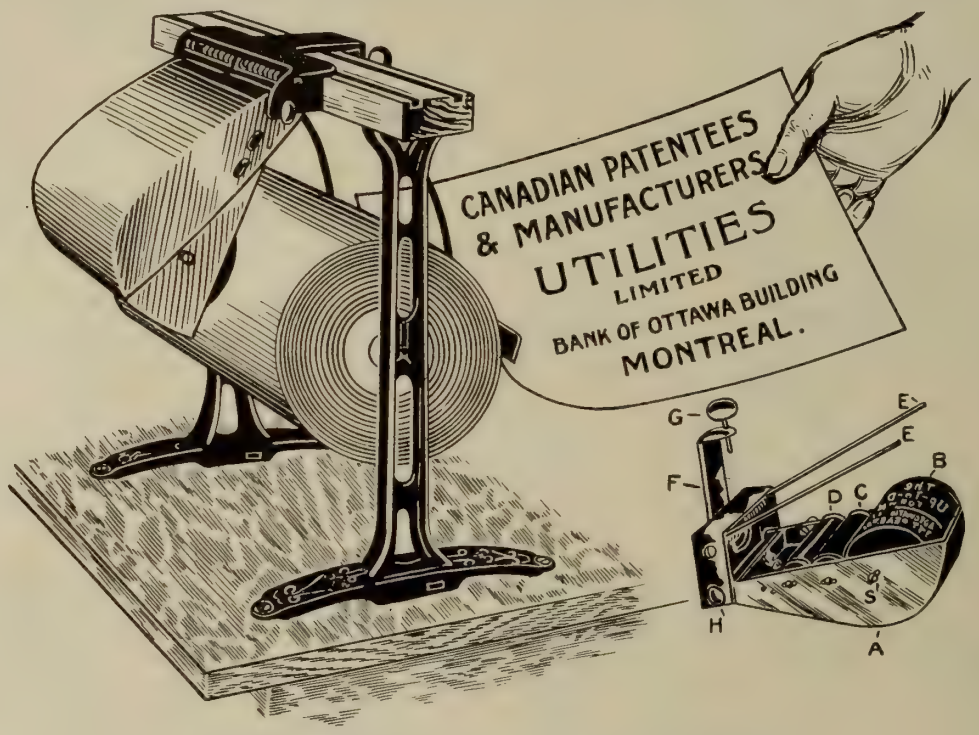
The Maytag Company, Limited

Winnipeg, Man.

A NECESSITY

TO EVERY HARDWARE DEALER

JUST PULL THE PAPER.



IT WILL DO THE REST.

THE AUTOMATIC PRINTER

is a simple device which can be attached to your paper holder and which will print your advertisement on every piece of paper you use. Thus every parcel which leaves your store carries your advertisement.

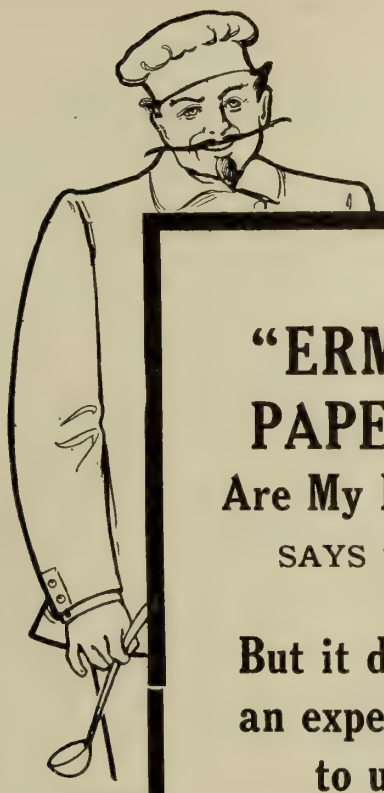
It requires no attention once it is affixed, and is the cheapest method for advertising your store which can possibly be found.

The type matter can be changed as often as desired, and this will be found an excellent way to advertise special sales or special lines of goods.

It can be easily detached and used for stamping bags or for other purposes.

PRICE, $7.50 EACH. TRY ONE

UTILITIES LIMITED, 74 BANK OF OTTAWA BUILDING, MONTREAL.



"ERMALINE PAPER BAGS Are My Best Friends"
SAYS THE CHEF.

But it does not take an experienced Chef to use them.

EVERY HARDWAREMAN in Canada Should Have a Stock of ERMALINE BAGS and ERMALINE COOKING BRUSHES.

Every one of your customers will be willing to give a trial to the new system about which the whole world is talking, and as they are bound to be pleased with the results obtained, a steady trade in BAGS will be your portion.

A large number of hardwaremen are doing a good business in this line, for the profit is worth while. **Why not do the same?**

The beauty of the "Ermaline System" is in its simplicity. NO DIRT—NO SMELL—NO WASTE—NO TROUBLE.

IF YOU HAVE NOT YET TRIED THIS NEW WAY OF COOKING, drop us a post card and we will send you sample bags FREE.

WEAR-EVER N.A. ALUMINUM LTD TRADE MARK

"Wear-Ever" Aluminum Ware

"No! They are not all the same."

"Wear-Ever" Aluminum Utensils *are different.*

Of course, aluminum is aluminum; but utensils may differ in thickness, in handles, in finish.

Thickness. They are made thick enough to prevent denting readily; thick enough to guarantee a lifetime of satisfactory service.

Handles. The handles of **"Wear-Ever"** utensils are made of the best tinned steel. Aluminum handles would become too hot—wooden handles would burn off or break. The handles of **"Wear-Ever"** utensils are gripped to the utensils by aluminum rivets with large heads. The heads are not sunk into the side of the utensil—the side remains of uniform thickness, strong enough to hold the handle on firmly for years.

Finish. The outside is polished. The inside is hardened by an electrical process which makes the metal harder, smoother, less liable to be discolored by food or water containing alkali or iron, and more easily cleaned than would be possible if the utensils were not so finished.

Replace utensils that wear out with utensils that "Wear-Ever"

25 times faster than grindstone, 10 times more efficient than emery---will not draw temper.

Dimo-Grit, remember, is nothing like emery. It is the newest artificial diamond abrasive, particularly suitable for steel. It is made of the same elements as real diamonds fused in the terrific heat of the electrical furnaces at Niagara Falls; and Dimo-Grit crystals are as hard and sharp as genuine South African diamonds. It cuts steel, peeling it away in tiny shavings, instead of wearing it away like emery wheels and grindstones. No need of cooling with water, no danger of drawing temper. We have exclusive rights to Dimo-Grit.

32 Different Types of Grinders

Hand, foot and engine power grinders with many exclusive features. The Luther line includes everything that can be possibly needed in the grinder line. Retail prices from $1.50 to $20.00.

Write for Our Liberal Offer to Dealers

Every dealer, from the biggest city store to the smallest country store, can make good profits from Luther grinders. Our Special Offer to dealers offers you an exceptional opportunity and makes it easy for you to handle this profit-making line. Don't delay. Write today for our Special Offer.

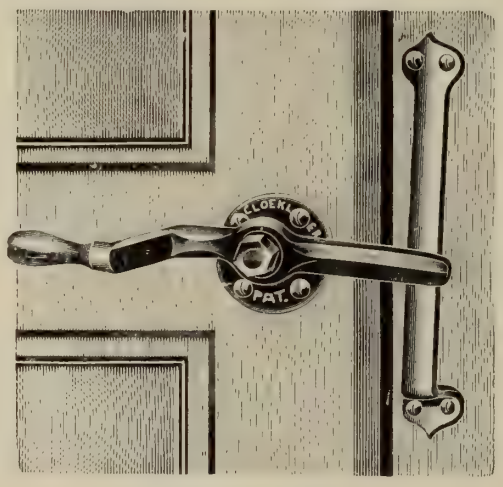
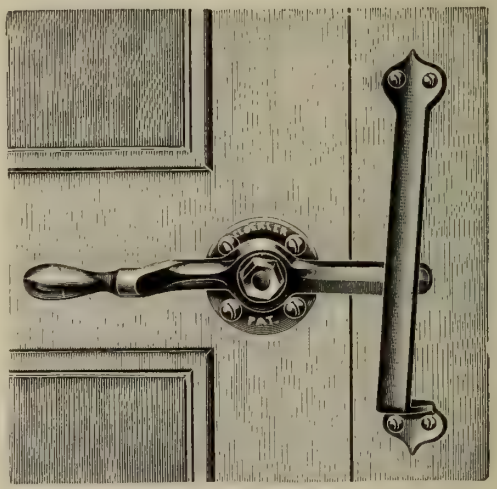
Gloekler's Patent Refrigerator Door Fasteners



Forcing Door Open



Showing Door Forced Shut

THIS fastener has been the standard for Refrigerator Doors and cold storage work ever since it has been on the market, and, especially for heavy work, is without an equal. It is made heavy and substantial with nothing about it to break or wear out, and will "last a lifetime." Simple and easy to operate. In closing door, turn lever inside keeper and press down on handle, which seals the door absolutely tight with little effort. To open door, turn handle around until lever comes outside of keeper and lift on handle which will force the door open without any effort, no matter how tightly jammed.

We also make a line of Spring Fasteners, Hinges, etc., in tinned, brass and nickel plated. Write for illustrated price list.

Made of the finest selected corn; on handles polished as smooth as glass.

Now is the time to put in a stock.

Stevens-Hepner Company, Limited

PORT ELGIN, ONTARIO

A Good Sanitary and Silent Fixture.

A High-Grade Fixture at a Moderate Price.

Automatic Combination. Simple, Positive, Durable, Sanitary. Especially designed for Schools and Public Buildings of all kinds.

No Plumber Wants To Install

a Low Cistern Water Closet Combination that causes his customer to 'phone him every little while that the cistern is not working.

When he installed the fixture, to all appearances it was all right; but he now finds that the lining is too light, and the cistern is leaking. Further investigation of the "works" revealed the fact that the ball cock was light and flimsy, and that the refill tube did not allow enough water to remain in the closet bowl to be sanitary. The valve had a small overflow tube with a rubber float—and the rubber none too good at that. It is hard to get good rubber, even in shoes. Even best quality rubber in a float in water swells, and in a few months is worthless.

When a man buys a Low Cistern W. C. Combination, he doesn't want one that causes trouble, as in the case mentioned. He wants one that is BUILT ON RIGHT PRINCIPLES, and has the MATERIALS and WORKMANSHIP in it to stand the test—not for a few months—but for years.

"ROYAL" Low Cisterns are made by workmen who are proud of their work, and try to make every "ROYAL" Low Cistern W. C. Combination as good as they know how.

The Lining is Heavy Copper, double lock-seamed.

The Valve Float is made of COPPER—not a cheap rubber bulb.

The Ball Cock is noiseless.

The Woodwork is of Golden Oak, well finished and put together, and the Tank has Lock-Joint Covers.

When we say that "ROYAL" Low Cistern Combinations are "Fit for any Bathroom," we are telling you what we know to be a fact, and we ask the chance to prove it to you. Why not investigate? Our prices are no higher than for other makes that are uncertain, and we can quote you a price delivered to your city.

EVERY TANK BEARS OUR TRADE MARK.

T. McAVITY & SONS, Limited

St. John and Winnipeg

WAS THE GARDEN OF EDEN IN MISSOURI?

We all have that "show me" instinct which must have come from some common ancestor—the presumption is that it came from Adam.

The low-priced article is the money-maker.

With an effective display and attractive, alluring show cards (furnished by us) goods of first class quality and established reputation will sell themselves.

SAPHO ANTI-DUST

meets a long neglected demand for a sweeping compound which not only has a sweet, wholesome odor, but which is at the same time a strong disinfectant. **It is the only sweeping powder which kills moths, insects and disease germs, makes carpets look lie knew, reduces the expense of frequently washing uncarpeted floors.** Its advantages are manifold and we will gladly send you "selling details."

SAPHO INSECTICIDE

kills instantly cockroaches, bed bugs, ants and insects of all kinds. Summer hotels and cottages are entirely freed from all insects by the use of this preparation. It is beyond all doubt the most effective insecticide on the market and a quick seller. Last year's demand exceeded our capacity.

SAPHO METAL POLISH

is an old favorite among those who have used it. The composition makes it especially desirable for use on metal exposed to rain and damp.

By means of carefully thought out and ingenious selling schemes which are at your service, you will be shown how the Sapho products sell.

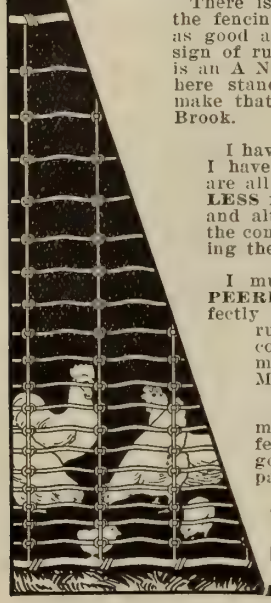
Why Not Sell the BEST Fence?

When you sell a fence your customer holds *you* responsible for its quality—not the maker. So why not sell the fence that will satisfy your customers and bring them back for more? Read what some dealers have to say about the

Peerless Fence

Saves Expense



There is no fault to find with your fence the fencing I put up four years ago is just as good as the day I put it up, showing no sign of rust and giving good satisfaction. It is an A No. 1 Fence. The **PEERLESS** around here stands the test better than any other make that I have seen.—John Mason, Spring Brook.

I have been well pleased with all the wire I have received from you. My customers are all highly pleased with all the **PEERLESS** fencing they have received from me, and although opposition is very strong in the community, **PEERLESS** Fencing is taking the lead.—Wm. F. Mills, Wheatley.

I must honestly confess I have found **PEERLESS** Fencing, once stretched, perfectly satisfactory. I have never seen any rust on it yet, nor have I received one complaint from the many different men I have sold wire to.—J. H. Craig, Metcalfe.

We manufacture farm and ornamental gates, lawn, farm and poultry fences of a quality that will build up good business for you. Write for particulars.

"Clyde" Hercules

Rockwell Pattern

The

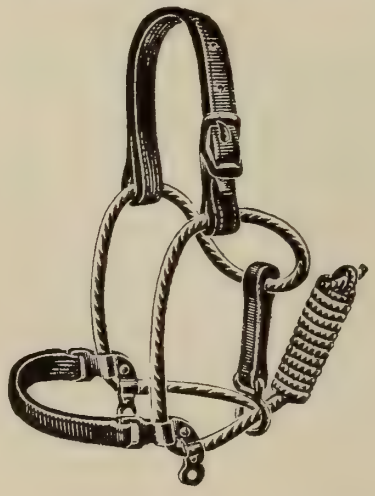
Handy Hame Strap

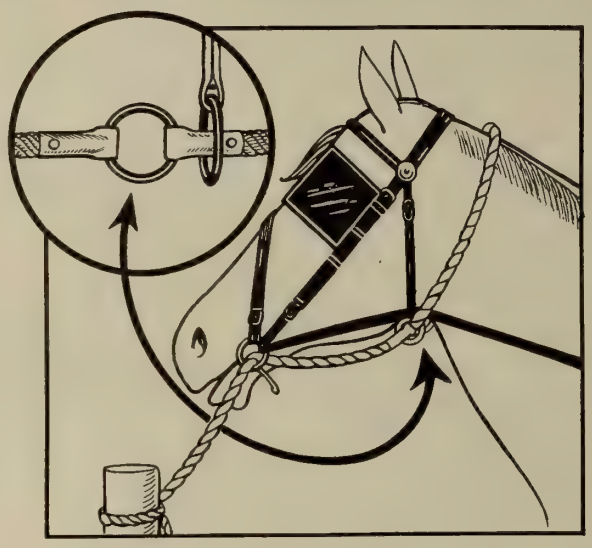
NEVER SLIPS

DO YOU SEE THAT HOOK?

It withstands the extra wear at this point and prevents slipping when being pulled up. When ordering Hame Straps be sure to specify "The Handy." Through your jobber or direct.

"Giant" Hercules





THE HARVEY TIE

This Tie has met with such favor locally that we have decided to offer it for general sale. There is no snap to break and no knot to untie. Simply throw it over the head and run the shank through the bit. On a straight pull a ring will stand three times as much as a snap.

HERCULES HALTERS HOLD HORSES

and selling HERCULES HALTERS will not only HOLD your HALTER trade, but will increase it.

The "Giant" Hercules here illustrated is, without exception, the strongest halter on the market to-day, which can be retailed for less than a dollar. This Halter created a great deal of interest at both the Guelph and Montreal Hardware Exhibitions. One farmer, on seeing it in our exhibit, said to his friend: "I cured an 1800-pound horse of halter-pulling with one of those halters. He pulled just three times and quit."

The "Clyde" is a very heavy halter, made of quarter-inch stock, all double and stitched, and weighs 25 pounds to the dozen. It makes a splendid dollar and a quarter line, with 50% profit. Worth considering, isn't it?

Why not try a sample order of Hercules Halters? They are sold by the leading Jobbers in Canada, or direct from the factory. We will prepay a set of six samples to any point in Ontario or Quebec, or give you a list of Jobbers handling them, on application. It's almost a case of "Dollar Diplomacy," and dollars count.

PURITAN
MOTOR WASHER

The "Puritan" Motor Washer has taken hold splendidly in the cities and towns where waterworks are established. The strength, simplicity and fine finish of the motor, and the fact that it works on very low pressure, have given the best of satisfaction to those who have bought one. The tub and washing mechanism are just the same as in the old favorite "Puritan" hand washer, and that means that there is nothing better made.

CHAMPION
High Speed Washer

The **"Champion"** High Speed Washer has also the same tub and rubbing mechanism as the old "Puritan," but a new and improved drive. The feature of it is the heavy balance wheel, which revolves several times for every stroke of the lever, making the "Champion" work with wonderful ease and smoothness.

"BLUE BELLE" WASHER

The **"Blue Belle"** Washer is of the revolving tub type, and for those who prefer that kind of a machine it has no equal. The tub revolves in one direction while the upper rubbing board turns the opposite way, making it very fast. Heavy coil springs underneath the tub assist materially in working it.

MAXWELL ELECTRIC WASHER AND WRINGER

We are the first manufacturers in Canada to design and place upon the market an Electric Washer and Wringer as illustrated. This is driven with one-eighth horse-power Motor and can be attached to any ordinary electric lamp socket, and Washing Machine and Wringer are independently driven—the one can be thrown out and the other operated by a very simple device and can be used in any house where electric wiring is installed.

It Will Pay You As to the Sell "MAXWEL

The "Maxwell" products are known quality and highly efficient service.

The dealer who handles this line is goods that allow an attractive profit and

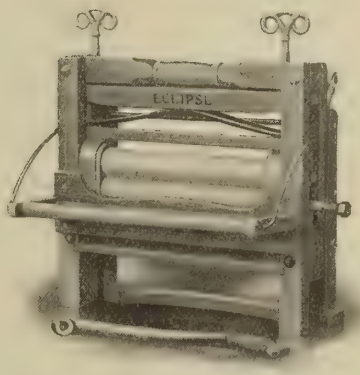
David Maxwell and

'FAVORITE" CHURN

Maxwell's **"Favorite"** is used all over the world—in Denmark, the butter country of the world—in the United States, in spite of high tariffs—and in every section of Canada. Our Agricultural Colleges and Govt. Inspectors recommend it, because it is the finest butter-maker in the world.

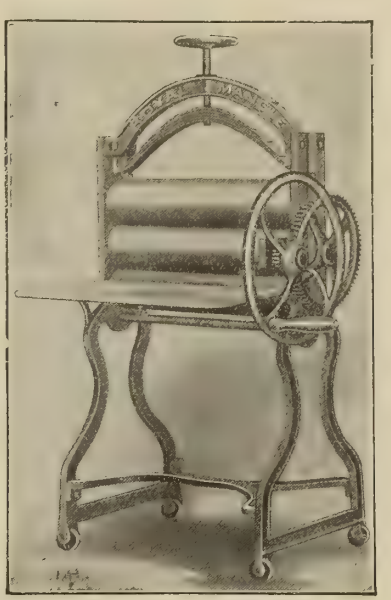
The roller bearings—and hand and foot levers—make churning an easy task, even for a child.

All sizes from ½ to 30 gallons.



"ECLIPSE" WRINGER

We illustrate **"Eclipse,"** the latest type we have placed on the market. This Wringer can be attached to Laundry tubs of any description. We manufacture a line of Wringers embracing between 50 and 60 different machines from 10 inches to 14 inches in width and from one to five years' grade, with and without ball bearings or covered gear. A variety to suit the wants of all customers.



ROYAL MANGLE

The **Royal Mangle** is a household convenience in which you could do considerable business with a little pushing. The value of a mangle in the large household is not yet fully appreciated, but the introduction of half a dozen "Royals" in your neighborhood would go a long way toward making its value known.

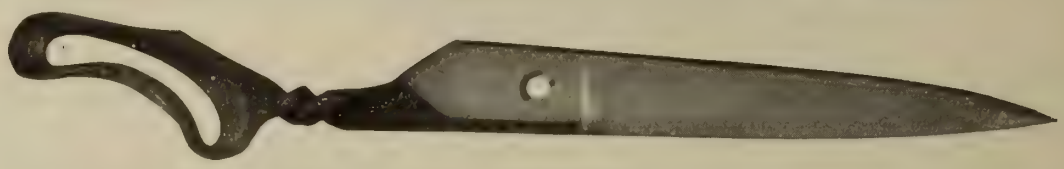
The WISS STEELFORGED PROCESS makes WISS SHEARS SUPERIOR in SHARPNESS and DURABILITY



It's a Profit-Producing Policy to Sell Wiss Shears and Scissors

Perhaps you say—as thousands of other clever merchants have said—

"I don't care a snap about BRANDS. I judge by merit—and not by NAME."

That's right—DEAD RIGHT.

And the best of all reasons why you should want to sell WISS Scissors and Shears.

We've been producing high grade cutlery since 1848. We've got the experience—the plant—and the men. It was only natural that "WISS" should perfect the celebrated "STEELFORGED" Process—the wonderful welding of a high carbon crucible steel cutting edge onto a breakproof frame of forging steel.

The merchants who buy on a COMPARATIVE MERIT and VALUE BASIS are our biggest and most discriminating customers.

AND THESE MERCHANTS ENJOY THE BEST TRADE—MAKE THE MOST PROFIT—AND KEEP THEIR CUSTOMERS.

Send for free catalog, illustrating 167 patterns and interesting information on building up REAL scissors and shear trade.

These Goods Sell on Sight!

COLLINS

3-Gallon

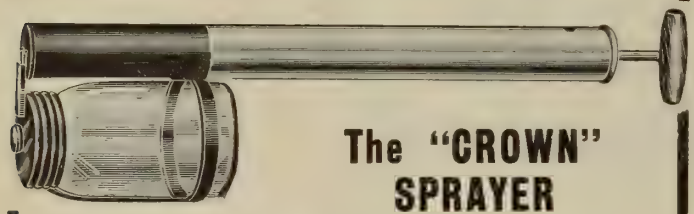
Improved Automatic Compressed Air Sprayer

Holds 1-3 more than any other sprayer on the market.

By a little change in the nozzle it will throw a long distance stream, about 35 feet.

One of the great features in this machine is our COUPLING, CONTROLLED BY US. constructed in such a way that the handle does four operations.

1st—Puts the cap on by turning handle to the right. 2nd—Takes cap off by turning to the left. 3rd—By inserting handle under clips or hooks can be carried from place to place. 4th—The same handle does the pumping. Every part is of the very best material, made by skilled workmen, so that we never have any blow-outs or leaks. Holding three Imperial gallons—when properly charged will run for fully 10 minutes before recharging.



The "CROWN" SPRAYER

This is an ideal sprayer for spraying flowers, trees, etc., can also be used for washing buggies or windows. The price will interest you.

The old reliable One Quart Crown Sprayer now on the market for several years, and the demand increasing every year. **It is adapted for spraying all kinds of Disinfectants, Fly Oils, Paris Green, etc. The great advantage of this Sprayer is the glass reservoir—contents always in view and should the glass get broken, step into the kitchen and replace it with another.**

Made of the best material all throughout, the barrel of heavy tin, 1¾ in. in diameter by 20 in. long, double spray, two curved brass tubes leading to contents, permitting it to spray upwards or downwards. Absolutely non-rustable.

Write at once for full details and prices.

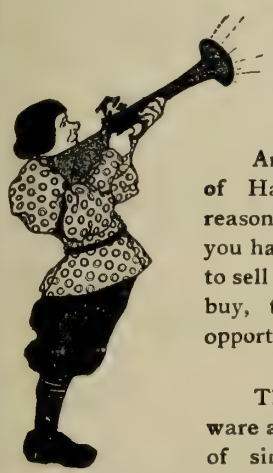
Hits the Mark



Among the thousands of readers of Hardware and Metal it seems reasonable that someone wants what you have to sell, or that someone has to sell what you have tried in vain to buy, that someone is hunting the opportunity you have to offer.

The want ad. columns of Hardware and Metal are the simplest form of simplified advertising. No ad. writer need be employed, no drawing or cut need be made, no knowledge of display type is necessary, for display type will not be used in these columns. All that you have to do is state your wants, state them simply and clearly and send to any of our offices along with remittance to cover cost of advertisement. No accounts opened in this department.

Don't despise the want ad. because of its small size or small cost. Don't forget that practically all the hardware merchants, clerks, manufacturers and travellers read our paper each week.

RATES:—
2c. per word first insertion.
1c. per word subsequent insertions.
5c. additional each insertion for box number.

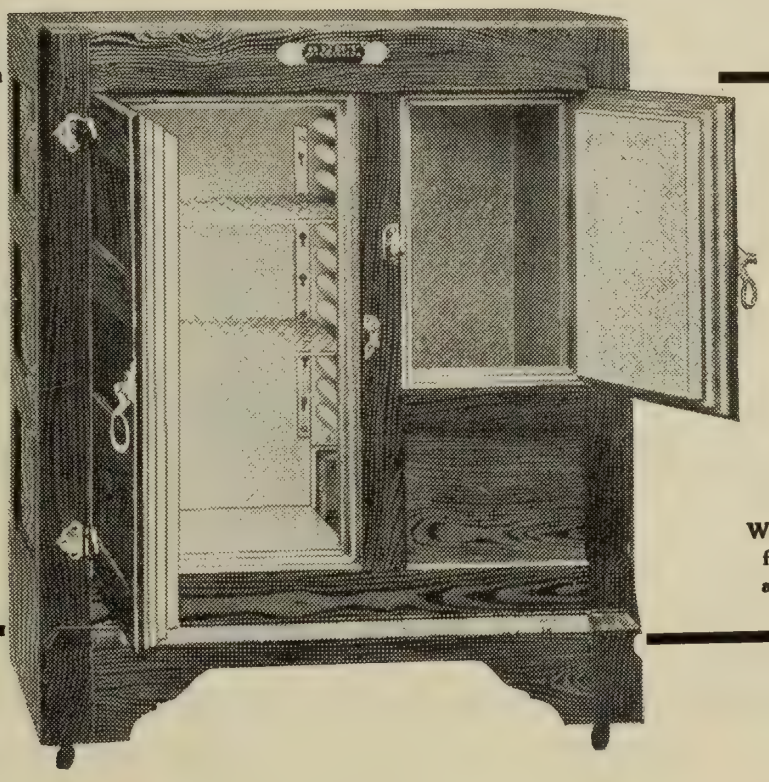
Perfect Circulation of Cool Dry Air

is acknowledged to be the ideal condition for a refrigerator, and it is the Syphon system of the

"BARNET" Refrigerator



Write To-Day for Details and Prices.

which has made this satisfactory result possible.

And besides keeping foodstuffs in prime condition, milk sweet, butter untainted, and salt perfectly dry, the Barnet is the Refrigerator YOU should recommend, because it is so economic in ice consumption, so perfectly sanitary and so easily cleaned.

THE REPORT OF EXPERTS on the "BARNET" REFRIGERATOR

Inspector of Hospitals and Charities, Parliament Buildings, Toronto

Having for some time been impressed with the great desirability of having a refrigerator, which, on account of proper ventilation and at the same time economical in the use of ice, I might be able to commend, I willingly consented to act with Mr. S. A. Armstrong, Assistant Provincial Secretary of Ontario, for the purpose of judging the merits of the "Barnet" Refrigerator.

We were first shown the empty refrigerators at the National Exhibition, Toronto, and allowed to designate any of our selection for the test. One was chosen and, after having been supplied with ice, the compartments were well filled with a quantity of food supplies, including milk (not pasteurized), fish, meat, onions, butter, cheese, apples, tomatoes, celery, oranges, lemons, bananas, matches and salt. The refrigerator was then locked and sealed, so that no one could open the door. The seal was broken 96 hours afterwards and the contents were found in a surprising condition. The milk was as sweet as when purchased from the vendor four days before and entirely free from any taint. The onions and other vegetables and fruit had not imparted the slightest odor to anything. The salt and matches were as dry as when placed in the refrigerator.

A more rigid test of ventilation could not be asked for, and the conditions in which the food supplies were found quite justifies the statement that the "Barnet" Refrigerator is constructed on a hygienic system peculiarly its own.

R. W. BRUCE SMITH.

I desire to corroborate the above statement, having been present and noted the conditions mentioned.

S. A. ARMSTRONG.

The Barnet Manufacturing Co., Ltd.

Renfrew, Ont.

The Merchants Bank of Canada

Brandon

The Barnet Mfg. Co., Limited,
Renfrew, Ont.

Gentlemen,—

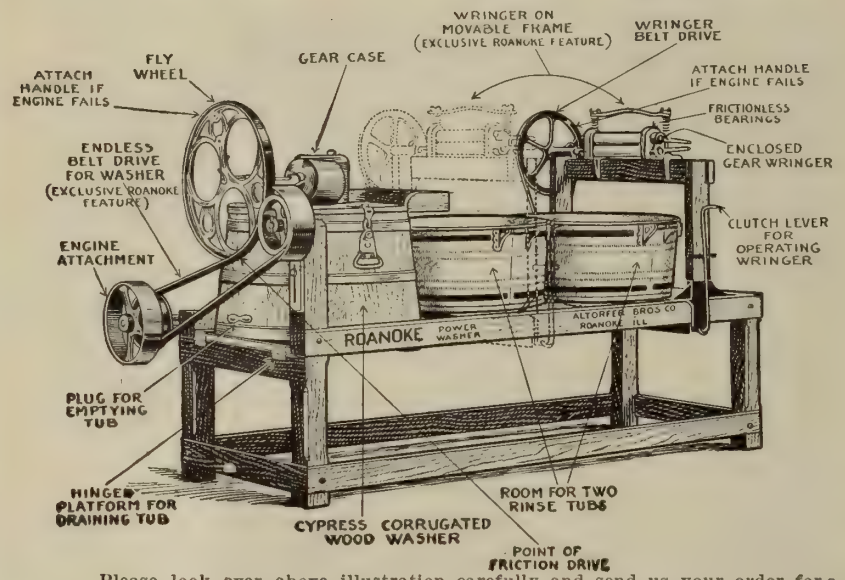
In reference to the refrigerator purchased from you a month ago, I would like to say, that it is giving entire satisfaction. The weather has been steadily warm since we commenced using it, and it has been working to perfection. The ventilation is good, and there seems to be no contamination whatever of any articles of food. Moisture does not collect inside. It is dry and sanitary. The consumption of ice is moderate. The refrigerator is so much better than the old one, that the two can not be compared at all. I consider you conferred a distinct benefit in persuading us to try it. We would not now be without it on any account. It will be a pleasure to recommend it to our friends.

Yours truly,
(Sgd.) J. S. Willmot.

ONE DEALER TRAVELLED OVER 800 MILES

TO GET THE SALES AGENCY OF THE

ROANOKE POWER WASHER AND WRINGER



Many other progressive dealers have gone way out of their way to get the Roanoke. Why? Because the Roanoke is **"The World's Best Power Washer."** It is the fastest, most profitable seller.

The Roanoke is best because it is the original machine with a Sliding Power Wringer. This wringer is vitally important because it saves much time and labor. Reversible ball bearing wringer slides along washstand and can be operated at same time washtub is working. Any power—gasoline, electricity or steam—operates both. No lifting or shifting of tubs.

The Roanoke is the only Two-Tub Power Washer and Wringer in the World. Think of the many advantages of this feature.

The Roanoke Belt Drive saves clothes and machinery. Still another reason for the Roanoke superiority. These points of merit (there are many others) and our extensive advertising in the magazines, weekly and monthly Agricultural Publications, make it easier and more profitable for you to sell the Roanoke Power Washer and Wringer than any other machine.

Big Profits to You

Complete Satisfaction to User

Please look over above illustration carefully and send us your order for a trial machine. We guarantee satisfaction. Do not wait, do not delay; delay was the reason of the dealer traveling 800 miles to secure agency. **Send order now.**

Altorfer Bros. Company, **Makers Exclusively of Washing Machines** **553 Jefferson Street ROANOKE - ILLINOIS**

A Proposition That Is Worth While

One that will fill your spare time with congenial work---bringing good money. Are you interested? You are. Well, here are the details.

Throughout Canada is scattered an army of men who are everywhere booking subscriptions for MacLean's Magazine. If you join them you can add very considerably to your regular income. If you are a hustler you will find it will pay you to give all your time to the work.

Some of our most successful salesmen were "spare time men" first.

JAP-A-LAC

THE KING OF HOUSEHOLD FINISHES

LOWER RETAIL PRICES

LARGER PROFIT to DEALERS

Taking into consideration the quality of JAP-A-LAC, also the retail demand created by our heavy advertising, and the fact that the consumers' cost is not higher than on other varnish stains, there is no question but that, under the new selling prices and new discount to dealers there is more money made by selling JAP-A-LAC than in selling substitutes. Write for our new retail prices and proposition to dealers.

TRADE Gillette MARK
KNOWN THE WORLD OVER

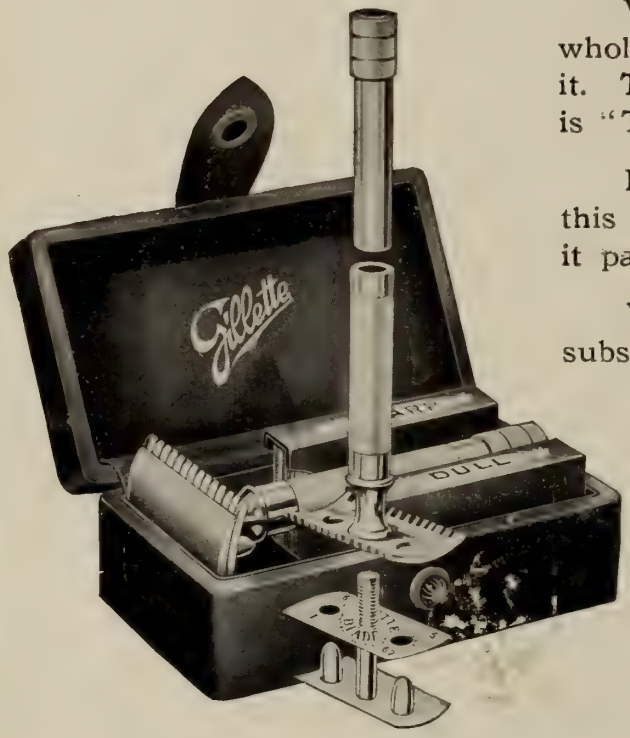
The Momentum of the GILLETTE

Ever watch a big Mogul puff and tug to start a heavy freight train? It certainly takes some energy.

But when that train has hit a 40 mile gait, it is easier to keep it going than to stop it.

It took no end of advertising and a vast amount of energy to convince men that the GILLETTE Safety Razor, so different from the open blades to which they had been accustomed, would really shave them quicker and better, as well as more safely. But we did it

Once started, that idea has steadily gained momentum, as time has proved the GILLETTE'S superiority. Persistent, vigorous advertising has helped it along, and now when a man thinks of safety razors he is almost sure to think first of the GILLETTE. Over six million have been sold, at prices that have never been cut, and sales are increasing every year.



What is true of the country as a whole is true of your particular section of it. To YOUR customers the GILLETTE is "The Razor of To-day."

It's a great deal easier for you to keep this idea going than it is to stop it—and it pays decidedly better.

With its immense popularity—its substantial, protected profits—and the way it brings men back regularly for new blades—the GILLETTE stands alone among razors. It's the livest specialty a Hardware-man can handle.

Are you taking advantage of the GILLETTE'S momentum to increase your business?

A SUGGESTION

Have you a stock of Spring Hinges that have distinctive selling features which your salesman can offer and which would make the prospective purchaser buy them and no other?

Chicago "Triplex" Spring Butts

offer this advantage to you. The appearance, durability and finish of this article are unsurpassed, and in consideration of prices that are conservative in respect to value, the up-to-date dealer cannot afford to neglect this profitable business.

Send for Catalogue M 26. It fully illustrates and describes the most complete line of Spring Hinges manufactured.

Chicago Spring Butt Company.

MOTOR BOATING

Will be more popular than ever this season

THIS year promises to be a record year in the motor boat field. When the season opens there will be a large number of new boats, and old boats fixed up. What are you doing to reap the benefit of this trade? Every wide-awake dealer should stock motor boat supplies and marine hardware. We carry the largest stock of accessories in Canada. Our Motor Boat Accessory Catalog is ready for mailing; a card asking for Catalog H. 24 will bring it to you.

If you are interested in Marine Engines you should have our Catalog H 23.

Stanley Tools

There are still a few Hardware Dealers who have not sent for one of our new Catalogues issued January 1st, 1912. It contains over 500 illustrations of STANLEY TOOLS, all of them made from new cuts, and many showing new tools which our previous catalogues did not contain. Among them are BREAST DRILLS, "JERSEY" VISES, snd several new PLANES, as well as new lines of BIT BRACES, "ZIG ZAG" RULES and SCREW DRIVERS.

The method of showing the different lines of Tools in a condensed form, avoiding unnecessary repetition, at the same time more fully describing the various articles than in any previous catalogues we have ever issued, is an original and valuable feature.

The different lines of tools are as far as possible listed in classes, and are so arranged that one opening of the book will show a complete line—an advantage, we believe, to both buyer and salesman.

It is 9½ inches wide by 11⅛ inches high—has a stiff board cover and is printed on a high grade of paper.

THIS BOOK SHOULD BE IN THE HANDS OF EVERY HARDWARE DEALER IN CANADA. A POSTAL BRINGS IT.

METALLIC PACKING

Steam pressure, sliding friction and moisture make it difficult to properly lubricate piston and valve stem rods, hence a self-lubricating metal like Magnolia naturally proves superior to other metals for packing rings. We recently published some splendid letters from Engineers on that subject, and here is another fine letter.

UNITED STATES ENGINEER DEPARTMENT
U.S. DREDGE "WALLOWA"

RIPARIA, WAS., OCTOBER 24th, 1911

Gentlemen:—I use Magnolia Metal for high-pressure steam packing on the main rods of the propelling Engines. These Engines have a piston speed of 150 feet per minute; diameter of rods, 3 inches; steam pressure, 225 lbs. per square inch: Four rings, or eight pieces, bevelled Magnolia Metal rings constitute the packing for each rod. I had a great deal of trouble with packing on the main rods, before using Magnolia Metal, with different kinds of Babbitt metals; the packing would melt or burn and crumble. I have at different times, when renewing packing, taken out from 30 to 48 pieces from each set, out of one stuffing box. Since using Magnolia for the rings, I have had no trouble whatever with the packing and after the rings got conditioned to the rods no steam leaked by. To-day I examined the packing rings and found them in as perfect condition as when I put them in four months ago, with hardly any sign of wear to them, and they look good for years of hard service. I cannot speak too highly of Magnolia Metal. Yours truly,

JOHN OWRE, Steam Engineer on U.S. "Wallowa."

SPECIAL OFFER

PRACTICAL ENGINEER POCKET BOOK, 680 pages, over 2000 subjects. Price 40c. post paid. We do not aim to make a profit on these books. We buy them in large quantities as an advertising medium and give Engineers benefit of low price. They are highly spoken of by Engineers. Address Montreal office.

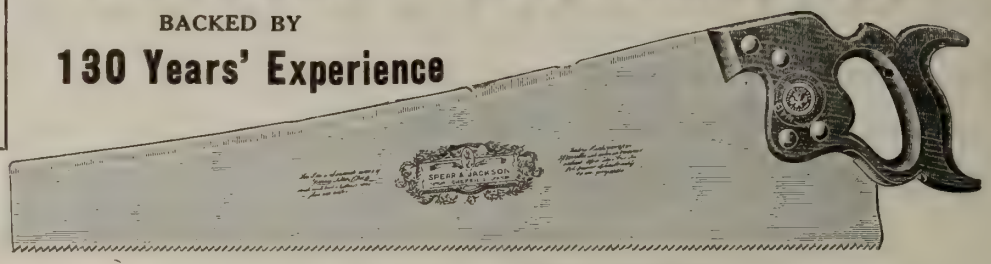
130 Years' Experience



LEAP-FROG

171-A Secret Process VANADIUM Steel
(Also Straight Back)

Extract from The LONDON DAILY TELEGRAPH

WHICH SPEAKS FOR ITSELF

As a matter of fact, the trade of which Sheffield is the centre has in the last year or two fought—and won—a notable fight. Germany was a formidable competitor; America a yet more serious one, in the matter of tools, and especially SAWS. The English makers set themselves to meet this sharp rivalry, availing themselves of a superior position alike in materials and highly specialized skill. They took full advantage of the technical schools, with their scientific teaching as to metals and the treatment of steel, and paid more attention than they have ever done before to design and finish. Their energy and enterprise won prompt recognition from the buyers for the retail trade, and within very recent days they have enjoyed the spectacle of seeing the agent of one of the most noted firms of tool-makers in the United States coming over to make a tour of inquiry as to what had come over English trade that they had lost it so entirely. The British manufacturers had, moreover, proved conclusively that, quality for quality, their products had nothing whatever to fear on the important matter of retail selling price, and their victory was complete.

IF you are handling our Saws and Edge Tools, you are paying more for inferior goods. Does it pay you ?

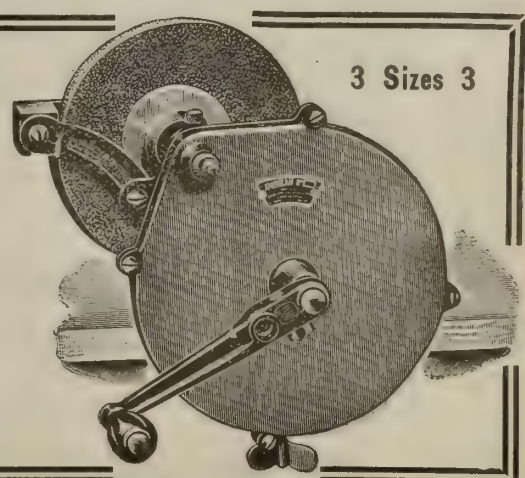
AMERICAN GRINDERS Are Real Trade-Winners

3 Sizes 3



This Grinder is particularly adapted for purposes where a very compact yet powerful grinder is needed. Just the thing for a carpenter's tool chest and private shops, as well as hundreds of occasions of like nature.

When the grinder is assembled a quantity of high grade oil is placed into the case so that the machine can be used indefinitely without oiling.

The gears run in this oil path, further causing them to operate noiselessly without friction, and with elimination of excessive wear.

Stock it at once—we guarantee good results.

A card will bring circulars and prices by return mail.

Three sizes. 4-6-7-Inch Wheels, Corundum or Carborundum.

Sport Lovers Now Considering Equipment

Baseball, Tennis, Lacrosse, Canoeing, Golfing and Fishing—All These and Other Activities Are About to Commence—The Devotees Are Wondering When the Season Will Actually Open, it is, Therefore,Well That Dealers Are Preparing to Meet the Demand—More Prominence to be Given Motor Cycles; and Bicycles, Which Were Largely Used at the Fashionable Winter Resorts, Are Being Quite Largely Handled—A Fine Fishing Tackle Window.

From the southern training quarters of the professional baseball teams there come reports of stars and rumors of new stars; from the river districts the old inhabitants are recalling, and improving, old-time fishing tales; from the sporting clubs come talk of tennis, and speculations regarding the earliest date upon which the courts will be ready for play. In short, spring is here, spring with its promises of the splendid out of doors sporting eason.

Since hockey was forced to yield defeat to the softening weather, there have been quiet times in the sporting departments of the hardware stores. But this is but the between-season lull. Shortly, the goods needed for the summer sports will be in demand. Evidence of this is to be found on every hand. The boys and young men, now so industriously reading of the baseball heroes, are only waiting for dry ground until they place their order for baseball goods. The fisherman will come for new tackle as soon as the season opens. The golfers are already examining their sticks and trying to decide if they will need a new driver, or if they can get along with the clubs which they have, plus a new brassy. Tennis players, too, are thinking of the game. More than one player is spending some thought over his racket. It is a favorite racket and he does not want to superannuate it if that is not absolutely necessary, but he is not quite certain that his game might not be improved by the purchase of a new model. Balls will have to be secured any way. Only the drying of the court is awaited.

Must Show the Stock.

So it goes. Every young man and many a young woman, too, is thinking of some game. The dealers are, therefore, rightly considering the best means of supplying this demand. They not only have to stock the necessary goods, but they have to let the sport lovers know that they have stocked them. So the wisest are planning window trims and attractive interior displays which will catch and hold attenton.

Baseball goods many consider an especially good line to carry. Undoubtedly there is a fine demand for these. While the professional games are the ones which attract the greatest crowds, there are, nevertheless, hundreds of amateur contests played every Saturday. In baseball season the world is pretty well divided into two classes—fans and non-fans—but the fans might be subdivided into the active and grand stand varieties. There are thousands in the first sub class, thousands who play the game themselves and who need the paraphernalia of a player.

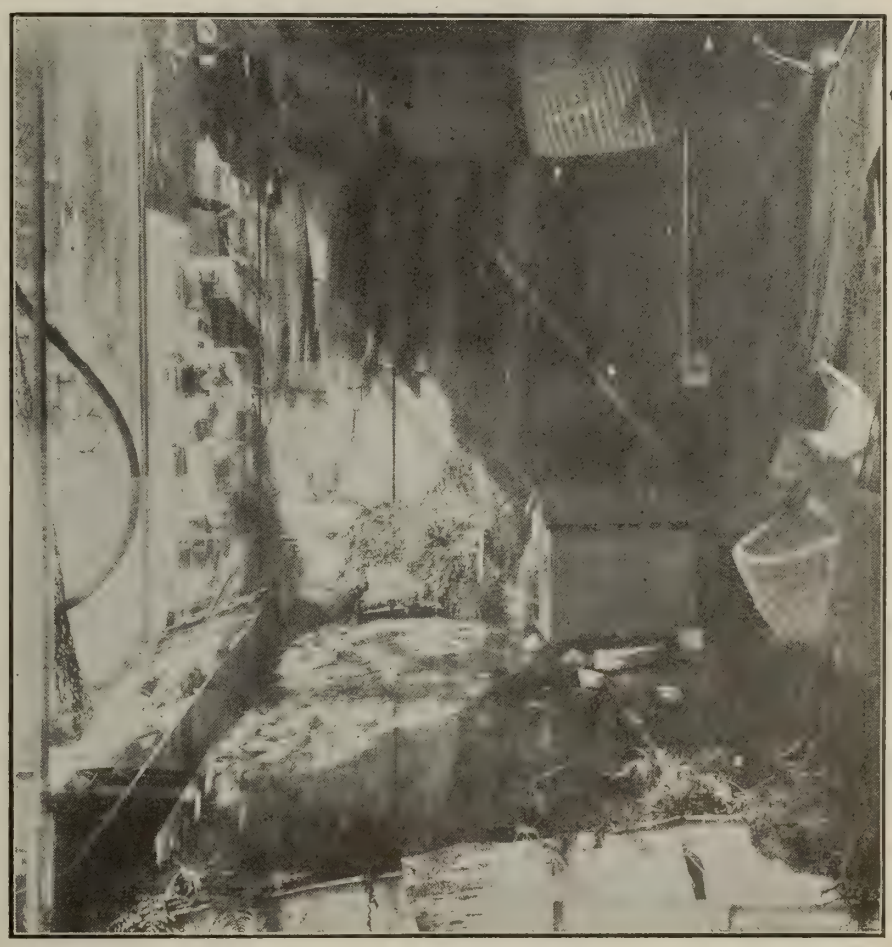
Boys Buy Expensive Gloves.

"One strange thing about baseball goods is this," remarked a man who has handled them for years. "It is for the good lines that the big demand is felt. You would think now that these little twelve or thirteen-year-olds would be satisfied with a cheap glove. But they arn't. I've sold a lot of them mitts costing from three to four dollars. They will work hard to get the money for a glove, and they save up until they have enough for a good one, too."

It is the old dyed in-the-wool fishermen who are the great buyers of fishing tackle. Young blood is coming into the fold every year, and to them a good quantity of supplies are sold, but the old timers are the big buyers. When the 24th of May approaches these men will become restless. They will feel the call of the river. Then they will buy some new tackle and be off. It is certain this will be so, for history repeats itself and so it has been in the past.

A Unique Window Trim.

A fine method of drawing attention to fishing tackle was taken by R. and W. Kerr, Montreal, last spring. One whole window was used to show the various lines. A galvanized tray, six inches deep and five feet by three in size, was placed in the window. At one of the ends a water wheel was constructed, over which the water flowed. The sides of the tank were covered with moss, and the bottom was given the appearance of a clear stream by a layer of pebbles. In the water swam about some large-sized minnows, while a miniature canoe floated on the surface of the water. The whole window was exceedingly natural,



Striking window display used to bring fishing tackle to the fore—The photograph is a little, indistinct, owing to reflections, making it necessary to make the exposure from the side.

ferns being used at the side and back to give a wood-like appearance.

Such a display naturally attracted a great deal of attention. It also sold a large amount of tackle.

According to those who are handling tackle in Canada at the present time—and they are a large number—the class bought is of fair quality. Some fishermen there are who hold that they can catch more with a ten cent pole than they can with a fine steel rod. Their number is not large, however. They are like the local preacher who violently opposed the renovation of the church in which he worshipped, claiming that he had been converted in a dingy old church with cobwebs as the only mural decoration, and he thought that was the best way to get converted.

Very Expensive Rods Not in Demand.

The great number of fishermen buy good rods and lines, though the high-priced articles so generally purchased in England do not find great favor here.

There are districts in which golf has not yet found much favor—districts in which the youth of the land has not become sophisticated through service as caddy. But wherever there is a golf links, there a demand for golf clubs and golf balls is felt. Many hardwaremen are making well out of their lines, though perhaps fewer handle this class of sporting goods than any other. It seems strange that this should be so, for there is money to be made from selling these goods.

For years tennis rackets, nets and balls have been given prominence in the hardware store. They appeal to men and women, and a sale is of especial value since it is almost certain to mean others. New balls will be needed before the season is over.

Paddles Worth Carrying.

In districts where canoeing is popular—and that means every district where there is a good river—hardwaremen are carrying canoes. It is an awkward thing to show, and yet in Montreal, some fine displays have been made. Canoes have even been placed in the windows, where they attract the attention of all passers-by. Paddles, of course, are needed, too. Indeed, the sale of these is not limited by the number of canoes marketed. Paddles occasionally break. Occasionally they get lost or borrowed. He is a fortunate canoeist who does not have to replace one or more blades during the season.

Bicycles and motor cycles are receiving attention from a number of dealers this year. The motor cycle seems to be coming into general favor—both as a means of pleasure riding and as a speedy means of transportation for the business man it is in demand. The bicycle is not gaining, but regaining favor. In Bermuda, Palm Beach, and such places where the well-to-do and fashionable foregather in the winter months, bicycles have been much used. The fad for them has been revived, and that seems to indicate that their use in cities and towns will become more common. There may yet be a rush for these machines, and if so, the hardwaremen will get his share of the profit.

Working Lines Together.

A wide variety of questions now face the hardware dealer who goes in for sporting goods. He must plan what he

F. C. Lariviere, Montreal, believes in displaying shaving accessories in his sporting department. He holds that this is the place where the greatest number of young men will see them.

can carry to best advantage. He must decide the manner in which he can best give these lines prominence. He must figure out attractive window trims and result-bringing ads. Moreover, he must remember that the sporting department—like many others—brings an indirect benefit. He must try to bring those lines which find their readiest sale among the young men into proximity with the sporting goods. F. C. Lariviere, of Montreal, remembering that the young man who comes to look for sporting goods may remain to examine something else, has gone so far as to carry razors in his sporting department. It is young men who are largely interested in these, and he has found that many sales have resulted from this arrangement.

Sporting goods have come to mean much to the hardwareman—especially at this season. To handle them properly necessitates a great deal of thought, but it is thought which will bring results, and after all that is what all the dealers are eagerly looking for.

Going Out After The Roofing Trade

Dealers Should Make an Effort to Secure Orders for New Buildings Now in Course of Erection—Thornton Bros. of Bradford Send Out Circular Letter to Their Customers and Get Results.

The spring trade starts before real spring weather arrives; that is, before it puts in its appearance permanently. The dealer's campaign should begin even earlier. He must be in the field with suggestions and methods for trade stimulation before the demand for spring goods has begun to manifest itself to any effect.

One of the best lines for spring exploitation is ready roofing. Hardwaremen have been handling it in large bulk of late years and have found that the demand has been growing with singular rapidity. Now building work begins just as soon as the snow clears away; even sooner than that sometimes. The dealer who wants to sell roofing for the new buildings going up in his vicinity cannot afford to lose any time about it, therefore. The owners or the contractors should be seen at once.

A good many dealers are adverse to outside canvassing. They claim that it involves unnecessary expense and that it stirs up bitter competition. In the opinion of the writer, however, outside canvassing is not only advisable but necessary in the matter of roofing.

In the first place the owner or the contractor will be found in a number of cases undecided as to what material to use. The shingle is still very much in use and will continue so until such time as all dealers make their roofing campaigns thorough and persistent. If a call were made, or several calls in connection with every building, the contractors would use prepared roofing to a greater extent and the dealer would reap the benefit of his thoroughness and persistency in bigger sales. A great many houses and buildings are finished off in the old way because the owner has never considered the advantages of using ready roofing.

Sent Circular Letter.

Among the firms who believe in featuring roofing are Thornton Bros. of Bradford, Ont. They also believe in going after this class of business early. This year circular letters were sent out to all prospective customers, outlining some of the advantages of ready roofing. The letter read:—

Bradford, Ont., March 9, 1912.

Dear Friend,—It has been some time since we heard from you and we do not intend to let our interest in each other lag, if it is within our power to prevent it. We enjoy your fellowship and business relations, and trust they may grow to even larger proportions this year. We handle roofing among the other good things on our list and this product is not of the ordinary kind but is considered by the large railroad companies and manufacturers as the best roofing material on the market to-day. We are delighted with it, and we take pleasure in recommending it to prospective users. Now the very next time you want to put a roof on your sheds, barns, or buildings we want you to give it a trial and you can take our word, it will prove the best and most lasting roofing you ever tried. It is cheap and does not take long to put on. It is made from fine wool felts and high grade asphalt, for these have proved the most elastic element defying properties possible for roofing. It carries an iron-clad guarantee.

A full line of "——— ———" roofing is carried in stock by us, and the next time you are near, if you will stop and get a few rolls just for a trial we are sure you will thank us for writing to you.

You will notice we handle a full and complete line of builders' hardware, stoves, paints, oils, cutlery, plumbing, etc., and our standard steam and hot water boilers meet your heating problem perfectly.

Very truly yours,
THORNTON BROTHERS.

This plan was found to be an effective means of bringing trade. Many people have since called in and the roofing demand has been large for this time of year.

Keeping in Touch With Contractors.

It is extremely important that the dealer should keep in touch with the contractors. It is not roofing only that can be sold in that way. The contractor needs a great many things; nearly everything that the hardwareman has to offer—builders' hardware, building paper, tools, cement, glass, paint and so on. If an order for roofing cannot be secured, other goods can be sold. The canvasser, if at all efficient, is certain to secure enough business to reward him for his time and trouble.

BETTER CONDITIONS TO FOLLOW.

Cleveland, Ohio, March 27.—The Iron Trade Review to-morrow will say:—

In the United States court last Saturday, Judge Killets asked District Attorney Denman whether there were any further orders to be entered in the rebating cases, the latter smiled and said there was nothing to be done except to arrange for the payment of the fines. Everybody seemed to be pretty well satisfied, and that is the attitude of the iron trade. Better conditions are expected to follow. During the past week there has been a moderate amount of ore selling, including a round tonnage for delivery in the east, from which the higher prices of last year practically exclude Lake Superior ores. Prices of finished material have hardened during the past few days, and pig iron, though not very active, showed considerable firmness in price.

The market on some finished products has advanced about $1 a ton, this gain being in a closer adherence to nominal prices in many instances, while in some others it has been an actual advance. The excitement in the coke market is less noticeable. Semi-finished steel is stronger, and buying more liberal. Railroads have appeared as buyers of cars. Light rails are increasing in activity, with production greater than at any time during this year. Plates are firm and specifications are increasing. Sheets have shown a better volume, and prices have firmed up considerably. Inquiries for structural material are more numerous, and the outlook is becoming more clearly defined as the season advances. The pig iron market, while firm, has not been so prolific of big orders, but there are signs of higher prices for third quarter delivery.

PUBLISHED EVERY SATURDAY.

A NEW SUPPLY OF TIN.

In Northern Nigeria, on the west coast of Africa, a boom is being experienced in tin mining. But this is as nothing compared with the boom in tin mine stock which is now taking place on the Stock Exchange in London. There, stocks which a few weeks ago were quoted at £1 are now being bought and sold for £5. Rayfield Syndicate shares show an even greater advance, nominally, worth 5s., these are now being quoted at £8. 10s.

The boom may be partially the result of stock market manipulation; yet there is some ground for the activity, the production of tin in Nigeria being at the present time quite considerable. So far the tin ore has been discovered only in patches, but there is now word of a great tin lode six miles long and 30 feet broad. Such a lode, if it exists, would render possible the production of great quantities of tin. It would put Nigeria on a par with Straits Settlements.

Tin can be produced in North Nigeria and delivered in London at a cost of £50. When it is considered that last year tin sold as high as £233 per ton, and that it is now selling well up to £200 per ton, it will be apparent that there is some ground for the speculation now taking place. Whether the Nigerian tin lode is as great as has been reported, of course, remains to be seen. This is exceedingly improbable, yet it does appear that the world's supply of tin may be increased by reason of the operations now being more extensively undertaken.

HAS BUSINESS OUTGROWN THE RAILWAYS?

Has business in Canada outgrown the railway facilities? This seems to be the reason for the serious situation which has developed during the past month.

The transportation problem in Canada is presenting many difficulties. The extraordinary development of the country in point of industry and commerce has been taxing the railroads for some years. The moving of the Western wheat has become such a gigantic task that each fall the danger of a freight blockade becomes more imminent.

At the present time the freight situation in some sections is causing much worry. Toronto shippers are being seriously hampered by the inability of the railroads to handle goods on time. Consignments of freight which should have been delivered early in the month, are in many cases still on the road or at the place of shipment. Had the weather been more propituous the freight blockade would have developed into a menance. As it is, trade has not opened up rapidly and the delay in shipments has not hampered business as seriously as it might had weather conditions been favorable.

The only feasible explanation seems to be that the transportation facilities have not kept pace with the development of the country industrially. In view of the fact that everything points to the present year breaking all records, the necessity for an improvement in the freightage facilities becomes a matter of grave import.

FEATURES OF MODERN STORES.

The improvements that are being effected in the construction and lay-out of hardware stores is shown by the descriptions of new stores which appear from time to time in Hardware and Metal. It has become a custom to make such descriptions a feature of the special numbers published each year. In past years, illustrations have been given of elaborate and up-to-date establishments, which have had an undoubted interest for members of the trade. In the special number just published, the new store of Thornton Bros., at Bradford, was described at some length and mention was made of the many practical ideas and improvements which have been put into effect there.

The close attention of every hardwareman should be given to this article. Thornton Bros. are doing business in a small town and their establishment stands as a model which all dealers, no matter how restricted their field may be, can hope some day to attain to. The ideas put into effect by the Bradford firm could be incorporated with good results in many hardware stores where a business on the same scale is conducted.

An especially commendable feature is the unpacking and shipping room at the side of the store. Not only is it possible by the use of this department to look after deliveries promptly, but the receiving and unpacking of goods has been systematized. Nothing so detracts from the appearance of a store as a collection of cases and packages shoved into odd corners waiting to be unpacked, or worse still to see the work of unpacking being carried on within the store. Where space permits, it is indeed a wise plan for dealers to provide a separate department for this work.

HIDING GOODS UNDER A BUSHEL.

This is a day of keen competition, when men crave all aids to salesmanship. The manufacturer who advertises his goods has little difficulty securing for them a place upon the dealer's shelves. Not only is this so because the dealer takes it for granted that the goods must have quality to give the manufacturer that confidence which leads him to expend a considerable sum to introduce them; but also because he knows that the goods which have been extensively and properly advertised will sell rapidly.

But while this is so there are cases in which dealers fail to do their part. They are glad to handle goods which have been advertised, yet they do not get the full benefit from this advertising. They hide it under a bushel.

An eastern dealer carries a much advertised line of silverware. This he shows in his windows and in his silent salesman, but not in the whole store is there a single sign to connect this silver with the line so well known by reason of the publicity given it. The retailer is selling good silver and is securing results; but he is wasting the good advertising which the manufacturers

are doing to help him secure his sales. He is robbing himself and the manufacturer. He is not only burying his own talent but also that of another.

Manufacturers advertising is an exceedingly valuable thing, but that the results may be most effective it must be followed up by the retailer. There must be a connecting link—something to let the customers of a store see that the article there displayed is the same article that had been brought so prominently to their attention, and for which they have come to feel a want. Some lines there are which state this fact themselves, by means of a prominent trade mark; but there are others which are not so self explanatory. They need the assistance of those signs and posters so carefully prepared for the retailers' use by the manufacturers who produce and advertise the goods.

To visit each factory and jobbing house in search of this information would not be feasible. To thoroughly read all the catalogues of all the firms bidding for business from the Canadian hardwaremen would be a physical impossibility. But to study the advertisements in each issue of Hardware and Metal is undoubtedly practicable, and it would give the hardware buyer a splendid grasp of the situation.

HANDLING NEW LINES.

The field of the hardwareman is almost unlimited. It is growing wider every day. New goods are appearing on the market which fall naturally under the head of hardware, and changes in commercial conditions are bringing other lines within his scope.

Each dealer must exercise judgment, however, in deciding in what directions his own business is to expand. Some lines which can be handled with great success in some places would prove flat failures elsewhere. Handling motor repair parts and accessories is a highly profitable venture for most hardwaremen, but there are some localities where it would not be advisable. If a small town already boasted a couple of up-to-date repair and supply shops, the hardware dealer would find it difficult to get a share of the trade. Jewelry is a first-class line in a great many localities, but there are other places where the opposition would be too keen for the hardwareman to start. When a trade paper points to the advisability of handling certain goods, it should not be thought that this is meant to apply to all members of the trade. Each dealer must apply the information given to conditions in his own locality. If conditions are not favorable, it would, perhaps, not be wise to make the venture. No rule can be drafted which would apply to all hardwaremen. Conditions vary and localities differ very widely.

BRIGHT WESTERN PROSPECTS.

The Board of Trade of Moose Jaw, Sask., claim there is every indication of a shortage of men in April in that district, unless the immigration at the latter part of the present month is heavy enough to meet the demands. Already the farmers of the district are sending in orders to the local employment agencies for men which will make the demand for farm help busier than in any previous spring. For the programme of building which is going on in that city this year, there will be needed altogether, according to the estimate of a contractor, fully 5,000 men, including carpenters, finishers, bricklayers, and concrete workers.

A city official estimates that the sewer, pavement, and water programme for the year will require several hundred men.

If this is an indication of western progress this year, prospects for a good 1912 are quite bright. It is an undisputed fact that the coming year will see a large influx to the West and business will be particularly good if the weather permits the grain yield to be an average one or better.

POINTED EDITORIALS.

If a new world's supply of tin has been found in Nigeria, a serious problem will have been solved.

* * *

The efficiency cry is being raised by all papers and magazines. It has become, in fact, the main theme of the present moment.

* * *

The paint trade will soon be at its height. The duty of the dealer can be summed up in two sharp, idiomatic words: "Get busy."

* * *

A motor boat exhibition is now being held in the arena, Montreal. Those dealers who are finding accessories a profitable line are paying considerable attention to the show.

* * *

A Belleville, Missouri, merchant has placed a striking sign over his store. "Come in without knocking," it says, "You're sure to go out the same way."

* * *

The qualities which go to make up an "efficient" man are: E—Earnestness; F—forcefulness; F—faith; I—initiative; C—conscientiousness; I—intelligence; E—energy; N—nerve (of the right kind); T—tenacity.

* * *

Spring is the season of all season's for the sport lover. The call of the brook and the woods is heard. The fan gives to baseball all the enthusiasm that he has kept pent-up during the winter. Is it any wonder, then, that the dealer finds the spring a splendid time for the sale of sporting goods?

* * *

Now Dr. Wiley, the United States Pure Food Expert, is resigning, claiming that his hands are tied. It seems a pity that a man who has the support of the people in general can not also feel the support of the authorities. Dr. Wiley has done much to put the canning business upon a higher plane. In doing this he has done something for the tin plate industry.

* * *

The series now running in Hardware and Metal, "Veteran Figures in the Hardware Field," has attracted a great deal of notice and comment. Some of the most interesting hardware dealers in Canada have been included in this series. Many practical ideas have been given in the various articles. Each sketch has contained suggestions and precept of value to every business man.

* * *

The burlap trade which has been greatly affected of late by reason of the high prices of jute will not likely experience any immediate relief. On July 1 next The Indian Factory Act comes into force. This limits the operation of mills to eleven hours a day, six days a week —a limitation which will certainly curtail the output. It seems the price of burlap is due to advance.

New Styles in Electrical Lighting Fixtures

The Old Ceiling Lights Have Given Place to Designs Suspended by Chains—Dining Room Domes Out of Style, Yet They are Still Popular—All Bars are Now Being Made in Circular Shape Instead of Square—Fixtures Remarkably Low in Price.

Whether spring or fall is the better time of the year for the sale of electrical fixtures may be a debated point. In some sections spring is the time when the largest sales are made. Other places experience the big rush in fall. There are some localities—localities where little building is being done, where Christmas is as about as good a season as any. But this is exceptional—usually the big demand comes either in the early days of spring or the early days of fall. It is then that those who have bought new houses are having them equipped with lighting fixtures. It is then those moving into old houses wish to buy some lights more to their liking than those which they find installed.

Showing New Patterns.

Little wonder, then, that those handling electrical fixtures are bringing them to the front at this time. They are showing complete sets which they can supply at a given price. They are showing fixtures especially appropriate to living room and dining room. They are bringing to the front all the new patterns.

New Patterns.—Here is where it pays the man handling lighting fixtures to study the trend of events. The fashion changes in lighting fixtures as it changes in well nigh everything else. The pattern which was much thought of a few years ago will still be highly regarded, yet those patterns are not the things which are now being largely sought.

It is but a little time ago that the aim was to have lights placed high up—bulbs, they appeared, sprouting out of the ceiling. In practically every room but the dining room this was the fashion, though in many households a greater variety was demanded. Still lights placed close to the ceiling were the fashion.

Chains Now the Thing.

At present these are not being sold so much. The light of the moment is that attached to chains. There are chains for the drawing room or living room; chains for the hall; chains for the den; chains for the bedroom, providing the wiring here does not necessitate the light being placed on the wall, instead of falling from the ceiling.

There are a variety of forms in which these fixtures are made—the chain is the only thing which remains constant. For the hall, for instance, a simple and yet an effective light is a globe hanging at the bottom of a chain perhaps two feet in length. The globes, of course, are made in various glasses—clear, ground, flowered. The prices vary, but this is a fixture which may be secured at an exceedingly reasonable figure, and which one Montreal dealer has been retailing at figures varying from three to seven dollars It is the globe which makes most of the difference in price. The chain remains about the same.

Ceiling Lights in Vestibules.

It must be noted that the old order of ceiling light is still being largely sold for use in vestibules and on porches. Perhaps the reason of this is that such a light may be installed inexpensively. It, moreover, seems exactly what is needed for this part of the house. These ceiling lights are being sold now at remarkably low prices.

Another hall light which is in considerable favor, is one in which the lamps themselves are placed within a glass or alabaster bowl. The bowl, of course, is suspended from the ceiling by chains. Such lights are more expensive. They are to be had for ten dollars, but the prices run from that up to forty and even higher.

In living rooms there are brass domes suspended from the ceiling by chains, and these again having lights suspended from them. There are clusters surrounded by prism cut crystals, these also suspended by chains. Even the bracket lamps — those lights which are placed beside the mantel — are fitted with chains. Short chains they are, just a link or two, but still chains.

Out of Fashion, But Popular.

Some attempt is being made to change the fashion in dining rooms. Domes are yet much used. They are liked. They are to be found in many houses and so the demand for them continues.

Those handling fixtures now recommend the installation of something in the cluster line. A favorite is a plate of beaten brass which is affixed to the ceiling, and from each corner and the centre of which chains drop, bearing at the end, lights. The centre light is usually of some power, while the corner ones are small, perhaps of only two candle power.

Chain effects are the fashion for bed rooms, too, and for dens. There are a variety of forms in which these fixtures may be secured; but always—or almost always—chains are used as the foundation.

Rods Are Now Circular.

Another change, some say, is to be noted in the most up-to-date lamps. It deals with the shape of the rods. Even with the great use of chains there must of course be some rods. In the past—the distant past of a season or two ago—these rods were largely square in shape. The bars on "the newest thing" are circular. Four-square men are still in demand, but the vogue of lighting fixtures in this form has passed.

While styles are changing in this way there appears also to be a steady change in the lighting business. The active building operations in many districts has caused this to improve. The very fact that fixtures are becoming cheaper has stirred up a great demand for them. Heretofore, when people had some fixture which they did not like, they grinned and bore it as well as they might. Now they think that a few dollars will enable them to get a light which appeals to them more. They do not bear with the old light, therefore. They bear it out, and supply its place with one of the new patterns which have been brought to their attention through the newspaper or window advertising of some man who handles this class of goods.

Another tendency of the purchasers, which handlers are now reporting, is their desire to have the work of installation done by the same people from whom they buy the lights. This saves them all worry, and enables them to tell right at the outset what their lights are going to cost them. There are a number of hardwaremen who have men in their employ who can install the lights. Others have got in touch with electricians who will do the work for them, and thus they are able to tell the customer at once what will be the total cost of a certain fixture, or a certain set of fixtures. These men have taken the right course.

MARBLE FROM CINDERS.

By a process which is being kept secret until the patents are allowed, a Berlin engineer is claimed to have succeeded in producing an artificial marble of extraordinary hardness from cinders combined with a binding material and coloring matter. With the aid of apparatus consisting simply of iron pots, a gas furnace and an old copying press, he is said to obtain, in a half hour's time, a slab resembling marble and as hard as iron.

Veteran Figures in the Hardware Field

No. 13.—Samuel Birch, Kingston.

Best results are obtained by team work. Some one man with outstanding ability and pronounced personality can sometimes dominate a situation or successfully manage a business all by himself. But in the main it is team work that counts. In big corporations, efficiency is needed all along the line. One weak spot hurts the efficiency of the whole machine. From president to penpusher, from director to drayman, there must be co-operation and team work.

History is full of instances of two-man co-operation. David and Jonathan, Damon and Pythias, Mackenzie and Mann, Kelly and O'Toole—you get them in all times, ranks and trades. When two men are so matched that one supplies what the other lacks and vice versa, the combination is better than any lone-hand competitor.

McKelvey & Birch, of Kingston, have been partners for 47 years. Before that the two members of the firm learned their trade together. They have been working together ever since the time they left school. and they make a great team. What John McKelvey doesn't know, Sam Birch does. If either one lacks a certain quality the other has that particular quality good and plenty. It's a case of give and take and between them they have built up a grand business.

As we enlarged in a recent issue on the subject of John McKelvey, the object of this sketch is to provide some intimate information with reference to the other member of the firm, Samuel Birch. Mr. Birch was born in Ireland and came out to Canada when 8 years old. His parents settled in Kingston and there he has remained all his life. When a lad, he engaged in the hardware business in the establishment of Arthur Chown. Another employee was a young fellow named John McKelvey and they became great friends. In 1865 we find them starting in on their own hook under the firm name of McKelvey & Birch.

Samuel Birch is above all else a practical man. He has a deep insight into the problems of steam heating and has been recognized as an authority on that subject for years. He is known from one end of the country to the other and has been called in for advice on some of the biggest installations in the United States. Naturally, he has taken charge of the plumbing and heating end

For some years it has not been necessary for Samuel Birch to turn into the work but we warrant he could wipe a joint or lay out a heating job with the best of them.

of the business while his partner has inclined more to the hardware department.

People in other cities sometimes hint that Kingston is a sleepy city. Samuel Birch has lived there over three score years and has not acquired any of the sleepiness yet. Although an old man in point of years, he is as active and virile as ever. He is first man down at the shop half the time—the other half, the first arrival is John McKelvey. The firm have contracts in many parts of the country and it is surprising how closely Mr. Birch keeps in touch with the outside work. It has not been necessary for him to turn into the work himself for some years but we warrant he could wipe a joint or lay out a heating job yet with the best of them.

Mr. Birch is of a retiring disposition. It must not be supposed, however, that he has not taken an interest in public affairs. His interest has always been deep-seated and sincere. He has traveled extensively. When the average man travels he does so for pleasure alone. Mr. Birch has seen as much of the world as he could with the purpose of widening his knowledge. The quiet man is usually observant and Mr. Birch being a quiet man, has used his powers of observation to such good purpose that he has acquired a fund of information on many matters.

Although three score years and ten have passed over his head, he is still enjoying good health and will be found in active business for many yeare yet, we trust.

AN ODE TO ORDER WRITERS.

An American manufacturer has sent out the following verses. His object quite apparently is to show dealers the necessity of writing orders legibly and clearly. The verses are clever and amusing and they undoubtedly point to a form of carelessness rather too common.

Though we never went to college, we've
acquired all kinds of knowledge
And can solve the hardest problems if
we only have a hint;
The handwriting of H. Greely we are
able to read freely,
And Cuneiform Inscriptions are to us
as plain as print.

When a musty old papyrus of the days
of good King Cyrus
Is unearthed by some old fossil, and
he wants to have it read,
We're the fellows that can do it, in a
moment we construe it,
For we haven't got a pumpkin where
we ought to have a head.

But, alas! like men and nations, even
we have limitations,
And we can't tell from some orders
just what tools we should have sent;
When a customer writes thickly "Send
one part and send it quickly!"
We'll be—blessed—if we can tell what
part of just what tool is meant.

Though our minds are often groping, we
intend to keep on hoping,
For we're learning metaphysics, and
developing our wit;
From subordinates to leaders we shall
soon become mind readers;
When, at guessing what's intended,
we'll be sure to make a hit. ("Nit.")

HARDWARE MEN LOST.

Rosetown, Sask.—The hardwaremen went down to defeat before the mercantile and professional men in a hockey match by a score of 7 to 5. An oyster supper was at stake.

Got Three Years.

Maple Creek, Sask.—A young fellow who broke into Cooil Bros.' hardware store and stole about thirty dollars from the register, was sentenced to three years.

Complete Course of Sheet Metal Work

By L. W. KOSER---No. 7

Problem 5, plate 13, illustrates a Y-joint in pipe. This can be a cut-off for a small conductor pipe, or a Y-joint for a large blower pipe. The size makes no difference.

The top piece P is straight and necessitates no pattern.

The pattern for the bottom is developed as explained for problem 1 and 2, plate 11.

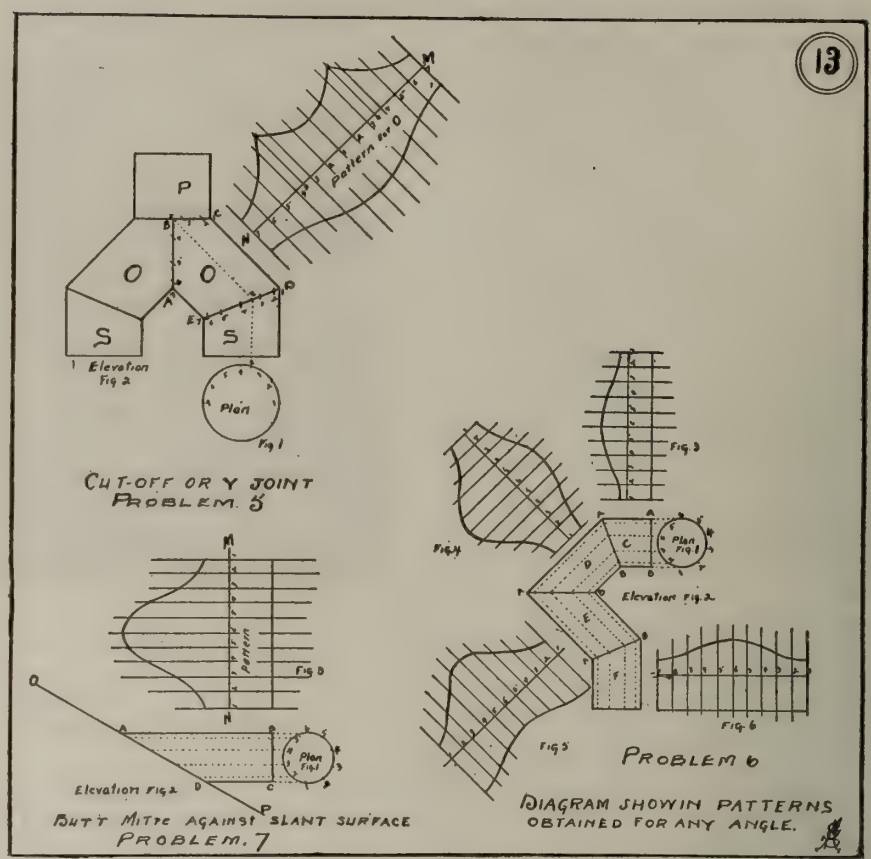
The gore piece O is very similar to the gore piece C, problem 3, plate 12, and is developed in practically the same manner.

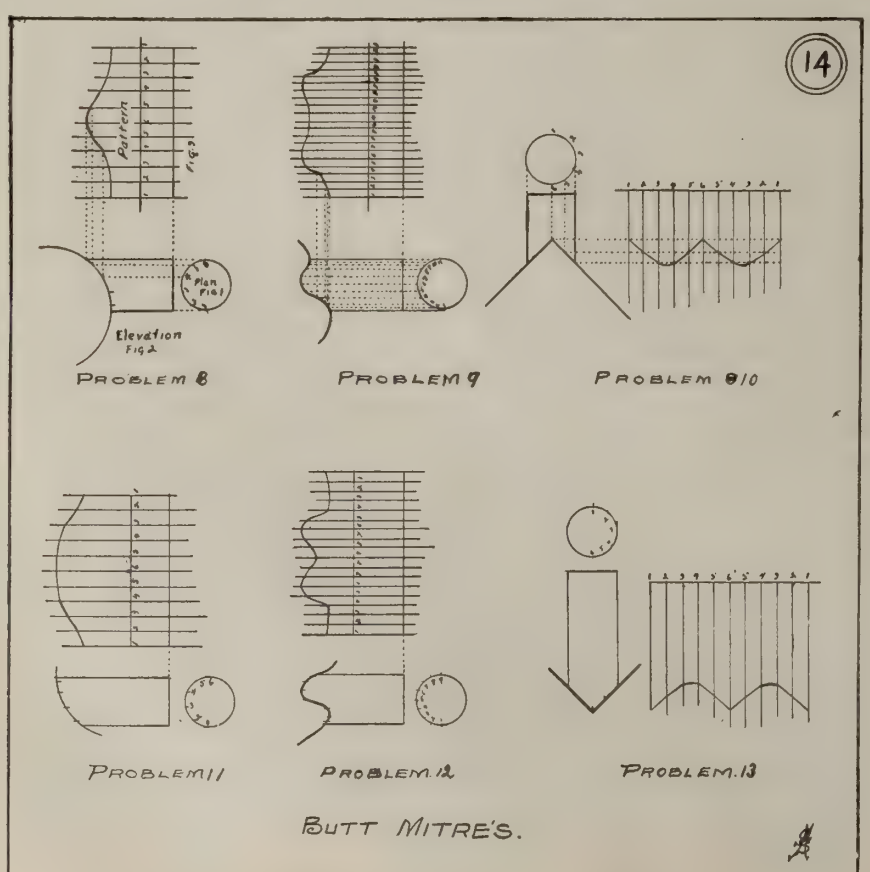
Lay out the plan, Fig. 1; then the elevation Fig. 2; keeping one arm of the elevation in line and directly above the plan.

One half the plan is then stepped off and numbered as previously explained and vertical lines are carried from the numbers to the first mitre line E D, then parallel to C D, to the next mitre line A B C.

The stretchout N M is then laid out at right angles to the line C D and the usual measurement lines drawn.

The T-square is then placed so it will run parallel to N M. Bring it against each one of the points on the mitre lines, and cut the corresponding measurement lines.





In measuring off the plan of a Y-joint, it seldom happens that any of the regular lines come into the point B on Fig. 2, therefore to get the pattern extended up to this point, we draw a line from the point B parallel to the line C D, until it touches the mitre line E D. Then we drop it vertically to the plan Fig. 1, to get its position for the stretchout line.

We call this line "x" or anything to distinguish it from the stretchout line.

It will be noticed in this case that it comes between 3 and 4 on the plan.

Now we want a line on the stretchout to correspond to this line, to have the same position on the stretchout that it has on the plan, so we transfer the space X 3 or X 4 from the plan to the stretchout and draw the measurement line X.

The place the T-square parallel to the line N M, bring it against the point X or B on the elevation and cut out the measurement lines X on the stretchout. A line traced through the points on the measurement lines completes the pattern.

Problem 6, plate 13, shows elbows running in different directions. This example is intended for practice on what the student has gone through. The principle is the same as 2 and 3-piece elbows and serves to illustrate the different

shapes assumed by the pattern for different turns and angles.

Problem 7, plate 13, illustrates a pipe butting against a slanting surface and is called a Butt-mitre, and is developed the same as explained for problem 1 and 2, plate 11.

The plan Fig. 1 is drawn, then the elevation Fig. 2, then the stretchout N M is laid out at right angles to the line A B.

Divide the plan off into equal spaces and carry the points to the slanting surface O P and then to the corresponding measurement lines; the pattern is then developed for the section A B C D.

It does not matter what the shape of the surface O P is like, or the shape of the pipe or moulding. The principle of developing a Butt-mitre is the same. The pipe or moulding is divided into smaller spaces for irregular surfaces.

Problems 8 to 13, plate 14, are examples of Butt-mitres and are, as before mentioned, developed the same as explained for problem 7.

Bank Buys Up-to-Date Revolvers

Despite Agitation Against the "Persuaders" Sales Have Not Fallen Off—People Realize There is a Right as Well as a Wrong Use for a Revolver—Bank Directors Are Convinced They Must Place Their Clerks Upon an Equal Footing With the Bandits Who Are Now Holding Up Banks.

In face of all the agitation that has been made in Ontario and Quebec against the revolver, the sales of these weapons have rather increased than decreased. Besides this, showing that a large part of the people realize that a revolver fills a proper as well as an improper purpose, it also makes it clear that there has been good salesmanship. Indeed this has been the case. Handlers have not waited for orders to come. They have gone out after orders, creating a demand where before it had not been felt.

Plan Revolver Campaign.

It was in one of the larger establishments in Montreal that a plan was laid to interest some of the banks in the most up-to-date revolvers. The work was not entrusted to a clerk. The head of a department went personally and placed the matter before the manager of the bank—The Bank of Hochelaga. He referred to the hold-ups which had occurred in Vancouver. He spoke of the need of tellers and others in the bank being prepared to face a bandit any day. He argued that the bandit would be sure to have on his hip one of the best revolvers made. It, therefore, behooved the bank officials to so arm their men that they would not be at a disadvantage in protecting the people's funds.

The bank president was interested. He asked the salesman to lay the subject before the board, and this the salesman agreed readily to do.

Armed With Arguments.

Often travelers are urged to go to their customers armed with arguments. This special salesman thought of this when he went before those directors. He went armed—armed with arguments in the shape of the revolver he was urging them to install. There, before them all, he showed how this worked; how it could not be accidentally discharged; how it was lightning-fast in time of need; how it was easily handled.

The directors were more than interested. They were convinced, and determined to put these revolvers in all their branches. They made only one condition—that the salesman should illustrate the use of the revolver before all the tellers who could be collected.

A Local Illustration.

Recently, there had been a bank robbery—or an attempted bank robbery—in Montreal. The facetious are saying that Montreal is getting more like Vancouver every day. However, that may be, this attempted safe blowing has given the dealers another good illustration of the need of banks having their staffs properly armed. This is being laid before the directors of other banks, much as it was laid before the directors of the Bank of Hochelaga, as outlined above.

Hardware Letter Box

Portable Gas Oven.

W. H. Turnbull, Brantford, Ont.—"Where can we obtain a portable metal oven heated by gas, in which we can bake 100 loaves of bread?"

Warren Mfg. Co., 782 King St. West, Toronto (natural gas only); Jas. Clarey. 438 West 48th Street, New York; Middleby Oven Co., 329 Greenwich Street, New York.

Jewel Coal Oil Stove.

H. Frank Peters, Portland, Oregon.—"What firm manufacturers a small coal oil stove called the Jewel. operated with an air pump?"

G. M. Clark & Co., Chicago, Ill.

Miniature Kegs.

Morrisburg Tack Mfg. Co., Ltd., Morrisburg, Ont.—"Can you give us name of manufacturer of miniature kegs?"

Automatic Wood Box & Turning Co., St. Romuald, Levis County, Quebec; Lachute Shuttle Co., Lachute, Que.; Canada Spool & Bobbin Co., Walkerton, Ont.

Enamel Letters.

J. A. DaWolfe, Gananoque, Ont.—"Where can I procure white enamel letters?"

J. E. Richardson & Sons, 147 Church Street, Toronto; Booth & Son, 21 Adelaide Street West, Toronto; C. W. Mack, 60 Yonge Street Toronto; Martel-Stuart, Let., Hermine Street, Montreal.

Manufacturers of Slate.

Binette Bros., Lachine.—"Who are the manufacturers of slate for roofing purposes?"

Genuine Bangor Slate Co., Wall Bldg., Easton, Pa.; E. J. Johnson & Co., New York; Matthews Consolidated Slate Co., Boston, Mass.

USE OF STOCK BOOK.

"We are just out, sir. Can we order it for you?"

How often is this statement repeated in your store, Mr. Hardwareman?

It is a serious matter, this difficulty in keeping the stock properly sorted up and complete. No merchant possesses a seventh sense which tells him when the last article of a certain line has been sold. Neither has he the time to keep rummaging and exploring through all the shelves and drawers to check up shortages. He has to depend on the good sense of the clerks to tell him when they find that any line is getting low.

Now, the hardware clerk is only human. He can be careless at times and he forgets the same as everyone else. He may intend to tell the boss that he has sold the last measuring tape in stock, but another customer drops in and he forgets it. In a day or two a couple of customers come in to buy measuring tapes and receive the answer with which this article starts.

It is inevitable and it happens in the best regulated stores. What is needed quite apparently is a system to check up the stock perpetually and make such oversights impossible. The nearest approach to a system of this kind is the "stock book" idea now followed by a number of progressive dealers.

H. Lindon, of Leamington, has adopted the plan and finds that it is quite successful. He has a book in the store for the entering of information regarding the stock. If a clerk finds that there are only a few locks of a certain size left, he is supposed to enter the fact in the stock book at once. Every evening the proprietor looks over the book and finds what has been entered. He orders at once the lines which are nearly exhausted and takes note of those which are dwindling down.

By "Mack."

A person with the native aptitude for making friends commercially or socially enjoys many advantages.

I think this much may pass unquestioned, for it is well known that the majority of mankind prefer the stream of approbation to flow towards them and not in an opposite direction.

Business friends or, shall we say, friends of a business, have so much to do with the success or failure of a venture into trade that this class shall be considered exclusively?

It is probable that anyone of magnetic personality will attract others to his store, and if this quality is united to other conditions he constitutes what is called hard opposition.

He may have the social temperament developed and people are drawn towards him.

They want to do their purchasing under pleasant and satisfactory circumstances.

Anyone may aspire to achieve the accomplishment of creating friendship in his customers.

He will be asked to make sacrifices sometimes, and to endure with becoming patience the appearance of trouble on the business horizon.

This, like other desirable positions, is not won easily, but needs constant practice so that one involuntarily takes the most agreeable course of action when meeting unexpected opposition to our wishes.

But the importance of being fair to all is the quality that counts heavily over a long period.

By this I mean to avoid in eagerness to gain progress on the good graces of those to be cultivated; the indiscretion of showing favoritism.

It is fatal to success and really defeats the aim of the dealer who makes the mistake.

The temptation to err in regard to expressing gratification for favors received from a liberal patron is strong, but some smaller customer will value his trade just as highly and feel offended should he not get the same recognition. Make all the friends you can, but do not discriminate.

AN OPTIMISTIC SUMMARY.

New York, March 27.—The Iron Age will say to-morrow: Whatever may have been the motives or influences which caused the slashing of Lake Superior iron ore prices, the result is wholesome. That the ore market is wide open is demonstrated beyond dispute. Prevailing prices at Lake Erie ports show a reduction on last season's quotations of 75 cents a ton on Bessemer and 65 cents on non-Bessemer ores. This means $3.50 for Mesaba Bessemer and $2.85 for Mesaba non-Bessemer, Old Range ores selling at 20 to 25 cents above these figures. It is undersood that on a few sales the cut was still deeper, an apparent effort being made by some interests to make prices so low that competitors would have no disposition to offer further inducements. The quotations above given are so low that shaft mines will hardly be able to come out even although open pit mines may be able to make a little profit. It is stated that a number of mines will be obliged to close and wait for an improvement in prices.

Some sales of Lake Superior ore have been made to eastern consumers and other business of this character is expected to follow. Mesaba non-Bessemer ore can be delivered to eastern furnaces at 8.35 cents per unit. Witherbee, Sherman & Co., miners of Port Henry ore, Lake Champlain, reduced their price some time ago, and have their output now quite well sold on the basis of 7.25 to 8 cents per unit for various grades delivered to Lehigh and Schuylkill Valley furnaces.

It is not expected that the reduction in ore will have much effect on prices of pig iron or finished iron and steel. Pig iron prices have for some considerable time discounted lower costs of ore, while on the other hand, coke is so much dearer as to offset considerably the reduction in ore. When prices were cut on steel products in November and December no attention was then given to the relation between the cost of ore and the selling price of steel products.

Threatened labor troubles cloud the immediate future with some uncertainty. The rejection by fifty eastern railroad companies of the demand for higher wages by locomotive engineers may possibly bring about a strike if the members of the brotherhood, to whom the question is to be referred, should vote in favor of one. The coal operators and miners have not yet come to an agreement, and April 1 is close at hand.

Catalogues and Booklets

Wright Summer Goods.

E. T. Wright & Co., Hamilton, Ont., have issued their 1912 summer catalogue, which contains prices and general information concerning the warm weather goods manufactured by this firm. Among the additions to their manufactured products this year are fly killers, minnow pails and a new lantern called the Comet Hot Blast Lantern. The various lines shown in the catalogues include the following: Wick oil stoves, wicks, asbestos starting rings, drums, chimneys, burners, founts, oil stove kettles, gasoline vapor stoves, hot plates, gas plates, flexible gas tubing, sad-iron heaters, gas stove pipe, elbows, collars, dampers lengths, ovens, asbestos stove mats, bread toasters, gasoline funnels, oilers, spray pumps, carpet beaters, ice tongs, ice picks, water coolers, ice boxes, refrigerators, and other similar lines.

Motor Boat Supplies.

The Canadian Fairbank-Morse Company has just issued a finely illustrated catalogue dealing entirely with motor boat supplies, carburetors, gasoline strainers, spark plugs, magnetos—these and scores of other fittings are dealt with and their price given. The booklet will be of great use to those doing business in a section where motor boats are extensively used.

Made in Worcester.

A neat leaflet has been sent out illustrating products made in Worcester, Mass. It is stated on the cover that "Worcester now manufactures and consumes more wire than any city in the world." Among the goods mentioned are Coes wrenches, Norton grinding wheels, Harrington and Richardson fire arms, Winslow skates, Coates clippers, Hills dryers, and Quality wire goods.

Tools for the Farm.

An interesting book "Disston Saws and Tools for the Farm" has been issued by Henry Disston & Sons. It contains, in addition to a complete description of Disston saw and farm tool products, a forcible plea for quality articles.

Breast Drills.

The Stanley Rule & Level Co., New Britain, Conn., have issued a booklet, illustrating their line of breast drills. The various varieties of steel and iron frame single and double speed drills are shown and described.

Current News of Hardware Trade

New Stores Opened.

Coquitlam, B.C.—Fred Watson and W. A. McKeown have started in the hardware business. They are fitting up a large and modern store which they expect to open to the public by the first of the month.

Carries Heavy Samples.

Montreal.—George H. Saywell, of Winnipeg, representative of a number of British manufacturers, is staying in the city for a few days. He has just completed a successful trip to the coast In Montreal Mr. Saywell picked up 700 pounds of new brass foundry samples. This makes 1,500 pounds of samples which he carries.

Building New Factory.

Three Rivers, March 28. — Argall Bros., who last fall bought out William Wallace, manufacturer of cant hooks and other lumber tools, are now building a new factory directly across from the skating rink. The structure will be of good size and will give the extra foundry room which the growing business has rendered necessary.

Landreth Bros. Store.

Lemberg, Sask.—The new hardware store of Landreth Bros., mention of which was made in the last issue, is a cement block two-storey building, the dimensions being 60 feet by 25 feet. The tinshop, which is one of the best departments of the business, is kept in the second storey. There is a store-room behind the main building, 35 feet by 18 feet.

Building New Store.

Ebourne, B.C.—Gordon & Son, hardware merchants, have had erected two new stores on Fourth street, south of Saskatchewan street. One they purpose occupying themselves this month and the other is to be rented. D. McRae has built two stores on Fourth street, south of Moosomin street, one of which is now occupied by H. C. Cornett, tinsmith.

Championship Decided.

Montreal, March 16.—The fight for the championship of the Hardware Hockey league was concluded last night, when, in an extra game rendered necessary by a tie at the conclusion of the regular season, the Canadian Fairbanks-Morse won the honors for the fourth time. The team from Thomas Robertson Company made a gallant fight, but one shot of the Fairbanks men passed their goal tender, and that one shot was sufficient to win the game.

The Hardware League has been a see-saw affair all winter. For some time the Frothingham & Workman team lead; then the old champions became contenders, as did also the Robertson team. There was not a weak aggregation in the league, so every game was hardly fought.

In last night's game, which was the most keenly contested and most exciting of the season, the teams lined up as follows:

Fairbanks (1)		Robertson (0)
Desomdy	Goal	Finnie
Davidson	Point	Rowe
Hyland	Cover	Thibeault
Marnell	Rover	DeGranpre
Bennett	Centre	R. McKeown
Bethune	R. Wing	D. McKeown
McMullen	L. Wing	G. Thompson

Referees—J. Marshall and J. Brennan. Umpires, C. Hoerner and C. Porteous. Timekeepers, E. C. Asselin and Thomson Robertson.

Fire Losses.

Elkhorn.—Goat Bros.' hardware store, Marsh & Co.'s general store, and the Bank of Commerce building at Elkhorn, Manitoba, were destroyed by fire a few days ago. The loss will aggregate $55,000, Goat Bros. building being valued at $6,000 with insurance at $4,000, the stock $10,000 with insurance at $8,000.

Business Changes.

Netherhill, Sask.—G. Reid has started here in hardware and general merchandise.

Avonlea, Sask.—The Monson Hardware Co. have opened their store here.

McOwen, Sask.—A hardware store has been started here by Kerlong and Forgoard.

Warman, Sask.—J. Lorrie, hardware dealer, has taken over the business of P. J. H. Martens here.

Macoun, Sask.—The Macoun Lumber and Hardware Co. have sold out to W. A. Conley.

Brooklin, Ont.—Pringle and Manning, dealers in hardware and implements, have sold out.

Armstrong, B.C.—The H. B. Morley Co. has been changed to the MacPhail-Smith Hardware Co. The members of the firm are Angus M. MacPhail, formerly with Martin, Finalyson & Mather of Vancouver, and Geo. A. Smith, for seven years in a local saw mill.

Arcola, Alta.—W. A. Youngblud has purchased the hardware store of J. R. Mears. M. Paterson will take charge of the tinsmithing department. M. Mears, who has been in business here for the past twelve years, will remain here during the summer.

Stornoway, Sask.—Wilson & Henry, hardware dealers have been succeeded by Geo. A. J. Henry.

Neepawa, Man.—E. N. King has bought out the hardware business of J. P. Shannon.

Pilot Mound, Man.—The hardware and general business of E. McConnell has been sold to Sellwood & Cleghorn.

Creelman, Sask.—W. C. Carruthers, hardware dealer, has sold to J. E. Wright

Seaforth, Ont.—Chesney & Archibald, hardware dealers, have dissolved partnership. The business has been taken over by G. L. Chesney.

Personal Notes.

W. E. Ramsay, Montreal manager for the Pedlar People, was one of a number of Montrealers to attend the railway maintenance exhibition in Chicago.

J. C. Newman, Montreal manager for McClary's, has returned from a fortnight spent in Atlantic City.

REMOVING OLD LACQUERS.

The following liquid is recommended by M. Rubini, according to a German patent: 1,000 grammes of weak alcohol (rum) are mixed with 90-120 grammes of oil of cloves and 90-120 grammes of ether; in a separate vessel equal parts (by weight) of paraffin oil and oil of turpentine are mixed; 500 grammes of each of the two solutions are brought together, whereupon a solution of 25-50 grammes table salt in 400-600 grammes of distilled water is added. This liquid must be well shaken until it forms a milky emulsion. It is then ready for use. A piece of cotton wool is wetted with this solution and rubbed over the painting. Fresh pieces of cotton must be used until the tuft remains perfectly clean on going over the painting. If the lacquer should be very old and dark, the surface of the painting may be covered with the liquid and then rubbed off with cotton wool. It will be found that the painting will regain its original fresh and deep colors, the liquid causing no injury whatever.

Progressive Hardware Retailing

Hamilton Firm Start a Vigorous Spring Campaign Directed at Farm Trade—How Smith's Falls Dealer Improved His Sale of Sporting Goods—A Record January Sale of Washing Machines.

SOLD WASHING MACHINES.

Calgary, Alta.—A salesmanship feat of no small merit was performed here during the last week in January by P. Levany, a member of the staff of Linton & Hall, hardwaremen. In six working days he sold eleven washing machines and twelve wringers. When one considers that during the time when the sales were made, the temperature hovered somewhere around twenty below zero, it will be recognized that so large a list of sales in these lines was something out of the ordinary.

Perhaps the most praiseworthy feature of it was that a wringer was sold with every washer and one extra was disposed of for good measure.

WATCHING WIRE REMNANTS.

"System" makes note of the following commendable method:

"A hardware dealer, whenever any remnants are left—as from a roll of wire screen—has a tag attached to the new roll. This tag states the number and length of remnants that have accumulated. With this fund of information, the clerk is often enabled to make a sale of a certain length remnant instead of cutting into the new piece."

BOOSTS TACKLE SALES.

Now that the fishing season is not far off, it is interesting to note that some dealers have evolved clever methods of boosting the sales of fishing tackle and anglers' supplies in general. Robert Hawkins, of Smith's Falls, Ont., tried a plan last year which brought good results. Mr. Hawkins organized a fishing contest, offering a prize for the largest salmon caught in that vicinity, and another for the largest small-mouthed black bass. A certain period was set, and during that time Mr. Hawkins gave a coupon to every person buying fishing tackle in the store. The coupon used for this purpose is herewith reproduced.

The contest was first announced in fitting style in a full-page advertisement in the Smith's Falls paper, and this enterprising dealer saw to it that it was kept before the public right along. A large advertising campaign was conducted.

The contest was a success in every respect. The prizes offered were large but it was found that sportsmen strove to win more for the glory of winning and beating out the other anglers in town than for the pecuniary benefit. Needless to state, the sales of fishing tackle in the store broke all records. What is more, the sales in other sporting goods showed a marked stimulation.

STEEL FISHING ROD CONTEST

OPENS JUNE 16---CLOSES AUGUST 31

THIS CERTIFIES that Mr..... has entered our Fishing Rod Contest and agrees to comply with all conditions.

1. Fish must be caught in Rideau River or Lakes.
2. Fish must be in good health and caught with hook and line.
3. All fish must be weighed at our store and a certificate of weight given.

Prizes will be given to party holding Certificate for largest fish, as follows:

1. For largest Salmon—Bristol Steel Fishing Rod of the telescope pattern, value $5.00.
2. For the largest Small Mouthed Black Bass—Steel Fishing Rod, slip-joint pattern, value $2.50.

ROBERT HAWKINS

P S—We reserve the right to examine any or all fish.

Coupon Used by Robert Hawkins, of Smith's Falls, in Conducting Contests.

A BRISK SPRING CAMPAIGN.

Hamilton, Ontario.—Stanley Mills & Co. have started a seasonable campaign directed at farmers and house owners, particularly the former class. On Saturday, March 23rd, a full page advertisement was inserted in the daily papers containing a striking summary of the goods carried of interest to the farmer and housekeeper. The opening argument in this advertisement was run under the caption, "Every farmer and house owner should read this advertisement; it will help him buy his spring needs right." It read as follows:

"No matter what the cold weather says—no matter how the banks of snow and ice seem to protest against it, springtime is here—and the warm rays of the sun will soon have the frost out of the ground, and new life springing up all around us. The farmer should overhaul his stock of tools and implements now, and see that everything is ready for the season's work. The house owner and the housekeeper should plan and decide about the painting and re-finishing that's to be done—and buy their supplies now. We've completed our part and can show you the best stocks of merchandise in the history of the store. Why not let Monday find you getting ready for the spring?"

A good deal of the space was given up to forceful paint advertising. Other goods featured under the heading of "Farmer's Needs" were: Cistern pumps, step ladders, washing machines, wringers, seeders, rubber drill tubes, pruning shears, pruners, post hole augers, butter workers, butter scales, tarred paper, roofing, horse clippers, curry combs, tooth rasps, wheelbarrows, manure forks and shovels.

KEEPING TAB OF PRICE CHANGES

Chatham, Ont.—"I find this card index file a very handy thing for keeping tab of price changes," remarked a hardwareman the other day, indicating a file on his desk.

"I really believe there are hardwaremen, even to-day, who try to carry all the price changes in their heads, but I've always made it a practice to relieve my mind of that sort of burden by jotting it down somewhere where it would be convenient to find, and never in the way at other times. Formerly I used an indexed book, but that proved cumbrous, and I resorted to the file.

"You will notice that the cards are ranged in alphabetical order, each card being devoted to a particular article or line. Thus, it is a matter of just a moment to enter each price change as it comes to my attention. Thus, if there's an advance in turpentine, I take out the

card under "T," enter the change with the date, and replace the card. Of course, I have all the latest catalogues filed away; but this system helps me to keep tab of all other quotations. It is more convenient than the book system, for when a card is filled I can start a new card for the same article, and throw away the old one.

"I find that I save quite a bit by keeping closely in touch with all the latest prices, and watching the trend of the market. In this respect Hardware and Metal is a big help."

—

PREPARE FOR SPRING.

Waskada.—The People's Hardware, G. R. McLean, proprietor, are conducting a brisk spring campaign directed principally toward the farm trade. They are advertising horse clippers, and stock tonics, two lines which are certain to attract the attention of customers from the country districts.

An early Spring advertisement to get the Spring trade.

FEATURING TOOLS.

Fort William, Ont.—W. G. Colville Co. are holding a ten-day sale at "The Sign of the Saw." A special effort is being made to push the sale of tools—all kinds of tools, for housewives as well as mechanics. Included in the list of house tools which they are featuring are washing machines, wringers and bread mixers among other useful articles. Carpenters' tools are also being featured.

—

A PAINT CAMPAIGN.

Revelstoke, B. C.—The Revelstoke Hardware Co. are conducting a brisk paint campaign. Recently a very creditable paint window display, mention of which has already been made in Hardware and Metal, was shown. The firm are also doing a lot of effective newspaper advertising along the same line, making a special effort to reach those who are building this spring.

—

AN OPENING SALE.

Manville, Alta.—J. R. Barnes, successor to Cecil Frank, hardware dealer, is holding a special opening sale. In order to make room for the new goods constantly arriving, inducements are being offered in the hardware, furniture, saddlery, stove and kitchen ware departments. The sale is announced in full page space in the local papers.

—

EARLY CLOSING AGREEMENT.

New Hamburg, Ont.—Hardwaremen here have joined with the other merchants in an early closing agreement. Under the agreement, which takes effect the end of March, all stores close at 6 p.m., except on Saturdays and evenings before holidays. In July and August, however, a further exception will be made in regard to Wednesday evenings, when stores will be kept open to accommodate farmers.

—

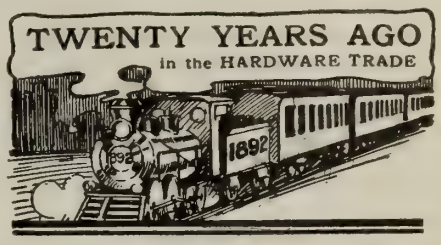
A HOUSECLEANING WINDOW.

Toronto, Ontario.—A good spring housecleaning window is shown in the store of S. Hobbs, hardwareman, of Queen Street West. A step ladder has been placed in the centre, and is used as a form for the grouping of the many articles which the housewife needs when the cleaning season begins—brooms, mops, carpet sweepers, stretchers and beaters, hammers, polishes, paint and so on. The assortment is a complete one, and the display has attracted much attention as a result.

Hardware Notes.

London, Ont.—Purdom's hardware is again in the running. The business was started just as soon after the fire as arrangements could be made. The regular "Saturday Savings Sales" are again being conducted.

Preston, Ont.—Bernhardt & Gies are showing a fifteen-cent window. The display is made up entirely of articles selling at that price.



The following items are taken from the issue of March 26, 1892:

A feature of each issue was a motto for the week. The motto used in this issue was: "It is better to have built a dog house than to have dreamed of building a palace."

* * *

"The Page Woven Wire Fence Co., of Adrian, will start an establishment in Windsor."

* * *

"For some weeks now there have been current reports of a big copper combination involving millions of dollars. Beyond the rumor nothing is known, however."

Editor's Note.—The same rumor is still being heard. It is a story, in fact, which, like Banquo's ghost, will not "down." Last year insistent rumors were heard of an immense merger and it was said in authoritative circles that it would undoubtedly go through. But nothing came of it.

* * *

S. T. Marling, hardware and general merchant of Craven, N.W.T., has bought out G. S. Rise, of Pense."

* * *

Editor's Note.—Mr. Marling sold out in Pense some years ago after making an ample competence and is now living in Victoria, B.C.

* * *

"Fire in the big warehouse of W. H. Thorne & Co., hardware dealers, St. John, N.B., was discovered on Monday last. Considerable damage was done before it was extinguished. Loss fully covered by insurance."

"Thomas Robertson & Co., Montreal, have appointed Messrs. Craig, MacArthur & Co., Toronto, their selling agents for Toronto and the West."

Weekly Market Report --- Metals

ADVANCES IN METALS.

Higher prices and shortages are developing all along the line. Tin, lead, copper and pig iron have shown advances in price during the week. All these metals, with the possible exception of tin, are getting scarce. Spelter is almost unobtainable still. Plates and sheets are extremely hard to obtain.

There is a brisk tone to the market and buying continues active.

MONTREAL.

Montreal, March 28.—Now the results of the English coal strike are beginning to be felt in Canada. The shipments of metal have been seriously interfered with, and the natural result has been a rise in prices. Tin, copper and lead have all advanced, and indications are that a higher level still may be expected.

In the present situation is seen the exemplification of the economic law of supply and demand. The demand for metals has not increased noticeably—indeed, for some lines there is no great call—yet the supplies have been so reduced from lack of replenishing that the handlers are forced to charge purchasers more. They are having to pay more for the material which they sell, and so naturally must get more for it.

Tin up Dollar a Cwt.

Tin—During the early days of the week a rapid advance took place on the primary market. Futures have not risen so much, but for immediate shipment tin is in great demand.

Here stocks are fairly good, but the stock is not sufficient to relieve the handlers from anxiety. They realize that if the strike continues, as now seems likely, it will be exceedingly difficult to get supplies. They are, therefore, guarding against unnecessary buying by putting up the price.

So far the advance has only been one dollar a cwt., but it is regarded as likely that there will be another advance shortly.

Copper Going Still Higher.

Copper—The activity in this metal is remarkable. It seems that the producers have succeeded in controlling the supply. They evidently intend to continue regulating the output so that the price will of necessity remain high. One of the producers, indeed, is quoted as saying that the price of copper has remained low long enough, and that he now would favor forcing the figure charged for it as high as possible.

The advance here has been only 50 cents a cwt. But more may be expected. Indeed, with copper, as with some other metals, the handlers look forward to the necessity of buying more largely from the United States than in the past. The English supply has rendered this more or less unnecessary in the past, but now, with shipments seriously disturbed, there will have to be purchases made at the United States advanced figure.

Scarcity in Antimony.

Antimony—Here there is a real scarcity. Antimony is not a metal for which there is an exceedingly large demand, but the babbitt manufacturers need it the year through, and now they are having difficulty securing their supply. No price change has been made yet.

Lead—The demand here is now in excess of the supply. There is difficulty replenishing supplies, and naturally an advance has been made, though only of 25 cents a cwt. Some shipments are now on the water, but these will almost certainly be sold before they are unloaded. The condition as far as this market is concerned, is serious. Many manufacturers, however, have good stocks on hand, so there may not be any great interference with the output of finished products.

Spelter—Locally the supply is somewhat better, and the probability of a serious shortage is now not great. Prices remain as last week.

Iron—This metal is rather more plentiful now. Shipments at present on the water are expected soon, so that the handlers are willingly selling what little reserve they still have. This metal has probably been as little affected by the strike as any.

Sheets Advance 10 Cents.

Montreal, March 29.—An advance of from 10 to 15 cents a cwt. has been struck for black and galvanized sheets and for copper sheets. The strike is responsible, of course.

TORONTO.

Toronto, March 28.—The past week has seen a general advance in prices. Most metals are selling at stiffer figures. Tin, lead, copper and pig iron have advanced.

The market continues strong despite the depressing influence of the English mining strike. It is a striking evidence of the soundness of conditions in this country that the effect of the strike so far has been to stir up an even greater degree of activity than before. Considerable anxiety is felt of course, on the part of metal men here and the situation in the Old Country is being watched closely.

Tin is Up.

Tin is reported to be very firm. It is selling locally from 46 to 47 cents, an advance on the average of about one-half cent. The demand has been steady and enquiries indicate that this condition is likely to continue for some time.

Lead High and Scarce.

Lead.—The steady upward trend in lead has been maintained. It is now selling at $4.50 and is firm at that figure.

It is practically certain that lead will continue high. Stocks are very light and new supplies are slow in arriving. On the other hand the demand is brisk and the metal houses are having not a little difficulty in supplying customers. Under these circumstances, it is practically assured that the stiff prices will be kept up.

Copper Very High.

The same conditions are beginning to manifest themselves in copper. It has now reached the extremely high price of 16 cents—an advance of ¾ of a cent. Copper has been climbing so rapidly during the past few months that the price has become the highest in some years. A scarcity is now manifesting itself and stocks are light. Demand remains brisk.

No Spot Offering.

Spelter.—The scarcity of spelter is quite as bad as ever. No spot spelter is offering and local stocks have become almost cleaned out. What business is being done is of the hand-to-mouth variety.

Another Shortage Develops.

Plates and Sheets.—The trouble anticipated in respect to plates and sheets has developed. The blockade is affecting business seriously and stocks have become very light. If the situation does not improve the visible supply will soon be exhausted. The prospect of securing fresh supplies is not good just at the present moment. The strike is regarded as particularly menacing in its aspect toward this branch of the metal business.

Pig Iron Higher.

An advance has been made in the local quotations on pig iron. The prices now asked are from 25 to 50 cents per ton higher. Stocks are not large and demand is running strong.

Weekly Market Report --- Hardware

A BRISK TONE.

There is a brisk tone to business, despite certain deterrent influences. The weather has not been favorable and freightage conditions in some sections, at least, have been bad. Orders are pouring in, however, and the jobbers have every reason to anticipate a larger volume of business than ever before.

MONTREAL.

Montreal, March 28.—Probably because the roads are breaking up, there has been a slight falling off this week in the mail orders received by the wholesale houses. From the city, and the district immediately surrounding the orders are good. From the far east too a big demand is being felt, but trade taken as a whole is not quite as good as it was last week. A decline, due to the bad condition of the roads, was expected however, so there is nothing to cause worry.

The strike has not caused any increase in prices lately, but in hardware, as in other lines, it is expected that an advance may come if relief does not. A week or two more of idleness in the English mines, and there will be more heard of the high cost of living.

Growth in Builders' Hardware.

For the time being it is the spring lines which are in demand, these and builders' hardware. During the past few days there has been no falling off in the call for this last line, rather has a growth in the orders been noted.

Spring Goods.—Sap pails and sap bits are in large demand. So are kettles and ladles. Sap has commenced to run, and as indications are that the flow will be large, those fortunate possessers of a good sugar bush are anxious to secure the equipment which will enable them to make the largest possible profit.

Egg crates still continue to move. Axle grease and carriage nuts are being ordered, while those hardwaremen who handle harness are putting in their requisitions for halters and the other lines which they need.

Hose for the East.

Wire goods are moving well, the dealers evidently preparing to fill the demand for fencing which will certainly arise as soon as the snow is off the ground.

Sprinklers and hose are in good demand. From the east especially, the orders for these are coming. There the spring comes on earlier and lawns are more quickly in need of careful attention.

Builders' Hardware.—At present there is a rush locally to get houses completed by May 1, the great moving day. This has created a great demand for builders' hardware. In many store windows the various lines are being shown. These are bringing results.

The large demand for this class of goods seems likely to continue from now until winter opens again. Buildings in well nigh every stage of construction are to be seen in the city. These, with others yet to be started, will mean a great call for this class of goods.

General Building Activity.

From outside Montreal the demand for builders' hardware is hardly as large as within the city, yet the orders show that the activity in construction is general.

Specialties.—House cleaning lines are among the most sought at this time. Mops, dust layers, and cleansers are being largely bought from the retailers, and naturally, therefore, they are being largely ordered from the jobbers and manufacturers.

Sporting Goods.—A number of the wholesalers are now preparing to issue their catalogues. From these the dealers will be able to tell more accurately what they need. Already there has been a good deal of ordering. Baseball goods especially have been largely stocked already.

Motor boat accessories also are moving well at present. The motor boat show now being held in the city is doing something to awaken more retailers to the field the call for accessories opens to them.

TORONTO.

TORONTO, March 28.—Conditions are satisfactory, although there are certain deterring influences. The weather has been bad for one thing. The freight blockade is also causing a certain amount of trouble. It is fortunate that the demand from the retailers for the shipment of goods has not been at all insistent. Otherwise the freight tie-up would have proven a very serious matter for the jobbers.

Trade has been better than last year and the prospects are that it will keep right up to the mark. The travelers report that they are meeting with encouraging conditions. The dealers seem to be confident of a large business this year.

Seasonable Goods.—There is now a first-class demand for spring goods. Garden hose, sprinklers, lawn mowers, rakes, shears, spades, axes, wire fencing, screen doors, etc., are selling now in large bulk. A number of orders have been placed for refrigerators and some shipments have been made. A good enquiry with respect to vacuum cleaners is a notable feature, indicating that the dealers are becoming interested in this line.

Household Goods.—Business is brisk in this department. Practically every order which comes in to the jobbers—and they are coming thick and fast nowadays—contains an assorted list of goods under this heading. Kitchen utensils are always more or less in demand, but the spring is one of the most active buying seasons. Meat choppers, coffee percolators, pots, pans and kettles are moving well and all lines of tinware and graniteware are in firm demand. Bulkier articles, such as washing machines and wringers are being booked up correspondingly well.

There is a large demand for housecleaning articles of all descriptions. Just as soon as mild weather can be said to have permanently arrived, people will begin to clean house and this will bring a heavy demand on the retailers.

Builders' Hardware.—The demand is growing rapidly and large orders are being placed.

Heavy Hardware—There is a steady demand for all lines. Price quotations are:—Discounts on carriage bolts, 3/8 and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

Sporting Goods.—There is a particularly heavy demand for trap shooters, supplies. Guns, ammunition and baseball supplies are also moving well. The orders placed so far this year are heavier than in past years and it begins to look as though a healthy increase would be registered.

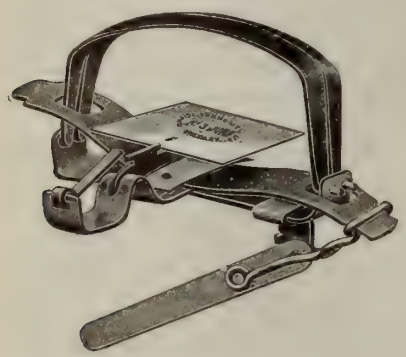
Peck Rolling Mills Won.

Montreal.—Those old-time hockey rivals, the Peck Rolling Mills and the Steel Company, of Canada, have played their annual match, and be it recorded that the Peck team won, the score being 4 to 2. The Peck players scored all four goals in the first half. In the second the Steel Company's team had the better of the game, but could score only two goals—not enough to win.

New Hardware Goods

NEW ONEIDA TRAPS.

The Oneida Kill-Um Trap illustrated herewith is the new production of the Lititz Department of the Oneida Community, Ltd. The manufacturers have met the growing and insistent demand for a trap which kills its catch with an



New Device for Setting Oneida Jump Traps.

ingeniously constructed machine made of wire. The trap is light yet strong—easily set and quick of action. An animal, once caught in it, is powerless to free itself. This trap may be packed flat in very little space.

A new device for setting the Oneida Jump Trap has been perfected by the Oneida Community, Ltd., and is illustrated herewith.

This tool enables the trapper to easily set these traps under the various conditions he meets with while out on his

A Trap Which Kills Its Catch.

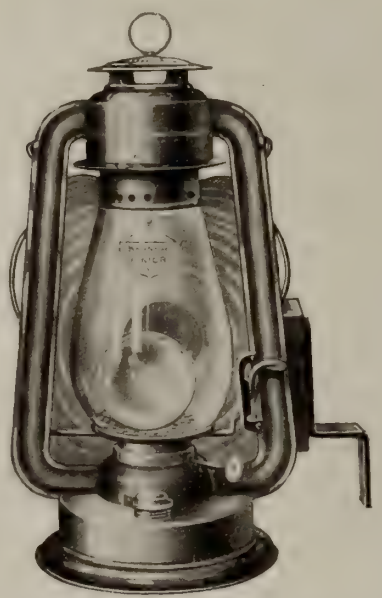
line. With one turn of the wrist the spring is brought down and held in place so that the jaws can be opened and the trap set.

There are two adjustments of the loop—for the smaller traps the second is used—for larger traps the end loop is used.

The entire tool measures but 9 inches in length, weighs but a few ounces, and may readily be carried in the pocket.

BUGGY LANTERN.

Among the many attractions displayed at the Ontario and Quebec Hardware Exhibitions was the Banner "Buggy" Lantern shown by the Ontario Lantern & Lamp Co., Hamilton. As its name indicates, it is especially adapted for driving. It is attached to the side of any vehicle, not to the dash board as at present and the light produced serves to illuminate the road in place of the horse's flank. A strong feature of the Banner Buggy Lantern is the red warning light shown behind through a ruby lense in the reflector. This is, of course, quite clear of the vehicle itself and serves as a warning to approaching automoblies. A bull's eye lense in front of the flame strengthens the light thrown ahead.



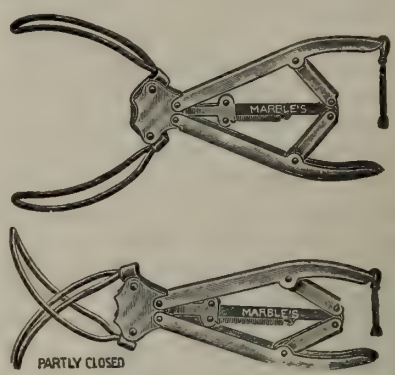
The New Banner Buggy Lantern.

The Banner Buggy Lantern is finished in Hard Black Enamel and is supplied with a strong bracket which is permanently attached to the vehicle, allowing the lantern to be removed at pleasure.

ADJUSTABLE SHADE HANGER.

R. M. Bowser & Son, Renfrew, Pa., are offering a novelty in the form of an adjustable shade hanger. The brackets are made of soft steel and are clamped very securely on the wood. No screws or nails are used and the danger of splitting the wood is thus avoided. The hanger will extend from 32 to 42 inches, but can be cut down for a shade as narrow as 14 inches and still extend out to 24 inches if wanted. Nails are fastened to each shade hanger to fasten the same up.

An Adjustable Shade Hanger.



Trout Nippers, Open and Partly Closed.

TROUT NIPPERS.

The Marble Arms Manufacturing Co., Gladstone, Mich., are putting a new line of trout nippers on the market. It is claimed for the new article that it is light, strong and easily handled. It can be hung on a belt or slung on a rubber band over the shoulder, and it is guaranteed it will tear neither clothing nor fish. The nipper has a length of 9 inches and a spread of 6 inches. It can be controlled by one hand and is guaranteed to "close in a wink." It is heavily nickeled and therefore will not rust.

BED ROCK PLANES.

The Stanley Rule and Level Co. of New Britain, Conn., have made some improvements in connection with their "bed rock" plane.

The one-piece effect, and absolute solidity, are as much a fact as if the parts were all one, for the reason that the entire under-surface of the frog is in contact with the solid seat cast in the plane bottom.

The new method of fastening the frog to the seat permits of the frog being adjusted either forward or backward without moving the lever or the cutter. The details of how this is accomplished are shown in a special "Bed Rock" circular recently issued.

Weekly Western Market Report

Business Conditions are Reported to be Excellent in all Lines—No Price Changes are Reported Here—Wholesalers Busy.

There is little to say concerning western conditions in the hardware trade. "Happy are the people whose annals are dull." There is nothing dull about things here, but business is running along so smoothly and satisfactorily that no particular feature can be brought into prominence.

Wholesalers have been very busy stocking up new firms in new towns, supplying railroad outfits and advancing stocks of builders' hardware in anticipation of the phenomenal building programme that will be shortly underway in all Western towns, that they have no time to talk over matters. "Busy!" call again," is about all that can be got out of sales managers these days.

In all lines of builders' hardware the present year should beat all records. Winnipeg has already issued permits for $2,500,000, and expects $20,000,000 for the season. Edmonton expects a building development of $10,000,000, and others in proportion.

The bulk of Winnipeg permits so far have been for residences of from $1,000 to $5,000, and the more of this kind of building done the better for the hardware merchant.

Prices are steady. No advances or reductions are reported, but the situation as regards rope, hardwood, goods of all kinds, and barbed wire is by no means settled. Sharp advances in these lines need surprise no one.

Winnipeg Hardware Quotations.

Ax Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.40; 2, $1.95; s.g. oak, $2.90.

Augur Bits—"Irwin" bits, 47½; other lines 70 and 10 per cent.

Bolts—Carriage, ⅜ and smaller, 65; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3; small lots, 2½; stove bolts, 77½.

Bar Iron—Bar iron, $2.50; Swedish iron, $4.25; sleigh shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $8.50; Jessop, $15.

Blocks—Steel, 50 per cent.; wood, 60 per cent.

Cut Nails—$3.15 per keg base.

Wire nails, base, $2.80 Winnipeg; $2.35 Fort William.

Copper—Sheet and planished copper, 30c per lb. Tinned, 24c. Copper wire, 3-inch gage, 24c, to 20-inch gage, 29c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87; 26 gauge, $4.18; pressed standing seamed roofing, 28, painted, $2.84; 26, $3.24.

Canada Plates—Firm. Half polish, 6 and 7-inch, $3.65; 8-inch, $3.90; full polish, 6 and 7-inch, $4.40; 8-inch, $4.65.

Clevices—7½c per lb.

Enamelware—Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white, 70 and 5; diamond, 50; granite, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron—Apollo, 16 gauge, $3.80; 18, $3.85; 20, $3.90; 22 and 24, $4; 6, $4.20; 28, $4.60; 30 gauge or 10¾ oz., $4.80; Queen's Head, 20, $4; 24, $4.20; 26, $4.60; 28, $4.80.

Galvanized Iron Pipe—⅜ in., $3.25; ½ in., $4.05; ¾ in., $5.00; 1 in., $7.20; 1¼ in., $9.80; 1½ in., $11.80; 2 in., $15.30.

Galvanized Ware.—37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90; No. 2 and larger, $4.65; snowshoes, No. 0 to No. 1, $5.15; No. 2 and larger, $4.90; steel No. 0 to 1, $5.35; No. 2 and larger, $5.10; featherweight, $6.50.

Horse Nails—"M.R.M." cold process—No. 3, $4.30; 4, $3.80; 5, $2.75; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 per cent.

Hinges—Light T and strap, 65 per cent.

Hooks—Brush, heavy, per dozen, $8.75; grass, $1.70.

Iron Washers—Full box, 40 per cent.; smaller lots, 35 per cent.

Iron Pipe, Black—⅛ in., $3.15; ¼ in., $2.30; ⅜ in., $2.35; ½ in., $3.15; ¾ in., $3.80; 1 in., $5.45; 1¼ in., $7.45; 1½ in., $8.95; 2 in., $11.55; 2½ in., $18.40; 3 in., $24.15; 3½ in., $32.25; 4 in., $36.75; 4½ in., $42.50; 5 in., $47.50; 6 in., $61.50; 7 in., $95.50; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.

Poultry Netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.75.

Lead Waste—$6.75.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope.—Sisal, 8¾; pure Manilla, 10¾; British Manilla, 9; lath yard, 9¼c.

Staples.—Bright wire, $2.50 F.O.B. Fort William; $2.90, Winnipeg.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops, 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $28 per cwt.

Screws—Flat head, iron, 87½, brass, 77½; round head, iron, 82½; brass, 72½; coach, 67½ per cent.

Staples—Bright wire per cwt., $2.50 at Fort William, $2.90, Winnipeg.

Stove Pipe—6 inch., $8.70 per 100 lengths; 7 inch., $9.30 per 100.

Terne Plate—I.C., $9.75; I.X., $11.75.

Tin Plate—I.C., charcoal, 20x28, full box, $10.25; ½ box, $5.50; IX., full box, $13.50; ½ box, $8; IXX., full box, $15.50; ½ box, $9.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 35.

Wrenches Agricultural—70 with 10 p.c. discount.

Paints and Oils.

Painters are already getting busy but it will be the middle of next month before the real season commences. There is enough of left over from last season to find employment for all until new work comes in as part of the season's building programme, and there is more than the usual renovating planned. Turpentine is still high, being quoted at $1.15 per gal., barrel lots. Linseed oil is firm at $1., and boiled at $1.03.

ALL IN USE.

A Wisconsin hardware store recently received the invoice of an order of goods from a wholesale firm in Milwaukee. All the articles ordered were included with the exception of an order for cork screws. A notation made on the invoice stated that the house was out of this stock and none could be found in the city (Milwaukee). Possibly they were all in use.—Monroe Evening Times.

Stoves, Furnaces and Accessories

Profits Made in Second Hand Stoves

Little is Wrong With Many of These Models—D. Cinnamon Has Found That a Small Outlay for Repairing Puts Them in Serviceable Condition—A Good Demand for These Old Patterns —They are Wanted for Summer Kitchens—Also for Summer Homes.

Since stoves were first made, those selling them have been face to face with the problem, what to do with the old models. Young married couples, purchasing a stove, have no old pattern which they wish to give as part payment. But the stoves sold to newly weds are but a small part of those marketed each year. Many more go to men and women who years before purchased a range—a range which now does not meet all their requirements, but which they yet feel to be too good to throw away. It is this stove which they wish to give the dealer as part payment on the new model.

And there is no use talking, many dealers find that they have to accept these old ranges. Some hold out, stating flatly that the only thing they will accept in exchange for a new stove is money; but many more prefer to meet the wishes of their customers. Moreover, from what several dealers say, the old model is not such a bad thing to handle. D. Cinnamon, of Lindsay, for instance, has found the old ranges not a source of worry, but a source of profit.

Little Wrong with Old Models.

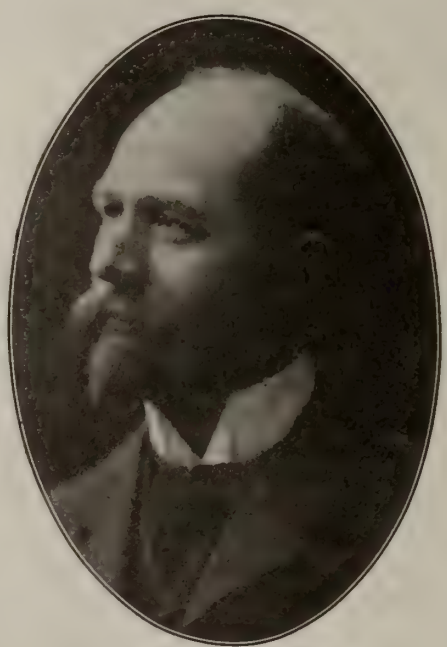
"I had to consider this question of second-hand stoves seriously," remarked Mr. Cinnamon in speaking upon the subject, "for a good percentage of those dealing with me regularly want to give an old model in part payment. I practically had to accept these, so I determined to take steps which would enable me to dispose of them at a profit. I have succeeded in doing this by establishing a repair department in which the old models can be put in good working order."

"You know," continued Mr. Cinnamon, "there is really very little wrong with some of the stoves people want us to accept at the time they are purchasing a new range. A well made stove now-a-days does not give out in a few years. Still, newer models are put out, and the people want these, for, of course, they get still better service from them.

"But what I mean is this, that there is yet good service in many of the second-hand stoves which are brought in to be exchanged. Often the flues alone are out of order. Sometimes the grates are not in good shape. None of the stoves are as good as the later patterns, yet, properly overhauled they are good for a number of years honest service.

Established Repair Shop.

"What I do for these stoves is this—put them in a repair shop which I have



D. Cinnamon, of Lindsay.

at the back of the store, and there have them overhauled by an expert. I have them polished and made look about as good as new, then I bring them forward and advertise a special sale."

Some may wonder where Mr. Cinnamon gets his market, in these days when people, more and more are coming to want the best that is to be had. It is, indeed, this very desire for the best service which is creating a demand for second-hand stoves. Practically every farm house, and many town houses too, have summer kitchens. Very shortly, now, these will come in use again; and it is for these that the old but repaired models are wanted. The women decide that they will get a good second-hand stove put up here, so that they will not be forced either to have the newer range moved, or to do their washing and other heavy work in the inside kitchen. Only a woman knows what advantage the outside kitchen is to her. Only a woman knows the benefit of a good stove there.

Advertise Special Sale.

"I simply have to advertise a sale of these repaired second-hand stoves," declared Mr. Cinnamon, "and the people come for them. It is not altogether the farmers' wives, though they buy largely; but many people seem to want a serviceable, yet a cheap range in the spring time. Many leaving for summer homes want a cook stove to take with them. They hardly feel like getting an expensive modern model, when they will only use it three or four months in the year, but they are glad to give a fair price for a second-hand, yet thoroughly efficient stove."

"Oh, yes," agreed Mr. Cinnamon, "we get a good profit out of these second-hand range. You see, in the first place, we don't pay any cash for them. We do give so much off a new stove, but then that is given off the price of the new model without any cash reduction. Moreover, people are willing to accept a very reasonable allowance, and by spending a few dollars on repair work it is quite possible to make the range worth twice as much. So we get our money out of the second-hand stoves, and they help us to get money for the new models. They do this in two ways. First, people know we will accept old ranges as part payment. They therefore think of us when they want to replace the cooker which has served them for some time. Moreover, when they come to us and get us to give them an allowance on the old model, they are more likely to pay the balance due on the new range in cash. That may not be so everywhere, but that is the way I have found it."

Hints for Others.

There is much for other dealers to consider in what Mr. Cinnamon says. It cannot be denied that many have to face this problem of the second-hand stoves. Possibly the majority dispose of them without any loss, but by taking some such steps as does Mr. Cinnamon it might well be possible to turn the old models into large profit bringers. Mr. Cinnamon handles these old ranges on a large scale. His repair shop, behind his

store, is full of them. Men work upon them at various times during the winter. But other merchants need not think that it would be necessary for them to keep a man to do nothing but repair these old models. That might mean too great an expense. The clerk who regularly handles the stoves, however, should be able to put them in good shape. In practically every store there is a quiet season. In practically every store there is a quiet day in the week. In practically every store there is a quiet hour of the day. By working at stove repairing at these odd times the necessary alterations could be made without any extra expenditure of time whatever. All that a dealer would have to get for his second-hand models would be what he allowed for them, and the cost of the new parts substituted for the worn-out fittings. Everything over and above this would be profit.

Knowledge and Enthusiasm are Needed

Essential Qualities in the Make-up of a Good Stove Salesman—Clerks Should Endeavor to Acquire as Much Practical Information as Possible From all Sources.

"Know your goods." The secret of successful stove salesmanship is summed up pretty concisely in that one phrase. It is conceded that the man, who knows the stove he is selling from the base up, has double chances of making good. He can convince his customers of the merits of the stove, by showing that he knows exactly what he is talking about.

A lady who had been inspecting a range in a hardware store the other day, decided after about ten minutes' colloquy with the clerk who was waiting on her that she would not buy just then. She had started for the door when the proprietor, who had been keeping a watchful eye on proceedings from his office, intercepted her.

"I hope you have been well impressed with our line?" he began.

"They seem alright—in most ways," said the lady. "But I am very cautious about such matters. You see, I particularly want a range with an oven which can be regulated perfectly."

"That is one of the strong points about our range," struck in the dealer. "Let me show you."

He led her back to the stove department and proceeded to demonstrate how easily the heat in the oven could be regulated. He made the sale then and there.

The writer was present and was a witness to the admirable manner in which the dealer advanced his arguments. It was quite apparent, however, that he succeeded purely and simply because he knew the range and was able to convince the customer on that one point. The clerk had failed because he did not understand the range as thoroughly. His explanation of the regulation of the oven had failed to convince.

One Salesman at Least.

The question was discussed at the Guelph convention as to whether the dealer should strive to have all his staff thoroughly ground in stove knowledge or to have one "crackerjack" salesman, literally steeped in stove lore, to handle the stove trade as much as possible.

An ideal state of affairs, of course would be to carry a whole staff of "crackerjacks." But then the stove department is only one branch of the business. Crackerjacks are needed in every department and it is hardly to be expected that each member of the staff will develop into a thoroughly efficient salesman of every class of goods. It is not very probable, therefore, that any hardware dealer will attain the distinction of managing a staff made up of crackerjack stove salesmen. It is wise, therefore, to endeavor to make all members of the staff as efficient as possible and to have at least one man who can be depended upon in any emergency.

Going to Factory.

The expedient has sometimes been adopted of sending men to the factory to learn all that they can there about the stoves they have to sell. The idea has good features. The salesman sees the stove in the making and picks up a great amount of practical knowledge which he could not acquire in any other way. He probably also has the opportunity of meeting and talking with the men engaged in the national campaign for the sale of the stoves and in that way learns much. A good salesman should return from such an excursion brimful of new ideas and enthusiasm.

But this can be done in a few cases only and it devolves on the majority of hardwaremen and clerks to acquire their knowledge by a more gradual process. This they can do by reading the literature that the manufacturers send out and by studying stove problems generally. By cultivating the acquaintance of the stove travelers, much valuable information can be secured. The traveler can be depended upon to explain any point on which the salesman is not quite clear.

Believe in Your Goods.

Enthusiasm is a great aid to salesmanship. "Believe in your goods," is second only to "Know your goods." The man who believes can talk his goods with redoubled force and with conviction showing behind his words. Belief is catching; and so is lack of belief. If the salesman is indifferent, he soon transmits the germ to his customer and the latter is not likely to buy. On the other hand, if the salesman is just brimming over with belief, the customer cannot help but catch the infection. There is a danger, of course. The salesman must not overdo it. When his enthusiasm borders on extravagant exuberance, the customer falls back on his natural store of skepticism and is inclined to doubt the sincerity of the salesman. He thinks that the simulation of enthusiasm is part of the latter's duties. It is the other kind which pays—the quiet but very evident and earnest enthusiasm which seems to indicate a deep-rooted belief in the goods.

The writer was speaking to a young clerk the other day and enquired what make of stoves was handled in the store.

"We handle ———'s," said the clerk. "And it's a great line. It's a pleasure to sell such stoves."

"I've been here about a year and a half," he went on. "Before I started, we had a range at home made by the ——— people; a good stove but not nearly as good as what we sell here. As soon as I found how good these ranges were, I got rid of the one at home and put in one of ours. And it certainly was a good move."

He believed in that line of stoves thoroughly, did this clerk. And he was a good salesman. The proprietor informed the writer that when he (the clerk) joined the staff, he did not know anything about stoves but that he had developed into a very efficient man. His enthusiasm was fully fifty per cent. of his salesmanship efficiency.

Knowledge and enthusiasm must go hand in hand. To know the goods is highly essential but knowledge is not particularly effective if linked with indifference. On the other hand, enthusiasm will not serve alone, unless the salesman has something behind it. He must be in a position to account for his belief in the goods that he sells. Enthusiasm without knowledge is likely to impress the customer as mere idle vaporing.

Rouleau, Sask.—C. Worden & Co. have bought the hardware stock of J. F. Brownscombe and Co.

Weekly Market Report---Stoves

ACTIVITY REPORTED.

The stove trade is picking up and activity is now reported in most lines. The assured increase in building operations makes the prospect for a record year in stoves and furnaces bright. A particularly heavy demand is anticipated in the West.

MONTREAL.

Montreal, March 28.—The spring activity has started. Since the thaws first made themselves felt there has been a good demand for these lines which naturally move at the commencement of the warm weather; but of late the orders have multiplied rapidly. Formerly the demand came largely from the far west and the east, with small orders from the most progressive dealers in the sections where winter hangs on longest. Now it is from these colder districts that the big demand is coming.

Prices may have had something to do with the increased demand. The coal strike in England has been expected to effect some changes. This it has not done yet, but it is impossible to tell when an advance may be struck. There seems no reason to expect an immediate settlement, and every day that the inactivity in the mines continues the probability of an advance in metals, which will necessitate an advance in the finished product, becomes more likely.

Change in Demand.

Spring Goods.—A little time ago the call was for milk can trimmings, railway can trimmings and sap pail trimmings. Now there has been a change, and the demand is not for the trimmings but for the milk cans, railway cans, and sap pails themselves. The time has passed when the tinsmiths could make these. Now the retail dealers need the finished articles to sell to the farmers who before very long will be needing them.

The change in prices outlined two weeks ago still obtains. That there will be a reversion to the old low figures is exceedingly unlikely. A change if one comes at all, will almost certainly be in the other direction.

Ranges, Heaters and Furnaces.—Furnaces, as might be expected, are quiet. For new houses some are being bought, but there will not be any great activity in this line until well into the summer, when this year's houses begin to near completion. Ranges, however, are nowbe commencing to move. The larger store owners are ordering a stock—not the complete stock that they will need to tide them over until fall, but enough to enable them to meet the early spring demand. Heaters are little wanted, but it is for the ranges that the real demand is felt.

Keen Competition.

Gas Stoves.—Here there is keen competition which is making things exciting for the retailers. The manufacturers are putting their new models on the market. They are showing the retailer that they can give him a remarkably good stove at a low price, and while they are impressing him with the advisability of selling a more costly stove where possible, they are enabling him to satisfy the customers who wants something cheap.

The retailers are finding a good demand for the stoves. Many seem to want them at this season. It is the season of preparations for the June weddings, the season of moving from one house to the other.

Kitchen Furnishings.—Perhaps the greatest activity of all is noted here. Refrigerators have commenced to move. Dealers are stocking the fine porcelain boxes, and the cheaper makes too. Then tinware, graniteware and enamelware is being largely bought. Many new kitchens have to be furnished. Many culinary outfits have to be supplemented.

A large number of dealers are conducting sales of cooking utensils at this time. Graniteware, enamelware and aluminum ware is to be seen in the store windows, and evidently the displays are bringing the results. The orders received by the manufacturers would show that, even if the statements of the retailers did not prove the point.

TORONTO.

TORONTO.—March 28.—The stove market is beginning to show considerable activity but the hampering influence of the freight blockade is being felt. Shipments are moving slow. Luckily there is little or no demand for immediate shipments and the situation is not as serious, therefore, as it otherwise would be.

Spring Lines.—The demand is setting largely to dairy supplies and tinware generally. There is a heavy call for all goods which come under this head.

Plates and Sheets.—There is also a consistently heavy call for Canada plates, tinplates and sheets of all varieties. The situation is not what might be termed satisfactory in view of the fact that local stocks are light and that supplies from the Old Country are very slow in arriving. The mining strike threatens to cut off the supply from the Old Country entirely. As a result, the jobbers are inclined to husband their resources.

A Good Movement.

Ranges.—There is a first-class movement in ranges. Moving time having arrived, a great many people are discarding their old ranges and purchasing new ones and this has had the effect of bringing along a good retail demand. One Ontario dealer placed an order for twelve ranges this week to be delivered at once; which is "going some" for the end of March. It is noteworthy that quite a number of good sized orders for ranges have been placed by Northern Ontario hardwaremen.

Gas Ranges.—The demand for gas stoves is now heavy. Some manufacturers state that their sales of gas stoves are constituting the feature of the trade at the present time. It is certain that the number of gas stoves sold this year will be largely in excess of any previous year. It is becoming the custom in the cities for a gas range to be installed in every home as well as a coal range.

Furnaces.—The furnace industry is showing every sign of spring activity. Building operations are already under way, particularly in the cities, and most furnace men have enough work on their hands to keep them busy.

As an increase of large proportions is assured in building operations this year, some speculation is already being indulged in as to the possibility of a furnace shortage. It kept the manufacturers busy last fall in meeting the demand and it is a certainty that a much larger supply will be needed this fall.

FAILURE FOLLOWS FIRE.

"Out of business, burned out and broke," is the laconic explanation given by a Southwestern dealer who has discontinued his subscription. Translated this probably means. "I was one of those unwise dealers who think they can afford to carry their own fire risks. I had been in business many years and never had a fire. This led me to believe that my establishment was immune and that insurance premiums constituted a needless expense. I know better now, but the knowledge came too late. It's all over and I'm down and out."

Let his fate be a warning to all dealers who are carrying their own risks.—Farm Implement News.

Methods of Retailing Paints and Varnishes

An Early Start Counts in Spring

Dealers Should Not Lose Any Time About Starting the Spring Campaign—Efforts Should Now be Made to Interest Prospective Customers.

Winter continues to "hang around" despite the fact that weather prophets had fixed an earlier date than this for its final exit off the scene.

The fact that spells of cold and snow have been sandwiched in between each brief taste of spring weather should not be accepted as sufficient reason for holding off the spring paint campaign, however.

It is a fact that Canada is going to experience during 1912 the biggest building year on record. The trend toward expansion has never been more marked or general. The boom is not confined to the big cities or to the new towns of the West. The country town will feel the influence as well.

This means, among other things, that there is going to be more paint sold than ever before. How much of that increased trade are you going to get?

It probably depends upon how soon you get into action. A good many orders for paint will be placed as soon as the buildings are started. Many house owners buy their paint for use on the first real spring day that comes along. A lot of paint is sold every spring before the snow is off the ground.

The dealer must start to feature his paint stock just as soon as this early demand begins to manifest itself—or a little sooner. It is better to be ahead of the season than behind it. Let the season overtake you rather than place upon yourself the necessity of overtaking the season.

The importance of the early trade cannot be overestimated. It must be remembered that the average male person is a creature of habit. He does the same things every day in pretty much the same old way. He has the "repeat" habit among other; if the goods he has purchased have suited him, he goes back to the same place with subsequent orders. It is exceptional for a man to experiment unless there are very good reasons for him doing so.

Now apply this rule of human nature to the paint business. If a man is satisfied with his first purchase of paint, it is going to take a wrench to get him to switch over to any other dealer. He will go back to the same store when the necessity arises for more paint—and keep on going. The rival dealer who only wakened up to the fact that people were buying paint about the time that his opposition was sending in rush orders for new supplies, has a small chance of getting much of that trade from his more enterprising rival.

Getting in First Word.

At the first of the season the mind of the customer is in a much more receptive mood than at any other time of year. He begins to figure out what painting he intends to do. In perusing magazines and periodicals, he sees a great deal of paint advertising. Last year, perhaps, he turned the work over to a painter and did not even enquire if the man mixed the paint himself or if he secured a ready prepared article. If a local dealer gets his ear at this stage and shows him the value of the paint that he (the dealer) is carrying, the chances are that the man will place his order. Later in the season, if he has begun in the old way, it will be twice as hard to convert him. The force of habit has manifested itself.

Ways of Starting Early.

There are many ways in which the necessary early influence of the dealer can be exerted. It can be brought to bear through the medium of newspaper advertisements. Window displays will be found equally effective and, if in addition to that, the dealer does a certain amount of personal work, his share of the early trade is assured. Personal work means talking paint to customers, making a canvass when opportunity presents and showing an interest generally in the paint department.

The manufacturers are prepared to supply dealers with literature and printed information for distribution. Full use should be made of these helps during the early spring. As stated before, the prospective customer's mind is in a receptive mood and the literature is likely to have more effect than later on. No further delay should be allowed before the distribution of paint literature is started. The final and definite opening of spring may come at any time now.

A FORTNIGHTLY SALE.

St. John, N.B.—Local hardware merchants are looking forward to an exceptionally busy spring this year, and in view of the projected development in building operations are of the opinion that the next few months will be record breakers in the sale of materials necesary in this connection. At present, however, with most dealers, there is no heavy demand on general stock, and because of this there is a tendency to create a run on certain lines which will be needed before long, or which are needed about the homes of customers at all times.

This idea is plainly manifested in the "Special sale of seasonable household goods" opened this week by the firm of

Two clever window displays in the store of Geo. Richardson, Guelph, which attracted much attention during the Ontario Convention.

W. H. Thorne & Co., in Market Square, and which they propose to continue for two weeks. It is brought forcibly to the notice of intending purchasers that "this is not a sale of special goods made up cheaply for the purpose, but a cleaning out of regular goods at very special prices, due to the fact that they find themselves rather over-stocked in many lines." This is an argument which generally commands attention, for it is well known that at many sales the goods offered at "bargain prices" are not the bona-fide articles which they are advertised to be. The fact that the salesmen are able to make this statement with truth and accuracy is one of the best arguments resorted to in making a sale.

The fortnight's sale to which much attention is being given is in the scores of various lines so much in demand in a few weeks' time. For instance whitewash brushes, paint brushes, varnish brushes, liquid paints, varnish wood stains, step-ladders, etc., are extensively advertised as "good buys" and the run on these lines seldom starts until the snow is well off the ground at least. There is also a wide range of articles for every-day purposes, such as wash boilers, wringers, ironing boards, irons, vacuum cleaners, aluminum ware, enammelled ware, polishes of all kinds, woodenware, and high-class nickel-plated ware. All the articles featured in the sale have the prices plainly marked and the grading scale manner in which this is done indicates to a great extent the quality and value of the various lines.

Preparing for the Holiday Trade

Dealers Should Feature Paint Strongly Next Week—A Great Deal Will be Used by House Owners on the Holiday—The Connection Between Salesmanship and "Busy Talking."

Next week will be one of the busiest of the year in the retail paint department.

A holiday is accepted by the average man as a splendid opportunity to do what "fixing up" is required around the house. He gets out his hammer and saw and a pot of paint and "putters around" for the better part of the day. Good Friday, being the first holiday in spring, is generally devoted to a pretty systematic cleaning up. The yard is cleared, storm doors and windows are removed. Paint and varnish are used to remove the signs of winter's wear and tear from the interior woodwork of the house and furniture. If the weather is sufficiently warm, the man of the house also essays to do a certain amount of outside painting.

There is, as a result, a heavy demand for all varieties of paint and varnish for a few days preceding the holiday. Dealers have found it a good policy in the past to encourage this trade in every possible way.

The usual methods of helping along trade will serve in this instance—prominent position of stock in store, window displays, some newspaper advertising and a certain amount of canvassing of customers who enter the store to buy other articles.

It is necessary to feature the paint stock strongly for some days before the holiday. A great many men do not use much forethought in figuring out what they intend to do on a holiday. When the day comes, they discover half a dozen things which they would like to do but they find at the same time that they have neglected to secure the necessary material. "Wish I had a pot of paint," the man says to himself. "That porch certainly does need a lick or two. And the floor of the dining room would look a whole lot better with another coating of floor paint." Unfortunately the hardware store is closed. The floor and porch go untouched and the dealer misses a profitable sale. If that man had passed a hardware store on his way home the night before, where paint was shown so prominently that he could not miss seeing it, he would have anticipated his wants by laying in a store of the necessary material.

One of the main considerations is to have a first class window display of paint. It will be noticed by all who pass and will almost certainly lead many to secure the goods they will need for the work they have planned to do on the holiday. Particularly good results will be obtained if the display has a direct bearing on the question of holiday work. A case is recalled where a hardware dealer placed a sign in the centre of his window with the query: "What are you going to do on the holiday?" surrounded as it was by a striking assortment of paint, varnish, enamel and brushes, the sign set quite a few passers-by thinking and led to many sales being made.

The dealer should not neglect to talk paint industriously during the week preceding the holiday. Detective Burns lays down as a first principle of successful crime detection that the detective must be a "busy talker." The same rule applies to a certain extent to salesmanship. The dealer or clerk who acquires a "talking acquaintance" with customers is in a better position to suggest purchases and discuss the needs of his customers with them.

When a man drops into the store during the coming week, the dealer might make it a point to ask him casually, "Going away on Friday?" or "What are you going to do with yourself on the holiday?" When it has been learned that the man has no particular plans laid, as will prove the case, nine times out of ten, the conclusion can safely be drawn that a part of the day at least will be spent in the before mentioned practice of "puttering around." There is a splendid opportunity, then, to bring up the subject of paint.

Canvassing of this kind will be found highly effective. It is probably true that one man out of every two would do a certain amount of painting work on the holiday if he had the necessary material. Half of those so disposed neglect to buy the paint, however. The work ahead of the dealer is to see that they have no opportunity to forget or neglect.

CANADIAN GYPSUM.

The total shipments of gypsum crude and calcined from Canada in 1910 were 525,246 tons, valued at $934,446, as compared with shipments of 473,129 tons, valued at $809,632, in 1909. The tonnage of gypsum, mined or quarried, in 1910 was 548,019 tons, and the quantity calcined, 69,889 tons. In 1909, 493,086 tons of gypsum were mined and 63,670 tons calcined. The shipments in 1970 included crude gypsum, 469,573 tons, valued at $508,686; ground gypsum, 6,121 tons, valued at $17,390, and calcined gypsum, 49,552 tons, valued at $408,370. In 1909, shipments comprised crude gypsum, 423,474 tons, valued at $457,038; ground gypsum, 8,814 tons, valued at $26,159, and calcined gypsum, 40,841 tons, valued at $326,435. The exports of gypsum in 1910 were: 346,081 tons of crude gypsum, valued at $416,725, and gypsum, ground or calcined, valued at $12,306. The 1909 exports were 315 tons of crude gypsum, valued at $372,-286, and gypsum, ground or calcined, valued at $2,787.

BUSINESS FOR SALE

THRIVING LITTLE HARDWARE BUSINESS for sale at Matheson, New Ontario. This little town is situated in the centre of the great clay belt and mining district. Stock about seven thousand dollars. Can be reduced to suit purchaser. Option of purchasing or leasing building. Reasons for selling, owner has interests elsewhere, which demand his attention. Don't answer this ad. unless you mean business. Frank A. Child, Cochrane, Ont. (13)

There's Money in the ML Line

ML goods are made to build up trade for our dealers and ourselves. They have to be good, and they are good because we've been in business for 20 years—long enough to know that the way to succeed is to give full honest value for every dollar's worth we sell.

M L PAINTS

Under weather tests ML Paints have stood up better than the many "best" paints in the market. You can surely get particular trade with ML Paints.

M L FLOORGLAZE

A quick drying, glossy, wear-resisting finish—good for any paint purpose. In solid and transparent effects. Many shades. Well advertised.

ELASTILITE VARNISH

A favorite with folk who know that quality pays though it seems to cost more at first. Elastilite is splendid for any varnish need, indoors or out.

DECORATIVE AID DEPARTMENT---A Help for Every Decorator and Dealer. Color schemes, and technical information given, by which any dealer may sell exactly the right paints in the right shades to properly decorate any house. Stencil designs, etc., included in information. This plan helps you get more business. Services are free. Write for Decorative Aid Booklet.

Many other good members in the ML Line. Get price list, color cards and samples soon, from

Weekly Market Report --- Paints

UPWARD TREND.

There is an upward trend in prices. Linseed oil and turpentine are higher, and it is not at all unlikely that advances will be made before long in white lead, glass and putty.

Difficulty is being experienced in Toronto in making shipments and getting in supplies. Stocks in turpentine have been very light.

MONTREAL.

Montreal, March 28.—The sudden reversion to winter, which came during the closing days of last week and lasted well into this, had a rather harmful effect upon business. The travelers could not get around so well, nor did the dealers throughout the country feel so ready to buy.

In the city the falling off was not noticeable. Here the merchants have felt the growth of paint orders. Many are preparing special windows to make the young householder's fancy lightly turn towards thoughts of painting. There are a large number of buildings nearing completion at this time, too, and for these paint is needed in good quantities.

Decrease Not Serious.

The momentary dropping off in trade is not regarded as at all serious. Even in amount the decrease is of little consequence, and the manufacturers realize that such dull weeks are to be expected early in the spring. On all hands there has been ample evidence that this is to be a good paint season.

Less than any other, perhaps, has the paint market been influenced by the English Coal Strike. If the present conditions continue there is likely to be an increase in the price of linseed oil, and there is practically certain to be an advance in glass; but for the time being the only change that has come has been in white lead. Nor can this rise be attributed altogether to the strike. Pig lead was high before. The corroders of white lead were making little profit. An advance was predicted some time prior to the labor trouble.

Good Orders From Maritimes.

White Lead.—The ten cent a cwt. advance had not checked ordering here at all. There is a big demand for this material, and the retailers are laying in their supply in good time. From the Maritime Provinces especially the orders are large.

Linseed Oil.—Here the strike is causing some uneasiness. There are those in close touch with the market who declare that the trouble in England will not affect the local market. They contend that the great bulk of the oil used here is ground from Canadian flax. On the other hand there are those who point to the interdependence of the markets. What causes poor shipping, they say, will prevent the easy carrying of seed, and will be certain to cause an advance in English oil—an advance which will in all likelihood be followed by a somewhat similar advance in the States and here in Canada.

At present prices are quoted at the old figure of .91 and .94. An immediate change does not seem likely.

No Change in Turpentine.

Turpentine.—No change here. What orders are being received are of small size. The supply at Savannah is ample, and handlers do not look for an immediate change. There seems no ground to look for a drop, and the sufficiency of the supply would seem to guard against an advance.

Mixed Paints.—It is here that the falling off in orders has been most noticeable. Many dealers already have good supplies on their shelves. They are not securing orders for these, since few wish to buy paint during such cold weather as obtained in this neighborhood recently; therefore, they are not placing further orders with the manufacturers. This, of course, only applies in certain sections. From some districts, notably the east and the city, orders have been coming in well.

Big Call for Paris Green.

Paris Green.—Already this has been a good season for this product. The dealers have ordered largely and are still ordering. They have to meet an increased demand.

Putty.—Here, too, business has been good, and continues so. This is undoubtedly to be attributed to the large amount of building.

Glass.—If there is to be an advance no word of it has come as yet. Orders are good, due as with putty, to the large amount of building. Whether shipments from England will have to be cancelled is not known yet. Upon this will hinge the future of glass, for the supply now on hand is none too large.

TORONTO.

Toronto, March 28.—While the unfavorable weather conditions have had some effect on trade, there is still an active tone noted. Booking is proceeding briskly and considerable shipping is now being done.

There is an upward tendency noted in prices. Several advances have been recorded and rumors are heard of impending increases in other lines.

The manufacturers and jobbers are considerably worried over the freight situation. Not only is it difficult to make shipments but supplies ordered early in the year are not yet to hand. There is a tie-up all around in freightage and it is feared that business is going to be seriously hampered when the spring rush sets in.

Linseed Oil Up.

Linseed Oil.—An advance of 2 cents has been declared in the price of linseed oil making the local quotations 94 cents for raw and 97 cents for boiled. A further advance seems certain within the next few days. The crushers are reported to be considering a further advance and this will mean a corresponding increase in wholesale quotations. Back of this upward trend is the great difficulty in getting seed. Buyers from Duluth and Chicago are bidding for supplies in Winnipeg as fast as the seed comes on the market. The prospects all point to a continued high price for oil right through the summer.

Turpentine Higher.

There are two outstanding features in the turpentine market—an advance of two cents and the almost complete shortage of local supplies. The price is now 72 cents. The shortage has been caused by the freight blockade largely. Stocks were so light last week that the jobbers doled out small quantities and strove desperately to secure new supplies. One jobber had an order for nine barrels to be delivered last week. The first barrel arrived this week and the rest will come some time in the future.

Under the circumstances, there is not a great deal of turpentine being sold.

An Advance Sure.

White Lead.—It is accepted here as an absolute certainty that there will be another advance in the price of white lead. Since the 10 cent increase went into effect, pig lead has continued steadily on the upward path. With the cost of raw material so much higher, it is not likely that the grinders will find it possible to maintain white lead at present quotations.

What About Glass?

The glass situation is creating considerable comment. It is generally conceded that the price of glass should be advanced, but it is not by any means certain that any changes will be made.

"I can always bank on my customer's paint trade after he buys his first can of B-H "ENGLISH" PAINT."

Mr. T. M. Nash, agent for B-H Paint at Wellington, Ont., in a letter written January 19th, 1912.

To have customers come back again, and again, and again---to build up a permanent, profitable paint trade you must give paint value in the paint can.

You and your customers know there is 100% value in B-H "ENGLISH" PAINT. There is a guarantee formula on the can---you know it is free from adulterants, that it is ALL paint---70% pure White Lead---30% Pure White Zinc, mixed ready for use with pure Linseed Oil, pure Turpentine and Dryer.

HARDWARE AND PAINT DEALERS

who are not our customers can learn something of interest and profit by communicating with us at once.

PINCHIN-JOHNSON & COMPANY (Canada) Limited

377-387 CARLAW AVENUE, TORONTO

Established in England in 1834

J-98

Steel Tanks and Self-Measuring Pumps for Paint Oils

They avoid all the loss and inconvenience sustained under the old method. The steel tanks are air-tight and will not permit the oil to gum or stick. The pumps measure the oil according to the Imperial Standard, directly into the customer's can. They count the gallons pumped and compute the charge for fractional gallons.

THE BOWSER PAINT OIL SYSTEM

will put every cent of profit into your pocket, where it belongs. With a Bowser your paint oil department will be as clean and inviting as your shelf hardware department. It draws trade.

Why not investigate now and be ready for spring. Your fellow merchants are using them. They'll help you. Ask for book No. 15.

S. F. BOWSER & COMPANY, INC., TORONTO

66-68 FRASER AVENUE

For Twenty-seven Years Manufacturers of Self-measuring Pumps, Tanks, Gasoline and Oil Storage Systems, Self-registering Pipe Line Measures, Dry Cleaning Systems, etc.

"SILKSTONE"

(COPYRIGHT)

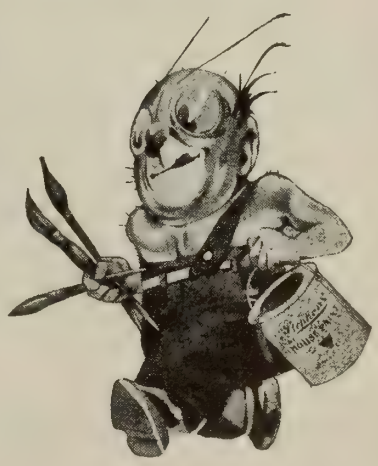
FLAT WALL COLOURS

Are RIGHT In Quality And Price

These colours win favor of housewives because they can be washed with soap and water without soiling the beautiful effect in the slightest. They will resist the action of the lime on the walls, are absolutely sanitary, extremely durable and can be used where kalsomine or distemper colours would prove ineffective.

They dry as smooth as silk and as hard as stone. Dealers get money back if not satisfactory in every respect.

Our agency proposition will appeal to every aggressive dealer. Write for it.



"GIVE TONE TO THE HOME."

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

ACCURATE COST KEEPING IS EASY IF you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employes' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalogue. International Time Recording Company of Canada, Ltd., office and factory, 29 Alice Street, Toronto.

BUSINESS GETTING TYPEWRITTEN LETters and real printing can be quickly and easily turned out by the Multigraph in your own office—actual typewriting for letter-forms —real printing for stationery and advertising, saving 25% to 75% of average annual printing cost. American Multigraph Sales Co., Ltd., 129 Bay Street, Toronto.

COUNTER CHECK BOOKS—ESPECIALLY made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for binders and monthly account systems. Business Systems, Limited, Manufacturing Stationers, Toronto. (tf)

YOU CAN BUY A REBUILT TYPEWRITER from us. We have about seventy-five typewriters of various makes, which we have rebuilt and which we will sell at $10.00, $15.00 and $20.00 each. We have also a large stock of better rebuilts at slightly higher figures. Write for details. The Monarch Typewriter Co., Ltd., 46 Adelaide St. West, Toronto, Canada. (tf)

SITUATIONS WANTED

HARDWARE LINES WANTED ON A COMmission basis, covering western provinces. Canadian Specialty Co., Suite 307, Travis Blk., Calgary, Alta. (14)

MISCELLANEOUS

COUNTER CHECK BOOKS—WRITE US to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

COPELAND - CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson Co., Ltd., Toronto and Ottawa. (tf)

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS ARE DEVISED to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

FIRE INSURANCE — INSURE IN THE Hartford. Agencies everywhere in Canada.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

MOORE'S NON-LEAKABLE FOUNTAIN pens. If you have fountain pen troubles of your own, the best remedy is to go to your stationer and purchase from him a Moore's Non-Leakable Fountain Pen. This is the one pen that gives universal satisfaction, and it costs no more than you pay for one not as good. Price, $2.50 and upwards. W. J. Gage & Co., Limited, Toronto, sole agents for Canada.

PENS—THE VERY BEST PENS MADE ARE those manufactured by William Mitchell Pens, Limited, London, England. W. J. Gage & Co., Limited, Toronto, are sole agents for Canada. Ask your stationer for a 25c. assorted box of Mitchell's Pens and find pen to suit you.

THE NATIONAL CASH REGISTER COMpany guarantee to sell a better register for less money than any other house on earth. We can prove it. Make us. The National Cash Register Co., 285 Yonge Street, Toronto.

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto. (tf)

SHERWIN-WILLIAMS

Profits

There may be profit (for a time) in selling low-priced paints and varnishes, made to catch the confirmed bargain-hunter. But these sales soon result in complaints and the trade drifts away. Cheap paints are always inferior paints and cause endless trouble for the dealer. The reliable, high-quality S-W Line of Paints and Varnishes brings a healthy, continuous increase in your sales and profits year after year. The prices are consistent with the best quality. Old customers are satisfied and new customers are added as a result of the splendid quality, reputation and publicity which make Sherwin-Williams Paints and Varnishes the best selling and most profitable finishes for the dealer in Canada.

FACTS ARE FUNNY THINGS

It is a fact that DOUGALL VARNISH is made from better ingredients than any other.

It is a fact that DOUGALL VARNISH has been proved by test to withstand the sun, wind and rain better than any other.

It is a fact that DOUGALL VARNISH will not crack and peel off, which cannot be said of a good many other varnishes.

It is a fact that DOUGALL VARNISH covers more surface than any other varnish made.

It is a fact that DOUGALL VARNISH is "The Varnish That Lasts Longest."

It is also a fact that DOUGALL VARNISH costs no more than any other, and therefore when all other things are taken into consideration it naturally follows that it is a better seller than any other.

Every Can a Berry Can

There are three leading reasons why you ought to make every can on your varnish shelves a Berry Brothers' Can.

1st. You will get the *right* varnish for every demand your trade can make upon you.

2nd. The label is so well advertised to consumers that every can becomes a Quality Advertisement on your shelves.

3rd. The Quality is so well known that you don't have to waste time in argument and *can always get a price that means a good profit.*

There's nothing in varnish, shellac or kindred lines that you can't *buy* best and *sell* best under the Berry Brothers' Label.

Berry Brothers' Business Builders

A Common Sense Talk

AIR IS CHEAP. You do not pay rates for air like you do for water, yet a big fuss is made over the impurity of water and very often no thought is taken of the impurity of the air breathed from day to day and night to night.

Crowded rooms, whether in public places, schools, opera houses or factories, require ventilation as well as the private dwellings.

HOUSE BUILDING IS A SCIENCE NOWADAYS AND NO BUILDING IS COMPLETE WITHOUT ONE OF OUR J. W. HARRIS VENTILATORS.

THE VENTILATOR ITSELF IS AN ORNAMENT and can be made to suit the character of the building, either as to size or as to quality of material.

MONTREAL, Dec. 4th, 1905

MESSRS. J. W. HARRIS MFG. CO., Ltd.
City

DEAR SIRS,—
In answer to your letter of the 25th ult., I must say that I am very much satisfied with the results of the "ZEPHYR" Ventilators.

Yours truly,
W. CHAMPAGNE,
191 St. Paul St.

Dealers everywhere will find a double profit in handling this ventilator. Write direct for catalogue and booklet to-day.

Learn about our system of ventilating. A pleasure to send books.

GET THE GENUINE

DOES THE REPUTATION of GARLOCK PACKING mean anything to you?

Does the fact mean anything to you that GARLOCK PACKINGS are giving eminent satisfaction the country over and everywhere Engineers who know insist on the installation of Genuine GARLOCK?

This big and insistent demand for GARLOCK PACKING is the demand for quality.

Imitators are making Packings that look like GARLOCK and are trying to sell them because they look like GARLOCK.

Sometimes these imitations are sold as being "just as good as GARLOCK." If they were as good, they would be sold on their own merits and not on the established reputation of GARLOCK.

Sometimes these imitations are substituted when "GARLOCK" is asked for. To prevent you getting an imitation and assist you in identifying the genuine, we have marked every piece of Spiral Packing with this mark of quality

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

WRITE FOR CATALOGUE

THE NEW METAL WORKER PATTERN BOOK.

A treatise on pattern cutting as applied to all branches of sheet metal work. By George W. Kittredge. 430 pages; 744 illustrations; size 10 x 13 inches. Cloth bound. **Price $5.00.**

ART OF COPPERSMITHING.

A practical treatise on working sheet copper into all forms. By John Fuller, Sr. 327 pages; 474 engravings; size 10 x 6½ in. Cloth bound. **Price $3.00.**

SHEET METAL WORK.

A manual of practical self-instruction in the art of pattern drafting and construction work in light and heavy-gauge metal, including sky-lights and roofing, cornice work, etc. By Wm. Neubecker. 267 pages; 358 illustrations; 6½ x 9¾ inches. Half-Morocco binding. **Price $3.00.**

A PRACTICAL WORKSHOP COMPANION.

For tin, sheet iron and copper plate workers. By LeRoy J. Blinn. 296 pages; 170 figures. Size 5 x 7¼ inches. **Price $2.50.**

SHEET METAL WORKERS' INSTRUCTION.

By Joseph H. Rose. 300 pages. Profusely illustrated. **Price $2.00.**

THE ROOFING, CORNICE & SKYLIGHT MANUAL.

175 pages; 170 illustrations and 13 plates; size, 6 x 9½ inches. Cloth bound. **Price $1.50.**

BAUGHMAN'S BUYER & SELLER COST TABLES.

A cost book for everybody having cost to figure by the piece, pound, foot or ton, from 2½c per hundred to $ 0 a hundred. Leather bound. **Price $1.50.**

TINSMITHS' HELPER & PATTERN BOOK.

With useful rules, diagrams and tables. By H. K. Vosburgh. A new revised edition; 120 pages; 53 figures; size 4½ x 6¾ inches. Cloth bound. **Price $1.00.**

TWENTIETH CENTURY SHEET METAL WORKER.

By H. E. Osborne. Gives short, concise explanations which should be easily understood by the young apprentice, and are sufficiently scientific for the practical use of the journeyman. 86 pages; size 5½ x 7¾; illustrated. Cloth bound; **Price $1.00.** Paper Cover; **Price 60c.**

PRACTICAL METAL PLATE WORK.

By Paul N. Hasluck. 247 illustrations; 160 pages. **Price 75c.**

TREATISE ON THE GEOMETRICAL DEVELOPMENT OF ROUND AND OVAL CONES.

With easy examples of their application. For the use of beginners and practical sheet-iron and tinplate workers. By John Fuller, Sr. 52 pages; 37 figures; size 4½ x 6¾ inches. Cloth bound. **Price 75c.**

MENSURATION FOR SHEET METAL WORKERS.

As applied in working ordinary problems in shop practice. By W. Neubecker. 51 pages; 70 figures; 5½ x 7¾ inches. Cloth bound. **Price 50c.**

TABLES GIVING THE LENGTH OF BARS FOR SKYLIGHTS, AND RAFTERS FOR ROOFS.

84 pages; bond paper; handy pocket size. Cloth bound. **Price 50c.**

THE METAL WORKER SHOP CARDS.

Made of Manila Board; 11 x 14 inches; eyeletted for hanging up in the shop. No. 1.—Table of the quantity of tin required for roofs. No. 2.—Table of the diameters, areas and circumferences of circles. **Price 25 cents each.**

EASY LESSONS IN ROOF MEASUREMENTS.

By W. Neubecker. Twelve lessons on figuring the amount of material required to cover a given surface in flat, hipped or irregular shaped roofs. 31 pages, 5½ x 8 inches; 12 illustrations. Paper cover. **Price 25c.**

HOUSE CHIMNEYS.

A series of articles on chimney troubles and their remedies. 62 pages; 5½ x 8inches; 40 illustrations. Paper cover. **Price 25c.**

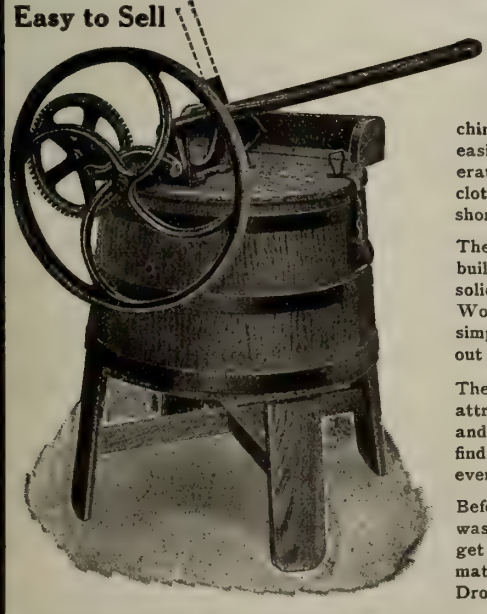
"THERMO" The Washer

That makes the Washday Bright

Easy to Sell



Its improved motion absolutely eliminates washday drudgery caused by hard working machinery. It is the easiest washer to operate and washes clothes thoroughly in shortest time.

The Thermo Washer is built to last and is solid and substantial. Working parts are simple and cannot get out of order.

Thermo Washers are attractively designed and well finished and find ready buyers everywhere.

Before restocking your washer department get full descriptive matter and prices. Drop us a card NOW.

THE LONDON FOUNDRY CO., LTD., LONDON, CANADA

Edwin Schofield (Eastern Agent), Canadian Express Bldg., Montreal; F. J. Schuch (Western Ontario Agent), 19 Jarvis Street, Toronto; MacPherson & Teetzel, Vancouver, B.C. (British Columbia Agents.)

In reply to one of our circular letters an Ontario firm wrote:

"We have been using your belting right along and are satisfied with our arrangements **with the local Hardware Dealer through whom we get it.**"

See the point, Mr. Hardwareman?

Why don't **you** put in a stock of belting and get some nice steady trade like the above?

"CROWN," "CLIMAX" AND "AMPHIBIA"

(Waterproof)

are the best brands of

Leather Belting

and are made by

Sadler & Haworth

Tanners and Manufacturers

For over 35 years the makers of the best leather belts

ROBERTSON SOCKET HEAD WOOD SCREWS

Have a decided advantage over other styles of wood screws. By having a square hole, into the centre of which a specially designed screwdriver fits snugly, it does away with all possibility of slipping, which often proves disastrous to the screw, and wastes a considerable amount of the workman's time. *They will sell on sight—get our prices at once.*

We also manufacture high-grade Hand Drivers, Yankee Bits, Brace Bits, Rivets, Burrs, Washers, Nails and Wire.

SATISFACTION PREVAILS

In every store where the

"Kansas" Pruning Knife

(Improved)

Is Sold

This is a knife of rare quality and convenience. It has proved its superiority by practical demonstrations and actual use for years.

Made in Canada by the Taylor-Forbes Co., Limited, Guelph.

Write for circular and prices.

International Tool Co.

Detroit, - Michigan

The **KANSAS PRUNING KNIFE** is **AUTOMATIC**, no levers to work by hand. Just put the hook over the limb and pull on the handle "that's all." It does heavy work and does it fast. Every orchard man needs it and should be able to purchase it from any up-to-date dealer.

The **KANSAS** is a real money maker. Get our circulars and prices at once.

BUSHLIN PATENT Knocked Down Rakes

ALLOW GOOD PROFITS

Buy your hay rakes knocked down. It is the most economical way.

In this form they occupy much less room, enabling you to carry a fairly large stock, which would otherwise be impossible.

These rakes are easy to set up, and are sold under a written guarantee. Their finish and design are certain to attract farmers.

Made in both wood and wire bow.

Get our prices and particulars at once.

Big Ben Store Helps

In order to enable Canadian dealers to get the maximum benefit from the Big Ben campaign now running in Canadian magazines, we are packing Big Ben specially for Canadian trade, six in a carton with a full set of store selling helps (two posters, two show cards, two metal signs.)

On an order for 12 we add a solid mahogany display stand. On an order for 24 or more, we print your name on dials, give the posters, display stand, and a beautiful metal sign lithographed in five colors.

Big Ben and his selling helps are being carried in stock by 54 wholesale Canadian distributors. We will be glad to let you have their names upon request. Any will tell you Big Ben is the best made and the best selling alarm that's ever been put out.

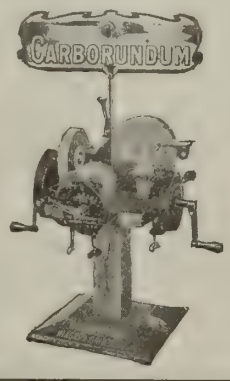
In broken and dozen lots, $2.15 less 2%. In lots of 24, $2.05 less 2%.

The Western Clock Co., La Salle, Ill.

There is a Grinding Need In Every Household, Hotel, Repair Shop and Garage for a

CARBORUNDUM NIAGARA GRINDER

Every machine is equipped with a Carborundum wheel—the wheel that cuts fast, clean and cool—every machine is mechanically perfect—castings strong, durable—gears perfectly cut, smooth running, uniform—Carborundum Niagara Grinders are assembled under the strictest supervision—every part is machined right—put together right. The machines are handsomely finished in brown enamel—all small parts nickel-plated—It is a machine that will appeal to anyone who has any tool grinding to do—Write for the details of our free grinder display stand offer—The Carborundum Grinder stand is a great sales booster.



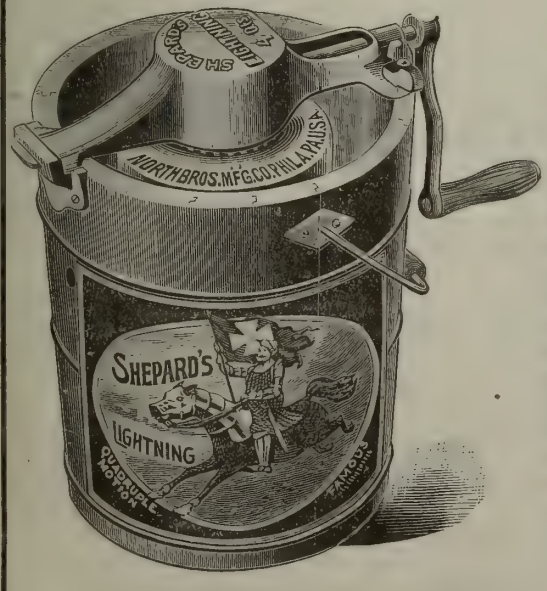
Are you a Carborundum Dealer? Let us tell you about our sales co-operation plans.

THE CARBORUNDUM CO.

NIAGARA FALLS, NEW YORK

THE LIGHTNING AND BLIZZARD

FREEZERS



stand ready to serve you in the same satisfactory manner in which they have served both trade and consumer for over a quarter of a century. The construction is of the same high class. They run easy, freeze quickly and take the smallest amount of ice and salt of any freezer made. The extensive advertising from season to season has created a permanent demand. They bring trade and help you keep it.

Better let your Jobber quote at once.

NORTH BROS. MFG. CO.

It Works Well and Sells Well. It represents Full Value for the Price.
It is a Good, Serviceable, Cheap Mower.

THEY DO THE WORK WANTED.

Every Mower Guaranteed Free of Flaws and Imperfections in Material and Workmanship.

They Cover all Needed Requirements and the Desired Range of Quality, Utility, Finish and Price.

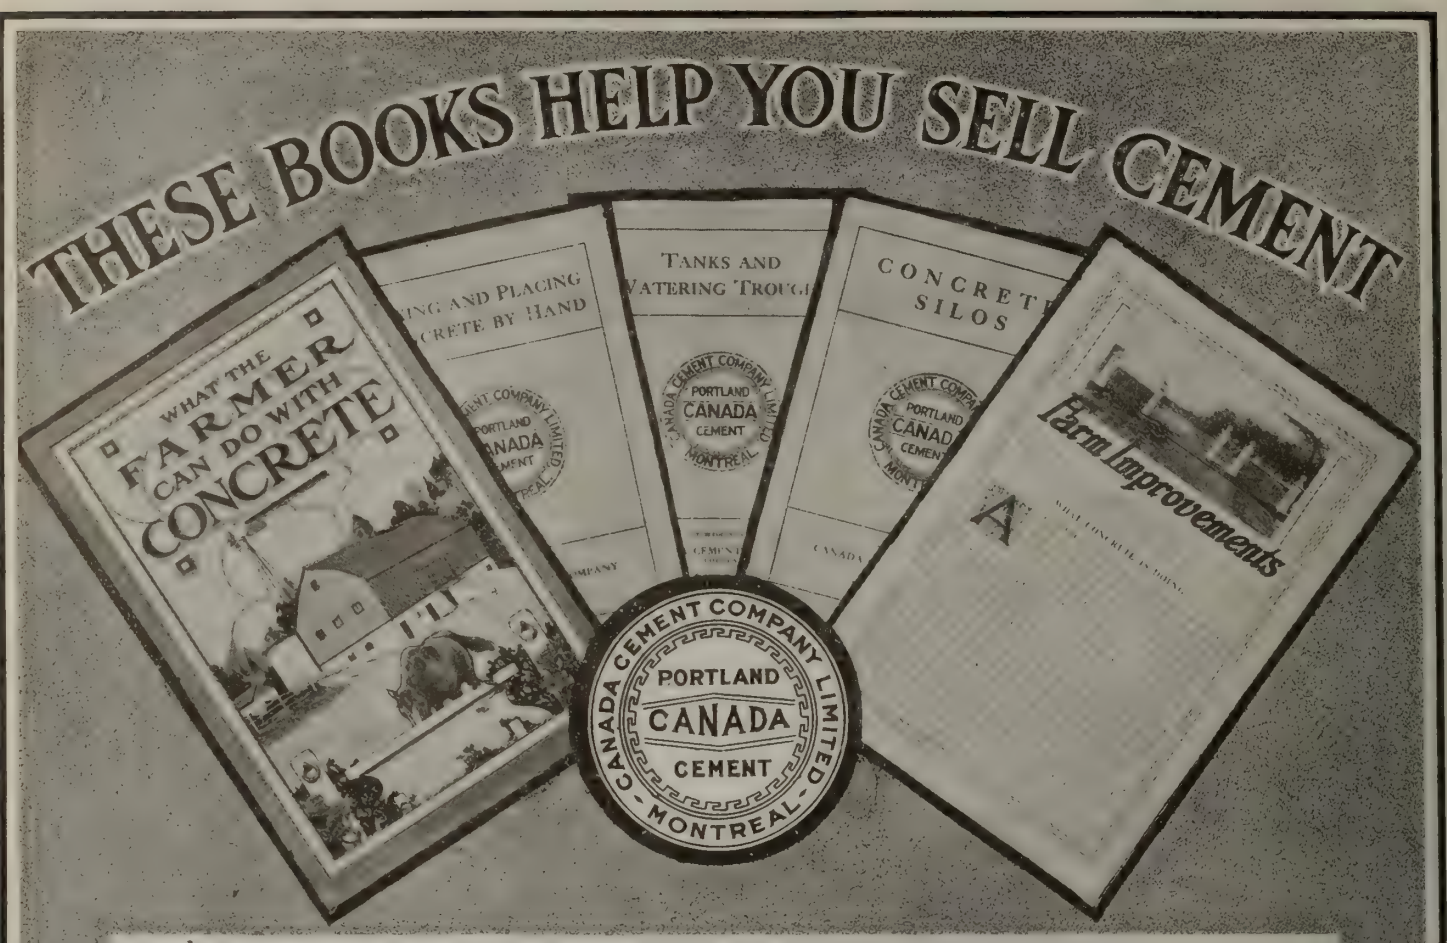
They do away with the necessity of carrying the many makes and styles formerly required to meet the demand.

They Simplify Your Mower Business.

Send for Circular Illustrating These Mowers in Their Actual Colors.

LEWIS BROS., LIMITED, MONTREAL

OTTAWA TORONTO VANCOUVER



Is your profit keeping pace?

Cement has become one of the farmer's daily necessities. His demand for it, active twelve months in the year, is growing by leaps and bounds.

The demand is being stimulated by the most energetic educational campaign ever undertaken in Canada.

A $3,600 prize Contest for farmers was conducted in 1911, and the second contest will be held this year. Advertisements in newspapers and farm journals — The book, "What The Farmer Can Do With Concrete"—A quarterly magazine, "Farm Improvements."—Booklets on every phase of concrete work—Lectures to farmers at agricultural colleges. These are some of the means now being employed to increase the demand for concrete."

Are you getting your share of the profits from this publicity?

We are anxious to help you get it. We will send you wall files, handsome steel signs and copies of all publications. Our Publicity Department is always glad to answer any inquiries you desire to make. In addition to this service, we send you the names of those farmers in your community who have inquired about concrete, giving you valuable "tips" on prospective purchasers.

Last, but not least, dealers who handle "Canada" Cement are building up a permanent trade on this newly-awakened demand, because they sell the Cement that always gives satisfaction.

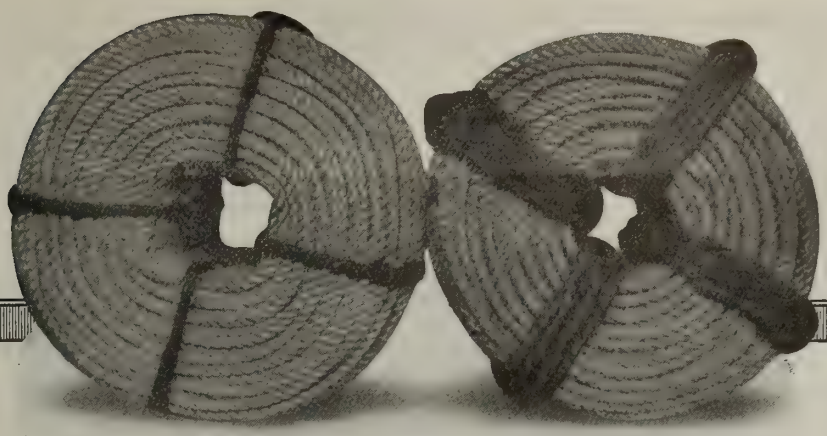
Coates Clipper Mfg. Co., Worcester, Mass., U.S.A.

John H. Graham & Co., New York, N.Y. (Sole Agents)



"A"
PLYMOUTH MANILA

"B"
Rope sold as "MANILA"

Two Kinds of Manila Rope Always Available

One is very cheap rope — so poor in quality that it's expensive at any price; the other is very good rope — so strong and durable that it's always a good investment for your customers.

The difference is shown by this comparison of these two coils of one-half inch diam. rope; bought in an open market; stripped of coverings, photographed, and then tested. The coil marked "A" is —

PLYMOUTH ROPE
"The Rope You Can Trust"

"B" is some of the "so-called" Manila rope.

THE COMPARISON SHOWED:	"A"	"B"
Length of rope in coil of 97 lbs.	1250 ft.	1070 ft.
Weight of lashings	1 lb.	3 lbs
THE TEST PROVED:		
Weight per 10 ft. of rope	13⅜ oz.	14⅛ oz.
Strength at breaking point	2907 lbs.	1450 lbs.
(Use formula: Actual Strength ÷ Wt. per 10 ft. = Value)		
Comparative value ("A" worth 100%)	3477 or 100%	1642 or 47%

It is obvious that "A" is worth more than twice the value of a rope like "B". Yet PLYMOUTH costs but a very little more. Can you conscientiously offer your customers a rope like "B" when you can give them so much more for their money? PLYMOUTH makes good friends and customers for you. Ask your jobber about it.

Some Truths About Horse Clipping Machines

Every Stewart Clipping Machine is sold with an unqualified understanding that it must please the buyer or no sale.

Stewart machines are made in the largest and most modernly equipped factory for the purpose in the world.

They are the simplest, sturdiest and most efficient made anywhere.

Stewart machines turn easier, cut faster and cleaner and the knives stay sharp longer than any others. When dull they can be resharpened to cut like new in a few minutes.

They compete in all the markets of the world and get the business on sheer merit.

More Stewart machines are sold in every country than of all other makes combined.

Dealers selling Stewart machines are backed by a better product, more extensively advertised than any other.

Every time you offer a Stewart machine to your customers you can do so with the understanding that it must prove more satisfactory than any other for the same money or we will refund every cent paid out for it.

From now to May these machines are in greatest demand.

BISSELL'S

No single feature ever made a successful carpet sweeper—

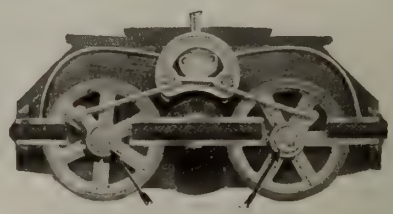
But "CYCO" BALL BEARINGS constitute the *greatest* single feature in carpet sweeper construction.

They insure an *automatic* and *effective self-adjustment* of the brush to all grades of carpets.

They insure easy running, noiselessness and a *positive rotation* of the brush.

Furthermore, they maintain a *constant* and *unvarying* performance of these functions for years, producing greater sweeping power and retaining indefinitely an unimpaired sweeping efficiency.

Thirty-six years' experience in the exclusive manufacture of carpet sweepers has taught us that the fullest measure of satisfaction and practicability is obtained in a sweeper that requires *no attention* in its use beyond the mere emptying of the pans.



"CYCO" BALL BEARINGS

The fact that we have continuously maintained the lead in this and foreign countries for the entire thirty-six years we have been in business is proof enough that the great buying public recognize the genuine merit of the Bissell Sweeper.

Our special Easter Offer with free sweeper, is in force from March 1st to May 15th. Write for copy of this Announcement.

Easy-Driving, Smooth-Running and Almost Noiseless "PENNSYLVANIA" *Quality* Lawn Mowers

HAVE SELF-SHARPENING CRUCIBLE TOOL STEEL BLADES THROUGHOUT

THESE oil-hardened and water-tempered blades are made from the same kind of steel as used in all tools requiring a keen-cutting edge. The lipped-edge stationary blade is so constructed that it gradually wears away, sharpening both itself and the revolving blades in the process. This self-sharpening feature enables a "PENNSYLVANIA" to soon pay for itself.

Another unique feature of "PENNSYLVANIA" mowers is their long wheel base operated by a train of gears on both sides, which insures smooth work over the most uneven lawns.

"PENNSYLVANIAS" are best for every class of work. They'll last longer and do more work with less labor than any other mower on the market.

For *permanent* lawn mower satisfaction, insist upon "PENNSYLVANIA" *Quality*—for 30 years in a class by themselves. Ask your seedsman or hardware dealer.

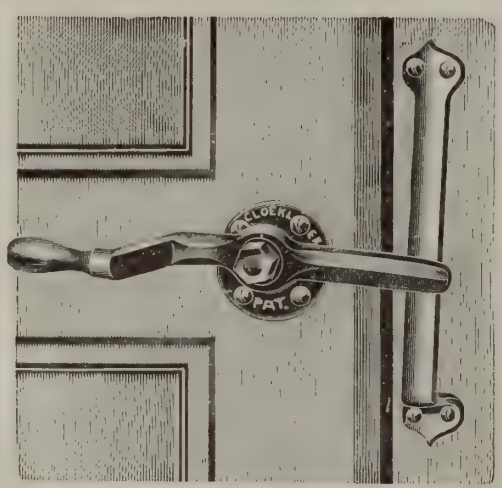
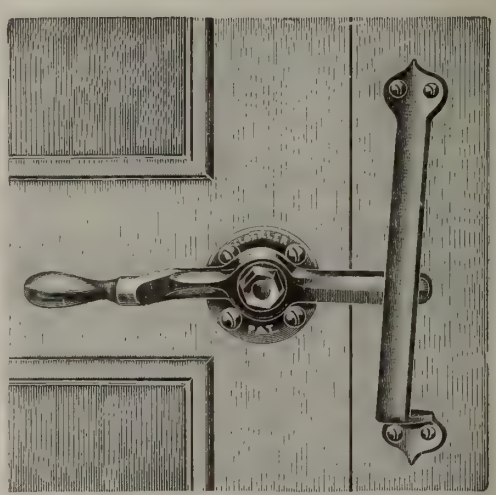
Gloekler's Patent Refrigerator Door Fasteners



Forcing Door Open



Showing Door Forced Shut

THIS fastener has been the standard for Refrigerator Doors and cold storage work ever since it has been on the market, and, especially for heavy work, is without an equal. It is made heavy and substantial with nothing about it to break or wear out, and will "last a lifetime." Simple and easy to operate. In closing door, turn lever inside keeper and press down on handle, which seals the door absolutely tight with little effort. To open door, turn handle around until lever comes outside of keeper and lift on handle, which will force the door open without any effort, no matter how tightly jammed.

We also make a line of Spring Fasteners, Hinges, etc., in tinned, brass and nickel plated. Write for illustrated price list.

BERNARD GLOEKLER & CO. **PITTSBURGH, PA.**

LOWER DOOR CHECK

The "LE PAGE" Patent OIL DOOR CHECK and SPRING

is a marvel of simplicity and has a mechanical action that is perfect.

It is the only door check made without packing in its working parts, which assures absolute freedom from packing friction.

The door on which this device is used cannot slam, as the oil in the spring cup of the check forms a cushion, which keeps the door under perfect control and allows it to close quietly.

The spring tension is applied by means of the ratchet wheel on top; the checking power is controlled by the thumbscrew at the right.

The bearings are long and the spindle, with crank at lower end, is drop-forged from cold rolled steel.

Toronto public schools, Simpson's, Eaton's, etc., use this door check exclusively.

Corrugated Iron Prevented Spread of Terrible Fire

The thousands who watched the terrible fire in Toronto a few days ago, when thousands of dollars' worth of property was destroyed, had a chance to see what corrugated iron would do to prevent the spread of flames.

In "The News" the next day it was reported that the firemen could not reach the flames on account of the iron coverings of the buildings, but as an official put it afterwards: "I tell you if it hadn't been for the iron coverings on those buildings this entire neighborhood would have been destroyed. Some of those buildings were huge furnaces and the last thing to fall was the metal sides."

And that is only one instance of the protection afforded by Corrugated Iron.

How about your buildings? Supposing some building near yours should burn, and the burning pieces fell on your factory, how many chances have you of saving it?

Use corrugated iron for your covering. Let us tell you about ACORN QUALITY CORRUGATED IRON—the iron with the trade mark—the kind that lasts practically forever.

If you intend building, write to us to-day for our prices.

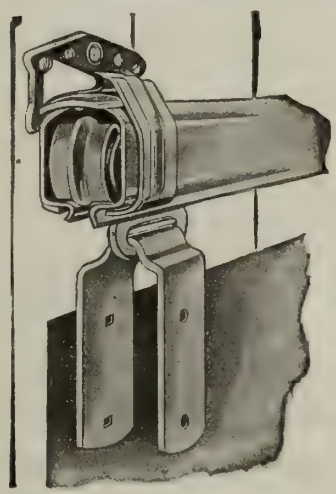
Louden Talks
to Hardware Dealers

Guelph, Ontario — April, 1912

Barn-Door Hangers

EVERY Spring the demand increases for Barn and Hay Tools, Barn-Door Hangers, Hay Carriers and Forks, Cow Stalls and Stanchions, and Feed and Litter Carriers. You Hardware Dealers, being in closest touch with farmers about to build or make over barns and stables, can add many a dollar to your profits by selling Barn and Hay tools. This month we speak particularly about



The track in Louden's Bird Proof Barn-Door Hanger is tubular and entirely encloses the trolleys. It is made from one sheet of steel pressed into shape, leaving only a narrow slit at the bottom for the hanger strap to slide in. Sparrows can never get into this hanger to nest, and it turns rain, snow, and sleet as perfectly as does the barn roof.

Louden's Bird-proof Barn-Door Hangers

These hangers can't be clogged by birds in summer or snow in winter. The tandem rollers can't come off the track. Louden's Bird-Proof Hangers are the only ones on the market having a flexible track which prevents the gathering of trash between track and barn. They will never balk, are always easy to operate, and are so perfectly flexible that crowding stock cannot break them. They work so smoothly and easily that the door can be pushed open by a child.

If you present to farmers these unique and decided advantages, you will have no trouble, but much satisfaction, in selling Louden's Bird-proof Barn-Door Hangers.

Louden Barn Tools
—a profitable line

Turn to profitable account the tendency of dairy and stock farmers to employ devices and tools which save money, time and labor. The Louden Line is widely advertised in the agricultural publications of Canada, from coast to coast. So if you talk Louden Barn and Hay Tools, Stalls and Stanchions, Feed and Litter Carriers, you are assured of interested attention. The chances are that many farmers in your own community are already using the Louden Line in whole or in part.

¶ Louden Barn equipments are the outcome of 45 years conscientious and intelligent endeavor to devise tools calculated to reduce waste on the farm, to economize time and labor, and to conserve soil fertility. The Louden line of Barn Tools is the most perfect, efficient and economical ever devised and is known and used all over the world.

Write for our catalogue, "Everything for the Barn," and discover for yourself how complete and efficient (and profitable) is the Louden Line of Barn Tools. Note the two addresses below.

Personal Chat With You About Ourselves

The Annual Spring Number of Hardware and Metal is always an event in the Canadian hardware trade. Every reader looks forward to this number as the most interesting and instructive of the fifty-two issues published by Canada's only weekly hardware paper.

During the twenty-four years of Hardware and Metal's history, the Annual Spring Number has been growing in size and increasing in interest each year. Every spring, the manager and editors are confronted with the problem of turning out a number which will show an improvement over the fine paper issued the previous year. But it has always been done.

Readers and advertisers scarcely realize the immense amount of work entailed in getting out this spring number. The whole country is annually ransacked by our editorial staff for illustrated descriptions of the most modern hardware stores in Canada. Our staff correspondents from Halifax to Vancouver, work hard to dig up ideas in selling, buying, window displays, and the like, which will help our readers everywhere to develop or improve their own ideas on these subjects.

It takes a lot of time and energy to get this matter into shape for the big spring number, but it is a great satisfaction after the number is off the press, to hear so many favorable comments on our enterprise among the hardware trade.

We have received a great many letters this week from readers, telling us that our most recent special number is the best we have ever issued. The following are some specimen opinions, taken from our mail:—

Metal Shingle & Siding Co., Preston.

The copy of Hardware and Metal's Spring Number came in this morning, and our two-page ad. certainly looks fine. We want to thank you for the good display.

W. F. Earle, Athens.

We thank you for sending us the copy of your Annual Spring Number and must compliment you on the appearance of our space.

Nicholson File Co., Port Hope.

Your Annual Spring Number received. Our ad. on pages 180 and 181 is satisfactory and we think it is a creditable piece of work.

Gutta Percha and Rubber Mfg. Co., Toronto.

The Annual Spring issue, copy of which we have just received, strikes us as being an admirable number, and we must compliment you upon it. We have no suggestions to make for its improvement.

Ontario Lantern and Lamp Co.

Your issue of the 23rd, your Annual Spring Number, is just to hand and we feel that we must compliment you on the general get up of this number, the paper, printing and composition being excellent. On the whole, we would feel justified in saying that this is the best number you have yet published.

Edward Lloyd, Limited, Montreal.

We thank you for the copy of "Annual Spring Number," and are well pleased with the location of our advertisement.

After looking over this number, we must compliment you on the care and trouble which has been taken to make this number everything that could be desired. As an example of tasteful advertising and as an advance on last year's number it is certainly a very creditable piece of work. Last, but not least, is the cover.

Sadler & Haworth, Montreal.

We acknowledge the receipts of your Annual Spring Number. We must heartily congratulate you on the appearance of this Number. There is no question at all, in the writer's opinion, that it is the finest Number you have ever turned out, and he is sure it will be very well thought of.

* * *

ABOUT HARDWARE EXHIBITIONS.

The following letter has been received from F. M. Tobin, first vice-president of the Canadian Hardware Manufacturers' Exhibitors, Limited, with the request that it be published in Hardware and Metal.

Hardware and Metal,

Dear Sirs,—Your letter of March 1 received. If you will permit me to express an opinion regarding the letter mentioned, I would say that the comparisons are somewhat exaggerated.

That there was an unusually large expense for the results obtained at the recent exhibition is not denied, there were extenuating circumstances that should be considered, however.

The future exhibitions conducted by the Canadian Hardware Manufacturers' Exhibitors, Limited, should show more satisfactory results from all points of view, and should have the support of every dealer, jobber and manufacturer in Canada, as well as publications interested in the general welfare of the hardware trade. It is expected that the expense will, as is usual, come upon the manufacturer, but the benefits will be derived by all interested.

Yours very truly,

F. M. TOBIN,

First Vice-president Canadian Hardware Manufacturers' Exhibitors, Limited.

Woodstock, Ont., March 19, 1912.

The letter to which reference is made above, read as follows:—

March 1, 1912.

Gentlemen,—It is estimated that the manufacturers who exhibited at the Guelph convention spent over $30,000 on the exhibition.

Those who made the most elaborate displays spent over a thousand dollars each. And there were about ninety retail hardwaremen on hand to see the goods. Few of them spent more than six or eight hours in the Exhibition Hall altogether.

For dollars you can run a full page advertisement in Hardware and Metal every week for a year. For dollars, you can use half-page space every week or full-page every other week for a year. Smaller spaces are charged in proportion.

And don't forget that Hardware and Metal reaches fifty-two times a year, more than ninety per cent. of the retail hardwaremen all over Canada.

Yours very truly,

HARDWARE AND METAL.

Tenth Annual Gathering of the Association Was the Most Successful Yet — Reports of Officers Showed That an Active Year's Work Had Been Done — Particulars Given of Campaign to Stop Price Cutting.

Vancouver, B.C., March 26.—Great enthusiasm has been injected into the hardwaremen of the lower mainland by the very successful convention held at North Vancouver on March 21st. It was the tenth gathering, and it outpointed previous conventions in every way. The attendance was large, great interest was taken in the discussions, excellent papers were given, and in the evening two hundred attended the banquet at the Palace Hotel. This affair surpassed any other banquet of any organization and went with a roll and swing and goodwill and fellowship—a complete culmination of the success of the day.

H. C. Martin, president for the past year of the B. C. Hardware Dealers' Association, was in the chair at the opening of the convention at 10 in the morning in the Knights of Pythias Hall. Those in attendance were: J. B. Paine, first vice-president, North Vancouver; George Blakely, second vice-president, New Westminster; T. S. Futcher, secretary of the Hardware Dealers' Association, Victoria; T. H. Kirk, L. B. Lusby, C. Bryson and Mr. Sayers, of New Westminster; George McBride, Mr. Hoag and Mr. Robinson, of South Vancouver; J. Johnston, Mr. Goldie, Mr. Paterson and Mr. Forbes, of North Vancouver; while from Vancouver there were W. C. Stearman, Mr. Abercrombie, George Mather, N. Kidd, W. G. Humphrey, Chas. Kennedy, Archie Venn, Mr. Bingham, C. K. Snell, George Moscrop, E. Paterson, J. A. Fortier, Ronald Brown, S. H. Warnock, Grant Gunn, H. H. Welch, W. R. Owen and E. B. Ryan. J. J. Foote, manager of McClary's, and Wm. Riske, vice-president of the B. C. Credit Men's Association, were also in attendance, being on the programme for short addresses.

R. D. Dinning, the secretary, who has done much to further organization work among the retail dealers in co-operation with the heads of the associations, was also in his place.

At the opening of the convention, Mr. Martin referred in appropriate terms to the death of Mrs. McFeely, wife of E. J. McFeely, of the wholesale hardware firm of McLennan & McFeely, which took place very suddenly. Since arrangements had been completed for the convention, and the date was so close at hand, postponement unfortunately could not be made. It was decided to send a letter of condolence to Mr. McFeely, and a wreath of flowers, while Messrs. Stearman and Snell, of Vancouver, and Messrs. Blakeley and Bryson, of New Westminster, were appointed to represent the association at the funeral.

Welcome was extended to Mr. Futcher, of Victoria, who was present as delegate from the dealers on Vancouver Island.

BUSINESS OF THE CONVENTION IN BRIEF.

Assessment of members readjusted. Increase in business has caused advance of fees.

Secretary's report showed that 25 meetings of association had been held during the year.

Election of officers.

Past President Martin gave a report of the conventions in Guelph and Montreal.

Address on "Co-operation" by J. J. Foote.

Talk on credits by W J. Riske, vice-president of the B C. Credit Men's Association.

It was decided to close on Saturday afternoons during the months of June, July and August.

The banquet in the evening was the most successful event of the kind yet held.

Assessment of Members.

One of the first matters of business was the readjustment of the assessment of members of the association. Progress in the West is indicated in no better way than by the increases that were deemed necessary. These assessments are based on the amount of business done, and they were nearly doubled in the aggregate. They grade from $100 each for the wholesale houses, $75, $50, $40, $30, $20, $12.50 and $10 for outside dealers.

President's Address.

As president of the association, Mr. Martin gave his report for the year as follows:—

"Gentlemen,—It affords me the greatest pleasure to submit my report for the past year, during which time I have served as your president to the best of my ability. I believe the past year has been the most successful both in regard to volumne of business and net profits that the members of the association have ever enjoyed, and I believe that the hardware dealers of Vancouver, North Vancouver and New Westminster can largely attribute the net profit end of this successful year to the untiring efforts of the officers of the association and the faithful members. I regret to say that in some few lines price cutting has been reported, but I trust that the result of this convention will be that even these few commodities will be put on a firmer basis, and that your next president will not have to comment along these lines a year hence.

"The monthly meetings have been well attended and the innovation of an informal banquet among the members previous to these gatherings has been pro-

ductive of fostering a splendid feeling of good fellowship among the members.

"All the committees have done splendid work, and your secretary, R. D. Dinning, has been untiring, in fact, your president's position has been a sinecure with such a live wire secretary to do the work.

"I have had correspondence with the hardwaremen of Prince Rupert and Revelstoke regarding forming sister associations, and headed a delegation to Chilliwack in our effort to form an association there.

"As your president, I represented you at the February convention of the Ontario hardware and stove dealers at Guelph, a report of which I will make later.

"While we are glad to take a retrospect and find things have gone well with us, yet it is really to the future that we must bend our attenion. We believe as merchants of British Columbia that our beloved province, upon which Nature has bestowed such bountiful wealth, is entering upon an era of prosperity that will eclipse all the good years that have passed, and it behooves us as an association and as individual hardwaremen to reap the harvest in such a way that all the ears of golden wheat which we are to garner in the hardware field of 1912 will be safely, honestly and profitably harvested. To best accomplish this we must be united, and while it is our duty to try and get all the legitimate busines we can, let us not in our anxiety overstep the mark of honesty and fair dealing toward our brother hardwareman, who, we must all admit, has a right to a share of business so long as he conducts it along the lines prescribed by our association of which he is a member.

"Although it is not for me to advise, I would suggest to the members the necessity of being more conservative than ever with regard to credits. Many amounts, both large and small, I am afraid have been lost by over-anxiety to do business. I would also suggest that we look for, and when found to eliminate, the business that is not profitable. Keep your eyes fixed on each cash counter trade from which our net profits come.

"In closing allow me to thank you for the honor you have done in having me as your president for the past year. I have done my best, and I assure you that as a private member I will give the best support to the incoming officers that I am capable of. I would express my hearty thanks to all those who have so ably assisted me during the past twelve months. May our association continue to grow and prosper and may we as individual members expand under its influences to be better citizens and better hardwaremen, fair to ourselves, honest to our association pledges and charitable to our competitors." (Applause.)

Secretary's Report.

The report of the secretary dealt with many general matters of interest. He said in part: — "Mr. President, and gentlemen,—In submitting my report on the work of the association during the past twelve months, I have pleasure in stating that we have 39 fully paid up members out of possibly some fifty hardware dealers in the cities of Vancouver, North Vancouver and New Westminster, and include in our membership all the large stores of any consequence. There were no resignations from the association, apart from two stores which discontinued business. New members include Johnston & Salsbury, North Vancouver; Brown & Hartley, Vancouver; Fox Pioneer Hardware, South Vancouver, and Shearer Bros, Coquitlam.

"A visit was paid to Chilliwack during the latter part of the year in an endeavor to get the merchants organized, and while so far we have not been successful in getting them to submit their application for membership, we feel sure it will not be long before they realize that it is to their own interest to become one of us.

"During the year, we have held 25 meetings, and a general meeting has been held each month. The attendance at the general meetings have not been as good as it might have been, and it would seem that the average retailer who joins the association does so without thought of contributing to the general fund of information which is so essential to the successful operation of the organization. It is fair to presume that every merchant joining an association expects to receive benefit, but unfortunately few expect to take active part in the work, without which it is an impossibility for an association to be an effective influence for bettering conditions. There is too general a willingness to leave the work to the officers or to a few of the more energetic and capable members. This is wrong. Every member should be an active member in the full sense of the word, every member should actively cooperate with his fellow members in planning and carrying on the work for which the organization was formed. No mem-

President Harry C. Martin, Vancouver, who presided at the first session.

Geo. Blakeley, New Westminster. elected first vice-president.

ber has a right to expect to derive benefits from the association unless he contributes something besides his mere dues towards making it efficient.

"We have taken up several grievances, principally price-cutting. In spite of all that has been said and written and in spite of the obvious farce of it, price cutting on certain articles, particularly nails, sash weights, building paper and powder, has been continued by certain merchants, utterly ignoring the obvious fact that the more goods one sells below cost the greater are the losses.

"The best attended meeting was held at North Vancouver on December 5th, when the holding of an informal banquet before the meeting and inviting manufacturers, wholesalers and travelers to be present had the desired effect and resulted in a bumper attendance."

The New Officers.

Election of officers resulted as follows:—President, J. B. Paine, North Vancouver; first vice-president, George Blakeley, New Westminster; second vice-president, George Moscrop, Vancouver; directors, C. K. Snell, C. Kennedy, and W. R. Owen, Vancouver; J. Johnston, North Vancouver, and C. Bryson, New Westminster.

The Afternoon Session.

In the afternoon, the newly elected president took the chair, with the immediate past president on his right and the first vice on his left.

Mr. Martin gave an account of his recent trip east, when he attended the convention at Guelph as the representative of the B. C. Hardware Dealers' Association. He reviewed some of the more important papers and business of that gathering, mentioned the benefits of fraternizing, and instanced the enthusiasm that these annual meetings aroused. He detailed also his visits to some of the large manufacturers in Eastern Canada and Eastern United States, and said that when he presented his card as president of the B. C. Hardware Dealers' Association he was very gladly received.

"They are certainly alive to the situation back there," Mr. Martin said. "We might think, because we live in the new West, that the people of the east are mossbacks, but no greater mistake could be made. The association hit upon a good thing when they decided to send the president east each year. He gets many fresh ideas which enable him to impart impetus to the work of the organization here."

Address on Co-operation.

J. J. Foote, manager of McClary's, Vancouver, gave an address on co-operation. "Get together and hang on," was his text. This applied not only to association work but to store management, and he suggested that employers should always use clerks to the best advantage. To do this, the clerk should be helped out at times, enthusiasm created in him, in short, the effort should be made to have the clerk a duplicate of the employer. The superior in office should always be on the job, explaining any difficult points of selling, patting a clerk on the shoulder, helping him out with a customer hard to win over, and doing all he can to develop the powers of salesmanship. Enthusiasm is created in this way, and enthusiasm is the greatest asset of any business. Mr. Foote suggested also that when any of the tip-top travelers came into the store, the clerks should be told to take account of his methods of selling. By watching these men, the employes acquired a useful knowledge of the art of salesmanship. When manufacturers were advertising their lines, the goods should be displayed in the stores. The watchful merchant reaps much advantage along this line. The more profitable lines of hardware should be pushed. When travelers came in with goods, and sales were made, they should be asked to give a demonstration before the clerks, so that the article and its uses would be thoroughly understood. Thorough understanding of the uses of an article is necessary to effective salesmanship, and nothing helps towards this like demonstrations. The follow-up system should not be neglected. If a man inquiries for something, and it is not in stock, put his name down, and when it arrives ring him up. All inquiries should be noted and the customer telephoned to later on. It may be that no inquiry is made, but one should get to know customers so that when an article arrives, say fishing tackle, guns, etc., it is known who is interested. They could be acquainted with the fact that the new goods are in, and an invitation could be extended for the customer to call around. (Applause.)

R. D. Dinning, the secretary of the association.

Mr. Foote was thanked for his helpful talk, and was accorded a vote of thanks, which was carried with considerable applause.

Mr. Stearman suggested that the members should be careful to read the article in a recent issue of Hardware and Metal, by a Montreal man, which was along these very lines, when reduction of prices was talked of in certain instances. Considerable time was taken up in the discussion of the price list, local features being the central topic.

A vote of appreciation was extended to the secretary for his efficient services, and the convention, with applause, heartily supported a motion, moved by Mr. Martin, and seconded by Mr. Stearman, that a cheque for $50 be drawn in favor of Mrs. Dinning, as a compliment to her husband.

Talk on Credits.

W. J. Riske, vice-president of the B. C. Credit Men's Association, gave a much appreciated talk on credits. He pointed out that in recent years credit has been put on a scientific basis, and this was necessary since it was a most essential factor in successful trade and was the largest asset that a business man had. Mr. Riske discussed the subject from the standpoint of the merchant, both as regards to the credit received and the credit extended. Credit, he said, was not a favor, but a right to be demanded, and the only concerns that could refuse it were monopolies. In giving credit, certain elements had to be considered, such as honesty and ability to pay, but if the credit man fully justified himself he should be able to judge almost intuitively. Mr. Riske quoted the remark in this connection that "an ounce of intuition was worth a pound of logic when reckoning with human nature and its manifold ramifications."

Mr. Riske's paper was well prepared and when he terminated his thoughtful consideration of this important subject, he was given a vote of thanks, and heartily applauded by the members.

Early Closing Discussed

The vexed question of Saturday afternoon closing during the summer months was discussed at some length. Considerable difference of opinion existed, and there was close division on the motions. Last year, the closing time was originally June, July, August and September, but at the first of September some of

the members declared their intention of discontinuing the half day closing. When the matter came up at the convention, several announced their intention of keeping open on Saturday afternoons, despite what action was taken. The discussion became quite warm at times, the members being divided on the three points: Keeping open altogether; closing on Saturday afternoons from 1 to 7 o'clock during June, July and August; and closing for five months, May, June, July, August and September. The voting was close, the orginal motion to close for three months being caried. The subject will probably come up for discussion at a general meeting.

This concluded the regular business of the association, and the session closed after six o'clock with the usual votes of thanks.

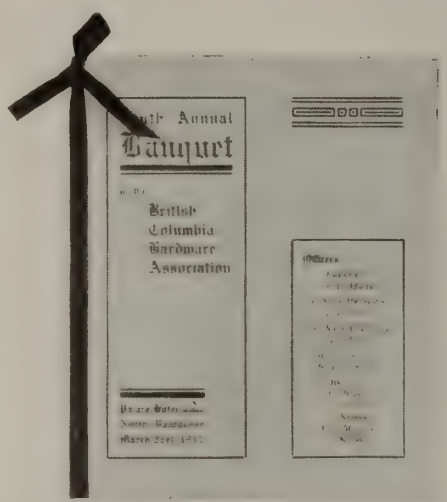
Hardwaremen Around Festive Board

Bright and Breezy Speeches, Coupled With Songs and a Steady Flow of Anecdote Made Closing Feature of Convention Most Enjoyable—Some Good Points Made by the Speakers.

Vancouver, B.C., March 26.—Just about two hundred sat down to the banquet at the Palace Hotel in the evening, which meant that few hardware store men were left in any of the three lower mainland cities. Here, too, arrangements which were in the hands of J. B. Paine, were so carefully laid out that nothing went wrong. It was as large a banquet as had been held in North Vancouver, and mine host Reda had "Jimmy" Morgan over from Vancouver to look after the spread. The name of Jimmy Morgan means a whole lot when mentioned in connection with a banquet, for it means that the affair was altogether tip-top. Jimmy has been in charge of only the very first-class of Vancouver restaurants, and has gone to Victoria to assume control of the Songhee Restaurant, established in connection with the new Westholme Hotel. This hostelry is reckoned on a par with the Empress Hotel, the first in the West.

Well, Jimmy was there and the boys were glad. That they appreciated his layout was only too evident. With the clatter of spoon against the soup plate started the chorusing songs sung at the Ontario convention. Copies of these had been printed by Messrs. McLennan, McFeely & Co. and everyone had one. Harry Martin was first precentor, and he and Jack Paine and Charlie Snell, with Ronald Brown, until he got too hoarse for utterance, kept those around the table putting over the songs until one on the outside would think it was a songfest instead of a feedfest. It meant much this keeping the crowd up to singing pitch, for in a little while the point was carried, that the gathering was not there simply to have something nice to eat but to enjoy themselves otherwise and be a part of a hardware throng. Some of the old timers who had been to banquets since the days when Vancouver people ate in restaurants long since faded out of existence, declared that nothing equalled this affair for cheerfulness, spontaniety and cordial fellowship.

J. A. Roaf, well and favorably known to the trade, officiated as toast-master. He caught Harry Martin and Jack



The neat menu card at the B. C. hardware banquet.

Paine napping for a moment in their H-A-R-D-W-A-R-E campaign, and alertly jumping to his feet started the ball rolling. After the usual preliminary remarks, he had the temerity to boast he was from Hamilton and one irreverent individual broke in with the question, "Where is the mountain?" Nothing daunted, the toast-master proceeded, and drew a comparison between North Vancouver and Hamilton. The as the Ambitious City, and this is the name North Vancouver has adopted. By an odd coincidence, North Vancouver has a mountain, but then the three peaks that pierce the blue north of the inlet are mountains.

After the toast to the King had been duly honored, Charlie Snell sang "Long Live the King," the audience joining in the chorus.

Just at that moment, greetings arrived from R. L. Borden, Premier of Canada, who wired hot haste: "No reciprocity, except between the two Vancouvers."

Mayor MsNeish, responding to the toast to North Vancouver, gave the glad hand to the hardwaremen, and spoke enthusiastically of the prospects of the city on the north shore.

"The Wholesalers' Association" was proposed by H. T. Kirk and done justice to by Hendrie Leggat and R. F. Anderson.

Just as the toast-master got on his feet to propose "The B. C. Hardware Dealers' Association," a telegraph messenger rushed breathlessly in and jostling through the affrighted crowd at last placed a yellow envelope in the hands of the president. The following was read out: "Keep up the good work. You've got a good place, and you can't beat the trade. George V." (Loud applause.)

The B. C. Association.

Mr. Paine, speaking to the toast, referred to the good work done by the president during the past year, and asked the members, clerks and travelers to give him a hand to build up the association. Travelers, he said, should not go around and say, "it's no good," but get out and boost. It might be said they did not say that, but he had been there. He wanted them to change their tune and declare that the association was the only thing that ever happened.

Mr. Martin gave a breezy, lively talk on association work, showing the different branches of the trade what they can do to help things along. He spoke well and to the point.

Profits, the Thing.

Fred W. Welsh, one of the leading officials of the Vancouver Retail Grocers' Association, was the first to respond to the toast of "Sister Associations." Incidentally, he remarked that it was exactly 21 years ago since he started in the grocery business in Vancouver. For many years he had been a believer in organization in trade and great good could be secured if worked in the right and proper sense. It was only in the last few years that the association had become really effective, and he doubted if any would go back to the old pre-association days. He once thought it was clever to cut prices and get the business, but he had learned to realize that the fundamental point was profit, not getting ahead of the other fellow. Association fellowship eliminated mistrust, and when a fellow dealer was better known it was seen that he was quite human. Mr. Welsh told of the work that had been done in try-

ing to organize the retail merchants in the smaller cities of the province. He also mentioned what might be accomplished in the retailer's interest in the way of legislation, such as, for instance, the making of a man and wife jointly liable for household necessities. As it is now, the property is put in the wife's name and the man alone assumes the responsibility of the bill. He referred to the compliment that had been paid the local retail grocers' association, which had been said to be the most aggressive in the West. If a man was content to spend his life in any business, he contended that it was worth his best efforts. Mr. Welsh made a few suggestions to the clerks, and closed with the hope that organization would so be extended that there would be an association in every city and town in the province, with every branch of trade represented, for interests were common and the work was for the general good. He mentioned that Mr. Martin would very probably be the next president of the B. C. Retail Merchants' Association.

Mr. Futcher, of Victoria, also responded. He told of the work in the capital city, and said that he would try and get a convention in Victoria, say six months hence, to be held alternately with one on the mainland. This suggestion was received with applause.

J. J. Foote and H. H. Welch did duty for the manufacturers. Mr. Foote said he had been to many conventions but never saw a better, not only in point of attendance but in the interest taken in discussions and in enthusiasm.

"Our Friends, the Travelers," had able upholders in A. T. Chambers, W. C. Birdsall and Mr. Wallace.

Many songs were sung during the evening by Ronald Brown, C. K. Snell, Mr. Henderson, and C. Clarke, of Clarke Bros. & Venn.

None of the speakers or songsters lacked for appreciation. Applause was generously given and every remark was intently listened to.

After the usual votes of thanks, and the singing of "God Save the King," the crowd caught a special boat for Vancouver, thoroughly satisfied with what had been accomplished in the day's work.

Hardwaremen Convene at North Bay

Members of the Trade in the North Part of the Province Assemble for First Convention—Meetings Held on Thursday and Friday—The Store of G. W. McDonald, North Bay.

North Bay, Ont., April 4.—The first convention of the hardwaremen of Northern Ontario will open here to-day. A session will be held this evening at eight o'clock. The real work of the convention will be done at the sessions to be held to-morrow.

It is expected that the convention here will be largely attended. Hardwaremen are expected from New Liskeard, Cobalt, Haileybury, Cochrane, Porcupine, Sudbury, Sault Ste. Marie, Huntsville, Barrie, Collingwood and many other points. President M. S. Madole, of the Ontario Association, will be on hand. He left Toronto this morning on his way north. He will probably be accompanied by Secretary Wrigley.

North Bay is a lively town, and it boasts some good hardwaremen. The latest addition to the ranks of local dealers is G. W. McDonald, who has taken over the business formerly conducted by his father and uncle under the firm name of McDonald & Hay. The change was made at the first of the year, previous to which the new proprietor had a store in Elk Lake, with a branch store in Gowganda. The firm of McDonald & Hay was one of the oldest and best known in the north of Ontario.

The accompanying illustration shows the store of Mr. McDonald. It is well arranged, light and roomy, and is undoubtedly one of the most creditable establishments in this part of the province.

The store of G. W. McDonald, North Bay—Mr. McDonald took over the bus iness of the well-known firm of McDonald & Hay at the first of the year.

THE B. C. ASSOCIATION.

A great deal of good has been done by the British Columbia Hardware Association during the years that it has been in existence. The members have been brought closer together and, in that way, many evils have been partially, if not wholly, eradicated. Price-cutting still exists, but the association keeps up a persistent warfare and manages to suppress this tendency pretty much wherever it crops out. The members have forgotten the jealousies which bitter commercial competition engenders; they have become broader men in every sense of the word.

It is gratifying to note that the future holds forth the promise of a still more active work. The scope of the association is being widened, and its influence will grow as time goes on. It is safe to assume that a gradual improvement of conditions in all parts of the province will follow the establishment of local associations in places where they do not now exist. Steps are being taken to effect this, and the coming year will see a great amount of good work done.

It is a boast of western men that they do things up right in the land of "wheat, wealth and wonders." Certainly, in association matters, they do not leave any room for criticism; for the B. C. Hardware Association is a live body, conducted on broad and useful lines.

CLOSED FOR STOCKTAKING.

Standing out clearly against the lowered blinds of a recently opened hardware store, is to be seen a sign bearing this simple phrase: "Closed for stocktaking." He who runs may read, but he who runs for a box of tacks or for hammer, saw, or screw-driver, may not enter. The store is closed. Inside work is being done, but in that the public is not interested—the fact of importance from the outside is that the inside is inaccessible.

Some may hold that this storekeeper is acting wisely in thus closing his establishment while he takes an inventory of what he has on hand. Perhaps there are cases where this course of procedure might be expedient; but in the instance which has just come to light it seems that a great mistake as been made. The store, now temporarily closed, has only been open to the public for a few months. Further down the street there is another store carrying similar lines. The natural thing, therefore, is for the person who comes to make a purchase at the establishment where stocktaking is going on to move further along and buy what he wants at the neighboring place of business. A regular customer may be lost in this way, as well as a fair amount of transient business.

Newspapers regard it of the greatest importance not to miss an issue. At the time of the San Francisco fire and earthquake—when the whole city was in chaos, and when newspaper buildings were wrecked among others—three of the leading papers united and published an issue. That perhaps did as much as any other one thing to restore the confidence of the citizens. It also raised the papers in the esteem of all.

There is undoubtedly great value in continuous service as given by newspapers, and there is value in continuous service as given by stores. People expecting to find an establishment open are annoyed at finding the doors closed. A notice that stocktaking is going on inside does not remove the annoyance. All are inclined to feel, and with some cause, that the stocktaking should be carried along at a time when it would not mean an inconvenience to the patrons.

FIXING THE SELLING PRICE.

No subject has created more general interest and comment in the trade for a long time past than the question of the fixing of the selling price. The articles published in this paper have stirred up dealers, wholesalers and travelers alike, and the topic is being discussed on all hands. After the publication of the first article some felt that the method therein advocated had not been made sufficiently clear. The second article, however, cleared up all doubts on that score.

From the tone of a number of the communications received, it is evident that all do not agree that the cost of doing business and the profit should be figured on the selling price instead of on the cost price of the goods. There are still a great many dealers, apparently, who find their selling price by adding the percentage for cost or doing business to the cost price, and then reckon their percentage of profit on the cost price plus cost of doing business. Thus, if an article cost $1, and they want to add 20 per cent. for cost of doing business and 20 per cent profit, they fix the selling price at $1.44. This method is entirely erroneous. The price $1.44 would give a profit of 11 per cent. only.

Here is the proper method in a nutshell. Selling price equals 100 per cent. It is made up of 20 per cent. cost of doing business; 20 per cent. profit, and the cost price. Obviously, therefore, the cost price must be 60 per cent. of the selling price. As the cost price in the case quoted was $1, the selling price should be $1.66, not $1.44, as reckoned the other way. The dealer who had reckoned on the cost price would be cheating himself of 22 cents. Is it clear?

This is a matter of extreme importance. From the tone of some of the communications received, it is quite apparent that many dealers are figuring on the wrong basis. If they fix the profit percentage sufficiently high they may save themselves from loss, but how many dealers do this? In many cases, they are figuring in a way that is bound to deceive them into thinking that they are getting a much larger profit than they are actually securing; which is a dangerous situation, indeed.

ECONOMY THAT DOES NOT SAVE.

With the first of April a somewhat cheaper freight rate was struck, and to take advantage of this a number of dealers have marked their orders "early April de-

livery." By this they save a few cents in freight, but lose a few days in time, for at this season of the year there is always a good deal of uncertainty as to the date upon which goods sent from a shipping room will reach their destination. Roads are in bad shape, and drays are sticking hourly. Cars are short, and this, added to the extra time taken in loading, necessitates a great delay. Freight which usually travels in a few hours is now taking anywhere from three days to a week.

Where then does the retailer save by securing the cheaper freight rate, which starts April 1—about the same time that the breaking up of the roads resulted in irregular transportation? The reduction in the rate is about 5c a cwt. If, therefore, the retailer's order is one of 1,000 pounds, he saves 50 cents; but if his shipment is delayed two or three days only he is quite likely to lose a sale, and one sale lost will more than offset the advantage of that 50 cents economy. One sale lost, moreover, means a loss of prestige, which means a final loss that no man can trace.

Undoubtedly, the retailer should take advantage of every opportunity to save, but saving is not in money only. If goods are wanted immediately it would be better economy for the dealer to order them for early March shipment—pay his extra 5 cents a cwt. freight, but be sure of having the goods when the demand for them arises.

THE FREIGHT CONGESTION.

The freight blockade is creating a situation in commercial circles which cannot be regarded as otherwise than extremely serious. Dealers report that consignments of goods which were shipped as early as the first of last month have not yet reached them. In some cases, they are now hard pushed for supplies, which should have reached them weeks ago. If warm weather develops soon, the situation will be a serious one. Many merchants will not be in a position to handle the demands of their customers.

Some dealers are complaining that drafts are reaching them for goods which they have not yet received—the surest kind of proof of the slowness of freight deliveries. It should be borne in mind that the wholesaler cannot in any way be blamed for the delays, and that he has no way of ascertaining when the goods he has shipped reach their destination.

A SIXTY PER CENT. ADVANCE.

A manufacturer who has made a study of the subject, declares that the building done in Canada last year was 60 per cent. in advance of that ever done before. Indications, he declares, are that another increase will be noted this year, though following a banner season it is doubtful if any such honor mark as 60 per cent. will be achieved.

Building like this means a great deal to a country—especially when operations are rendered necessary by a natural growth, as has been the case here. Such extensive operations mean a large and growing trade for the retailers. It means that the country is prosperous, and that those who are not building will be desirous of improving the exteriors and the interiors of their older houses or offices. It means that the dealer who properly presents the proper goods will have little difficulty in disposing of them.

For the manufacturer, of course, the present state of affairs could hardly be more satisfactory. If he can produce the goods—in both the grammatical and the slang sense—he will reap the profits.

The present is one of those times when it is of the utmost importance for the retailer and the manufacturer "to get together." One wants to secure any manufactured produce which will help him increase his earnings. The other can only increase his earnings by securing the co-operation of the retailer. Both can achieve their aim through the assistance of Hardware and Metal. In a time of presperity, like the present, this paper points the way to greater prosperity.

POINTED EDITORIALS.

"Swat the price-cutter," is the slogan of B. C. hardwaremen.

St. John, New Brunswick, has decided for civic government by commission. The east again is in the van of reform.

* * *

Horseless carriages, wireless telegraphy, fireless cookers, etc., were all great inventions. But this tipless hotel idea is the best yet.

* * *

How do you figure your selling price? The articles which are running in Hardware and Metal on this subject are well worth your attention.

* * *

Paint windows are becoming quite common in Montreal hardware stores. To these must be given part of the credit for the increased demand.

* * *

The straw hat is not yet in season, but people are beginning to resurrect last year's "straws" for inspection and repair. It is time, therefore, to push the sale of hat enamel.

* * *

Men who have tried declare that profit is made by accepting the pieces of a broken show window as part payment on the required new glass. This seems one of the instances where it pays to take panes.

* * *

The Spring Special Number has won encomiums everywhere. Dozens of letters have been received, voicing the opinion that the number was undoubtedly the best of its kind ever published. The appreciation of the trade thus expressed is indeed gratifying.

* * *

Harry Martin, of Vaucouver, just back from a tour of the east, asserts that there is nothing backward or effete about the eastern provinces. He is still convinced, however, that to find the best climate, the best people, the best opportunities, the best everything, in fact, one has to travel beyond the western fringe of the Rockies.

* * *

Evidently the worth of hardwaremen is coming to be appreciated. At the present time, four, yielding to the request of citizens, are facing the polls. In Montreal, C. H. Godfrey, of the Montreal Steel Works, is running as citizens' candidate for the seat on the Board of Control rendered vacant by the resignation of F. L. Wanklyn. In St. John, which has decided in favor of government by commission, W. S. Fisher, of Emerson & Fisher, is running for mayor, and Miles E. Agar and C. B. Allan, two other hardwaremen, are seeking election as commissioners. All are put forward by the Citizens' Committee.

More on Question of Fixing Selling Price

Articles in Hardware and Metal Have Stirred up Interest, and Many Letters and Opinions Have Been Received—The Method of one Dealer Who Contends That Value of an Article Depends Upon What it is Worth to Purchaser—Big Profits are Necessary on Some Articles to Offset Losses on Others.

Articles upon fixing the selling price of goods, which have appeared of late in Hardware and Metal, have stirred up interest in all parts of the country. Letters have come in from a number of districts, both approving and disapproving of the method as explained. A representative of the MacLean Publishing Company, who was in Three Rivers, Quebec, last week, found two travelers and a general storekeeper arguing this question. To the credit of the travelers be it said they stood together. To their discredit be it said they both contended that the profit should be figured upon the buying cost. But the general storekeeper held his ground. He could not explain very clearly why he had come to believe that profit should be based upon the selling price, but he stated that he had seen the advisability of this when he read about the system in his trade paper.

One Man's Conclusion.

All over the country these articles upon the selling price and how to arrive at it, have aroused a great deal of interest. One man figures that he has been selling an article, upon which he always thought he was securing a good profit, at no profit at all. The subject has aroused a great amount of serious comment. It has caused retailers and manufacturers to think carefully about this subject, and as a result, many will benefit.

But throughout this discussion of profits, there had been considerable mention of 10 per cent. It must not be thought that the aim is to fix this as a profit for all lines. For many articles 10 per cent. would be quite inadequate, since there are other lines which must be sold at a considerably smaller margin.

Consider Each Case Separately.

One dealer comes forward with an explanation which brings home clearly the need of each retailer figuring what profit he can secure upon each article.

This man, though he has a large store, does practically all the pricing himself. And this he does not do according to any rule, except the rule of common sense. He thinks not so much what a certain thing is worth to him—what it cost him --but that it is worth to the man who must eventually be the buyer. The dealer tries to put himself in the position of this man.

Doing this, he says he travels through some such train of thought as the following before fixing the price on any article: How much would a man be willing to give for that if he could not secure it anywhere else for less? How much could he secure it for elsewhere? Upon the answer to these two questions the selling price is determined.

A Case in Point.

"I do not content myself with any 10 per cent. profit on many lines," declares this merchant. "I buy a lot of knives, for instance. The majority of them I sell at 50 cents, and thereby gain a fair profit. But in looking over the knives, I find that there are some with fine handles—pearl handles. These I could sell for 50 cents and gain a fair profit; but on the other hand, I know they cannot be secured elsewhere for any such sum. I know I will have little difficulty in getting $1.50 for them. And I also know that if I sell them for 50 cents, many people will some to consider this the proper price for such a knife. Thus, subsequent sales at a higher figure would be rendered more difficult, and sales of such knives will have to be made at a higher figure, for this lot which I secured was probably a fag end which the manufacturers allowed to go at a lower price than usual, in order to clear out his stock.

"Ten per cent.," laughed this man. "I often get very much more than that. Then there are times when I have to sell below cost, on account of goods depreciating, or in order to meet competition. It is only through seizing the opportunities to gain a good profit that I am able to secure satisfactory returns from my business operations."

This dealer has attained success, and the reason will not be hard to find. He has looked at every article, not only from his own standpoint, but also from that of the purchaser.

What is Value.

Value is a peculiar thing. There are a number of economic definitions of this, but when all is said and done this dealer has got about as correct an idea of value as could be obtained. Value is what a person is willing to give for an article, in the light of what he can secure a similar article for elsewhere.

There are many goods sold in hardware stores which have a fixed price. They are standard—the same in every store, and the same in price. With them the dealer does not have to worry. He makes a fair profit on each sale, and may rest content. There are other articles, however, which are alike in many ways, yet which have different appearances, penknives, for instance. One bought at 35 cents, wholesale, may have as good looking a handle, and as good a blade as one bought at a dollar. These things frequently occur. The purchaser buying that knife at $1.25 would be getting good value for his money. The question, therefore, becomes one as to the merchant's moral right to charge $1.25 for a knife which cost him 35 cents, and which he originally intended to sell for 50 cents.

The Moral Aspect.

The dealer who brought this phase of the question to mind, claims that any retailer is perefctly justified in making such a profit, and gives as his reason the occasions when goods have to be sold for a profit much smaller than was expected. A balance must be kept. These low profits must be underwritten; and the only way in which this may be done appears to be through a careful valuation of each article marketed—the retailer securing for this not the sum he paid for it, plus a certain profit, but the amount the article is worth to the purchaser. If the article is defective he sells it for what it is worth to the purchaser. When it is good, why should he not determine his selling price in the same way?

The Method Explained.

The first article on this subject appeared in the March 16 issue of Hardware and Metal. Immediately on its appearance, a number of letters were received, commenting on certain phases of the problem or asking for further elucidation. It may be stated that this first article was sent out by the Burroughes Adding Machine Co., and was read by F. C. Lariviere at the Guelph convention, being reproduced in Hardware and Metal as read.

In the meantime, another and more complete article on the same subject was being prepared by a member of the editorial staff of Hardware and Metal. This was published in the Spring Special Number, and has doubtless been read by this time by all interested in the subject. The method of figuring was, we believe, clearly explained.

Some of the communications received brought up interesting points, however, and are reproduced.

Hardware and Metal.—Your article "How to Arrive at the Selling Price," on page 33 of your March 16 issue, strikes me as not being very clear. In other words, from the information given in this article, it is likely that the merchant would have considerable trouble in arriving at a selling price for an article costing any other figure than $1. The article in question proves that when the selling expense of 22 per cent. is based on the sales price, and the profit of 10 per cent. is also based on the selling price, that $1.47 is the correct price to ask to obtain the 10 per cent. profit, but it does not show clearly how the price of $1.47 was arrived at, and in order that the merchant could use this to advantagee, I would suggest the following:

Let the selling price be taken as 100 per cent.

By substracting the expense from the sales price, there remains an amount equal to the cost, plus the net profit. Therefore, by subtracting 22 per cent. from the sales price of 100 per cent. there remains 78 per cent., which is the sum of the net cost plus the net profit. If figuring a profit of 10 per cent. on the sales price, and the 78 per cent. includes both cost and profit, then by deducting the 10 per cent. from 78 per cent. we have the cost only, which is 68 per cent. of the total 100 per cent. or selling price. If, as in the case referred to. the cost is $1, then $1 must be 68 per cent. of the sales price, and 1 per cent. of the sales price is 1-68 of $1, which is 1-47 100 cents (approximately) and 100 per cent., or the sales price, will be 100 times 1-47 100 cents. which is $1.47.

What is 10 Per Cent. Profit?

In further reference to above, it has always been a mystery to me why business houses should base their percentage of profit as taken from their sales. In the case above, the net profit, after expenses have been deducted, is practically 15 cents, yet. according to the rule in vogue, this profit is not figured as a percentage against the $1, but as a certain percentage of $1.47. It strikes me that if I invest a dollar, and make a profit which returns me from this investment $1.15, my profit is 15 per cent., and I base that theory on the banking practice. If a bank pays you 5 per cent. interest per annum on $1, it pays 5 cents interest; therefore, the 5 cents represents 5 per cent. of $1, not a certain per cent. of $1.05, and, if you make, draw or are paid 10 per cent. profit on an investment of $1, you are paid 10 cents profit, or a total of $1.10, and not $1.15 or $1.20 or anything other than $1.10.

Basing the percentage of profit on the sales price, as in the case above, if one's expenses (which very properly should be figured against the sales price) are 30 per cent., then in order to make 10 per cent. profit based on sales price, an article costing $1 would have to sell for $1.66 2-3, because the 30 per cent. expense would amount to 50 cents, leaving $1.16 2-3, or a net profit of 16 2-3 cents, which is 10 per cent. of the sales price.

So there we have it. In the case of A. with 22 per cent. expenses, he makes 15 cents net on his dollar, and B, with 30 per cent. expense, makes 16 2-3 cents on his dollar, and C puts his money into stocks and has no expense, and he makes 10 cents net on his $1, yet all invested the same amount and, according to the rule, make the same percentage of profit.

Really, it is a joke.

Yours truly,
D. L. GOODLOE.

More Information Wanted.

Otterville. March 22, 1912.

In your Hardware and Metal of March 16, 1912, I noticed a very interesting and also puzzling problem, to which the answer was given.

Would the writer of this question please inform us on the pages of the Hardware and Metal, whether the profit is considered on the cost price or selling price of an article? Your journal stated that the wholesale cost price is $1, that cost of running expenses is 22 per cent. or 22 cents. This article actually costs $1.22. Then 10 per cent. profit should be considered on $1.22, which is cost price. If this is the case, then the selling price must be $1.22+ 10-100 of $1.22, or $1.34 1-5.

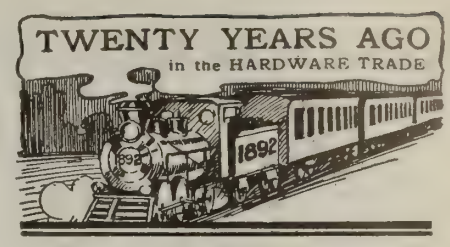
However, if you consider that the gain is on the selling price, then the rules of arithmetic must have been changed lately. Also, if you wish anyone to work out a problem in arithmetic, please don't state the problem ambiguously, as you failed to state whether the 22 per cent. for running expenses was to be allowed on the cost price or selling price.

Hoping you will give a fuller explanation of this problem, I remain,

Yours truly,
"A READER."

This correspondent is referred to the second article, which appeared in the Special Number, and to the communication above which explains the method to be followed in finding the selling price when cost of doing business and profit are reckoned on the selling price.

Other communications have been received, which will be dealt with in subsequent issues.



The following items are taken from the issue of April 2, 1892:

"At a meeting of the Toronto Board of Trade the following motion was adopted:

"That in the opinion of this board it is desirable that there should be an insolvency act with a discharge clause properly guarded, applicable to the whole Dominion for the equitable distribution of the assets of bankrupt estates.

"Among those present at the meeting were: E. Gurney, W. W. Copp, P. Howland, R. Jenkins, F. B. Polson, and other men connected with the hardware trade."

* * *

"The McClary Manufacturing Co. are making preparations for the manufacture of galvanized iron ware. The premises for this department are completed and the plant will soon be in."

* * *

"Prices for copper are lower and the market is in extremely peculiar and uncertain shape. Anxiety has had considerable weight to crowd prices for Lake Superior ingot down to 11⅞ to 12 cents."

Editor's Note.—Copper is selling today around 16 cents. This advance has occurred largely in the last six months, however. At the same time that the advance began, the uncertainty which has existed right along was replaced by a feeling of pretty general confidence.

* * *

"D. Brown, hardware merchant, Portage la Prairie, has sold his stock—Chas. Hamilton, Blyth, has sold out to Henry A. Scarlett."

ERROR IN ADVERTISEMENT.

In the advertisement of the Burrow, Stewart & Milne Co., on page 26 of the Spring Special Number, a compositor's error crept in, which very materially altered the meaning. In the sentence, which should have read "tighten your grasp upon the stove business—handle the Jewel line," the word "lighten" was used by mistake.

Complete Course of Sheet Metal Work

By L. W. KOSER---No. 8

On plate 15, Problem 12, is a T-joint between two pipes of the same diameter.

There are two patterns that we wish to develop in this case.

First, the pattern for the piece A. to mitre into the piece B.; and second, the size of the opening to cut out of B. to accommodate A.

This piece is shown by H., Fig. 5.

The easiest way to get the opening H. is to develop the pattern for the piece A., then place it against B. and mark a line around it. Then cut out to this line, or allow about an inch inside for cutting and flanging into A.

Where strength is needed these flanges can be riveted.

While this method is the easiest to understand at the start, it is by no means as quick, nor does it give as neat an effect as developing in the flat.

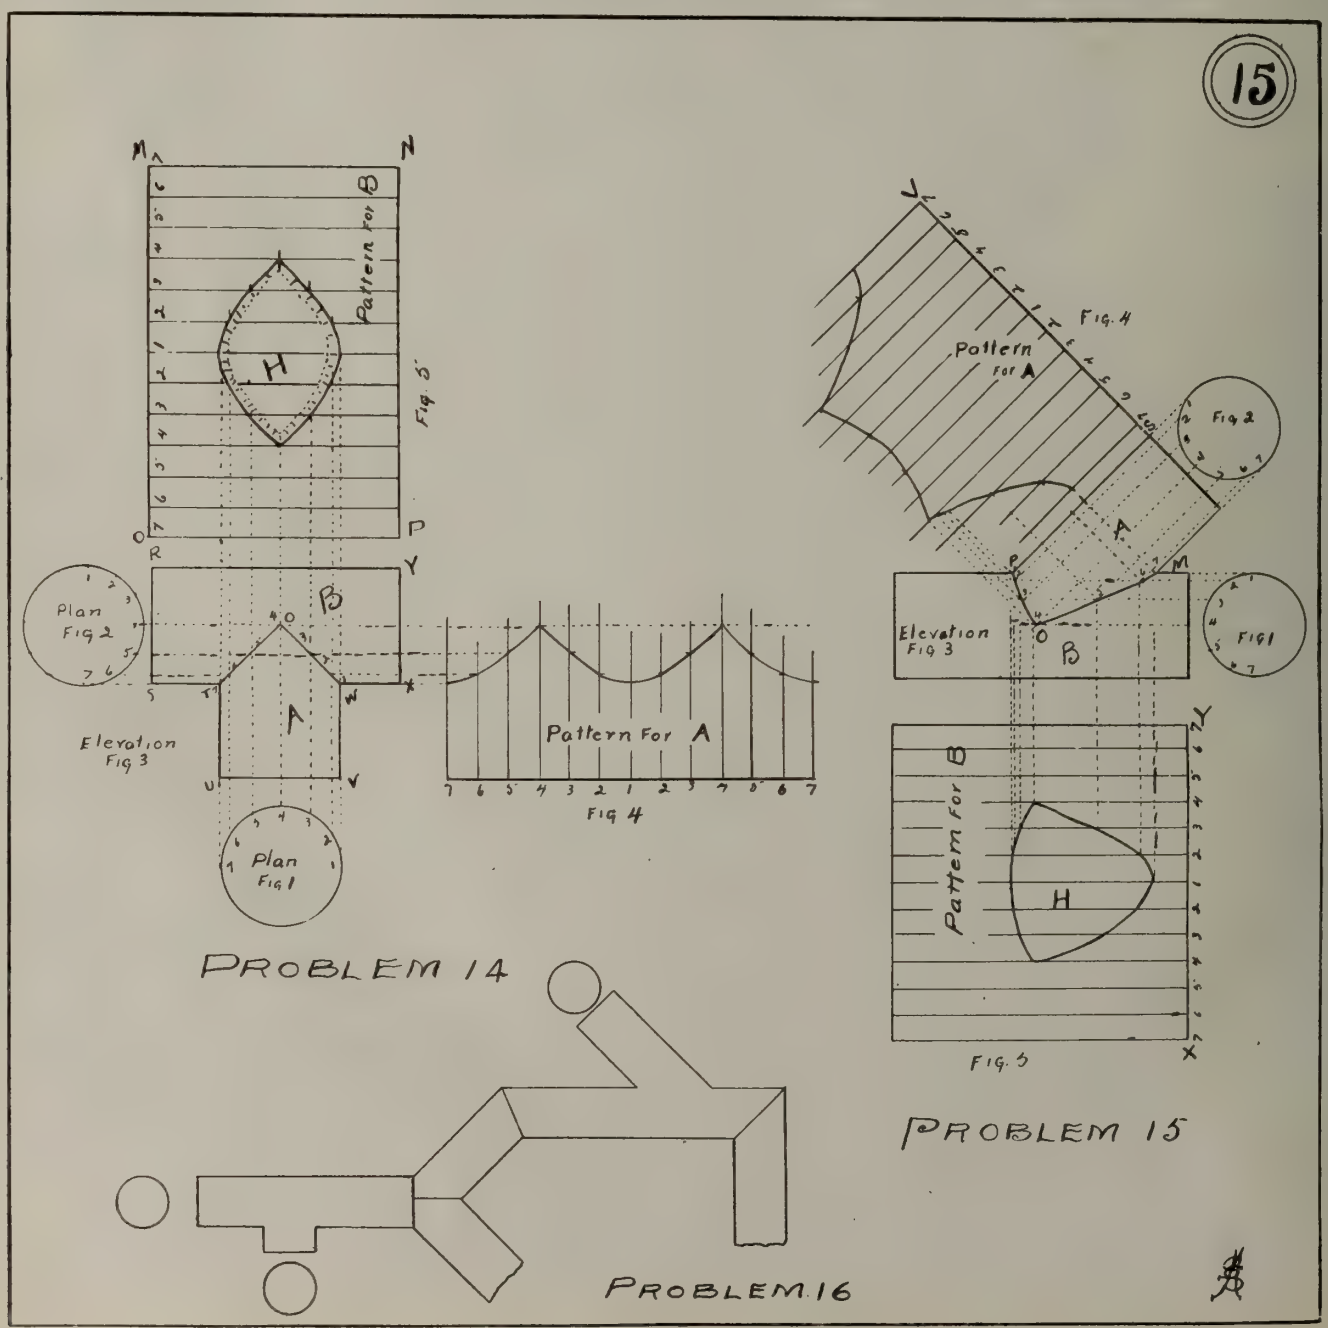
Before developing the pattern for the piece A., we must develop the mitre line for A. mitreing into B., as shown by the lines O. T. and O. W.

Draw the plan, Fig. 1, then the plan, Fig. 2, in such a position that when vertical lines are projected up from Fig. 1 and horizontal lines from Fig. 2 the lines so projecting will form a T-joint, as shown by the outline, R. S. T. U. V. W. X. Y., Fig. 3.

Now step off Fig. 1 into equal spaces, having No. 1 on the right, and No. 7 on the left. This gives No. 4 exactly in the centre.

Now step off Fig. 2 into the same number of spaces, having No. 1 on the top and No. 7 on the bottom.

Now project a light or dotted line up from No. 4, Fig. 1, any distance so it will pass a line carried horizontally from No. 4, Fig. 2. Carry lines up from Nos. 5, 6 and 7, Fig. 1, and carry horizontal lines from Nos. 5, 6 and 7, Fig. 2, until they intersect. Also carry lines from 3,



2 and 1, Fig. 1, until they intersect lines from 5, 6 and 7, Fig. 2.

A line traced through the points of intersection gives the mitre lines O. T. and O. W.

Now lay out the stretchout, Fig. 4, at right angles to V. W., and draw the usual measurement lines through same.

Now lay the T-square parallel to the stretchout line, bring it against No. 4 on the mitre line and cut No. 4 measurement line; then against No. 3 and cut measurement lines Nos. 3 and 5, then against No. 3 and cut lines No. 2 and No. 6, then against No. 1 and cut No. 1 and No. 7. A line traced through these points gives the pattern.

To get the opening H., first lay out the stretchout of Fig. 2 directly above the elevation, as shown by the outline M. N. O. P., Fig. 5, starting with No. 1 in the centre and spacing both ways, draw the measurement line No. 3, also from No. 6 and No. 7 and cut lines No. 2 and No. 1 respectively.

A line traced through these points gives the opening H.

Problem No. 15 is an oblique connection between two pipes of the same diameter.

Draw Fig. 1 and Fig. 2 and from these develop the outline of the elevation, Fig. 3.

We first want to get the mitre line O. P. and O. M.

Divide Fig. 11 into equal spaces and project horizontal lines from each.

Divide Fig. 2 into the same number of spaces and carry lines parallel to the line P. S., from the points, Nos. 1, 2, 3 and 4, until they meet lines carried from Nos. 1, 2, 3 and 4, Fig. 1. Then carry lines from 5, 6 and 7, Fig. 2, until they meet lines from No. '' and L, Fig. 1.

A line traced through these points gives the mitre line.

Lay out the stretchout, S. V., at right angles to the line P. S., and draw the measurement lines parallel to P. S.

Then place the T-sqr. so it will run parallel to the stretchout line. Bring it against point 4 on the mitre line and cut No. 4 measurement line.

Then bring it against each of the other points on the mitre line and cut the measurement line having the corresponding number and the pattern is developed.

To get the opening H. for the pipe B., lay out the stretchout of Fig. 1 directly below Fig. 3 and draw the usual measurement lines.

Place the T-square parallel to the stretchout line, Y. X. Bring it against the points, 1, 2, 3, and 4 on the mitre line and cut the measurement lines, 1, 2, 3 and 4, then bring it against 5, 6, and 7 on the mitre line and cut the measurement lines, 3, 2 and 1, respectively.

Problem 16 gives a general exercise on the pipe work done so far.

Develop the different mitre lines, patterns, and openings for this problem.

By "Mack."

One of the features which attracted my attention in the Special Spring Annual of Hardware and Metal was the reproductions from photographs of the hardware stores recently established in our western provinces.

In a more than ordinary degree was my interest aroused when the descriptive reading matter surrounding the cut of a completely equipped hardware store told us of the enterprise shown by the proprietors.

They were both recruits from Old Ontario, and when I say that the senior member of the firm to which I refer was a graduate from our store a number of years ago, my interest is explained.

And reflecting upon the general fact that nearly all these new ventures into business out west, as we say here at home are conducted by young or comparatively young men, usually I believe below forty years of age.

Now, I have never heard Dr. Wm. Osler's celebrated theory applied to our business of hardware, but I shall assume, nevertheless, that it is applicable, for I have the evidence of an elderly gentleman, who engaged in an attempt to master the details of general hardware, and confessed himself beaten by the weight of his years.

There may be instances of success coming to a few who entered perhaps, it may be said at the eleventh hour, but they are the exceptions, it would seem.

Making decisions becomes repugnant when we arrive at Prof. Osler's proscribed limits, and we would rather bear those ills that are known, according to my view, than make changes of any kind. Now, it is impossible to take the initiative in any activity when the mind is held in such conservative mold, therefore, I take it that many new promotions never develop beyond the embryonic stage. For it is apparently just as easy to think of doing things as it ever was in early life, but energy to execute our plans is deficient. I know there are those who affirm their excellence of general ability is higher than prior to forty, but if we examine the circumstances we are led to the conclusion that they happen to be successful.

A further knowledge of early conditions also shows that the foundation was laid and the superstructure of the business reared years before the time of life indicated.

Hardware Letter Box

Alca Vacuum Cleaners.

Henry Gilles, St. Jacobs, Ont.—''Who are the manufacturers of the Alca Vacuum Cleaner?''

Can any reader supply this information?

Slush Scrapers.

John Lett, Success, Sask.—''What firms manufacture slush scrapers?''

Canada Axe and Harvest Tool Co., St. Paul, Que.; James and Reid, Perth, Ont.

Togo Cook Stoves.

Cochrane Hdw., Ltd.—''Where is the Togo Cook Stove manufactured?''

Moffatt Stove Co., Weston, Ont.

Oiled Building Paper.

Metal Shingle and Siding Co., Preston, Ont.—''Kindly give us names of firms manufacturing oiled building paper.''

Alex. McArthur & Co., Montreal, Que.; Paterson Mfg. Co., Toronto; Northumberland Paper & Power Co., Campbellford, Ont.

Green Bone Cutter.

Edward Drier, Preston, Ont.—''Can you give me name of manufacturer of a green bone cutter?''

Binette Brothers, Lachine.—''Could you supply us with the names of Roofing Slate manufacturers?''

Genuine Bangor Slate Co., Wall Bldg., Easton, Pa.; Matthews Consolidated Slate Co., Boston, Mass.; E. J. Johnson and Co., New York.

Progressive Hardware Retailing

Western Firms Are Running a Big Paint Campaign—An Early Effort to Sell Straw Hat Enamel—Disposing of Sporting Goods.

A GOOD DISPLAY.

Montreal, April 1.—At the Motor Boat Exhibition, held in the Arena last week, the James Walker Hardware Company had an exhibit of sporting goods which should bring sales. At the back of the booth canoes were shown—some racers, and some of the becushioned kind so popular on Saturday afternoons. Near the front of the exhibit fishing tackle was shown—rods, flies, hooks—all the equipment needed by anglers. A feature of the display was, of course, the motor boat accessories, in which this firm does a large business.

SPORTING GOODS AT HALF PRICE.

Montreal, April 2.—"Sporting goods at half price." This is the sigh which stands out prominently in one of Philbin & Co.'s windows. The baseball gloves, balls, and bats that are being offered at this attractive reduction are also shown in the window, and the quality of these is such as to draw a big custom. Mr. Philbin is taking this way of clearing out some old stock.

The other window of this store is being utilized to bring home to passers-by the need of painting. The display is an exceedingly good one, and it, like the sporting window, is already bringing results.

FEATURING HAT ENAMEL.

Fredericton, N.B.—Although it may seem early to place the article upon the market, there is an old adage that "the early bird catches the worm," and R. Chestnut & Sons, styling themselves the "Hardware People," are already to the fore with "21 fashionable shades of straw hat enamel." They are taking advantage of the fact that "Easter is near at hand and early buyers of this article can easily fix up their last year's straw hat so it will look like new and have it match his or her spring suit too." It is argued that even if no exceptionally great quantity of this article is sold before Easter there is every reason to believe with the matter being brought to the attention of their customers, that the firm has a wide range of colorings in this line, a steady demand would be experienced before long.

An enterprising hardware house is that of W. F. Diblee & Son, of Woodstock, N.B., who are now engaged in the promotion and launching of a "Fifteen Days' Sale of Household Hardware." They are featuring a wide range of household lines, particularly washing machines, wringers, tin and granite ware, heating stoves, silver-plated ware, lamps and other articles, such as are used for every-day purposes about the home. To induce custom to their store, Diblee & Son are offering a 20 per cent. discount from former prices and advising their customers "If they are wanting bargains in any of the lines featured, now is the time to buy."

3-column advertisement used by Chestnut & Sons to feature hat enamel.

HARDWAREMEN SELECTED.

St. John, N.B., April 3.—On the slate of the Citizens' Committee for the new commission government, by which the affairs of St. John are shortly to be conducted, appear the names of three hardwaremen. For mayor, and for two of the four seats as controllers, men connected with this business have been selected. A wholesale stationer, and a progressive trades and labor man are the suggestions of the Citizens' Committee for the other two posts.

Some time ago the need of a better style of government was felt in St. John, and then the Citizens' Committee started an agitation for government by commission. Finally, this met the enthusiastic approval of the citizens as a whole, and at present all that remains is to select the men who will form the new administration.

W. Shives Fisher, of the firm of Emerson & Fisher, is the selection of the citizens' committee for the Mayor's chair. Mr. Fisher is now in the West, establishing a chain of branches; but he has stated his willingness to stand, and will return to St. John in time to participate in the campaign.

Besides his interest in the wholesale and retail hardware business, Mr. Fisher is a director of the Enterprise Foundry of Sackville.

Miles E. Agar, and C. B. Allan are the two hardwaremen running for seats as Commissioners at the behest of the Citizens' Committee.

Mr. Agar is a native of St. John, having entered the hardware business with the firm of Lewis & Allingham before the great fire. Later, he was with Hayward & Co., and still later, traveled for a Montreal Hardware firm in the lower provinces. But for some years now Mr. Agar has been in business in St. John, having succeeded to the business carried on by Alexander Yates & Son. He is president of the Hardware Manufacturers and Dealers' Association, a former president of the Canadian Club, and a member of the School Board.

C. B. Allan is about to complete his twenty-fifth year as a successful dealer in stoves and sheet metal. Nor does this comprise all his experience. For ten years he was in the iron foundry business, having worked as superintendent in Allan Brothers' shops.

H. B. Schofield, of the Schofield Paper Company, and W. W. Allingham, a former president of the Trades and Labor Council, are the other candidates for the post of Commissioner, endorsed by the Citizens' Committee.

As a number of nominations are expected, both for Mayor and Commissioners, it has been decided to hold a primary election on April 9. At this, the mayorality candidates will be reduced to two and the commissioners to eight. Then, on April 23rd, the final election will take place.

Current News of Hardware Trade

Making Alterations.

Toronto.—J. W. Peacock, Queen St., West, has been making an addition and alterations to his store.

Bonds on Market.

Brandram-Henderson are putting six per cent. bonds upon the market. As the outpt and the earning of this old company have been growing rapidly, the subscription is sure to be brisk.

By-law Carried.

Port Colborne, Ont.—The by-law submitted to the voters to grant a fixed assessment of $50,000 on the Canadian Union Furnace Company was carried almost unanimously.

Improving His Store.

St. Thomas.—A. E. Campbell, the Ross Street hardware merchant, has just completed the remodelling of the interior of his store, and now has one of the most up-to-date in that line in the city. The partition which divided the store in the past has been removed, and makes a marked improvement.

Oil Furnace Installed.

St. John, N.B., April 3.—A valuable addition to their foundry has been made by the firm of T. McAvity & Sons in that they have installed an oil furnace, the first of its kind in Canada. Formerly, much work had to be sent to the States to be finished because of the coal furnace in use, but now flue welding, flanging, etc., which require a high and even temperature, can be done in this city by McAvity's foundry.

Rogers Annual Meeting.

Charlottetown.—The annual meeting of the Rogers Hardware Company took place here. Since the change took place on November 1, the business has very largely increased, so much so that more floor space was acquired to meet the ever increasing demands. The following officers were re-elected:

George J. Rogers, president.

Aeneas A. McDonald. vice-president.

The Moulden Trophy.

Winnipeg, Man.—The Moulden Curling Trophy donated some years ago by H. F. Moulden to the Winnipeg Wholesale Hardware Curling League, has been won this season by Marshall Wells Co. The inter-series has been a very interesting one and the winners were given a hard run for the honors by Wood, Vallance, Ltd., Rink. The latter won second place and thereby won the gold lockets presented to the same league by D. Philip, Winnipeg. The James Robertson Co. were winners of this trophy twice, and the Marshall Wells Co. have now won the trophy for the second time and it will become the permanent property of the rink winning three times in succession. The competing rinks this year are as follows:—Marshall Wells Co., Wood, Vallance, Ltd., J. H. Ashdown Hardware Co., James Robertson Co., Miller-Morse Co., and the Merrick-Anderson Co.

Business Changes.

Edmonton. — The firm of Werner & Jenkinson, harware dealers, have dissolved partnershp, J. A. Werner is continuing the business.

Steinback, Man.—Barkman & Gossen, hardware dealers, have been succeeded by the Barkman-Penner Co.

Stornaway, Sask.—The hardware firm of Wilson & Hendry have been succeeded by G. A. J. Hendry.

Clearwater, Man.—J. Morrison, hardware dealer, is adding a line of implements.

Halbrite, Sask.—O. H. Helleckson, dealer in hardware, has sold out.

Prince Albert, Sask.—A hardware business has been started here by Fred Read.

Cupar, Sask.—Roberts Bros. have bought the hardware stock of Baker & Taylor.

Elbow, Sask.—J. J. Fallis, hardware and implement dealer, has been succeeded by the J. J. Fallis Hardware and Implement Co.

Kamloops, B.C.—Wilcox & Hall have taken over the business of W. Hargreaves.

Staff Changes.

Vidette, Sask.—Richard Fryer has left Storey's hardware store, and gone to Rouleau, where he has accepted a position.

Prescott, Ont.—H. Turner, of the McClary Manufacturing Co., has been transferred to the northwest territory. His old territory, from Belleville to Cornwall, will be covered by Mr. McKenzie, of St. John, N. B., who was taken over the ground by Mr. Turner last week. Mr. Turner has a son and heir just two weeks old.

Brandon, Man.—After serving as manager of the hardware store of Johnson & Co. for 18 years, J. E. McComb is severing his connection with that firm. He will go to Vancouver and, after a six-month rest, will probably engage in business. He will be succeeded by B. Saunders. of Brockville, Ont.

Deaths and Accidents.

Charlottetown, March 26.—This afternoon Ernest Teed, aged 32, and unmarried, head shipper for the Rogers Hardware Company. fell from the third storey of the warehouse to the first floor through the elevator shaft. He was taken to the hospital with a fractured skull, and internal injuries, dying two hours later. He had been in poor health, and it is thought that he took a weak spell and fell.

St. Catharines, Ont.—Samuel Little, an employe at the McKinnon Dash & Hardware factory, died this morning, atfer a week's illness, from pneumonia, at 38 Ottawa Street, in his 24th year.

Montreal.—Mr. Hemminway, of Smith Hemminway, New York, spent several days in the city this week, calling upon a number of hardware dealers.

Mr. Wiggs, of the Mechanics' Supply Company, Quebec, dropped in at the Montreal office of Hardware and Metal last Friday.

JAPAN DEVELOPING.

During 1910 Japan exported 24,747 tons of zinc, valued at $383,485, and imported 11,581 tons. It is believed that a new industry will be built up in Japan as a result of this new process.

BRITISH MANUFACTURER IN CANADA.

Montreal.—R. W. Evered, of Evered & Co., brass founders, of Birmingham, is in Canada now, having come over on the Empress of Britain. It is his intention to spend three or four months in Canada, visiting all the principal cities and town between Halifax and Vancouver. The idea is more to see what the Canadian people want, than to take orders.

Mr. Evered, though a young man, has seen much of the world. He has traveled through India, South Africa, and has just returned from China. In these countries his mission was much the same as it is here—to get a clear conception of the people's needs so that his firm may meet this need.

Though only in Canada a few days, Mr. Evered states that he has been greatly pleased by the Imperialistic spirit which he has seen evidenced on every hand. Canadians, he now knows, are only too glad to deal with English concerns if these can offer the kind of goods which they need.

Weekly Market Report --- Metals

ADVANCE IN COPPER.

The feature of the metal market has been a rather steep advance in copper.

Other metals, particuarly spelter, are very scarce. There is no spelter in sight this side of May.

The freight congestion is causing considerable trouble, as shipments in all metals are late.

MONTREAL.

Montreal, April 4.—Owing to the English coal strike and the exceedingly poor carrying facilities offered at present by the Canadian railways, the metal men are experiencing much trouble. The advance in price they take as a matter of course, but the freight delay is a constant worry. One house reports that a car of spelter which reached Chicago on March 8 has not been moved from there since. At another office it is stated that a car loaded with plates, which was shipped from Pittsburg on March 6, has not been heard of since.

"How can we help being short of supplies?" said one metal man. "We naturally did not think that it was going to take six weeks to get spelter from the States here. We ordered in good time, yet the delays have been so great that stocks have got alarmingly low. Manufacturers are hard put to it to get enough of the metal to enable them continuing their operations.

Mills Starting Again.

Now there seems good reason to believe that conditions resulting from the English strike will not become more serious. One Montreal agency has heard from its head office that the galvanized plate mills are to be started again on the eighth of this month. A coal supply has been arranged for. Usually the mills are closed for a week at Easter, but owing to the protracted inactivity there will no no such vacation this year. Thus a week's output will be gained.

The probability of a late opening of navigation is another disquieting feature at the present time. The report is current here that the Royal Line has already decided that the sailing of April 17th, which usually docks at Montreal, will this year unload at Halifax. This, of course, is but a straw which shows how the wind blows. It appears, indeed, that river navigation will be about two weeks later than usual.

Copper Advances and Will Advance.

Copper is the only metal to advance greatly, though tin on the primary market has climbed remarkably in consideration of the strike. Antimony is scarce, and may rise, but the change will hardly come immediately.

Tin—All week there has been a steady advance on this market. A few declines were noted at various periods, but the general trend of the market was upwards. Locally, prices have not been advanced, but as still higher figures are looked for in England, and as the supply here has been affected, there is a strong likelihood that a rise will come.

Copper—An advance of 50 cents a cwt. is noted here, and the handlers state that the ingot metal should really move at a higher figure. Probably the small advance was determined upon because the handlers did not like to raise the prices too rapidly. It would seem that another one-quarter cent a pound may be expected at least.

Copper in the Future.

The ultimate future of this market is a little uncertain. Undoubtedly there has been a great demand for coppr of late. That this demand will fall off there is no reason to believe. On the other hand, production is likey to be increased, and when this has been in force a little time there may be a natural reaction.

Antimony—This metal is scarce. Those manufacturers who need it are experiencing some difficulty in getting their supply. As there is no immediate prospect of larger stocks, an advance does not seem unlikely.

Spelter—This metal is scarce, principaly because of the shipping troubles. A good deal of the metal is rolling now, and has been for some time. When this arrives, as some of it must shortly now, the present stringency will be relieved.

Iron Stocks Low, Too.

Lead.—Still the demand for this metal is in excess of the supply. There have been no further advances, but as this metal, too, is being affected by the freight troubles—of which all the handlers are complaining—there seems some probability that another increase may come.

Iron—Stocks low The metal is on the way, but it will likely be bought as soon as it arrives

---

TORONTO.

Toronto, April 4.—The metal markets continue active. The demand, in fact, is big all around, and it is believed that the buying movement will be the largest this year that it has ever been. This is strikingly evidenced in the case of copper, where the demand has reached remarkable proportions. The feature of the week has been the steady upward movement in this metal, the local price having been advanced to 16 1-2 cents.

The strike in the old country is being closely watched, but so far the market has not suffered to any extent as a result of the disturbing events in the English mining districts. The first direct effects—if there are to be any—will be felt when navigation opens.

Tin is Steady.

Tin—There have been no developments in tin. Fractional fluctuations on the London market have not disturbed the local price. Quotations here vary from 46 to 47 cents. There is a large demand.

No Change in Lead.

Lead—There is still an active tone to the lead market, demand being heavy. While the market seems to incline to higher prices, local quotations have not changed this week. There is every probability that the price will continue high and it certainly would not surprise metal men if further advances were made shortly.

Copper Advances.

Copper.—A further advance of ½ cent has been made in the price of copper, the local quotation thus being 16½ cents. The situation is such that further advances would not create any surprise. The demand is extremely heavy, not only here but in all parts of the country. It seems quite evident that the consumption of copper will show great advances in the future.

Stocks are said to be light and this has been partly instrumental in forcing up the price.

Shortage in Spelter.

Spelter.—There has been improvement in the spelter situation. There is no spelter in sight, in fact, this side of May. Absolutely no spot spelter is offering and it is almost impossible, therefore, to fill orders. Prices in consequence, are practically normal.

Another Shortage.

Plates and Sheets.—There is a real danger of an acute shortage developing in these lines. Stocks are very light here, and with the strike still holding in the Old Country, the chances for obtaining new supplies do not appear particularly bright.

Pig Iron Firm.

A firm tone is noted in pig iron. The advances of from 25 to 50 cents per ton made last week have been closely maintained. There is a large demand.

Weekly Market Report --- Hardware

HARDWARE PRICE CHANGES.

Some prices changes have been made during the week but they are not of sufficient size to disturb trade in the lines affected.

There is a steady tone to the hardware market which no amount of bad weather can check. Large shipments are now being made.

MONTREAL.

Montreal, April 4.—In the city, the snow which fell as an April Fool joke on Monday has put a little damper on the hardware trade. This, however, will be short lived; and the activity here, as in the surrounding district, will shortly resume its spring briskness. The orders, it must be understood, have not ceased to pour into the jobbing houses, but a little lull was noticed early in the week, and there is no hesitancy in giving the April snow fall as the cause of this.

Now the strike in England seems likely to have a harmful influence upon this market. Sheet metal stocks are exceedingly low. Fresh supplies were expected, but shipments having been interfered with, these have not arrived as yet.

Building Hardware Wanted.

No further advance has yet been made in the sheet metals, but one or two advances of minor interest have been noted in other lines. Generally it is for spring goods that the great demand is being felt, though the call for builders' hardware and plumbing supplies is perhaps as large.

Spring Goods.—In addition to spades, rakes, hoes, lawn mowers, and other goods needed in the gardens which will shortly be put under cutivation now, there is a big demand for washing machines, vacuum cleaners, wringers, and such articles needed especially during the house-cleaning season. A big demand is being felt for woodenware too, step ladders, ironing boards and similar goods moving rapidly.

Kitchen Utensils Moving.

Tinware too is moving well, not only the sap pails being wanted, but also the goods for kitchen use. Graniteware and enamelware too are being sought, while there is a good call for the more modern aluminum ware.

Builders' Hardware.—Here there is a great rush. Greater activity even than was experienced last year is expected, and hardwaremen all over the country are preparing to meet this. All kinds of articles are selling, from nails to fancy door knobs.

It is here that the strike has worked its greatest harm. As has been said sheet metal stocks have fallen off, so that jobbers are now experiencing some difficulty in filling the orders. An advance in the present price is expected as the result of this condition.

Some Small Advances.

Heavy Hardware.—In this class some price changes are noticed. Pressed spikes, which have been selling at $2.70 a cwt., have advanced to $2.85, though the reason is not apparent on the surface. The rise in the cost of raw material is likely the explanation, however.

Manilla rope, which was advanced 25c. a cwt. by the manufacturers a week or so ago, is now being quoted at the advanced figure by the jobbers. The advance has not had any tendency to decrease orders.

Sporting Goods.—Here business is brisk. The retail demand for baseball goods has already started. Those owning canoes or motor boats are now thinking of getting these ready for the opening of river navigation. New motor accessories are being bought. Paddles are in demand. Naturally, therefore, orders for this class of goods are coming to the makers. Spring is young yet, but the sale of sporting goods is already well under way.

TORONTO.

Toronto, April 4.—Not even the snowstorm which came along so unexpectedly on the first day of the month, nor the freight difficulties, can check the busy tone which has developed on the hardware market. Business is good, exceptionally so, and the jobbers are too busy to pay much heed to the minor difficulties which have arisen.

Of course, the storm hurt trade this week to some extent. Orders fell off for a few days and shipments were delayed. Business has worked back at time of writing, however, to the busy stage it had reached previous to the atmospheric change.

The freight difficulties are still causing considerable trouble. Shipments are very slow and a few dealers seem inclined to blame the delay on the wholesaler rather than the railroads; which in manifestly unfair. The congestion is also delaying the arrival of new supplies.

Seasonable Goods.—The call for spring goods is now heavy. Retailers realize that the spring demand, which is reported to have started in some sections, will begin briskly at once now, and they are losing no time about stocking up in preparation.

Household Goods.—There is a particularly brisk call for goods which come under this head. The spring house-cleaning always creates a need for new household articles and purchases are heavy around that time. Moving time is also near at hand and this entails a big demand for goods of a varied description.

Builders' Hardware.—If there is any line which promises to outstrip all previous records this year in point of sales, it is builders' hardware. There can be no doubt that building operations will be largely in excess of last year. All sections of the country are showing evidences of this and already the demand for hardware has commenced to manifest itself.

Heavy Hardware.—The demand is good. Price quotations are:—Discounts on carriage bolts, 3-8 and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7 1-8.

Sporting Goods.—A lively demand has developed for sporting goods. Baseball supplies are selling well and lacrosse sticks are also being shipped. Trap shooters' supplies bulk pretty largely in the demand at the present moment. Guns, canoes, paddles, tennis goods, golf sticks, all lines are moving in more or less large bulk.

STILL TALKING MERGER.

Montreal, April 2.—Again the talk of a hardware merger has started. The Americans, who are said to be behind the movement, are in the city, evidenly discussing their plans with the heads of the local jobbing houses. It is said that some of the houses have given options upon their business until the first of May, but confirmation of this is lacking. Those closely in touch with the negotiations express themselves as doubtful of anything definite growing out of the present negotiations.

EEH—NIS—KIM COUNCIL.

Plans have been perfected for a big council meeting of the Eeh—Nis—Kim. It will be held in an Indian camp on the banks of the Niagara River during the months of July and August. Complete camping facilities and various forms of entertainment will be offered to visiting members.

Stoves, Furnaces and Accessories

Meeting Mail Order House Competition

The Local Dealer Must Step as Lively a Pace as the Catalogue House—He Must Not "Let Up" at any Season—Stoves Must be Featured Strongly.

Where retail efficiency is found, mail order buying does not flourish. In places where the stove dealers are up to the mark, people do not send to the cities for stoves.

One of the essential features of efficiency in stove salesmanship is giving due publicity. The mail order house sells stoves by advertising; and as the local dealer has a greater chance to advertise effectively, he can, if he uses this power, discount the catalogue house influence entirely.

Advertising is only a part of publicity. Many other things come under the same head; proper display in the store, window displays, good service, are all phases of publicity. The dealer who sees that he is keeping his stoves to the front in these several ways has no reason to fear that there will ever be an epidemic of mail-orderitis in that neighborhood.

The local dealer offers the customer a better bargain than the mail order house. He may ask a larger price, but it is seldom that the local price is higher than that of the catalogue house when express and cartage charges are added. It should be borne in mind also that the sale of a stove ends with the catalogue house when the article is shipped. If the stove does not give satisfaction or requires immediate repairs, that is the business of the purchaser; the house is through with the transaction. The owner experiences difficulty and delay in getting repairs, and, if the stove does not come up to expectations what can he do about it?

On the other hand, if the stove had been purchased from the local merchant, no difficulty would have been experienced in getting repairs and, if satisfaction were not given, there is the dealer to appeal to.

Undoubtedly, the local dealer offers the customer more for his money.

The writer's idea of an efficient stove man is one who could impress that fact on the public; who could demonstrate it and prove it. To do this, he would have to carry a good assortment in stock, so that any order could be filled without delay. It is one of the dealer's strongest arguments that he can supply goods at once whereas the catalogue purchase may not arrive for a couple of weeks.

In the second place, he would have to keep his stock in good shape. The attractive cuts in the catalogues catch the eye. The dealer must have his stoves looking fully as desirable as the resplendent articles depicted in the mail order publications. A dusty stove in a dingy shop suffers by comparison with the sketches which the catalogue artists make. When the dealer has room in his store to demonstrate his goods, he has a great advantage for, after all, the real thing when properly presented, can be much more attractive than any picture.

The next consideration is that the public must be kept posted on the fact that the hardware store has the proper goods to offer. Every dealer has heard this statement time and time again: "Why, I didn't know you carried this." Many people do not realize that the local dealer has just as fine an assortment of stoves as the list shown in the catalogue. In fact, not a few people take it for granted that the dealer does NOT carry a complete line. A prophet has no honor in his own country and the same law of human nature which discounts the prophet, causes quite a few people to take it for granted that local stores will not offer the same variety that the big city houses have.

It is quite clearly "up to" the dealer to remove this unpatriotic pessimism. He can only do so by demonstrating that he has just as good a stock, for all practical purposes as can be found anywhere. To demonstrate this fact, it will be necessary for him to advertise, to display his goods effectively and to give a top-notch service.

Must Keep at It.

And now for the main point. Where the local stove dealer chiefly lacks is that he doesn't keep at it. From December 1 to September 1 of the next year, he does not give much attention to his stove stock. He is inclined to regard stoves as a one-season line. On the other hand, the mail order house is always at work. It keeps pounding away season after season, week in and week out. Its very persistence accounts for a good percentage of the sales that it makes.

To offset this, the local dealer must never neglect his stove department; not even during the dull winter months when sales are small. He must see to it that his customers do not forget the fact that his store is the best place to go when a stove is needed. If he "lets up," he voluntarily deserts the field for the time being and gives the mail order house, which never lets up, a full and uninterrupted opportunity to undermine the dealer's influence in his own community.

In other words, stoves must be made an all-year-around article. At the present time a brisk spring campaign should be inaugurated. There is a splendid market for stoves in spring and the dealer should not neglect the opportunity thus presented.

To sum it all up, if the local dealer follows the pace set by the catalogue houses, if he does things on the same basis as they do, he will soon diminish their sales almost to the vanishing point.

Catalogues and Booklets

Ideal Barn Plans.

The Metal Shingle and Siding Co., Preston, have issued a handsome catalogue on "Ideal Barn Plans," which contains a great amount of valuable information relative to the laying out and construction of barns. Plans are shown for barns of all sizes and descriptions, together with expert advice on all points relating to equipment, protection, ventilation, roofing and siding.

It is printed in large sheet size on brownish graye paper and is elaborately illustrated. The cover is embossed and contains a handsome colored illustration.

Grindstones and Specialties.

The Richards-Wilcox Manufacturing Co., of Aurora, Ill., are issuing a neat booklet illustrating a line of mounted grindstones, barn-door hangers, and other hardware specialties for the farm trade. Among the lines shown are steel frame grindstones, wood frame grindstones, ball-bearing grindstone fixtures, barn-door hangers, wagon jacks, adjustable ratchet wrenches, folding third seats, rope buckles, wire fence stretchers, tackle block and wire stretchers, and folding sleds. The booklet is printed in colors and neatly illustrated.

Weekly Market Report---Stoves

STOVE SUMMARY.

There is an active tone to the stove market. Everything seems to point, in fact, to a record year.

The range, gas range and furnare industries are quite busy at the present time.

A shortage is developing in plates and sheets as a result of the strike in the Old Country.

MONTREAL.

Montreal, April 4.—Always there is a fly in the ointment—said fly now being the difficutly which is experienced with deliveries. Retailers are having to wait for their goods, and manufacturers are being somewhat harassed by daily queries as to why goods ordered several days ago have not yet arrived.

The difficulty, it seems, is not altogether due to the car shortage, or to the somewhat inadequate cartage facilities. It is the bad condition of the roads which is causing the trouble. Carts leave a warehouse and get stuck in one of the pitch holes which make the side streets so hazardous. An extra team has to be sent to extricate that load. Thus a delay is caused — a delay which becomes greater in loading. Always at this season there is some such trouble with the transportation companies. It would seem that the dealers would do well to remember this from year to year, and not leave their orders until such time that they must be shipped at this rushed season.

Beating Last Year's Record.

Generally trade is good, the demand in all lines being heavy. The manufacturers report that the business done in March was in excess of that done in February, which month showed a much greater turnover than January. The operations, to date, moreover, are in excess of those for the first three months of last year—which is saying something when the large increase then made is remembered. It is keeping all the concerns busy to beat their record of last year, but they are working hard to accomplish this, and evidently are getting the right kind of support from the retailers.

Spring Goods.—Here there is great activity. Enamelware especially is on the move. All the stores are selling this in good quantities. Some are seizing this opportunity to make special sales of this line. Milk cans and railway cans are still being ordered, while the call for sugaring supplies has not quite died out yet. Refrigerators are another class of goods which are in demand now. The cold weather has deterred the retail call for these, but they know this will come and are preparing.

Ranges in Demand.

Ranges, Heaters and Furnaces. — Ranges are more active now than they have been for some time. Many dealers are replenishing their stock. They face a good spring demand, and are anxious to be ready to catch the first sale. Heaters are but little wanted. A few dealers have need for these at this time of the year, but their number is not great. Furnaces are needed by the contractors, however. There is no time in the year now when this line is quite inactive. True it is quieter now than in fall, but at this very time many houses are being equipped with heating apparatus.

Gas Stoves.—Here there is activity on every side—activity for the dealer and activity for the manufacturer. Those who are taking up house keeping in May are thinking of getting their stoves now. It is about time. One Montreal retailer has advertised, "Don't wait until late in April to order your stove. Ask for it now and be sure that it will be installed and connected when you need it." There is wisdom in such advice, and the people are evidently realizing this.

Kitchen Furnishings.—Woodenware is being extensively sold. Everything that is needed at the house-cleaning season indeed is on the move.

TORONTO.

Toronto, April 4.—The stove situation does not present any features of unusual interest at the present moment unless the difficully being experienced in getting shipments through is counted. The manufacturers are having a lot of trouble that way. Luckily, however, few orders of an urgent nature are being received, so that the delays are not causing as much worry as they would undoubtedly cause at any other season of year. However, in some cases, the dealers are inclined to be impatient at the slowness of deliveries.

Spring Goods.—The demand for sugaring goods has not yet reached an end although orders are now pretty small for the most part, and are of a sorting nature entirely. Dairy supplies are selling in smaller bulk but the demand is still felt.

Ranges.—There is a much bigger demand than usual at this time of year for ranges. In fact, the manufacturers report that up to date, they have established a fairly subsantial increase over the first three months of last year when trade was generally conceded to be heavier than ever before. If the range trade can be accepted as any criterion, all records will be broken in the stove trade this year.

Gas Ranges.—The demand has become very heavy. Many dealers neglected to place their orders on the travellers' first call and they are now losing no time about placing their requirements. Shipments have also started and will continue heavy all month. The unfavorable weather will keep back moving operations to some extent but it does not seem to have had any effect on the demand for gas stoves.

Furnaces.—Trade has been revived with great expedition. Already the contractors are hard at work with their new buildings, and quite a little work of furnace installation has been begun. Furnace men are busy canvassing for the new trade and some have already placed large orders. Reports from furnace dealers are very optimistic. They are anticipating the greatest year in the history of the industry. "I am going to instal more furnaces than ever this year," says one man. "My only worry is whether I will be able to get the goods and the help."

Plates and Sheets.—The strike is causing some worry in this department. Stocks have become very light and as there is a brisk demand, there is every possibility that an acute shortage will develop before long. Local supply houses are husbanding their resources and making every effort to secure new supplies.

FIRE IN PAINT WORKS.

Ottawa, Ont.—Fire in the Ottawa Paint Works, 687 Wellington Street, recently did damage to the extent of possibly $8,000, though the exact amount cannot be ascertained till the stock is gone over. The principal loss will be to the paint ingredients destroyed by water. The damage to the building proper will not exceed five or six hundred dollars, and the company will not be handicapped in its work. There will be no delay as a result of the fire. The loss is fully covered by insurance.

The origin is supposed to have been from spontaneous combustion in the clothing of the employes which was hung in the card room at the southeast corner of the upstairs flat. Mr. W. F. McPherson, of the C.P.R., was the first to give the alarm. About 8 o'clock his attention was called by smelling burning paint. When he looked, smoke was coming out around the roof, though he could see no fire.

Weekly Western Market Report

No Changes in Prices From Last Quotations—Opening of Navigation Will Bring Reductions—Collections Unsatisfactory, it is Reported—Business Prospects are Bright.

Winnipeg, April 1.—No changes of importance in prices in Western hardware may be lookeo for until the opening of navigation, when reduced freight rates on the lake-rail route as compared with the all rail route will as usual modify prices on heavy hardware.

Other conditions that may have an effect on hardware prices are the long continuance of the coal strike in the anthracite regions or sympathetic strikes in conjunction with the same. These are, however, somewhat remote contingencies.

At present business is good, prospects for a roaring trade throughout the spring and summer were never better. Immigration and capital are pouring into the West and building and construction work are in full swing.

Of course much depends upon the weather and weather conditions are at present first-class. Farm work has already commenced in Alberta and should be general in Saskatchewan and Manitoba next week.

There is, however, a dark side to the picture and that is that collections for March have been most unsatisfactory, probably due to the congestion of the wheat trade. It is estimated that there are yet 60,000,000 bushels of wheat to market in Saskatchewan. When this grain is turned into cash collections will no doubt improve.

Formaline is very scarce and as the demand for it is urgent at this time of the year a sharp advance in price is not improbable.

Winnipeg Hardware Quotations.

Ax Handles—Oval and octagon. s.g. hickory, $3.50; No. 1, $2.40; 2, $1.95; p.g. oak, $2.90.

Augur Bits—"Irwin" bits, 47½; other lines 70 and 10 per cent.

Bolts—Carriage, ⅜ and smaller, 65; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3; small lots, 2½; stove bolts, 77½.

Bar Iron—Bar iron, $2.50; Swedish iron, $4.25; sleigh shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $8.50; Jessop, $15.

Blocks—Steel, 50 per cent.; wood, 60 per cent.

Cut Nails—$3.15 per keg base.

Wire nails, base, $2.80 Winnipeg; $2.35 Fort William.

Copper—Sheet and planished copper, 30c per lb. Tinned, 24c. Copper wire, 3-inch gage, 24c, to 20-inch gage, 29c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87; 26 gauge, $4.18; pressed standing seamed roofing, 28, painted, $2.84; 26, $3.24.

Canada Plates—Firm. Half polish, 6 and 7-inch, $3.65; 8-inch, $3.90; full polish, 6 and 7-inch, $4.40; 8-inch, $4.65.

Clevices—7½c per lb.

Enamelware—Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white, 70 and 5; diamond, 50; granite, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron—Apollo, 16 gauge, $3.80; 18, $3.85; 20, $3.90; 22 and 24, $4; 6, $4.20; 28, $4.60; 30 gauge or 10¾ oz., $4.80; Queen's Head, 20, $4; 24, $4.20; 26, $4.60; 28, $4.80.

Galvanized Iron Pipe—⅜ in., $3.25; ½ in., $4.05; ¾ in., $5.00; 1 in., $7.20; 1¼ in., $9.80; 1½ in., $11.80; 2 in., $15.30.

Galvanized Ware.—37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90; No. 2 and larger, $4.65; snowshoes, No. 0 to No. 1, $5.15: No. 2 and larger, $4.90; steel No. 0 to 1, $5.35; No. 2 and larger, $5.10; featherweight, $6.50.

Horse Nails—"M.R.M." cold process—No. 3, $4.30; 4, $3.80; 5, $2.75; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 per cent.

Hinges—Light T and strap, 65 per cent.

Hooks—Brush, heavy, per dozen, $8.75; grass, $1.70.

Iron Washers—Full box, 40 per cent.; smaller lots, 35 per cent.

Iron Pipe, Black—⅛ in., $3.15; ¼ in., $2.30; ⅜ in., $2.35; ½ in., $3.15; ¾ in., $3.80; 1 in., $5.45; 1¼ in., $7.45; 1½ in., $8.95; 2 in., $11.55; 2½ in., $18.40; 3 in., $24.15; 3½ in., $32.25; 4 in., $36.75; 4½ in., $42.50; 5 in., $47.50; 6 in., $61.50; 7 in., $95.50; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.

Poultry Netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.75.

Lead Waste—$6.75.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope — Sisal, 8¾; Pure Manilla, 10¾c; British Manilia, 9c; lath yard, 9¼c.

Staples.—Bright wire, $2.50 F.O.B. Fort William; $2.90, Winnipeg.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops, 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $28 per cwt.

Screws—Flat head, iron, 87½, brass, 77½; round head, iron, 82½; brass, 72½; coach, 67½ per cent.

Staples—Bright wire per cwt., $2.50 at Fort William, $2.90, Winnipeg.

Stove Pipe—6 inch., $8.70 per 100 lengths; 7 inch., $9.30 per 100.

Terne Plate—I.C., $9.75; I.X., $11.75.

Tin Plate—I.C., charcoal, 20x28, full box, $10.25; ½ box, $5.50; IX., full box, $13.50; ½ box, $8; IXX., full box, $15.50; ½ box, $9.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 35.

Wrenches Agricultural—70 with 10 p.c. discount.

Paints and Oils.

A brisk trade is now on in all lines of paints, oils and varnishes, etc. Outside painting is now being carried on on all bright days.

Paints and Oils.—White lead, decorators' pure 7.60, decorators' special 7.10. Rebate of 25 cents on ton lots.

Boiled oil per gal, $1.03. Raw oil $1, turpentine 80 cents per gal. barrel lots.

Sporting Goods.

Retailers are already disposing of considerable stuff in the way of summer sporting material and such is also much in evidence in window displays. A record should be established this year in these lines, as recent successes have kindled much enthusiasm in the city and country.

Methods of Retailing Paints and Varnishes

Time to Interest Boat Owners in Paint

They Can Get Their Caulking and Varnishing Over Early, and Have Their Crafts Fit for the Water as Soon as it is Fit for the Crafts.

More and more retailers are taking steps to reach out and secure a good part of the paint business which always comes in the spring—also to do their part in stimulating paint business, for every one who has considered the subject realizes just how this can be stimplated. Passers-by may be made to regard paint not only as a beautifier but as an insurance. They may have the preserving qualities of paint and varnish brought home to them, so that they will pause to consider this fact as they have never considered it before.

This preserving property is especially worthy of demonstration at this time of the year. Not only are new houses being erected at this season, which need paint to decorate their wooden parts and to insure these against wind and weather; but those in love with water sports are now thinking of getting their boats and canoes out from their winter quarters. These boats and canoes will need some attention before they can be placed in the water.

A Novel Display.

There is a dealer who has thought of this, and who is now showing a paint window which will catch the attention of every passer-by. It shows the material with which seams may be caulked. It shows varnish, good for interior or exterior. It makes the passer-by think of the craft in which he will shortly be spending his Saturday afternoons; and makes him think that he would be wise to buy some material and caulk, paint, and varnish that craft at once.

By taking action at once the canoeist or oarsman may have his bark ready for the very earliest occasion upon which he may safely venture on the water. He may get the craft out of its winter quarters; may examine it thoroughly; may go carefully over all the dcracks; may oil the wood, and varnish those parts which will be improved by varnishing. He may let this dry and then apply his paint, in whatever colors he has determined upon. He may even obliterate the girl's name which adorned the bow of his canoe last year, and substitute for it the new name which is now more desirable.

All this may be done during the next week or two, and then the craft may be left to soak if it still needs a little soaking to quite pull the seams together. It is surprising what leaks will come during the winter, even in a good craft. It is also surprising what a little paint and caulking will do to keep the craft quite dry.

What these materials—roughly applied by an amateur—will not accomplish, a little soaking will, and by getting the painting done early the owner of boat, launch, or canoe may allow this soaking without foregoing any perfect days on the river. He can have all his work completed by the time the perfect May Saturdays come along.

Business Building.

There are great opportunities for building up business in this line. Boat owners are only too anxious to do any thing which will make their crafts more water-tight. Probably they will think of paint and caulking later on, of their own accord, but by using an attractive display now any retailer in a district where there is considerable boating will be able to secure much of this business for himself. This may lead to other business too, for many owners of skiffs, canoes, or motor boats, are also owners of houses; and when they see what a little paint and varnish will do for their crafts, they are likely to think that this would do something to improve the appearance of their homes. Anything which gets people using paint increases the demand for paint. There is not a limited amount of painting to be done, which once completed will mean a finish to paint purchases. Every can of paint that is sold does its little part to create a demand for another can.

L. R. GREEN TAKES CHARGE OF S. W. P. ADVERTISING.

L. R. Greene, for a number of years head of the advertising department of the Sherwin-Williams Co., of America, has now moved from Cleveland to Montreal, taking charge of the advertising of the Sherwin-Williams Co., of Canada, and of the Canada Paint Co. He is also to be in charge of the new insecticide department which the S. W. P. Cana-

A good window display shown in the Bo nd Hardware Store during the Guelph Convention.

dian company is establishing with the view of rendering greater assistance to the farmers in their fight against pests.

In securing Mr. Greene, the Sherwin-Williams Company has gained an advertising manager who has made for himself a national reputation. It is fourteen years ago that Mr. Greene first joined the S.W.P. force, then working in the Toronto office. He had a great talent for sketching and writing, and one of his sketches falling into the hands of an official resulted in his removal to Cleveland. From a subordinate position in the advertising department there, Mr. Greene worked his way rapidly to the top, and for some time now has been at the head of the department which has turned out such splendid advertising matter.

Though liking the United States, Mr Greene is glad to get back to Canada, the land of his birth; and is delighted that Mr. Cottingham and Mr. Ballantyne have been able to effect his transfer from the head of the advertising department of the Sherwin-Williams Co., of America, to the head of the advertising department of the Sherwin-Williams

A THREATENED SCARCITY.

There is a general belief that the present strong price for china wood oil is the result of a condition which cannot be overcome during the current season, and which is likely to result in further advances in the cost of china wood oil, says the Paint and Varnish Record. The supplies of oil in this country at the present time are known to be small. The Chinese revolution so unsettled business conditions in the flowery kingdom as to put a practical end to the china wood oil industry for the season. The cessation of shipments from country points in China was noted immediately on the outbreak of the revolution. Traffic on the river is a precarious proposition at the present time, and has been ever since the revolution started. The failure of shipments to this country has resulted in a scarcity, which, if continued for a short time longer, without any augmentation in supplies, is likely to result in a famine.

The latest advices from the seat of the Chinese revolution would seem to indicate that hostilities are about over. The abdication of the throne of China by the Manchu dynasty and the establishment of a provisional republic have given hope that present unsettled conditions may have an end soon and that a return to normal operations may be anticipated before very long. The inability to secure reliable and accurate information concerning the progress of the revolution, however, makes it possible that the situation in China is more delicate than believed on this side, and even if it is possible to make safe shipments of oil down the river at this time, it hardly seems probable that there could be any material amount of oil to reach this country inside of two or three months.

The eastern advices are to the effect that the supplies of oil at New York and other points are very small.

Where Broken Windows Have a Value

Cracked Sheets of Plate Glass Can be Taken as Part Payment on New Panes. and if they are Carefully Removed a Good Profit Can be Secured From Reselling Them — One Man's Experience.

A good old story tells of a farmer, who, after visiting a pork packing house, reported that the makers were using everything but the squeal.

Later it has been said that even the squeal is utilized—that it is from the squeal, indeed, that the profit is secured.

There is a good deal of truth in this figurative remark. It is from the little things that much of the profit is made now-a-days. Competition is keen, and prices have to be kept low. For that very reason, therefore, there is need that nothing should be wasted; and that every available means of making a profit should be firmly grasped.

Accidents Bring Opportunity.

One of these opportunities for unexpected profit comes to those who handle glass. It is an opportunity which arrives not by accident, but through accidents.

When a plate glass window is broken there is need for hurried action. Few glass windows there are now-a-days which are not insured. It is by the insurance company, therefore, that negotiations for a new window are usually made. And here is about the way the transaction is made.

"We want a new window," states the insurance company.

"Yes," laconially replies the dealer.

"The old window is worth something," declares the insurance company.

Much Remains Intact.

Now those who have noticed broken store windows will have noted that it is seldom that the glass is splintered. A stone is thrown. A runaway horse collides with the glass, and there is a crack. But usually a good sized piece is left intact. This, of course, has a value. It can be used for smaller windows, or for the front of doors in private houses.

So, when the insurance company asks the dealer what he will allow on the old glass, the dealer must make a calculation. While the old glass has a value, it has a value which is greatly reduced by reason of the difficulty which there is to get it out in good shape. Always there is risk in putting in a window, and there is even more risk in taking one out. The dealer, indeed, has to underwrite this risk, but even after this is done he can well afford to make an allowance on the old glass.

Small Allowance Given.

One man, who has made quite a success of transactions such as this, declares that the allowance on the old windows has meant for him a double profit. "I do not allow a great deal on the old pane," he said, "and by taking great care I seldom have an accident. Even when the glass is further broken there is usually a large enough piece left intact to offset the allowance. On the other hand, if the glass is taken out practically as it remained in the window after the accident, there is a large profit —a profit of several hundred per cent. Of course, considerable work is necessary to put the old glass in marketable form, but allowing for this the net profit is great.

Two Profits on Transaction.

"Then," he continued, "there is also the profit on the new pane. The deduction for the old window is, of course, made from a price which will allow an ample profit. So you see I am in somewhat the position of the broker who gets a percentage both for buying and selling a stock. I get a fair profit from installing the new window, and I am likely to gain a much larger profit from my purchase of the old pane. Even with accident, as I have said, I seldom lose."

The experience of this man may be of value to hardwaremen in other communities who do a good business in glass.

Condulet Talk.

The Canadian General Electric Co., Toronto, have sent out No. 8 of their second series of "Condulet Talks." It illustrates a number of different types of condulets for use on exposed conduits.

Wise Dealers Handle the ML Line Because They are Honest Goods That Build Trade.

Our New ML DECORATIVE AID DEPT. Helps You to Get Trade.

ML Paints—make good because they are made good—there's 19 years of practical experience mixed into them. **ML Paints** defy weather and last, and last, and last!

ML Floorglaze—a brilliant, quick drying, flint hard finish that withstands scruffing and scratches. Washable like glass. In solid and transparent colors.

Elastilite Varnish—the one varnish you can guarantee just as though you were its maker. Good for use indoors or out. Elastilite will get and hold the best varnish trade for you.

GET OUR HELP
Our Decorative Aid Dept. answers your problems in house decoration and painting with free color suggestions, estimates, stencil designs, etc. Stencils sold. You get the right goods in the right shades for best effects in any house. Send for Booklet.

Your Copy of "Paint and Painting" Is Ready

This miniature encyclopaedia of paint information, written by experienced and practical paint men, is worthy of the attention of dealers, clerks and painters.

It treats on paint troubles and how they can be avoided. It takes up the discussion of right and wrong primers, the succeeding or protective coats, and deals with the painter's part in good results.

In fact, this handbook gives paint information in a practical form, which anyone may understand. It is not a catalogue or a price list, but a book of suggestions to paint users from paint makers of fifty years' experience in the making, sale and use of paints.

Every Hardwareman should send for this booklet. A copy will be mailed free on request.

Weekly Market Report --- Paints

MONTREAL.

Montreal, April 4.—Despite snow flurries, which seem to have forgotten that April is here and that the showers which bring May flowers are what is expected, there is an increased demand for paint. The roads are not in the best of shape, and travelers are having some difficulty in making their trips, nevertheless, the orders are coming in rapidly. This is the state of affairs announced at all the paint houses.

Prices have not changed at all this week. There is little excitement in linseed oil, turpentine or white lead. The ordering for oil is not large, and white lead, despite the recent advance, is in great demand. There is a likelihood that a still greater advance may be necessary in lead before long. The product is now being made at a small margin of profit, and if pig lead advances any further—as seems quite likely—a somewhat corresponding advance will have to be made in white lead.

Car Load of White Lead.

By the way, there comes from the States word of a whole train-load—36 cars—of white lead being shipped to New England. Such gigantic shipments are not being made here, but car-loads in this material and in mixed paints are everyday occurrences; and it does not take many of these car-loads to form a long train.

Linseed Oil—A settlement of the strike in England seems more imminent now, and there is, therefore, little disquietude as to the future of linseed. Some thought a continuance of the strike would cause prices to advance, but now a rise seems less likely. It is difficult to predict the future of linseed, however; all that can safely be said is that prices are now quoted at .91 and .94, and that there is no great rush to buy on the part of those who usually stock up heavily when they feel that the market is due to advance.

Turpentine—Here, too, there is little activity. Supplies at Savannah are good, and there is no shortage in Montreal. Prices are quoted at .70.

Large Orders for Paint.

Mixed Paints—Here the big demand is noted. Dealers who have already laid in a good supply are ordering more that their shelves may not become empty through the early retail ordering. In all parts of the country the buying is going on, though orders from the far west and the Maritime Provinces are still among the largest.

Paris Green—The demand for this material continues. Retail ordering has already started, and the indications are for a much greater call this year than in any previous season. This business of combating destructive insects is a serious affair for the farmers nowadays, and the paint manufacturers, recognizing this, are making a careful study of insecticides, which will help the agriculturist in his work.

Will Putty Be Scarce?

Putty—The stocks here are not as large as is usually the case at this season of the year. The grinders will have to be kept busy all summer or there will be too little putty on hand to supply the great demand which is sure to come at the approach of fall.

Glass—Orders are still coming in largely. The lateness of navigation opening may cause some shortage of supplies, but if the strike does not cause serious delays in shipment, the stocks are not likely to be so reduced that orders will have to remain unfilled.

TORONTO.

Toronto, April 4.—The unfavorable weather and the freight blockade are combining to hold back trade. Even with these deterring influences, however, business continues pretty brisk. Starting with the first of the month, the jobbers began to rush out goods which had been ordered for the spring trade. A large volume of new business is being received at the present time.

Difficulty is being experienced in the matter of getting shipments through, but the situation has not yet reached an acute stage.

Firmness in Oil.

Linseed Oil—The price of linseed oil remains the same, but it does not look as though there would be any reduction for some time at least. There is not as much reduction in the prices offered for June delivery as had been expected, which indicates that the crushers are anticipating that prices will remain up. The Argentine crop is now pretty well in, and reports indicate that it is not as large as had been expected. This will undoubtedly have the effect of maintaining firmness on the English market.

The local price is 94 for raw and 97 for boiled.

Turpentine Scarce.

The feature of the turpentine market is the scarceness which exists here. All the jobbing houses are short and, although some new supplies are coming in, they are large enough to do more than stave off a famine. The fact of the matter is that the buyers, anticipating lower prices with the arrival of new turpentine at the primary points, held off buying until the local market became almost cleared out.

Advices from the south are to the effect that new supplies, already overdue, are not likely to arrive for three weeks yet. The weather continues cold and unfavorable, and it is impossible to get the colored folk to work until the sun shines good and warm. As a result, the stock at Savannah is being pretty rapidly depleted but, as there is still quite an accumulation, the price has not been changed to any extent. There have been, in fact, fluctuations downward. The local price has remained at 72 cents.

White Lead Firm.

White Lead—Rumors are still heard of pending changes in the price of white lead. The determined upward trend in the price of pig lead is making it obligatory on the grinders to advance their quotations. That an advance will come seems certain, and speculation is confined to the time it will come and the amount of the advance when it does come.

Glass—There are no developments to report in glass. Rumors of advances are heard, but nothing has materialized.

Putty—The demand is strong for putty, and it is stated that higher prices will soon be declared. The firmness in linseed oil and the increased cost of whiting are factors which will tend to make the higher quotations. Present prices are:—Standard bulk in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same. Bulk, in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder, in barrels. $3.

Prepared Paints—The demand is heavy at the present time, and large shipments are being made. The jobbers and manufacturers report that they have had a particularly heavy call for varnishes and interior paints and stains of all descriptions.

BIG PAINT CAMPAIGN.

Lethbridge, Alta.—The Hayr Hardware Co. have opened the spring season with a big paint campaign, inaugurated by a full-page advertisement in the local papers. Every inch of the space is devoted to the paint question. Among the different lines mentioned are floor paint, elevator paint, flat wall colors, shingle stain and varnish stain. The advertisement is written in forceful style, and is bound to attract a great amount of attention.

"I can always bank on my customer's paint trade after he buys his first can of B-H "ENGLISH" PAINT."

Mr. T. M. Nash, agent for B-H Paint at Wellington, Ont., in a letter written January 19th, 1912.

To have customers come back again, and again, and again---to build up a permanent, profitable paint trade you must give paint value in the paint can.

You and your customers know there is 100% value in B-H "ENGLISH" PAINT. There is a guarantee formula on the can---you know it is free from adulterants, that it is ALL paint---70% pure White Lead---30% Pure White Zinc, mixed ready for use with pure Linseed Oil, pure Turpentine and Dryer.

MINERVA PAINTS
AND PAINT SPECIALTIES

have held pride of place with discerning dealers for more than two generations.

The quality of materials we use, and the skill we exercise in grinding and compounding, have made "**MINERVA PAINTS**" a line that never fails to satisfy.

And the direct support we give the dealer in the way of original and effective selling helps has created a demand for "**MINERVA**" Brand, which is appreciated by every aggressive retailer.

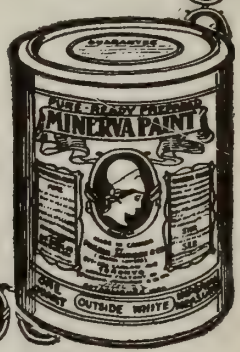
Tell your customers every "**MINERVA**" can contains Full Imperial Measure. This is a splendid selling feature. Make comparisons of packages and contents.

PINCHIN-JOHNSON & COMPANY
(Canada) Limited

377-387 CARLAW AVENUE, TORONTO

Established in England in 1834

K-27



Steel Tanks and Self-Measuring Pumps for Paint Oils

They avoid all the loss and inconvenience sustained under the old method. The steel tanks are air-tight and will not permit the oil to gum or stick. The pumps measure the oil according to the Imperial Standard, directly into the customer's can. They count the gallons pumped and compute the charge for fractional gallons.

THE BOWSER PAINT OIL SYSTEM

will put every cent of profit into your pocket, where it belongs. With a Bowser your paint oil department will be as clean and inviting as your shelf hardware department. It draws trade.

Why not investigate now and be ready for spring. Your fellow merchants are using them. They'll help you. Ask for book No. 15.

S. F. BOWSER & COMPANY, INC., TORONTO
66-68 FRASER AVENUE

For Twenty-seven Years Manufacturers of Self-measuring Pumps, Tanks, Gasoline and Oil Storage Systems, Self-registering Pipe Line Measures, Dry Cleaning Systems, etc.

Condensed or "Want" Advertisements

Those who wish to sell or buy businesses or stocks, obtain competent help, connect with satisfactory positions or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL

It is the central market place of the hardware trade throughout Canada.

There is always someone somewhere looking for just such proposition as you have to offer.

RATES (payable in advance) :—
2c. per word first insertion
1c. per word subsequent insertion.
5c. additional each insertion when Box Number is required.

ARTICLES FOR SALE

THE PATENT FOR A NEW AND THE most efficient ventilator extant. Address the inventor R. M. Pancoast, Civil Engineer, Camden, N.J. (17)

COMPLETE SET TINSMITH'S TOOLS. COST over $250. Will sacrifice for $150. List on application. McBrien's Hardware, 1000 Bloor West, Toronto. (14)

BUSINESS CHANCES

NICE, SMART LITTLE HARDWARE BUSIness for sale, in thriving western town. Turnover $12,000. Large district to draw from. Box 647, Hardware and Metal, Toronto. (11tf)

HARDWARE, TINWARE AND STOVE business in good town and district. Stock $5,000 to $6,000 at rate on dollar. Good turnover. Going West. Write at once. Box 654. Hardware and Metal. Toronto.

CENTRAL ALBERTA.—GOOD HARDWARE business for sale in one of the best towns, mixed farming and dairying community, stock and fixtures about $5,500, in first class shape, one opposition. Box 648 Hardware and Metal, Toronto. (11tf)

DOMINION RIGHTS FOR NEW AMERICAN inventions are often offered ridiculously cheap —merely reimbursing inventors for patent fees expended. Such monopolies afford opportunities. Communicate with H. D. MacDonald, 35 W. Congress, Detroit, Mich. (13)

THRIVING HARDWARE BUSINESS FOR sale, consisting of shelf and heavy hardware, stoves, etc. Located in central part of Ontario; three railroads; turnover $50,000; stock $10.000, which is being reduced. Excellent chance to buy at rate on dollar. Retiring from business. Box 618, Hardware and Metal, Toronto. (52tf)

THRIVING LITTLE HARDWARE BUSIness for sale at Matheson, New Ontario. This little town is situated in the centre of the great clay belt and mining district. Stock about seven thousand dollars. Can be reduced to suit purchaser. Option of purchasing or leasing building. Reasons for selling, owner has interests elsewhere, which demand his attention. Don't answer this ad. unless you mean business. Frank A. Child, Cochrane, Ont. (13)

A REAL LIVE HARDWARE AND TINsmith business in a central Saskatchewan town of 300 people, a three-quarter million bushel grain point, five elevators, very best farming district and people. $21,000 turnover last year at a profit of over $4,000. Absolutely no competition whatever. This proposition will stand the closest inspection because it is a real moneymaker. $5,000 will handle, balance on terms. Wholesale support guaranteed to right man. Box 641, Hardware and Metal, Toronto. (14)

FOR SALE OR TO LET

THE TINSMITHING AND PLUMBING DEpartment of Binns' Hardware, Newmarket, Est. 20 years. Tools almost new. 8 ft. brake. Town 3,000 and booming. One opposition. Splendid chance for the right man. Apply G. A. Binns, Newmarket. (14)

STORAGE

STORAGE, VANCOUVER, B.C.— STORAGE or space to rent, office if required; warehouse close to all wharves, with railway siding; two elevators. Martin & Robertson, Ltd., 329 Railway Street, Vancouver. (14)

SITUATIONS VACANT

WANTED. GOOD ALL AROUND TINsmith. Good wages and steady job to the right man. A. R. WILSON, Sherbrooke, Que. (14)

WANTED.—Hardware clerk with two or three years' experience, as second man. Apply with references and state salary expected to The Nelson Hardware Co., Ltd., Windsor, Ont. (16)

WANTED—A RELIABLE, AMBITIOUS MAN in every town to look after the entire circulation of our thirteen publications. Work very remunerative. MacLean Publishing Company, 143-149 University Avenue, Toronto, Ont. (tf)

PRICE TICKETS

PRICE TICKETS FOR WINDOW SHOW goods. Black lettering on white card marked 25c, 50c, 75c, $1, $1.25, $1.50, $1.75, $2, $2.50, $3, $3.50, $5. Dozen in set, per set 25 cents postpaid. Technical Book Dept., 143 University Avenue, Toronto. (tf)

TECHNICAL BOOKS

HINTS FOR PAINTERS, DECORATORS and paperhangers—Practical and useful book treating on the preparation of surfaces, materials used, mixed paints, operations, taste in color, graining, paperhanging, estimating cost of work, useful recipes, etc. Price 25 cents postpaid. MacLean Publishing Co., Technical Book Dept., 143-149 University Ave., Toronto.

MISCELLANEOUS

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

ACCURATE COST KEEPING IS EASY IF you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employes' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalogue. International Time Recording Company of Canada, Ltd., office and factory, 29 Alice Street, Toronto.

BUSINESS GETTING TYPEWRITTEN LETters and real printing can be quickly and easily turned out by the Multigraph in your own office—actual typewriting for letter-forms —real printing for stationery and advertising, saving 25% to 75% of average annual printing cost. American Multigraph Sales Co., Ltd., 129 Bay Street, Toronto.

COUNTER CHECK BOOKS — ESPECIALLY made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for binders and monthly account systems. Business Systems, Limited, Manufacturing Stationers, Toronto. (tf)

YOU CAN BUY A REBUILT TYPEWRITER from us. We have about seventy-five typewriters of various makes, which we have rebuilt and which we will sell at $10.00, $15.00 and $20.00 each. We have also a large stock of better rebuilts at slightly higher figures. Write for details. The Monarch Typewriter Co., Ltd., 46 Adelaide St. West, Toronto, Canada. (tf)

SITUATIONS WANTED

HARDWARE LINES WANTED ON A COMmission basis, covering western provinces. Canadian Specialty Co., Suite 307, Travis Blk., Calgary, Alta. (14)

MISCELLANEOUS

COUNTER CHECK BOOKS—WRITE US to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

COPELAND - CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson Co., Ltd., Toronto and Ottawa. (tf)

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS ARE DEVISED to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

FIRE INSURANCE — INSURE IN THE Hartford. Agencies everywhere in Canada.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

MOORE'S NON-LEAKABLE FOUNTAIN pens. If you have fountain pen troubles of your own, the best remedy is to go to your stationer and purchase from him a Moore's Non-Leakable Fountain Pen. This is the one pen that gives universal satisfaction, and it costs no more than you pay for one not as good. Price, $2.50 and upwards. W. J. Gage & Co., Limited, Toronto, sole agents for Canada.

PENS—THE VERY BEST PENS MADE ARE those manufactured by William Mitchell Pens, Limited, London, England. W. J. Gage & Co., Limited, Toronto, are sole agents for Canada. Ask your stationer for a 35c. assorted box of Mitchell's Pens and find pen to suit you.

THE NATIONAL CASH REGISTER COMpany guarantee to sell a better register for less money than any other house on earth. We can prove it. Make us. The National Cash Register Co., 285 Yonge Street, Toronto.

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto. (tf)

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

WINNIPEG FACTORY

Right Quality--Right Prices--Right Profits

Our business in the great Northwest is growing with the country. The reputation of C. P. products is known throughout the Dominion, and their sales continue to increase year after year. They sell because the quality is satisfactory, the prices are right and they pay a good margin of profit. C. P. Paints and Varnishes are one of the oldest makes in Canada. They have been sold successfully for nearly half a century. Many promising claims are made by manufacturers new in the Canadian field, but just remember the plan on which the C. P. policy has been successfully conducted for nearly 50 years—dependable quality—right prices—fair profits. The demand for C. P. products is not in anticipation, it is an established fact.

THE CANADA PAINT COMPANY

MONTREAL TORONTO WINNIPEG

Glidden

Challenges Comparison

Our terms are Sixty Days—some varnish houses give four months.

Why should you deal with Glidden?

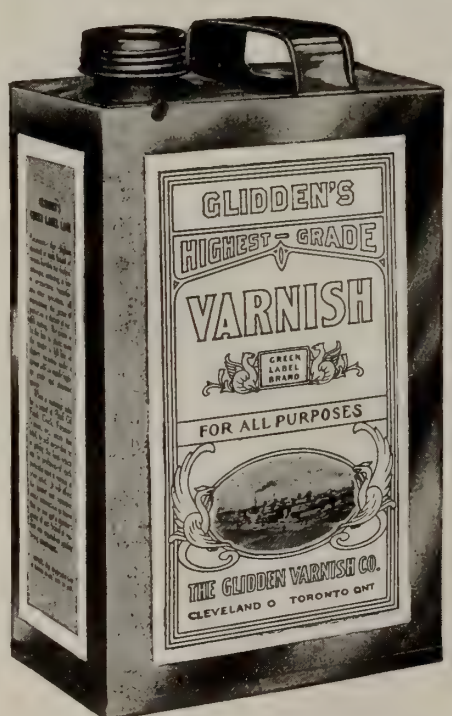
There's just one answer, Mr. Merchant: The quality of the goods and the profits to you.

The Glidden discount is so much more generous than the discounts made by other varnish houses that *the discount discounts the terms.*

The discount we offer the trade on Green Label Varnishes, Stains and Specialties makes it possible for you to *make more money* absolutely regardless of four months' five months'—or six months' terms, and Glidden's Green Label Varnishes are in a class by themselves.

Have you been reading our advertising in the painters' publications?

We challenge any painter in the land to send us a sample of any exterior varnish equal in quality to Glidden's M.P. Durable Exterior, or any interior varnish equal to Glidden's M.P. Durable Interior, or any floor varnish equal to Glidden's M.P. Durable Floor.



We are giving this challenge bold advertisement in the Master Painter, The Painter and Decorator, The Modern Painter, Practical Decorator, Painters' Magazine, Cement World, American Carpenter and Builder, etc.

That is the sort of challenge that shows *faith* in the quality of our goods, and the painters know it.

Write for our New and Most Generous Proposition to the Trade on Green Label Varnishes, Endurance Wood Stains, Endurance Colorspar, and Specialties. Use the attached coupon.

GREATER SALES-GREATER-SATISFACTION-GREATER—PROFIT

It is the quality the manufacturer puts into his paint that gives the greater satisfaction — that makes greater sales possible, and returns the greater profits to the paint dealer. The dealer who handles

Martin-Senour Paint
100% Pure

finds his business growing as a result of the presence of the quality of *lasting service, non-fading color, luster, free flowing, surface covering capacity* put into paint by its makers. If you want the greater sales and the greater profits that come as a reward for greater satisfaction, sell Martin-Senour Paints. Don't put off writing for the agency

THE MARTIN-SENOUR CO., Limited

Pioneers of Pure Paint

Montreal **Chicago** **Winnipeg**

What Does the Future Hold?

It holds whatever you provide. Let us talk about your varnish trade. What kind of varnish are you selling to your customers? Do you know? Is it just so-and-so's varnish at so much a gallon, or is it a varnish guaranteed to last and to give good service?

If a man wants a reliable guaranteed varnish, recommend DOUGALL VARNISH. We will stand back of your guarantee.

DOUGALL VARNISH is made from none but the very finest materials, will cover more surface per gallon than any other varnish made, and furthermore it is

Not a Single Complaint on Pratt & Lambert Varnishes in Ten Years

This letter **proves** Pratt & Lambert Varnishes **sell** through P & L advertising and varnish selling assistance which has **tripled** the sale of "61" Floor Varnish for P & L Dealers in three years; **tripled** the sales of Vitralite, the Long-Life White Enamel in less than one year. How much have your white enamel and floor varnish sales increased?

F. P. COLLINS PAINT CO.

White Lead, Paints, Colors, Varnishes, Oils, Turpentine, Brushes, Glass and Painters' Supplies

225 West Fayette Street
Syracuse, N.Y., December 12, 1911

PRATT & LAMBERT

Gentlemen:—We are glad to have the opportunity of expressing our appreciation of your **courteous** treatment and **hearty co-operation** in the sale of these celebrated goods. The writer has been identified with the paint business for upwards of twenty-five years, and is pleased to say that your several makes of Varnish seem to meet the needs and win the unqualified approval of our trade, not only in Syracuse but also in the many cities and towns of Central New York.

If there is such a thing as pre-eminence among your excellent brands, our trade would place Vitralite and "61" Floor Varnish a step in advance of the others. Reports from consumers indicate that these brands need no salesman. In the writer's experience as a dealer, he has yet to find there equal.

We are always glad to give credit where credit is due and assuring you that we are pleased to continue **pushing the sale of your famous products,** we remain, Very truly yours, F. P. COLLINS PAINT CO. FPC-W Per F. P. Collins (Signed)

Pratt & Lambert advertising is creating the same varnish selling demand in your town which will be greater than ever this Spring. You must decide for yourself whether or not you will take the sales and profits, but first, so you may consider the facts,

FACTORIES:— BRIDGEBURG, CANADA NEW YORK BUFFALO CHICAGO LONDON PARIS HAMBURG

Our Business Is Built On a Rock

—alabaster rock, from which is made the only pure, permanent and sanitary wall-coating—

ALABASTINE

When a room is being papered or kalsomined you know the trouble and unpleasantness it involves—the rubbing and washing and scraping. And you know how soon Kalsomine decays and rubs or scales off. But **ALABASTINE** is a cement which hardens on the wall—becomes a part of it and does not need to be scraped or washed off when a fresh coat is applied. In fact, each new coat improves the wall.

Why not build up your trade on the alabaster rock which has been so sure a foundation for our success? We help with our advertising and supply you with catalogues, show cards, banners, tint cards and posters. But the greatest help is **the genuine value of Alabastine.**

Remember that Spring rush and ORDER NOW, direct or through your jobber.

Paint and Varnish Removers

MR. DEALER: When you buy Paint and Varnish Remover remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance. The fact that all the leading manufacturers of paint and varnish in Canada and the United States who handle paint removers at all are licensees of this company and manufacture under our patents is the strongest possible testimony that the only practical, satisfactory and efficient removers on the market to-day are those covered by our patents.

SEE THAT EVERY CAN IS MARKED "LICENSED UNDER CANADIAN PATENT No. 78,586"

The above Canadian patent corresponds to our U.S. patent No. 714,880, which is the basic patent under which modern paint removers are manufactured. The following well-known and highly respected Canadian companies sell paint and varnish remover manufactured in Canada under our patents:

	NAME OF BRAND
The Sherwin-Williams Co., Montreal, Canada	"Taxite"
International Varnish Co., Ltd., Toronto Canada	"Klensa"
Pratt & Lambert, Inc., Bridgeburg, Ontario, Canada	"Expedite"
British American Paint Co., Victoria, B.C.	"Bapoo"
Mount Royal Color and Varnish Co., Montreal, Canada	"Scrape-off"
James Robertson Co., Ltd., Toronto, Canada	Robertson's Paint and Varnish Remover"
Sanderson Pearcy Co., Ltd., Toronto, Canada	"Devolite"
Stewart & Wood, Toronto, Canada	"Solvo"
Martin-Senour Company, Ltd., Montreal, Canada	"Martin-Senour Paint and Varnish Remover"

The character and standing of these companies is a guarantee to you that the paint remover sold by them is the best that can be produced.

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient. They contain no carbolic acid or alkali. They are neutral.

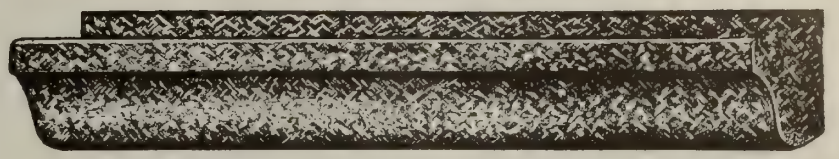
EAVETROUGH



STRAIGHT - TRUE - UNIFORM

This is the final word when you discuss Eavetroughing with the man who likes to do a job of which he can be justly proud.

Our Trough is made on the largest and heaviest press of its kind in Canada. Each length is made in the same die, in the same way, and all are uniformly straight and true. It's a pleasure to work with our kind.

Insist on getting this from your jobber or send us your specifications for Trough, Pipe, Galvanized Iron, Tin and Canada Plates. We will not keep you waiting.

Winnipeg Ceiling and Roofing Co.

P.O. Box 2186 H. WINNIPEG, MAN.

MAPLE LEAF

"Improved Racer" Cross Cut Saw

This saw has proved itself to be the fastest cutting saw in use to-day. The cut illustrates the wide blade, but we also make this saw in a narrow pattern, thin back, which is especially well suited for small timber or pulpwood. All "MAPLE LEAF" saws are fully guaranteed.

GET THE GENUINE

DOES THE REPUTATION of GARLOCK PACKING mean anything to you?

Does the fact mean anything to you that GARLOCK PACKINGS are giving eminent satisfaction the country over and everywhere Engineers who know insist on the installation of Genuine GARLOCK?

This big and insistent demand for GARLOCK PACKING is the demand for quality.

Imitators are making Packings that look like GARLOCK and are trying to sell them because they look like GARLOCK.

Sometimes these imitations are sold as being "just as good as GARLOCK." If they were as good, they would be sold on their own merits and not on the established reputation of GARLOCK.

Sometimes these imitations are substituted when "GARLOCK" is asked for. To prevent you getting an imitation and assist you in identifying the genuine, we have marked every piece of Spiral Packing with this mark of quality

March 28, 1912

Hardware & Metal,
Toronto, Ont.

Gentlemen :—

We are pleased to announce that we were to-day favored with a visit from Mr. Bert Hamilton of Hamilton & Stott, of St. Thomas.

While here Mr. Hamilton on behalf of the firm of Hamilton & Stott completed arrangements whereby they purchased from the Jones Register Co., of Toronto, their entire stock of Jones Registers, floor registers, borders and faces, wall pipes and fittings, and everything connected with the heating business formerly owned by the Jones Register Co., of Toronto. From this date Hamilton & Stott will be successors to the Jones Register Co., of Toronto, and all Jones Registers furnished to the trade in the Province of Ontario will be furnished by Hamilton & Stott, of St. Thomas.

The Jones Register Co. still retain the book accounts, and all collections of the Jones Register Co.'s book accounts will be made by the Jones Register Co.

Yours very truly,

THE JONES REGISTER CO.

A. O. Jones, Sec'y.

Barrel Brand

Unsurpassed in Quality and High Workmanship

CUTLERY

(Razors, Scissors and Pocket-Knives)

Guaranteed To Give Full Satisfaction

is the line you should handle. Why? Because we sell the goods for you by our advertising to the public. Because it leaves you better profits. Because, on account of its unequalled high class quality, it will not only keep your old customers but bring you new ones.

Canadian Agents: GREEFF-BREDT & CO., TORONTO

Western Office: Fellman, Gibson & Jardine, 222 Portage Ave., WINNIPEG. MONTREAL Office: H. J. Stafford, 134 Bleury St.

SELL A GOOD LAWN-MOWER

to a man and you've gone a long way toward winning his confidence and trade. Sell him one not quite so good and he'll resent it every time he mows the lawn. Sell him a

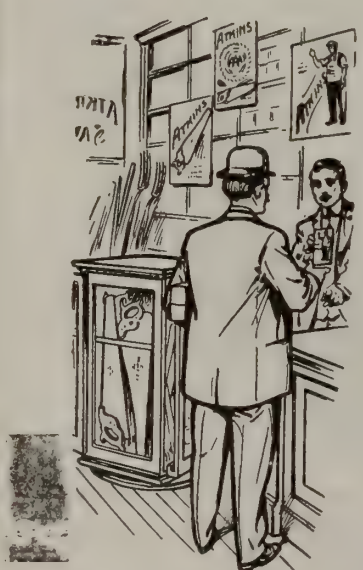
MAXWELL LAWN-MOWER

and be sure you are on the right side. The Maxwell cuts so smooth, clean and easy, and holds its edge so well, that every man who appreciates a good machine is sure to be pleased with it.

8 to 22 inch widths, wheels 8 to 11½ inches high, 3 to 6 knives. Grass catcher attachment if desired.

David Maxwell & Sons, St. Mary's Ont.

Why not make 1912 the most profitable saw year in your history?



ATKINS STERLING SAWS

MADE IN CANADA

THEY are Quality Saws. They appeal to the best mechanics and are backed up by an aggressive advertising campaign that pays. Write us for full information. It will cost nothing to at least investigate the merits of this important line. Address

MAKERS OF STERLING SAWS

HAMILTON, ONTARIO

Vancouver Branch, 109 Powell St.

U.S. Factory, Indianapolis, Ind.

The busy housewife's thoughts turn to spring cleaning at this time and it is the opportune time for the aggressive dealer to display and put his selling powers behind cleaning and **SWEEPING COMPOUNDS.**

SOCLEAN

The Dustless Sweeping Compound

needs little introduction to a good many of your customers, and if introduced in its true light to those who have not been lucky to know of its labor-saving qualities your sales will be enormous. "Soclean" is economical, absolutely lays dust, saves scrubbing and dusting, brightens and preserves carpets, is a disinfectant, leaving a pleasant odor after sweeping.
It sells at 25 cts., 50 cts. and $1.00, put up in handy sized pails convenient for all uses.

SOCLEAN LIMITED, Toronto, Ont.

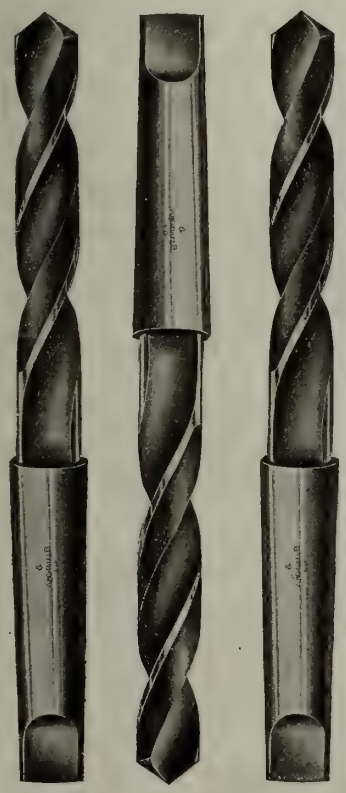
We manufacture all kinds of lumber tools.

Light and Durable Send for catalogue and price list.

Long Distance Phone No. 87

Sold throughout the Dominion by all Wholesale and Retail Hardware Merchants.



"Hercules" Drills Are Not Made By The Taking-Away Process

The goodness of "Hercules" High Speed Twist Drills is the result of the Twisted-While-Hot Process. The Vanadium Steel, from which "Hercules" Drills are made, comes to you with its strength unimpaired in the grain or in its lasting quality. Other methods of drill manufacture remove the strength-giving quality of the metal and produce drills without a backbone. "Hercules" Drills have the taper shanks, usually one size larger than regular, which eliminate tang troubles and give greater driving power, owing to the firm hold of chuck which grips the drill in the center. Your jobber can supply you or you can order direct.

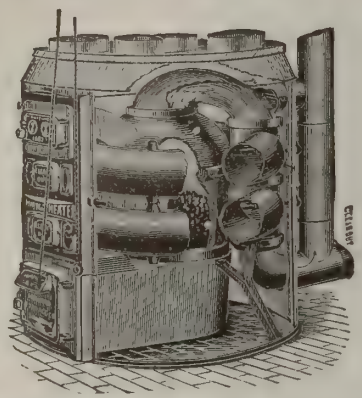
Established 1854 ST. CATHARINES, ONT.

STOCKS CARRIED AT WINNIPEG AND MONTREAL

IT'S QUALITY AND ADVANTAGES THAT MAKE

CANADIAN HOWARD DOUBLE RADIATOR FURNACES

THE CHOICE OF MOST BUILDERS



The "HOWARD" Furnace means an enormous economy in fuel to the user, as the heat and gases have to pass through two radiators, thereby greatly reducing the heat by the time it reaches the smoke pipe, which, in the ordinary furnace would go up the chimney.

We employ only the most skilled mechanics and use only the best materials in the manufacture of this furnace.

Mr. Dealer, if you want to handle a line that will prove completely satisfactory to your customers, and a money-maker for yourself, investigate the HOWARD. Remember it is absolutely guaranteed. Write us for particulars.

CANADA'S ONLY WEEKLY HARDWARE PAPER

HARDWARE AND METAL

Published Weekly by

THE MACLEAN PUBLISHING COMPANY, LIMITED

Vol. XXIV. Publication Office: Toronto, Canada No. 15

April 13, 1912

"There's a GOOD Job! I used Amatite ROOFING"

"NOW I have the best roof in this township. One that will last—one that's waterproof—one that will resist the hardest storms—and I didn't have a bit of trouble laying it."

That's about what every Amatite owner says. Its superiority over all other ready roofing is apparent to anyone who uses it.

Amatite does away with all roofing troubles and unnecessary expenses because it is made with a real mineral surface that *needs no painting*. It is durable, fire retardant, practical, economical.

Don't buy any other roofing till you look up Amatite. Write to nearest office for samples.

Everjet Elastic Paint

Save money by using this black paint wherever the color is no objection. Elastic, heat-proof, durable. Use it for "rubber" roofings and all exposed iron and wood.

The Paterson Mfg. Co., Limited

Montreal: Toronto, Winnipeg
Vancouver, St. John, N.B., Halifax, N.S.

A QUESTION OF POLICY

Many a dealer, in his desire to be strictly up-to-date and to please his customers, has stocked nearly every safety razor that has come out.

The steady demand, built on quality and persistent advertising, soon clears out his GILLETTES. But the others stick—and their appearance does not improve with age.

Some dealers, facing a considerable loss in these slow-moving goods, decide to hold back the GILLETTE till they have succeeded in getting rid of the other stuff with which they are loaded.

As surely as night follows day, this course leads to two results.

Their razor trade falls off, because customers go elsewhere to buy the GILLETTE—and those who do purchase other razors come back to kick, or worse still, stay away and knock.

To sacrifice these misfits at once hurts, but it pays in the end to do it, and to feature the GILLETTE.

You simply cannot afford to recommend to your customers as the best, any razor except the one that is the best—and six million users concur in the opinion that this is the GILLETTE Safety Razor.

The GILLETTE is the razor that increases sales and makes friends, not kickers.

A SUGGESTION

Have you a stock of Spring Hinges that have distinctive selling features which your salesman can offer and which would make the prospective purchaser buy them and no other?

Chicago "Triplex" Spring Butts

offer this advantage to you. The appearance, durability and finish of this article are unsurpassed, and in consideration of prices that are conservative in respect to value, the up-to-date dealer cannot afford to neglect this profitable business.

Send for Catalogue M 26. It fully illustrates and describes the most complete line of Spring Hinges manufactured.

MOTOR BOATING

Will be more popular than ever this season

THIS year promises to be a record year in the motor boat field. When the season opens there will be a large number of new boats, and old boats fixed up. What are you doing to reap the benefit of this trade? Every wide-awake dealer should stock motor boat supplies and marine hardware. We carry the largest stock of accessories in Canada. Our Motor Boat Accessory Catalog is ready for mailing; a card asking for Catalog H. 24 will bring it to you.

If you are interested in Marine Engines you should have our Catalog H 23.

H&R ARMS Co

¶ Right in every hardware store is the most logical place for a line of reliable, accurate, and moderate-priced single guns.

For ridding premises of pests—snakes, rats, 'chucks and the many kinds of crop and poultry destroyers, the Harrington & Richardson single guns are specially suited.

¶ There is a large and growing demand for an economical and efficient weapon for just that purpose, as well as for occasional hunting.

Here's the gun:

TRADE H&R ARMS CO. MARK

TRADE H&R ARMS CO. MARK

Specifications, 12 to 28 gauge—26 to 32 inch barrel—ejecting or non-ejecting—fine black walnut stock—hard rubber butt plate—weight 5¾ to 6½ lbs., according to gauge and barrel. For black or smokeless powder.

¶ These guns are quick sellers. They are made and sold under the broad H. & R. guarantee of quality, reliability and satisfaction. With a few of these H. & R. guns in stock, the hardware dealer is equipped for a profitable and increasing trade.

Our 40-page catalogue is yours for the asking. It contains valuable selling points for every hardware dealer, and shows the complete H. & R. line. Ask for it now while you think of it.

Harrington & Richardson Arms Co., 715 Park Avenue, Worcester, Mass.

American Cans

IN SELECTING your PAINT and VARNISH Cans use the same careful judgment and criticism that you exercise in all other purchases. "American Cans" court such a test. Cans are not all alike, even if they do seem similar and look alike as "two peas in a pod." Satisfy every one of your needs in weight, strength, manufacturing detail and appearance; then consider price, promptness of delivery and possibility of a continuous supply without interruption. On the above basis we will take a chance on securing and holding your business.

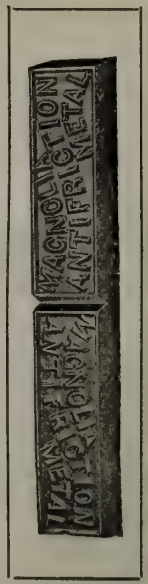
D. J. BARKER & COMPANY, - Picton, Ontario

CONVERTED

The foundation upon which we have built a world-wide business is based upon our policy of seeking and curing troublesome bearings, and otherwise demonstrating the value and economy of Magnolia Metal.

Magnolia is not a *soft* metal; its factor of safety is far in excess of the requirements of any properly constructed bearing—and out-wears even brass or bronze, giving much better service. There is a lot of misinformation regarding "hard" bearings.

No matter how hard they are they go to pieces or give trouble when they get hot—which they generally do. Magnolia keeps cool, won't squash, stays put, and won't cut.



O. B. LITTELL
622 Pontius Avenue, Seattle, Was. December 7th, 1911.

Gentlemen:—I take pleasure in stating that I am a user of Magnolia Metal and have been for the past two years.

I have put Magnolia Metal to what I consider a thorough trial. The first place I applied the metal was to an Emery wheel travelling 1200 R.P.M., and it worked so well that I then applied it to a fan 1470 R.P.M. The next place was to the crank pin of my main engine, and having such good results I concluded to babbitt the cross head brasses. In all the places the metal was applied, not one bearing has been taken up over 1-16-inch, and has run from 12 to 18 months.

I have come to the conclusion that Magnolia is surely a riddle; it can be worked like lead and still be as tough as it is.

I was somewhat afraid to try it in my main engine, because I thought it was too soft to stand up to the work, but I have a different opinion now. I have been following this line of work for over twelve years, and am sorry that I did not have an introduction sooner.

Yours respectfully, ALLEN J. STOCKS, Engineer in Charge.

SPECIAL OFFER

PRACTICAL ENGINEER POCKET BOOK, 680 pages, over 2000 subjects. Price 40c. post paid. We do not aim to make a profit on these books. We buy them in large quantities as an advertising medium and give Engineers benefit of low price. They are highly spoken of by Engineers. Address Montreal office.

All Bits May Look Alike to You

but there's as much difference between the FORD and ordinary bits as there is between Black and White.

It is unquestionably the finest Bit ever made. No other bit CAN bore as rapid, no other Bit DOES bore as smooth and no other bit has the "accurate to the fraction of an inch" clean cutting qualities the FORD possesses.

FORD BITS will bore straight through the hardest knots
without turning off the least. The FORD Patented Concave Twist is a marvel. As it works it throws all borings to the centre, thus insuring a free, easy action from the moment the screw point starts until it bores out.

Enthusiastic Ford Users have termed it "The Twist that saves the wrist" and once you try a Ford you'll agree that it does save many a twist, bores as easy again and leaves a smoother hole than any bit you ever used.

Progressive dealers everywhere sell this money saving, labor saving bit. Insist upon the FORD—each one fully guaranteed.

Corrugated Iron Prevented Spread of Terrible Fire

The thousands who watched the terrible fire in Toronto a few days ago, when thousands of dollars' worth of property was destroyed, had a chance to see what corrugated iron would do to prevent the spread of flames.

In "The News" the next day it was reported that the firemen could not reach the flames on account of the iron coverings of the buildings, but as an official put it afterwards: "I tell you if it hadn't been for the iron coverings on those buildings this entire neighborhood would have been destroyed. Some of those buildings were huge furnaces and the last thing to fall was the metal sides."

And that is only one instance of the protection afforded by Corrugated Iron.

How about your buildings? Supposing some building near yours should burn, and the burning pieces fell on your factory, how many chances have you of saving it?

Use corrugated iron for your covering. Let us tell you about ACORN QUALITY CORRUGATED IRON—the iron with the trade mark—the kind that lasts practically forever.

If you intend building, write to us to-day for our prices.

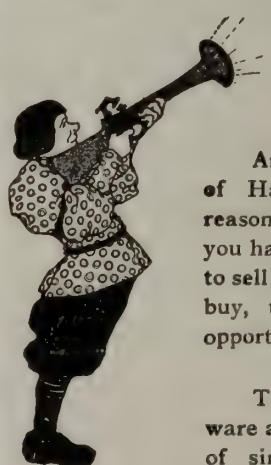
Hits the Mark



Among the thousands of readers of Hardware and Metal it seems reasonable that someone wants what you have to sell, or that someone has to sell what you have tried in vain to buy, that someone is hunting the opportunity you have to offer.

The want ad. columns of Hardware and Metal are the simplest form of simplified advertising. No ad. writer need be employed, no drawing or cut need be made, no knowledge of display type is necessary, for display type will not be used in these columns. All that you have to do is state your wants, state them simply and clearly and send to any of our offices along with remittance to cover cost of advertisement. No accounts opened in this department.

Don't despise the want ad. because of its small size or small cost. Don't forget that practically all the hardware merchants, clerks, manufacturers and travellers read our paper each week.

Hamilton Will Get the Convention

This Point Was Practically Decided At A Joint Meeting Held On Monday At Hamilton—Negotiations For Use of Armouries Now Under Way—Directors Of The Canadian Hardware Manufacturers' Exhibitors, Ltd., Hold Meeting And Draw Up Constitution—It was Decided To Work For A Large Attendance of Retailers Next Year.

Hamilton, April 8.—Hamilton will get the convention of the Ontario Retail Hardware and Store Dealers' Association, together with the manufacturers' exhibition, next year.

This is the decision practically arrived at this afternoon at a joint meeting of the Board of Directors of the Canadian Hardware Manufacturers' Exhibitors, Limited, and the executive of the O. R. H. & S. D. A. Unless some unforeseen difficulty crops up, this arrangement will go through.

A meeting of the Board of Directors was held in the Waldorf Hotel, those present being A. A. Bittues, President; F. M. Tobin, first vice-president; Chas. E. Stewart, third vice-president; M. R. Griffiths, fourth vice-president; R. B. Johnson, chairman of the exhibition committee; and F. N. Hollingsworth, of the same committee.

At the joint meeting, the executive members of the O. R. H. & S. D. A. were practically all on hand, those present being President M. S. Madole, second Vice-president W. F. McPherson, Secretary Wrigley, Treasurer Caslor, and Messrs. McNabb, Bennett, Otton and Conn, members of the executive committee.

The question was threshed out and it was recognized on both sides that Hamilton would be the best place for the convention if the necessary arrangements could be made. A conference was then held with a committee from the city of Hamilton, consisting of Dr. Hopkins, Dr. Wesley and Ald. Wallace and with Col. Rennie, of the Army Ambulance Corps, the senior officer in that district. The visiting committees presented the necessity of securing a suitable hall, and received assurances of the assistance and co-operation of the officers and the city council in obtaining the use of the Armouries. It is believed that the necessary permission will be secured.

Splendid Facilities Offered.

If the drill hall is secured, the exhibition facilities will be the best that the exhibitors have ever had. The hall is 190 by 90 feet. It is comfortably heated and dry and has a good floor. A good hall for the convention sessions can be obtained in close proximity to the Armouries, so that there will be no difficulty on that score.

M. R. Griffiths, Fourth Vice-president of The Canadian Hardware Manufacturers' Exhibitors, Limited.

The request will be sent on to the military authorities without delay and a decision is expected shortly.

The members of the civic committee extended a most cordial welcome to the hardwaremen to hold the convention and exhibition in Hamilton. They promised to do everything in their power to give the delegates a good time and to provide them with every convenience. It was pointed out that the accommodation would be good and that there would be none of the crowding experienced in smaller cities.

Meeting of Exhibitors.

A number of important matters were taken up at the meeting of the Board of Directors of the Canadian Hardware Manufacturers' Exhibitors, Ltd. Some time was given to the drafting of a consituation, covering the objects of the association and the work that it aimed to do. The constitution was completed and copies will be ready shortly for the members.

It was decided to provide 88 booths for the exhibition next year. Applications will be received by the secretary, and the allotting of spaces and similar arrangements will be carried out in accordance with the regulations adopted. The directors will have charge of all matters pertaining to the exhibition.

Want Large Attendance.

It was decided to invite retail hardwaremen to attend the exhibition whether they belong to the association or not. A determined effort will be made to insure a large attendance of dealers and the directors will co-operate most heartily with the officers of the retail association in bringing this about. Steps will probably be decided upon later for a campaign to increase the attendance.

The directors feel that, under the new arrangements, the exhibition next year will be the most successful ever held. The hall will be the largest and most convenient yet provided, and the committees will be in a position to insure fullest satisfaction from the standpoint of the exhibitors as well as that of the delegates and visitors.

Are Well Satisfied.

President Bittues and Vice-president Tobin called in at the office of Hardware and Metal on Tuesday. They expressed themselves as well pleased with the way things had shaped up, and were quite confident that the necessary arrangements would be completed to hold the convention and exhibition in Hamilton.

"We want to make the 1913 meeting the most successful yet from the standpoint of both manufacturer and retailer," said President Bittues. "It is our desire to work in unity with the retail association. The arrangement now reached will be, I believe, the best possible, and we are trusting that the results will be in keeping. We must all work together."

MAKING HIGH GRADE GLASSES.

The Stanley Rule and Level Co., New Britain, Conn., have purchased the business of Theodore W. Van Hoesen, Albany, N. Y., who for many years has manufactured a line of the highest grade of ground level glasses for use in scientific instruments and mechanics' tools. The entire equipment has been transferred to the factory of the Stanley Rule and Level Co., and the glasses are now being made there by the workmen formerly employed by Mr. Van Hoesen at Albany.

Hardware Store Publicity

Chapter 6—The Layout of an Advertisment.

The man who writes store advertisements has not the easiest task in the world. To turn out creditable ads. and to make sure that the printer does his part right, takes a lot of time—longer, perhaps, than most ad. writers can afford to give. In the first place a good idea must be thought out; and ideas are sometimes hard to get. But the responsibility of the ad. writer does not stop there. He must arrange a neat lay-out for the printer to follow in order to give the ad. an attractive and striking appearance.

The designing of a good lay-out takes considerable time. The writer must possess a certain amount of originality and, more important still, a fairly extensive knowledge of type and typographical rules. Some ludicrous mistakes occur as a result of the ingnorance shown by ad. writers of everything pertaining to printing. It is not an uncommon thing for a man with three-inch single-column space to send in enough copy for a full-page ad. and insist on every line being inserted. Cases are known where cuts have been sent in which more than filled the space contracted for. If the ad. writer supplies more reading matter than the space can conveniently accommodate, the printer does the best he can to crowd it in. He sets it in the smallest type, crams it in regardless of appearance and lets it go at that. One can hardly blame the printer if the result is a botch.

The value of understanding the use of type is illustrated in the matter of head lines. If the head line supplied is a little too long, the last word or two must be put in a second line, thereby spoiling the effect and using up valuable space. The ad. writer should indicate in his instructions to the printer the size of the type that he desires in his head lines and should count the letters to make sure that the lines will fit in.

Draw Up Plan.

The first step in preparing advertising copy is to draw up a plan, as shown in the accompanying illustration. A large sheet should be used and a space marked off in the same proportions as the space contracted for. If possible, it

An Ad. Which Shows Effective Use of Panels.

is best to make the copy the exact size of the ad as it will appear. It is then much easier to map out how the space is to be used. If any cuts are to be inserted, the exact size can be indicated in the copy and the writer is less likely to misjudge the space that he has at his disposal. Likewise, the printer has explicit instructions to follow in arranging the lay-out and is more likely to follow the ad. writer's ideas to the letter.

In preparing the plan, the space where each head line, cut and section of reading is to go should be plainly indicated. The head lines should be printed or written in but it is not wise to attempt to write in all the copy unless extreme brevity has been observed in the preparation of the reading matter. Writing by hand is necessarily much larger than print and there is not enough space, therefore, to write in the matter which it will be necessary to embody. The proper method is to indicate on the plan where each section of reading matter is to go and forward the matter on separate sheets. The spaces allotted for reading matter are filled in with ruled lines as shown in the sketch. For instance, under the line, "You need spring supplies" and between cuts 1 and 2, a wide space is left for the "introduction," as the leading argument is usually called. The matter for this space is written (typewritten, if possible) on a separate sheet, as follows:—

How Plans for an Advertisement Should be Arranged.

You Need Spring Supplies.

The time has now come when you must "house clean." You will need a great many things before your premises and garden will look presentable after the long winter. Spring is here at last and nature is putting on her brightest garb. Are you going to allow your home to continue in the shabbiness which winter brings?

In the panels shown under cuts 1 and 2, there will be reading matter and prices which should be prepared on separate sheets. The head lines, "For the House," and "For the Garden," written on both plan and copy will prevent any mixing-up of material on the part of the printer.

The cuts should be sent along with the copy. It is well to paste sheets of paper on the backs, with the name of the firm and numbers to correspond with those in the plan marked plainly in ink. This prevents mistakes and the loss of the cuts.

These rules should be adhered to rigidly. When the plan is prepared with little care and with but vague instructions as to lay-out, the printer is left to his own devices. The results, sometimes, are not by any means what the advertiser had desired. The careful preparation of a plan makes it impossible for the printer to mistake the intentions of the ad. writer. The idea is before him clearly in black and white.

It is equally important to have the reading matter typewritten on separate slips. When the ad. man writes everything on the one copy he is setting a premium on mistakes. In the first place, he has to write in a small hand. Copy is frequently received around news paper offices which is quite microscopsic in character. Descriptions and prices are jumbled in and the printer has to be a mind reader to get it all straight. Another objection is that a complete copy of an advertisement is prepared necessarily on a large sheet of paper. The "typo" folds it up to facilitate his work and, if the copy is in pencil, the folding process does not add to its legibility.

Here is a case which is typical of what is happening every day. A hardwareman advertised a certain article at 85 cents. The price got in the paper as 35 cents. Next day there was a run on the store and the proprietor made a great many enemies because he refused to make good the mistake and clean out his stock at a heavy loss. Investigation at the newspaper office showed that the price had been marked in pencil and had become smudged. It looked as much like 35 as 85, and the printer had picked the wrong one. Who was to blame?

The printer for one. He should have have made sure of the price before leaving the ad. The merchant for another. He should have made his copy perfectly legible.

Planning a Lay-out.

So much of the basic rules to be followed in preparing copy.

A great deal could be said on the subject of planning the lay-outs, which is one of the most important features of ad. writing. There are inumerable styles to be followed, running all the way from the plain announcement set forth with head line at top, condensed lines in body of ad. and firm name at the bottom, to the other extreme—the ornate, much-broken up, advertisement with panels asd illustrations filling every corner of the space. If the advertiser has a good-sized space at his disposal, it will pay him to plan out a neat arrangement of the matter, with the use of panels and illustrations. It is not wise, however, to attempt anything too "fussy" or new. A jumble of borders and lines cutting up the reading matter into every conceivable shape does not constitute a good lay-out by any means. It confuses the eye and it takes so much time and trouble on the part of the printer that it is a safe wager that he will do his work roughly and with little care for the details so important in the proper setting of an advertisement.

The accompanying advertisement of the Hickman Tye Hardware Co., Victoria, illustrates the good use that can be made of panels in large space. This ad. occupied full page space and was an especially effective one. Each article was paneled off by itself. At the same time, the arrangement was not too complicated for so large a space.

In planning the lay-out, it is necessary to see that a proper balance is maintained. An ad. "out of plumb" will not be attractive. In arranging the cuts and reading matter, therefore, it is necessary to have an eye to the maintenance of balance. Observe the triangular arrangement followed in the plan shown. This arrangement balances the advertisement up, whereas the use of two cuts on one side and one on the other would have brought far from satisfactory results.

A good plan is to mark the size of the ad. on a piece of paper and group the cuts on the paper in various ways until the most satisfactory arrangement is found.

Opinions of Trade on Spring Special

Opinions of a highly complimentary character with reference to the Annual Spring Number of Hardware and Metal continue to arrive. Some of those received are appended.

Sherwin-Williams Co.

You are certainly to be congratulated, not only upon the splendid appearance of this issue, but also upon the splendid amount of advertising carried.

Alfred Rogers, Ltd.

We wish to congratulate you on the "Annual Spring Number," which is certainly a beauty. We are well satisfied with our advertisement, and feel sure that it will be of good benefit to us.

Canadian Logging Tool Co.

We are just in receipt of your Annual Spring Number of Hardware and Metal, and we wish to congratulate your art department on this work as it certainly appeals to us as a very striking ad. To our mind the work is first-class in every respect and, in addition to this advertisement, we wish to congratulate you upon the excellent reading matter which should be of interest to every hardware dealer in Canada.

Edward C. Plume Co.

We have received a copy of the Special Spring Number of Hardware and Metal, and feel that congratulations are due the publishers for succeeding in presenting so complete an edition of a paper that will prove of inestimatable value to the trade generally.

While the greater portion of the Spring Number is devoted to advertising pages, these have been so carefully arranged and displayed as to make them a really attractive feature.

The various subjects covered are in the main timely and splendidly written, anl the illustrative features exceptionally well executed.

T. McAvity & Sons.

We duly recived copy of your Annual Spring Number, and are well pleased with our full page ad. shown therein.

Re the special number, we are pleased to say that we consider it an exceptionally good one, and hardly see where it could be improved upon from an artistic standpoint or otherwise.

Supplee Hardware Co.

In reference to your Spring Special are glad to take the opportunity of congratulating you on the very handsome copy you have produced.

The Spring Special is a revelation to the writer and to all to whom he has shown it, making them more fully appreciate the importance of our neighboring market.

PUBLISHED EVERY SATURDAY.

TO MEET AT HAMILTON.

It seems reasonably assured that the 1913 Ontario hardware convention and exhibition will be held at Hamilton. If the use of the Armouries can be secured, the decision reached at the meeting held in Hamilton on Monday will be carried out. In such an event, the exhibition should be a great success, for the quarters would be the best yet provided for that purpose.

The fact that the manufacturer and retailer will work hand in glove to make the 1913 assemblage an unqualified success, bespeaks great things for the next convention. The manufacturers have announced their intention of working to secure a larger attendance of retailers. This is a highly essential point. The success of the convention and exhibition hinges on the number of dealers who attend, and the larger the number on hand the better the results. The decision of the Board of Directors of the Canadian Hardware Manufacturers' Exhibitors, Ltd., to admit dealers to the exhibition whether they belong to the association or not, is justified under the circumstances. It is not at all probable that the association of retailers will object, for they must realize that the surest way to get dealers interested in association work is to secure their attendance at the exhibition.

The local association idea gained a firmer foothold on Good Friday, when out of a meeting of Northern Ontario dealers held at North Bay, was evolved the New Ontario Retail Hardwaremen's Club. The men of the north evinced a rare degree of enthusiasm, and there is no reason to doubt that the club will prove an immediate success. It is intended to meet at frequent intervals for the discussion of trade topics and grievances, and it is firmly believed that in this way it will be possible to do a great amount of good.

The idea of forming associations of a more local character than the provincial can ever be, is one of great potentialities. Much will depend upon the results obtained in the two first organizations of the kind formed—in the east and in the north. If these bodies show strength and virility from the start, the idea will take deeper root.

GOOD SERVICE—PLUS.

Even in hardware store it is likely that there are some clock watchers, some clerks who wait anxiously until the time to close comes, and who do just as little as possible until that glad hour arrives. To such as these it is of little value to make suggestions. But there is another, and fortunately a larger class, who do, to the best of their ability what falls to their hand. Sometimes these wonder why it is that greater success does not come to them. They try, yet their advance is not rapid.

It is vision—initiative—which many of these clerks lack. They fail to reach out. What they might get by doing well not only what comes to hand, but also by bringing something to hand which seems out of reach, is well illustrated by a true story which is now gaining some circulation.

A young hardware clerk, having made a favorable impression upon a traveller, was employed by the house which that traveller represented. He was put to work in the Toronto warehouse, trucking boxes. He did that work well, and in his spare moments he made sketches—sketches which he thought could be used to make the public realize better the value of the product which he had been trucking. Those sketches were appreciated by the men in authority. The young man was put upon the advertising staff, at the head of which he now is.

It was this man's enthusiasm—his desire to do his best—plus, which brought about his advance. It is that plus service—the something which was not expected, but which is appreciated, which points the way to rapid advancement for all.

PREPARING ADVERTISING COPY.

There is a great deal of good common sense in the adage that a thing worth doing at all is worth doing well. When a man turns his hand to anything he should do so with the idea of giving his very best efforts. Half-hearted attention is often worse than absolute neglect.

This is particularly true with respect to advertising. If advertising is worth doing—(and no one disputes that)—it is worth doing well. It is true, in fact, that advertising poorly done can be harmful instead of valuable.

Great care should be exercised in the planning and preparation of advertising copy. In this connection, it would be well to give some attention to the article appearing in this issue, which deals with that subject. The practice, much too common, of mapping out the ad. roughly on a sheet of paper and writing all the copy in, is neither wise nor expedient. It sets a premium upon mistakes. If printer has nothing to guide him but the rough copy thus prepared, it is a moral certainty that he will deviate from the idea intended by the ad. writer, and there is every likelihood of his making mistakes. To obviate this, advertising copy should consist of a plan, showing how the matter is to be laid out, where the cuts (if any) are to go, and the size of the type, together with separate sheets containing the reading matter. The matter should be typewritten wherever possible.

Advertising well done is a splendid investment for any merchant. Careless copy goes a long way toward minimizing the good results, however.

SPRING FLOODS AND BUSINESS.

Generally now there is complaint about the condition of the roads, the lack of proper drainage, and the resulting floods. Trade is being interfered with as a result of the too great abundance of water. Farmers are unable to get to town. Dealers are feeling a smaller demand, and are ordering less largely. The wholesalers, therefore, are suffering temporarily to some extent.

Undoubtedly this is a serious state of affairs, yet it is not without its hopeful signs. The drains should be better, so that the water could be carried off properly; but the drains are not better because there have been so many drains needed. The prosperity of the country has

been such—the expansion so great—that perfect engineering works have not been always possible.

"This is a terrible place," remarked a visitor from a European country, as he walked through a western city. "You are laying pavements everywhere. Roads are torn up on all sides. It is very unpleasant."

"Yes," remarked a Canadian friend, "there is a good deal of work going on. You see this isn't a finished country."

No, Canada is not a finished country. It is impossible that all its great areas could be perfectly drained yet, and so occasional inconveniencing and damaging floods are unavoidable. They do harm, and are to be deplored and guarded against, yet, after all, they speak of the great extent and possibilities of this country. They bring to mind the progress—the wonderful progress of the last few years.

DEFEAT THE PARCELS POST.

"What are the merchants going to do about this Parcel Post legislation?" was a question asked Hardware and Metal during the week.

What ARE they going to do? There is a possibility that this question may be brought up at any time in the House of Commons and if nothing has been done to offset it, the probalities are it will go through.

That Parcels Post is going to benefit the large mail order houses at the expense of the merchants of the country seems to be a fact beyond a doubt. Not only will the country merchants lose but country communities will not prosper to the extent they otherwise would, and some of them are bound to recede in standing, importance, wealth and population.

Parcels Post will drain money from country districts and bring it into the big cities to help enrich a few large mail order houses. This means money that should be spent at home will leave the rural and country town districts where it is most needed.

This is not in the general interests of the country. No wonder the last census shows decrease in the population of many rural districts. They are not being looked after well enough. The big cities are getting wealthy at the expense of the country and it ought to be the aim of our legislators to have the wealth produced by labor spread as much as possible where that labor is expended. As a matter of fact we hear little of Parcels Post from anybody but a few members of Parliament. They deem it a popular move to attract votes, forgetting to reason out the consequences.

It is up to every retail merchant in Canada to oppose, and oppose strongly, this measure. See that the member for your constituency is acquainted with the reasons why this legislation should be defeated. Write him, or wire him if necessary, and at the same time put it up to the Postmaster-General.

Do it now.

PLAN TO ESTABLISH TIPLESS HOTELS.

The death blow to the "tipping evil," which the Commercial Travelers' National League of the United States has been directing its energies to abolish, may be struck if the latest plan formulated by that body is carried into effect. At a recent meeting of the officers of the organization, W. E. Adams, of Philadelphia, vice-president, offered a resolution calling for the formation of a stock company which will operate a chain of "tipless" hotels in more than one hundred leading cities of the country.

To accomplish this he suggested that each traveling man invest $10 and all houses employing commercial travelers $100 each, thereby providing a capital stock in excess of $10,000,000, which would be sufficient to operate a number of hotels to which traveling men could resort and escape the "tipping" nuisance.

WIDTH OF WAGON WHEELS.

A bill of interest to manufacturers, wholesalers and some retailers, to regulate the width of tires on wagons and other vehicles has been introduced into the Ontario Legislature. It provides that minimum width of four-wheeled vehicles shall be 3 inches for carrying capacity of 2,000 to 4,000 pounds, 4 inches for 4,000 to 6,000 pounds, 5 inches for 6,000 to 8,000 pounds and 6 inches for all having carrying capacity above 8,000 pounds.

The bill, if passed provides that after Jan. 1, 1914, no vehicle which does not comply with above regulations shall be sold in Ontario, nor after Jan. 1, 1918 shall any vehicle be driven which does not come within the regulations prescribed.

POINTED EDITORIALS.

Advertising copy must be prepared carefully and neatly if mistakes are to be avoided.

* * *

Simplicity and efficiency are almost synonymous terms. The shortest way is generally the best.

* * *

One consolation goes with a late, cold spring. It will be followed by a scorching hot summer.

* * *

Even the weather seems to have human failings. Warm weather apparently "can't come back."

* * *

With manufacturer and retailer working together the Ontario convention and exhibition of 1913 should be the best on record.

* * *

A number of the paint manufacturies failed to keep Good Friday as a holiday. This is a sign of prosperity that the hardware dealers will appreciate.

* * *

Energy is the quality most needed in conducting a spring stove campaign. For that matter energy is just about the most needed quality in everything.

* * *

The education of the general public to the value of paint as preservative and beautifying agency is proceeding apace. The amount of paint advertising in national and international mediums is proportionately large.

* * *

The development of New Ontario has been rapid and spectacular. It is not to be wondered at, therefore, that the hardwaremen of that section are live, aggressive and up-to-date in every respect. The club formed on Good Friday should be a hummer.

* * *

All ages are supposed to have some one outstanding characteristic, for instance, the stone age. The present era will some day, perhaps, be known as the speed age. Every advance made seems to be toward improved transportation or motion.

* * *

The dealer who does not feel equal to essaying the cash system should at least put a check on the credit business.

New Ontario Dealers Form Club

Hardwaremen Hold Convention on Good Friday and Organize New Association—The Election of Officers—Topics of Vital Interest are Introduced and Discussed at Some Length—President Magladery Tenders Banquet.

North Bay, April 4.—A meeting of the hardwaremen of New Ontario was held here to-day, when an organization was formed, which it is believed will prove of much benefit to the trade. The meeting was well attended and so marked was the enthusiasm shown that the future success of the body seems assured.

The use of the town hall had been secured for the occasion. The first session was held in the morning, with quite a representative gathering on hand. Men were present from practically all points in the New Ontario district. Wm Magladery, of New Liskeard, who, as the New Ontario representative on the executive board of the Ontario Retail Hardware and Stove Dealers' Association, had been largely instrumental in arranging the meeting, was chosen as chairman.

The proceedings began with a statement from the chairman of the purpose for which the meeting had been called. Some communications were read, including a telegram from Hardware and Metal in which assurance of co-operation and support was given.

Addresses were then given by several of the officers of the Ontario Association who were present. They pointed out the advantages of organization and showed how the work could be furthered by the formation of associations in various sections of the province. Those who spoke were President M. S. Madole, Secretary W. Wrigley and D. McNabb of Orillia, a member of the executive. Opinions were secured from a number of the northern dealers present, and it was evidenced thereby that the idea of forming an association had found unanimous favor. The meeting then adjourned for lunch.

On reassembling, the work of organization was begun. A motion was put and carried without a dissentient voice, that those present form themselves into an association to be known as the "New Ontario Retail Hardwaremen's Club." In the discussion as to the advisability of organizing, a great deal of enthusiasm was displayed. The opinion was voiced on all hands that much good could be done by the new organization and that a distinct betterment of trade conditions would be brought about.

The Fee Fixed.

It was decided to fix the fee at $5 per year. This will cover membership in the Ontario Retail Hardware and Stove Dealers' Association. The new club will pay a per capita tax to the Ontario body.

Wm. Magladery, New Liskeard, elected first president of the New Ontario Retail Hardwaremen's Club.

Officers Elected.

The election of officers was then held, resulting as follows:—

President.—Wm. Magladery, New Liskeard.

Vice-President.—E. C. Reciard, Sudbury.

Secretary.—J. W. Richardson, North Bay.

Executive Committee. — John Bell, Mattawa; Milton Carr, Cobalt; John Hilliar, Burk's Falls.

To Meet Often.

The questions of the holding of future meetings was discussed at some length. It was felt that the club should meet just as often as it could possibly be arranged. Some favored monthly meetings and it is altogether likely that the club will meet quarterly, if not oftener. It was decided to hold the next meeting at an early date, the matter being left in the hands of the officers.

An address was given by W. G. Wright, of Ontario, along the lines of insurance. Discussion was aroused on a number of the points brought up and in that way some vital phases of the insurance question were threshed out.

Selling to Consumer.

The meeting was then thrown open to general discussion of trade topics. One of the first questions brought up was the practice of wholesale houses selling direct to the consumer or to people outside the trade. Quite a lively debate ensued, in which a large number took part. Instances were recited where dealers had been subjected to unfair criticism. Methods of regulating or stopping the practice were discussed. This subject will be brought up at the next meeting of the club.

The talk then veered to the subject of exorbitant freight and package charges. The merchants of New Ontario suffer in this connection more than the dealers in older districts where the transportation facilities are better. It is, therefore, a question of vital importance to them and it was discussed at some length.

Many other topics were introduced but, as time was short, the discussions were necessarily kept within limited bounds. It has been suggested that a certain amount of time be set aside at each future meeting of the club for a question box discussion. If it is found that time permits, this will undoubtedly be done, for it is realized that the discussion always becomes more general and useful during the question box than at any other time.

It was decided to conduct an energetic campaign before the date of the next meeting in order to get all hardware dealers in New Ontario actively interested. It is believed that this can be accomplished and it is recognized that the larger the number of dealers co-operating with the club, the greater the chance there will be of effecting an improvement in trade conditions.

Gave a Banquet.

A banquet was afterwards tendered to the members of the new club and the visitors at the Pacific Hotel by President Magladery. A pleasant time was spent and the acquaintances made during the day were cemented around the banquet board. Short addresses were the order and the first meeting of the new club was brought to a most happy conclusion in this way.

ENLARGING SHOWROOMS.

Fifty per cent. additional space will be added to the present showrooms of S. Sternau & Company, makers of Sternauware, 305 Broadway, New York city.

This additional space will make the showrooms the largest in the country devoted to the display of fancy brass and copper ware, and will give an enlarged window display.

The enlargement is necessitated by the new lines which the company have put on the market during the last year.

The Profit on a Bill of Goods

Hardware Dealer Sends in Invoice Covering Large Shipment of Hardware, With the Retail Prices Marked—His Average Profit Would be Between 17 and 18 per Cent—Does Not Consider His Profit in Past Has Been Big Enough.

An interesting communication was received from a well-known hardware dealer this week, relative to the question of fixing the selling price. It reads as follows:—

Editor Hardware and Metal,—"We have read with considerable interest the discussions in the last few issues of Hardware and Metal re the percentage of profit on goods retailed by hardwaremen throughout the country. For our information and guidance in adding profits, we are enclosing you an invoice of hardware received by us a few weeks ago. We have marked in the right hand margin the price at which we retail each article and would like to know exactly the gross percentage we will make on this bill.

"We have not been making as much money as we should for the amount of turnover, and we want to find out where the trouble lies. Last year brought one of the largest turnovers we have ever had in business and yet our net profits were less by about $500 than they were six years ago with about the same amount of busisess."

The information contained in the letter was not as definite as could have been desired. No mention was made of the percentage allowed for overhead expenses. It was necessary, therefore, to fix the percentage at about the figure it would probably be and proceed on that basis. It was estimated that in the average store the cost of doing business is 18 per cent. of the total turnover. Mark well that it is 18 per cent. of the total turnover. This item must be reckoned, therefore, on the selling price, not on the cost price.

In figuring the percentage of profit on the bill of goods enclosed in the letter, 20 per cent. of the selling price was allowed for the cost of doing business. This we believe to be a more than necessarily liberal allowance.

The profit on each article was figured on the basis outlined in previous articles. The selling price was taken as 100 per cent., and the percentage of the selling price represented by the cost price was then reckoned. Take, for instance, one article on the bill:—

1 food chopper, $2.60—S. P. $3.50.

The price paid for the food chopper, $2.60, is just 74.2 per cent. of the selling price which is $3.50. The cost of doing busisess and the profit must, therefore, equal what is left, or 25.8 per cent. of the selling price. The cost of doing business has already been fixed at 20 per cent. The profit made on this article is exactly 5.8 per cent.

SEND IN OPINIONS.

No discussion of recent date has awakened more interest than that now being carried on through the columns of Hardware and Metal on the fixing of the selling price of goods. The question is one of deep practical interest and readers are invited to send in further communications relating thereto.—Ed.

In finding the percentage of the selling price that the cost price represents, multiply the cost price by 100 and divide the selling price into it. A simple rule of arithmetic.

The invoice was a formidable document containing no less than 96 items. It took considerable time to figure out. Space will not permit of the whole being reproduced, but a few items selected from the list are appended.

1 Sausage stuffer, $7.00—S. P. $11.00. The profit here is 16 per cent.

1 doz. carpet sweepers, jap'd, $2.00 each—S. P. $3.00. The profit is 14 per cent.

1 doz. carpet sweepers, N. P., $2.25 each—S. P. $3.25. The profit is 13 per cent.

1 doz. egg crates, $3.50—S. P. 40 cents each. The profit is 7 per cent.

1 doz. mall clevises, No. 10, $1.00—S. P. 15 cents each. The profit is 25 per cent.

1 doz. w'tree ferrules and hooks, $1.10—S. P. 12 1-2 cents each. The profit is 10 per cent.

1 doz. sisal bed cords, 60 by 3, 76 cents—S. P. 10 cents each. The profit is 17 per cent.

1 gro. M. P. iron hdles, jap'd, $8.90—S. P. 10 cents each. The profit is 18 per cent.

1 doz. wringers, $3.72 each — S. P. $5.75. The profit is 15 per cent.

1 doz. rat traps, 70 cents—S. P. 10 cents each. The profit is 17 per cent.

1 doz. chisel hdles., 54L x 4, 45 cents—S. P. 8 cents each. The profit is 34 per cent.

1 doz. tanged fir. chisels, 3-4 S. E., $1.37—S. P. 25 cents each. The profit is 32 per cent. It looks bigger first glance; but it isn't. The dealer who figured his profit and cost of doing business on the cost price would reckon that he was getting about 100 per cent. profit.

1 doz. Snap Hand Cleanser, $1.25—S. P. 15 cents each. The profit is 11 per cent.

1 doz. sets asbestos sad iron, $18.00—S. P. $2.00 each. The profit is 5 per cent.

1 half dozen stove lifters, No. 3, 25 cents—S. P. 10 cents each. The profit is 39 per cent.

Figuring out the whole bill, the profit on the selling prices indicated would be betwen 17 and 18 per cent.

Is it enough? Opinions are invited on this point. It would be well for each dealer to go over the partial list above and decide if the price this hardwareman has sent on each article is a good one; if it is as much as he (the reader) has been marking.

Resale Prices.

Here is another communication received recently, bearing on the same question:—

Editor Hardware and Metal.—Following up your question of "How to arrive at the selling price," I wish to call your attention to the fixed prices of certain lines of goods. Take for example, safety razors. We buy a razor at $3.75 and sell it at $5.00. Supposing our cost of doing business is 25 per cent., which I think is a fair average, you can readily see where our profit is, "which is none at all." Take again the cheaper kind which we sell for $1.00 and cost us 75 cents. The result is the same. Kindly advise if the above is corect, or if my average of 25 per cent. is too high.

J. G. M.

You have placed your percentage for the cost of doing business at too high a figure, we believe. Only in rare cases do overhead expenses exceed 18 per cent. of the annual turnover. In a great many cases the percentage is less.—Ed.

MISTAKE IN PRICE.

A mistake occurred in the advertisement of the Onward Manufacturing Co. in the issue of April 6, the price of the Triumph Electric Vacuum Cleaner being put at $110.00. The paragraph in question should have read: "This machine sells for $125 and is guaranteed to be superior to any machine on the market selling for $150 or less."

A Departmentized Hardware Store

How Ingram & Davey, of St. Thomas, Have Divided Up Their Large Establishment, Putting Each Department In Charge of One Member of The Staff — The Scheme Has Been Eminently Successful.

One of the most complete retail stores in Canada is that of Ingram & Davey, St. Thomas. Mention has been made of various departments of their business at different times in Hardware and Metal, but no attempt at a complete description of their model establishment has been made. It will be interesting, therefore, to give some facts relating to the Ingram & Davey store, together with illustrations.

The main store is 40 feet by 115 and comprises three storeys and basement. There is, in addition, an annex, 40 feet by 45, two storeys high. The firm utilize the large space at their disposal to splendid advantage. They carry a stock which can accurately be termed complete, and in the arrangement of this stock many pointers may be gleaned by fellow hardwaremen.

A prominent feature in the arrangement and management of the store is the fact that the whole business is departmentized. That, in fact, is the outstanding feature. Every distinct branch of hardware has its own place in the store. Over each one of these departments one of the staff is placed. It devolves on him to hold up that end of the business, to see that the goods are attractively arranged and that the sales are up to the mark. The results of this system have been eminently satisfactory.

The department devoted to mechanics' tools is at the front of the store to the left of the main entrance. The tools are arranged in specially designed drawers and cases, in front of which are sliding show cases containing samples of the better grades of tools.

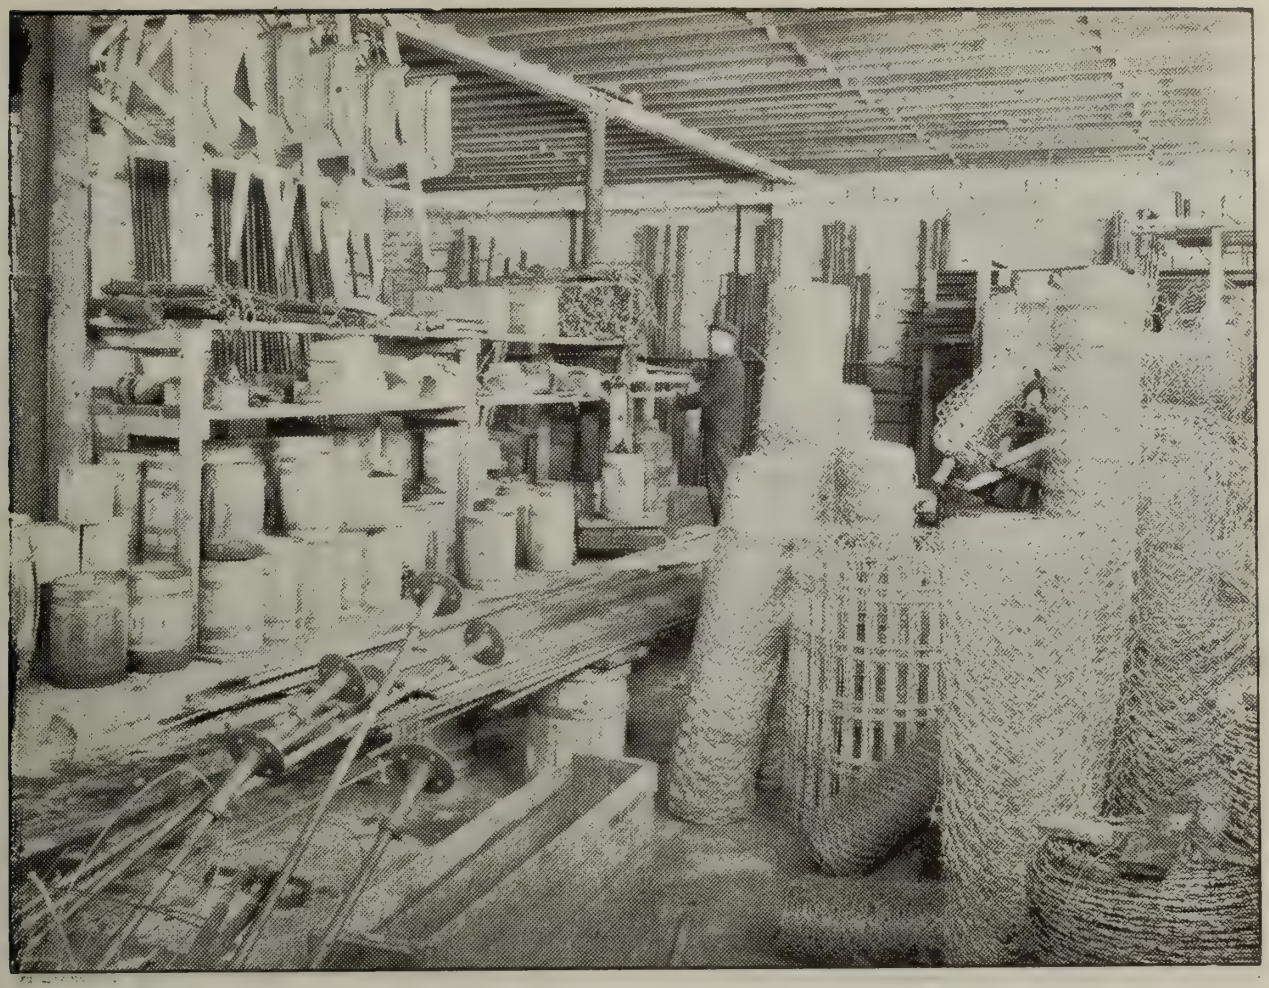
Back of this department on the same side is the space devoted to mill supplies. A feature of this section is the display of belting in pyramid form, quite a number of pyramids being kept up. Back of that again are farmers' supplies. Here we find harvest tools of all kinds, hay forks, ropes, chains, whiffletrees, neck yokes, saws, wire, wire fencing and so on.

At the rear is found the stove department. A large stock of stoves and ranges is kept, all sizes and varieties being shown.

At the front of the store on the right of the entrance, is found the builders' hardware department. Back of that, the sporting goods are stored.

In the centre of the store and exactly opposite the main entrance are a number of handsome silent salesmen, mounted upon marble bases, which contain a most elaborate collection of cutlery, silverware, brass goods, nickel-plated ware, chafing dishes, candelabra, scissors, shaving outfits, etc. It is indeed a "glittering array" which greets the customer on first entering the store, and this department has become, as a re-

A View of the Main Floor of Ingram & Davey's Store, Showing the Shelf Hardware Department.



A View of the Warehouse Where Economical Arrangements of Goods Are Found.

sult, one of the most important in the establishment.

Separate Paint Department.

A description of the paint department has already appeared. Suffice it to say that this department is at the rear of the main store and has a separate entrance on the side street.

The offices are at the rear on the right hand side of the store.

On First Floor.

A broad, quarter-cut oak stairway, winding above the office, lends to the first floor.

This floor is divided into several departments. The first is given over to a collection of household goods—washing machines, wringers, refrigerators, churns, baby carriages, bath tubs, linoleum, and an additional stock of heaters and oil stoves. Although there is plenty of space here, every square inch of it is accounted for.

At the front part of the first floor the toy department is found. "Toyland" was established a year and a half ago, and it has developed into one of the finest and most profitable features of the whole business.

On the same floor is found the gas and electric fixture department. It is divided into two rooms, both fitted up with a most striking assortment of mantles, grates, fixtures and globes.

The Warehouse.

At the rear of the main store is the warehouse, a structure with cement floors and walls, against which lean miles of bar iron, steel and pipe, standing on end in deep cement trenches. In this building also is stored the stock of wire and wire fencing, horse shoes and iron work of all descriptions. The warehouse is not exempt from the rule which governs the whole establishment, and has been set aside as the special domain of one member of the staff.

On the upper floor of the warehouse is the tinsmithing and plumbing department. The shop is fitted up with the latest machines.

In the Basement.

The basement is used for the storing of glass. The whole of one wall is lined with cases for glass of all sizes and quality. The rest of the basement space is used for storing chain, ropes, nails, building paper, white lead, cement and stock of a similar nature.

Department Managers.

The division of departments has been made on the following basis: — E. A. Davey has charge of the cutlery, silverware and sporting goods departments; Frank Barrett, of the mechanics' tools; G. A. Ferguson, of the builders' hardware; J. L. Campbell, of mill supplies, farmers' supplies and stoves, the last named in conjunction with Mr. Barret; C. A. Hood, of the paint department; R. W. Langs, of "Toyland" and the electric department; A. Lewis, fore-

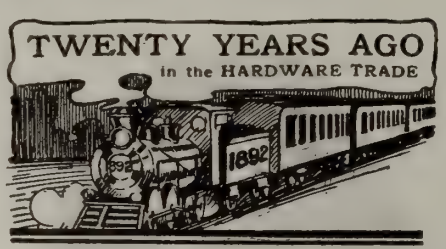
G. A. Ingram, President and Treasurer.

A View of the Store and Warehouse of Ingram & Davey.

man of the tinsmithing and plumbing; Chas. Hodge, of the warehouse; R. H. House has charge of the basement.

The members of the firm state that this plan has brought returns in the shape of improved service and stimulated interest on the part of the staff members. In so large a store it is impossible for any one man to take complete charge without some sections being allowed more or less to suffer. The departmentizing idea has solved the difficulty perfectly. Every section of the store is kept in A1 condition.

G. W. Davey, Vice-president and Manager.



The following items were taken from the issue of April 9, 1892:—

"Frankel Bros., metal dealers, George Street, Toronto, have bought out the stock of the Toronto Mill Stock and Metal Co., River St."

Editor's Note.—Frankel Bros. moved into a large new building on Eastern Ave. about a year ago.

* * *

"It is sixty-two years since the firm now known as Aikenhead & Crombie started a hardware business on the corner of Yonge and King Streets. In 1830, the firm name was Ridout Bros., afterwards changed to Ridout, Aikenhead & Crombie, later still Aikenhead & Crombie. To-day the old corner knows them no more. They have moved to 6 Adelaide Street East."

* * *

"The Ontario Iron and Steel Co. has been formed with a capital stock of $1,000,000. The provisional directors are: Elias Rogers, H. S. Howland, Robert Jaffray, J. K. Kerr, H. N. Baird, A. S. Irving, W. D. Matthews, George A. Cox, John I. Davidson, G. T. Blackstock, H. L. Hime and T. D. Ledgard."

Self-Wringing Mops.

Sumner Co., Moncton, N. B.—"Can you give us name of Canadian manufacturers of self-wringing mops?"

Tarbox Bros., Toronto.

Fort William, Ont.—The Copp Stove Works are again being enlarged. A new building is to be erected 150 feet by 70. Building operations will commence as soon as the weather conditions permit.

Complete Course of Sheet Metal Work

By L. W. KOSER

In problem 17 plate 16, we show a T joint between a large and a small pipe. The circle fig. 1, representing the large pipe, is first drawn; then the circle fig. 2 representing the small pipe.

Then the arm of the small pipe joining the large one, as shown A B C D, is drawn.

Now construct the elevation fig. 3, and the plan Fig. 4 with the arm M. N. O. P.

We first want to develop the mitre line M.P. To do this divide one-quarter of the small circle Fig. 2 into equal spaces and project lines from each of these points until they touch the circumference of the large pipe Fig. 1 and number them the same.

Now divide the plan Fig. 4 into the same sized spaces as Fig. 2, and project lines up from each number any distance so they will intersect lines drawn from the numbers on the circumference of Fig. 1. For instance a line is drawn from No. 4, Fig. 1. Then a line is projected up from No. 3 and 5 and is intersected by a line from No. 3, Fig. 1. Then a line is projected from Nos. 2 and 6, and is intersected by a line from No. 2, Fig. 1. A line traced through the points of intersection gives the mitre line.

The stretchout Fig. 5 is then laid out and the pattern developed for the arm M. N. O. P. as explained for problem 14.

To get the opening H. Fig. 6 it is only necessary to lay off enough of Fig. 1 to accommodate the size of the opening.

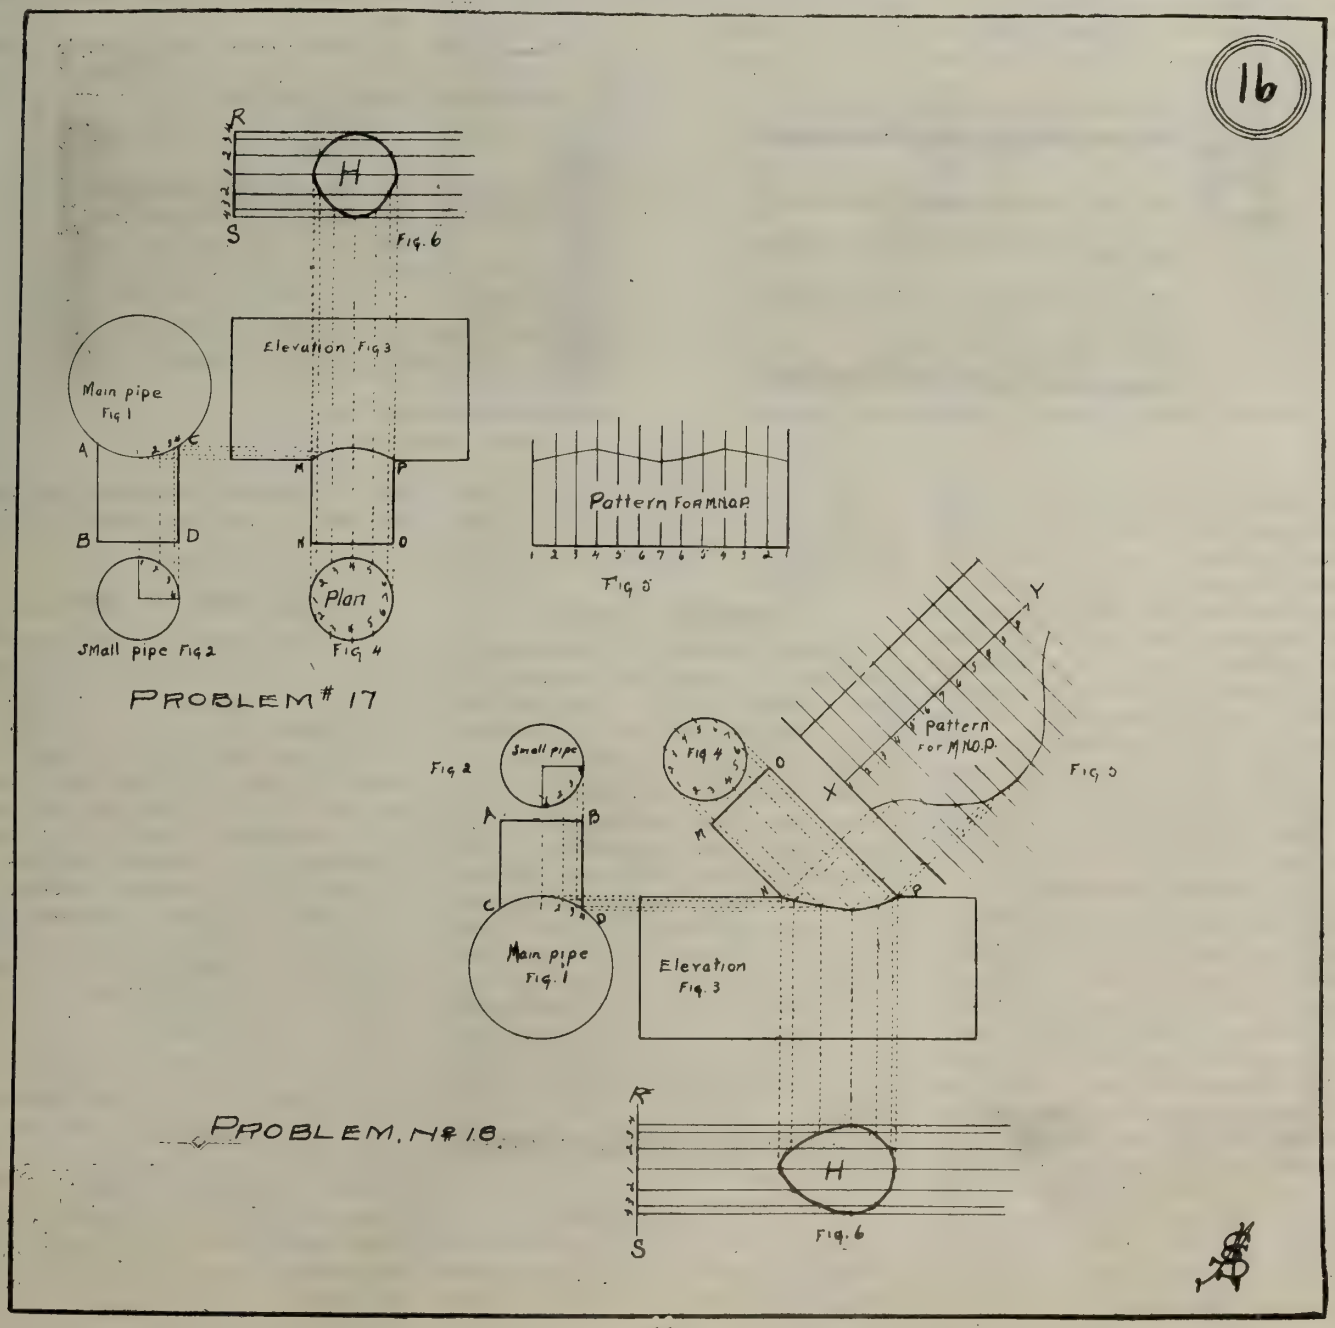
To do this lay out a line as R. S. Now set one point of the dividers at Fig. 1 and the other at 2, and transfer into spaces like this to the line R. S.

Have 1 in about the centre of this line and two on each side of it.

Then transfer the spaces 2 and 3 and 3 and 4. Each space it will be noticed is smaller than the last.

Then the line 4 to 4 represents the amount of space which the small pipe Fig. 2 takes up on the side of the large pipe Fig. 1.

(Continued on page 44.)



Lesson 12---Course in Cardwriting

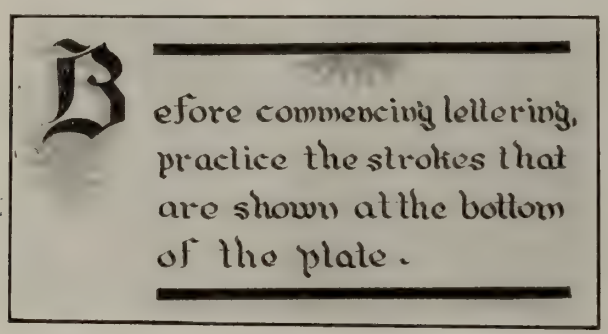
A Style of Alphabet Suitable for Use as Headlines or for Special Fancy Cards, But Not Appropriate for Sale Cards—Decorative Features.

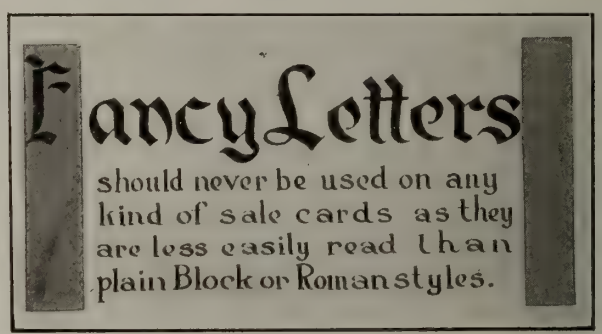
By J. C. Edwards. Copyright, Canada, 1911.

No reasonable argument can be used to uphold the use of fancy letters as practical for sale cards. The plainer a letter is the more readable and therefore, the more productive of results.

Though this course has been compiled with the express purpose of presenting the reader with only practical alphabets for use in modern show-card writing, there are times when the less practical lettering is advisable even in every-day work.

There are times when a fancy trim is called for, and while a plainly lettered card is proper, yet a fancy touch is more in harmony. Now this fancy touch does not need to be so fancy as to detract from the legibility of the card—it must be quickly made as well. Old English lettering, in its original set style is not practical and is less readable than almost any style used in lettering to-day. Yet it is a handsome letter and when nicely written makes a fine effect. This is the reason why we present here a corrupt version of the Old English, taking away the fussy parts and transforming the letters into an easily and quickly written style which can be read without trouble.





Cards showing application of flat stroke fancy lettering and decorative effect.

Placing Emphasis.

Where one word or so requires to be brought out more prominently in the inscription this letter may be used effectively. This is demonstrated in the card reading "Fancy Letters should never be used on any kind of sale card, etc." The words "fancy" and "letters," being the subject, and the most important parts of the card are made prominent by the use of this alphabet. The small letters in the reader of the inscription are made with a small soennecken pen (No. 2½). This lettering will be taught in later lessons.

The decorative feature of this card is the grey panel scheme used at both ends of the card—the one on the left being used as a relief for the capital F. The other card illustrates the use of flat stroke fancy lettering for the whole inscription. Note how much harder it is to read this card than the one previously described. Compare the two and you will readily see the reason for not advocating this or any fancy letter for sale or quickly read cards.

A very simple form of decoration is used in this card, but which adds just enough life to relieve the plain black and white appearance.

At the bottom of plate 12 there are a number of strokes given which, if practiced, will give the elements of this letter and be of great aid in helping you to master it.

Persistent Practice.

Persistent practice will accomplish a great deal in card-writing, in fact, it is the secret of success. You may ask where this style of letter would be used to advantage.

Your special sale cards may bear the formal inscriptions lettered with "Flat Stroke Fancy" and illuminated in whatever way you may desire, or they may have an informal inscription with the main words in "Fancy." Your Easter cards, your Christmas cards and such important cards may be made with this style of lettering. In fact, new goods cards where quality and style—not price—is the main feature, may be lettered to a more or less degree with this "Flat Stroke Fancy" lettering. You must use your better judgment in deciding what you use.

The Use of Capitals.

Capitals of this style of letter do not blend well together. They are even less readable than the lower case and should never be used only at the beginning of a sentence or when only two or so words are used as the headline they may all begin with a capital.

There are only about three letters in the lower case which are like the capitals and these are S and X and Z and even these are slightly different inasmuch as the S in the capitals has the lower or last stroke continued right up and across the face of the letter. The Z is practically the same but the X is finished slightly different. The rest of the letters are decidedly unlike each other.

The lower case is more simple to execute. A number 7 red sable flat brush was used to make this plate.

OLD BOYS TO DINE.

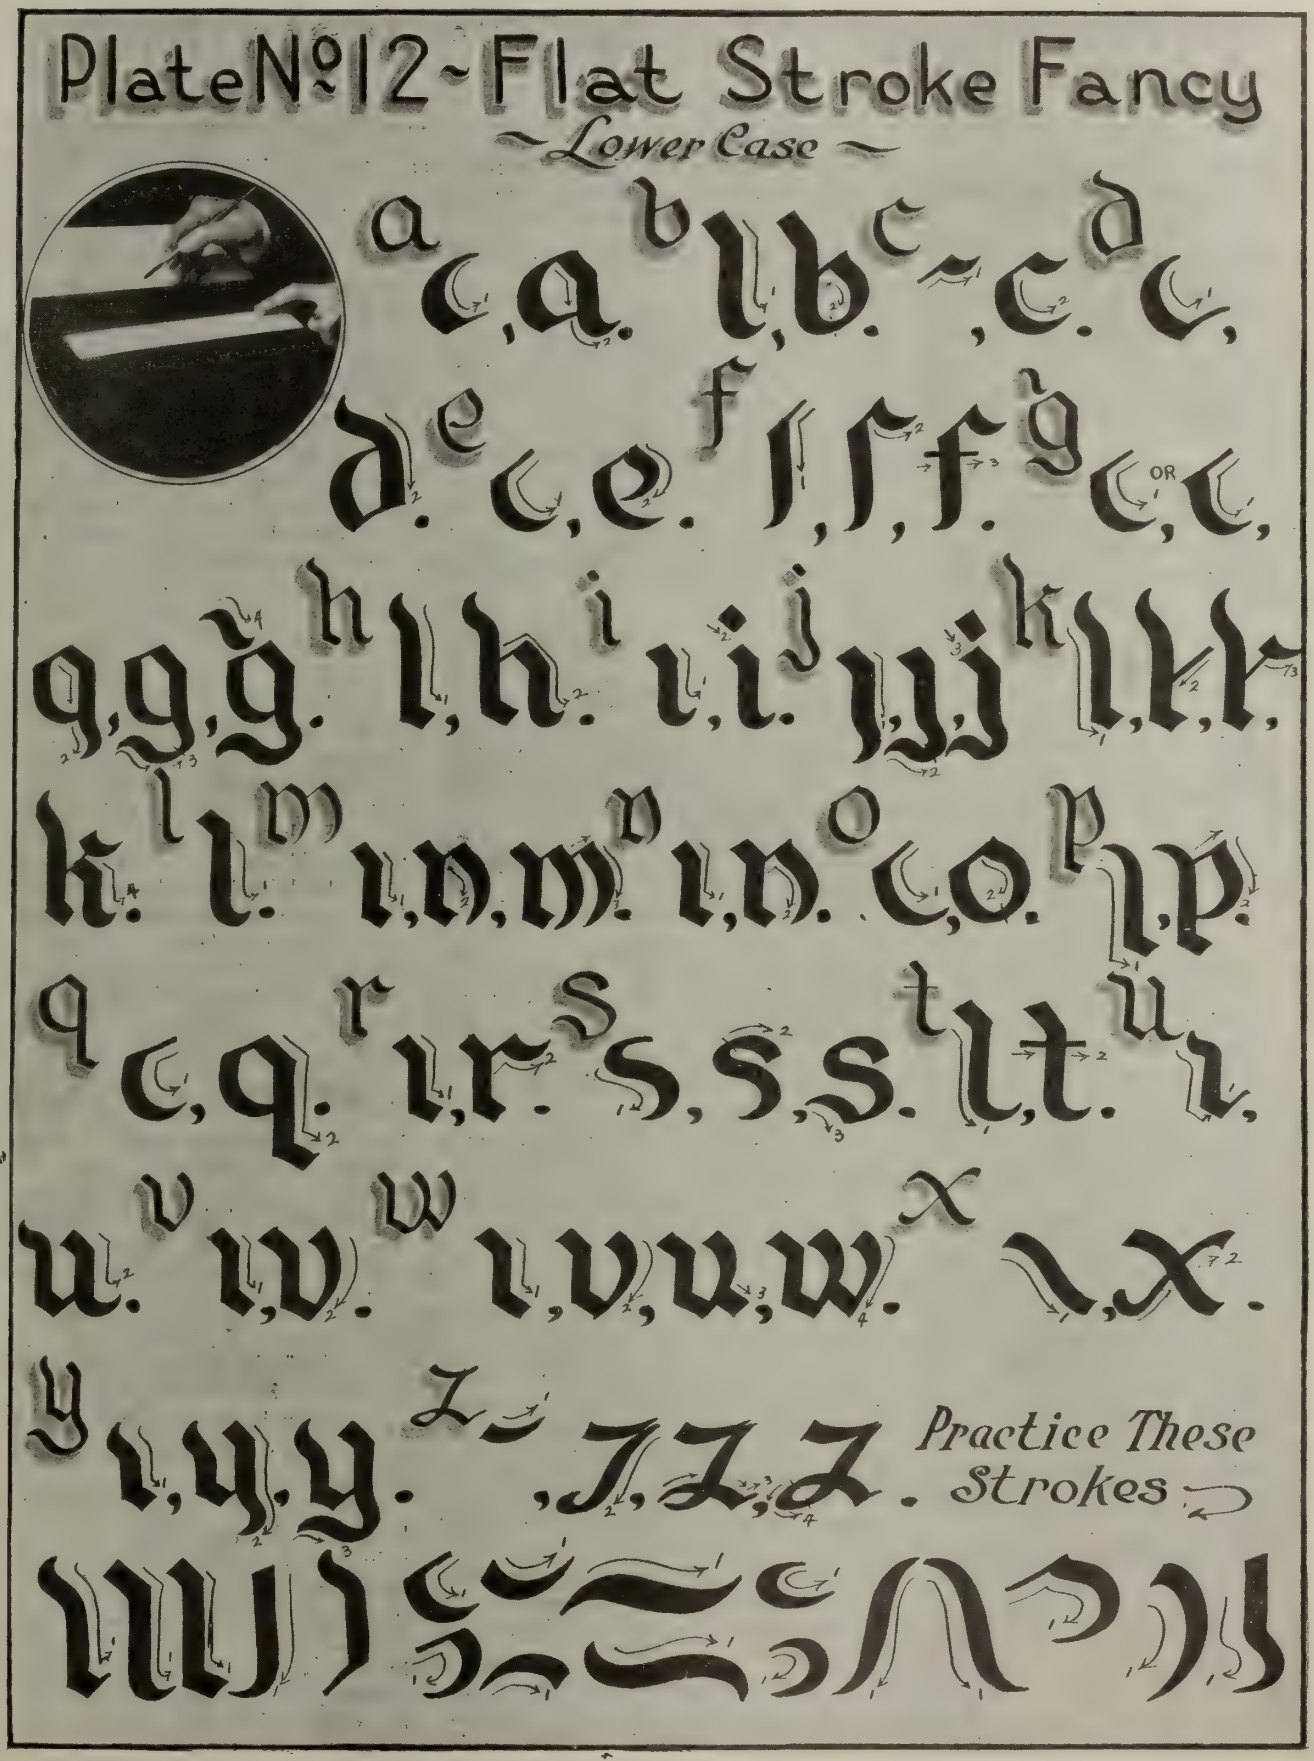
On Friday, April 19, the Kingston Old Boys of Montreal, will hold their annual dinner at the Engineers' Club, 9 Beaver Hall Square.

It is hoped that all travelers who once resided in the old "Limestone City" and now living in Montreal, will send in their addresses to the secretary, Hugh C. Walkem, 127 Coristine Building.

Courtlandt M. Strange, director of Lewis Bros., Limited, is president, and T. E. Merrett, Inspector of Agencies of the Merchant's Bank, is vice-president of the Montreal branch of the Kingston Old Boys' Association.

J. G. Lewis, of Lewis Bros., Montreal, is spending a couple of weeks at Atlantic City.

Frank Stafford, of Stafford & Co., Combermere, is now preparing to erect a new hardware store. He was in Montreal calling upon a number of friends this week.



Flat stroke fancy lettering, which has its more practical value in the various decorative purposes to which it is applicable.

Progressive Hardware Retailing

A Demonstration of Water Heaters Which Has Brought Good Results—Firm Advertising Wire—Kingston Firm Move Into Fine New Store.

WIRE ADVERTISEMENTS.

Fredericton, N. B.—James S. Mill & Sons are making a special effort to attract the trade of the farming class. Their advertising matter recently has been of a forcible character, taking up such lines as barb wire, crimped frost-proof wire, plain galvanized wire, plain twist wire, wire woven fence, gates of all sizes and similar lines.

SELLING BIG STOCK.

Seaforth.—G. L. Chesney, successor to Chesney & Archibald, is holding a clearing sale of all his stock, which is valued at $5,000. He intends to go out of business in Seaforth and leave for the West, and is intending, therefore, to dispose of all his stock. All goods are being offered at a large discount and the sale is being heavily advertised.

WATER HEATER DEMONSTRATED.

Saskatoon, Sask.—A demonstration of an instantaneous electric water heater has been conducted at the store of the Westhaver Hardware Co. One of the heaters was placed in the store and connected up so that it could be shown to all interested. It has been kept working pretty steadily for the past few days and the value of the article is being pretty widely recognized as a result.

MOVE INTO NEW STORE.

Kingston, April 9.—Simmons Bros. have moved into their new quarters on Princess Street, in the building formerly occupied by H. Skinner & Co. and the Yellow Store, as it is known, is now in full swing. The history of this firm, one of the best known in this district, is that of remarkable growth and development of business. And it was this that necessitated the removal into the new quarters.

The main store has a ground floor of over 5,000 square feet. This gives every opportunity for the display of goods, and at the same time, serve customers in comfort. The back premises included three buildings, which contain the mechanical plants, comfortable offices, with lavatory upstairs and immediately to the rear is a large stock room. The business is divided into four departments, viz., tinsmithing, plumbing, hardware and stoves, and each one has an expert. Every branch of the work has met with success.

Special pains have been taken to make the front of the store attractive, which is always a good thing, as first impressions always stay. New plate glass windows with prism tops have been put in, and this makes the interior bright and cheerful.

By "Mack."

It is a critical time for the majority of business men in my view when a proposition is laid before them for acceptance which does not demand an exchange of values.

In other words, "receiving something for nothing."

There is a fascination in the belief that sometimes the Goddess of Fortune may in a generous mood single one of us out for her favor and that is probably why we strain the sense of hearing in listening for the call to affluence.

Sometimes these calls appear under the caption of opportunities if we accept the interpretation of the newspaper advertisements which give publicity to various promotions.

And it may be the part of prudence to agree with the statements emphasizing the importance of these opportunities and make them our own opportunity of showing the wisdom of avoiding such allurements.

Many are the forms in which our cupidity is inflamed by the offering of something tangible which does not fulfil our expectations.

I know in every day business it may appear in the temptation to buy goods in excessive quantities.

Take a carload and you make an extra profit of perhaps five or ten per cent., you are urged.

Upon the surface this theory appears proven, and it should seem that so much additional interest has as we say, been made for nothing.

This hope is soon sunk in despair when it is discovered that demand is over estimated and the superflous quantity must be in the language of the trade "Carried over."

We are, therefore, made to pay in another form sometimes more than the price for smaller quantities of merchandise.

It seems that there is an underlying economical law which prevents us from creating something out of nothing.

To get our desires legitimately it is compulsory to work for them.

In the last public interview that Inventor Edison gave to the Associated Press he laid down the axiom that nobody gets anything without effort.

Not even an Idea.

He went on to say that all he did was to be in the laboratory during his work hours and wait for impressions and keep working at something all the time.

Moreover, when absent from the workshop he avers nothing comes to him as an idea for future development. It is imperative to have the proper environment.

May we not believe that it is fair to draw an analogy between Mr. Edison in his laboratory and the retail merchant in his store?

COMPLETE COURSE IN SHEET METAL WORK.

(Concluded from page 41.)

Draw the measurement lines from each number.

Now place the T-sqr. parallel to the line R. S. Bring it against the different points on the mitre line and cut out the corresponding measurement lines as explained for problem 14.

Problem 18 is an oblique intersection between a large and a small pipe.

First draw the main pipe Fig. 1, then the small pipe Fig. 2, then the arm A. B. C.

Then the elevation Fig. 3; then Fig. 4 and the arm M. N. O. P.

Divide one-quarter of Fig. 2 into equal spaces and drop lines to Fig. 1.

Current News of Hardware Trade

Fire in Moulding Shop.

Montreal.—Fire broke out in the moulding shop of the Caledonia Iron Works Tuesday night. Considerable damage was done.

New Companies.

Letters patent have been issued incorporating the Granby Hardware, Limited, with a capital stock of $250,000; head office in the town of Granby, Quebec.

Address on Salesmanship.

Quebec, April 11.—At a largely attended meeting of the Retail Dealers' Association of the city, held in the City Hall last night, J. A. Naud, of the Martin-Senour Company, Montreal, delivered a striking address upon the subject of salesmanship.

No Bond Issue.

In last week's issue a mistake was made, it being said that Brandram-Henderson were making a new bond issue. The mistake occurred by reason of a somewhat misleading advertisement printed by a Bond House which is fortunate enough to have $10,000 of the old bond issue made by the Brandram-Henderson Company. The truth is that a reserve fund is yearly being set aside from the earnings to buy in this old bond issue, a good block having just been purchased by the company.

The mistake about this supposed new issue was not made by the Eastern Editor of Hardware and Metal alone. A number of business men, seeing the advertisement of the Bond House in a Montreal daily, telephoned Brandram-Henderson officials asking for further information. Had there really been a flotation it evidently would have been rapidly snapped up.

Business Changes.

Liberty, Sask.—A hardware store is being opened here by Duncan & Smith.

Pratt, Man.—A hardware store is being opened here by a merchant named Beham.

Keremos, Alta.—E. M. Crooker has disposed of his hardware business to Ezra Mills.

North Bay, Ont.—A new hardware store has been started here by Doyle and Munns.

Strathroy, Ont.—Alexander McDougall has purchased the Thomson hardware store. Mr. Thomson intends moving West.

Strome, Alta.—The hardware business of Ellison and Bradley has been taken over by Mr. Story, who has been in business at Camrose for more than a year past.

Uxbridge, Ont.—McGowan Bros., who have been in the hardware business here for 40 years, are selling out. It is their intention to go to Los Angeles in the fall.

St. Thomas, Ont.—Geo. McMurtry, hardware dealer, has bought out the tinsmithing business of J. Bradley, Ross Street. He will manage it in conjunction with his hardware business.

Leamington, Ont.—H. Lendon, hardwareman, has bought J. S. Greenhill's hardware store, and will conduct the two businesses under one management. Heavy work, tinsmithing and plumbing will be carried on in the Talbot St. east store, while the Talbot west store will be devoted to light hardware. Mr. Ives, chief clerk for Mr. Lendon, will have charge of the Greenhill store.

Morinville, Alta.—Joseph N. Cote, who has been in charge of the hardware and furniture departments of E. H. Ward's general store, has purchased these departments and will continue them for himself. Mr. Cote is a young French-Canadian who talks English and French equally well. He began as a chairmaker in Gardner, Mass., and now at the age of the 23 years, is in business for himself.

Mirror, Alta.—Chas. Roy, manager of the Roy Hardware Co., has disposed of the building and stock to Hans Kiesel, who will carry on the business under the name of the Mirror Hardware Co. Mr. Roy is going to Edmonton, where he will engage in real estate work. Mr. Kiesel has had several years' experience with Ross Bros., Edmonton, both in the retail and wholesale departments. Previous to that he travelled in Europe, Asia, and Africa, and is a linguist of some ability, being able to carry on a conversation in nearly all of the European languages.

Personal Notes.

J. E. Julien, of Point Rouge, spent Monday and Tuesday in Montreal.

Humbolt, Sask.—W. A. Westwood, hardware dealer, is on a visit to the East, and rumor has it that he will not return alone.

George J. Rogers, president of the Rogers Hardware Company, Charlottetown, was in Montreal on business this week.

TO RUSH WORK AT MINE.

Kingston, April 9th.—At the annual meeting of the North American Smelting Company, held in this city, it was stated that the company would rush its work at the Perth Road mines, and it was also stated that the concentrating mill would be in operation by the time the Canadian Northern Railway commences to run the railway through there. The line runs across the company's property, within 120 feet of the main working shaft and mill. William M. Weigel, who had charge of the construction, and was superintendent of the National Lead Smelter, East St. Louis, Mo., and one of the most efficient smelter experts in the States, has been secured as general superintendent. It is expected that lead will be shipped from the smelter by June 1. The final completion and installation of the furnaces will be rushed so as to start operations about June 1. At first, fifty men will be employed.

The officers elected were:—President, Robert E. Cushman; vice-president, O. L. Cushman; treasurer, Chas. N. Putnam, Alexandria Bay. The directors are Robert E. Cushman, O. L. Cushman, William M. Bristol, New York; Wallace W. Holmes, Redwood, N. Y., Chas. N. Putnam, Alexandria Bay, N. Y., W. G. Craig, Kingston, T. J. Ford, Toronto.

Catalogues and Booklets

Anti-Friction Metal.

The Magnolia Metal Company have issued new booklets in English, Spanish and Portuguese containing testimonials asd tests describing the uses of Magnolia Anti-Friction Metal, and giving full directions for pouring the metal.

Paint Pamphlets.

"Paints and Painting" is the title of a highly instructive pamphlet, issued by Lowe Bros. It tells "how to secure best results and avoid unnecessary failures," and contains practical suggestions for painters and paint users on the importance of proper foundations and good coatings. Paint will fail unless the material on which it is spread is in proper condition to receive it. Illustrations are given of the bad results obtained from the use of cheap paint, and the consequences of faulty application. Blistering, flatting, cracking and peeling are illustrated, and the methods of preventing them are explained. The pamphlet contains a wealth of valuable information.

Stoves, Furnaces and Accessories

Energy Needed in Spring Campaign

Dealers Should See To It That Stoves Are Featured—Housecleaning And Moving Help To Increase The Demand For Heating Goods—The Importance of The Gas Range Trade.

The spring brings a stimulation of business in practically every branch of hardware.

The stimulation is felt in the stove department. Although trade in stoves is not as brisk in the spring as it is at other seasons, as in the fall for instance, a profitable and brisk business can be done if the dealer makes an effort in that direction.

In the first place, spring is housecleasing season, and the housewife is more apt to realize the need of a new stove then. If the stove in the house is old, the mistress finds out that it requires a tremendous amount of work, of shining and polishing, to make it look in keeping with the rest of the place. "We need a new stove," is the mental note made by probably one housewife out of every two during housecleaning. This refers particularly to ranges. In many homes, the range does duty right through the summer. It is a matter of double importance, therefore, that it should be in good working order. A cranky range is sure to be at its crankiest in summer when it is only used off and on; and the housewife's temper is apt to become cranky in keeping.

The Moving Trade.

Then there is the moving trade. April and May are the migratory months. More families move during those two months than during all the rest of the year. These people can be considered as more or less good stove prospects. It is a trait of human nature that when a man turns over a new leaf he wants to go the whole distance. Half measures do not satisfy. It is the same with making a change of any kind. It is natural to desire a complete change. When a family move to a new house, the more complete the change can be made in furnishings and general arrangements, the better they are satisfied. Moving generally entails the purchase of quite a little new furniture as a result. It is quite natural, therefore, for the family engaged in moving to feel that they need a new stove. "Might as well make the change now," is their likely comment.

Moving time is the "psyscological moment" for the stove dealer to see these people. Once they get the old stove moved in and set up, it may be a year, or several years, before they will feel impelled to make a change.

The case is recalled of a dealer who made it a rule to call personally on every man or woman who was moving. As the town was not overly large he had no difficulty in finding out the names of all families who were moving or contemplating a move. "I always got a hearing." he states. "I don't recall a single instance where I failed to get the people interested. They are keen to buy and the only objection I ever meet is that, on account of moving expenses, they cannot afford to purchase just then. I make sales in a large number of cases. Frequently, of course, the sales are made on the time basis."

"I have found," he continued, "that people are always anxious to have the house they are moving into look its very best. They will stretch a point or two every time to buy a new range or stove. If a time payment basis is proposed, they nearly always 'fall for it.'"

The Gas Range Trade.

An important feature of the spring trade is the demand for gas stoves. The gas range, once a luxury, has become a necessity. No house is now deemed properly equipped unless it has one. The sales of gas stoves is Canada are estimated to have been quadrupled during the past ten years. This is a rough estimate and it is quite possible that the increase has been much larger than that. At any rate, it is certain that there has been a most remarkable growth in the demand of late years.

The trade is centered largely in the spring and early summer. It devolves on the hardware dealer, therefore, to pay particular attention to this branch of his business at the present time.

An energetic Ontario dealer informed the writer the other day that he had already sold a couple of dozen gas stoves. "I seized the opportunity presented by the first touch of bright weather," he explained, "to put a couple of gas ranges in window. I had them connected up and kept them lighted in the evenings with a kettle boiling on top. Quite a little attention was attracted in that way. At the same time I put some live advertising into the local papers and the combination got people thinking and talking gas stoves. The nice weather didn't last long but it kept up long enough for my purpose. I've had good sales off and on ever since."

Is Importance Realized?

That the importance of the gas stove trade is not realized to its fullest extent by quite a large number of dealers is the statement made by the sales-manager of one large manufacturing concern. The possibilities of trade in this line, he contends, are practically without limit.

"Look at it this way," he states. "The gas stove has become practically a necessity and yet at least half the homes in our cities and towns still lack them; considerably more than half, I should say. Now if an energetic campaign were conducted and every householder without a gas stove were approached the sales would be enormous If the dealers went after business as energetically as the piano men, for instance, they could sell fifty thousand gas ranges in no time — provided that the manufacturers could supply them."

There is undoubtedly a splendid field. It is probably true, also, that a great many dealers are not realizing on the opportunities presented for the sale of gas stoves.

There is no time like the present to "turn over a new leaf" in this respect. Get after the gas stove trade, Mr. Dealed. It presents possibilities not excelled in any line.

A SUCCESSFUL SEASON.

The hockey season just closed has been the most successful in Winnipeg's history. Among the minor leagues, the Wholesale Hardware undoubtedly ranks as the fastest, and the fans who follow its fortunes are always assured some fast and exciting games.

As a result of the season's play, the handsome cup donated by the Starr Manufacturing Company, will spend another summer with the Wood, Vallance, Limited boys, while they also have the honor of holding the new Dixon Cup on its first presentation. This is a very fine trophy presented to the league by the Joseph Dixon Crucible Co., Jersey City, N.J., for annual competition.

The Wood, Vallance team came through without a defeat, while the Ashdown septette came under the wire in second place. The first games, Wood, Vallence vs. Ashdown and Wood, Val-

lance vs. Miller-Morse, were the closest encounters, and furnished lots of excitement for the large crowds present.

An enjoyable feature this season has been the excursions to country points, the speedy hardware boys on several occasions playing games with nearby towns.

The league officers for the season were:—W. F. Auger, President; C. C. Nash, Secretary-Treasurer; Committee, H. Fargey, H. Lloyd, C. Nash and C. J. Delaney.

The following houses were represented in the league:—Wood, Vallance, Limited, J. H. Ashdown Hardware Co., Miller-Morse, and Merrick-Anderson.

Weekly Market Report---Stoves

PROSPECTS ARE BRIGHT.

The stove industry is experiencing a marked stimulation of trade and manufacturers agree that prospects ahead are of the brightest. All reports are to the effect that the demand so far has shown a healthy increase over last year. The gas stove trade is showing a healthy improvement.

Advances are expected in some lines of kitchen gods.

MONTREAL.

Montreal, April 11.—Trade in stoves and similar lines is improving daily. Still some trouble is being experienced with deliveries, but as the rush, which came immediately following the striking of the lower freight rates on April 1 subsides, the service is becoming better.

Prices changes have not been made for some little time, but there are rumors of changes in the air. Stoves, it seems, will not be connected with any different level which may be struck, but rather the new rate will apply to kitchen ware. It has been indicated that the advanced figures charged for tin plates, by reason of the coal strike, would likely result in a higher price being fixed upon all kitchen tinware. It now seems that this higher figure will be fixed within the next few days. Undoubtedly this is a good time to buy kitchen ware. It is practically certain that an advance on a number of lines will be effected shortly.

Better Class of Refrigerators.

Spring Goods.—Refrigerators are beginning to move rapidly now, and it is noticeable that more of a higher grade are being ordered than in past years. The reason for this not altogether that the people are asking for better goods, but also that a number of manufacturers are stopping the production of their cheaper lines. As one man said, "we find it better to make $100 out of 40 sales, than to make $100 out of twice that many transactions.

There is still a good demand for milk cans, sap pails and similar lines. Kitchen ware is moving largely—and more largely all the time. There seems no satisfying the hardware men with their stocks of this.

Ranges Moving Rapidly.

Ranges, Heaters and Furnaces.—The time for ranges is here once more. All the manufacturers report good orders. The stocks which they have been establishing during the winter are ample, but the spring demand is sure to cause a great diminution of these.

Heaters are in some small demand, though only in certain sections. For the ranges the demand is general.

Furnaces are being bought by some contractors who are finishing jobs, but the call is not at all large.

Gas Stoves.—Good business is being done in this line. Sales managers are already beginning to complain of difficulty in getting the goods from their factories. The retailers are playing up the gas ranges to the best advantage, and purchases are being made rapidly.

TORONTO.

Toronto, April 11.—Trade has shown a great improvement during the past week. Orders are now coming in from all sections and for every kind of stove. The amount of business being done is largely in excess of the usual spring trade.

"It is rather early in the year to talk of prospects," said one stove man, "but certainly everything begins to look like a record year. We are doing more business than ever before already and we have have no hesitation about laying our plans for a larger fall trade than we had last year; and last year was by long odds the biggest we ever had. Our travelers tell us that the dealers on their routes are expecting to have bigger sales. The demand from the west is certain to show a large increase."

The settlement of the strike in the old country has relieved the manufacturers of considerable anxiety. While it would not have had any very direct detrimental effect, the industry would undoubtedly have suffered to some extent.

Ranges.—The demand for ranges is quite large. There is, of course, more or less call the whole year around but it is not often that the early spring brings as large orders as are coming in at the present moment. Dealers are securing shipments of large bulk.

Heaters are also in better demand, although orders are not yet large or numerous.

Gas Ranges.—Business is exceptionally brisk in this branch of the stove industry. Large orders are being placed. This is particularly the case in the cities where the use of the gas range is becoming universal. Even from smaller centres orders are being received regularly.

One manufacturer estimates that the output of gas stoves this year will show an advance of at least twenty per cent. over last year. It is a little early yet, however, to indulge in speculation of this nature and nothing can be stated with any degree of certainty.

Furnaces.—The furnace industry is showing every sign of spring activity. Building operations are already under way, particularly in the cities, and most furnace men have enough work on their hands to keep them busy.

Hardware Letter Box

Magic Vacuum Cleaners.

F. Hoar, Barrie, Ont.—"Who are the manufacturers of the Magic Vacuum Cleaner."

Can any reader give this information?

Fireless Cookers.

D. Leckie, Kelowna, B.C.—"Will you kindly tell me who manufactures fireless cookers?"

Toledo Cooker Co., Toledo, O.

Squaring Hand Shears.

E. Boucher, St. Hyacinthe, Que.—"Can you inform me where I can procure squaring hand shears, 15-inch, which fold like a mitre box?"

Peck, Stowe & Wilcox, Southington, Conn.

SITUATION WANTED

GENERAL HARDWARE — YOUNG MAN with three years' experience desires position; temperate, good salesman and stockkeeper. Can furnish best of references. Must be in first-class store. Box 658, Hardware & Metal, Toronto. (15)

Weekly Market Report --- Metals

SHORTAGES AND ADVANCES.

The metal market has been featured by a general tendency toward higher prices, brought about in some cases by the shortage in the supply. Metals are scarce all around, spelter particularly so. At some points, there is positively no spelter on hand.

Copper keeps on the upward path. Tin and lead are firm.

MONTREAL.

Montreal, April 11.—A great scarcity of almost all metals renders the market here rather trying, both for those who wish to buy and for the handlers. Part of this scarcity—a large part—is due to the coal strike in England. Part is the result of poor transportation facilities which are making it practically impossible for the handlers to get their supplies in anything like reasonable time. So bad have the railway facilities become that metal men are wondering if the roads will catch up with their shipments by the time the heavy shipments of next fall commence. There is talk of getting the Board of Trade to look into this matter.

All Metals Scarce.

Following the advance in copper of last week there has come another advance, with still greater rises looked upon as quite likely. Tin is up, and seems likely to remain firm, or perhaps to climb higher. Spelter and lead are scarce and high in price. The volume of business done is satisfactory—indeed there would be great difficulty in filling orders if they came in too rapidly. Even now there is much borrowing of certain metals, and for some the handlers hesitate to make bookings at the present prices.

Tin.—On Wednesday there came a small decline, but this was only a passing fluctuation. The general trend of the market has been upward for some time. The opinion is that there may be a decrease in stocks toward the end of the month, which will keep prices firm—at the present figure or higher. Locally there is practically no tin to be had. The handlers are in bad shape.

Ingots and Sheets Scarce.

Copper.—The ingot metal has been advanced 50c. a cwt. to $17, and it is generally understood that there will be another rise shortly. There can hardly be any other movement unless stocks increase greatly.

Sheets have advanced 2c. a pound. A local mill having been burned it will be necessary for a good deal of this material to be brought in from the States at a higher price. This fire makes the future of sheets a little more uncertain than would otherwise be the case, for it will be come months before production can be resumed.

Antimony.—This market is exceedingly firm. The stocks are well nigh exhausted, and those who must have this metal to continue manufacturing are experiencing some uneasiness.

Won't Guarantee Futures.

Spelter.—Scarce is the word that applies here too. Some metal has come to Montreal recently, but not nearly as much as is needed. The future will probably be all right, for the transportation troubles once over, good stocks will be received.

Lead.—Little of this to be had. The stocks have not been replenished for some time, and owing to the likelihood of little metal being on the first shipments, there is little chance of a greater supply of this metal in the next few weeks. Prices remain steady.

Iron.—Usually the handlers in England keep good supplies. These have fallen off during the strike, and now will need to be built up. Because of this it is not at all certain that a lower price for iron will be attained. One local handler, indeed, has refused to book an order for fall delivery at the present prices. He wants to cover before he takes this.

TORONTO.

Toronto, April 11.—The metal situation is featured by a singular shortage of supplies. In spelter, for instance, it amounts to an absolute famine. Metal firms state that they haven't any spelter whatever in stock and they are thus not in a position to fill orders.

The shortage is due partly to the effects of the mining strikes but mostly to the freight congestion. Now that the old country strike has been settled, there will be some improvement in certain lines but there is no sign of a betterment of the freight service. It is feared, in fact, that it will get worse as the season advances..

The general state of trade here is active, in spite of the handicaps thus suffered. In the opinion of local jobbers, the present demand presages a splendid year's business.

Tin is Firm.

Tin.—There have been fluctuations on the primary markets but no price changes have occurred here. Quotations vary from 46 to 47 cents and the general trend of the market is toward firmness. The demand is exceptionally heavy at the present time.

Lead Scarce and High.

Lead.—Small advances have been registered elsewhere in lead but the local price has remained steady. An advance in the near future here would not cause any surprise, however, for the metal is very scarce and it is in heavy demand.

Copper Advances.

Copper.—It has become a regular thing to expect an advance in copper. The price has been going up steadily and has now reached 16¾ cents here. This price is a little lower than might have been expected in view of the quotations at other points. Unless conditions show a radical change, therefore, the local price will see further advances in the near future.

Stocks continue light and the demand is so consistently heavy that the supply on hand is not likely to grow.

Spelter Cleaned Out.

Spelter.—If there is any spelter in Toronto it has been most effectually hidden away. The metal houses report that they are absolutely cleaned out of spelter and furthermore that they don't expect to get any in before next month. In the meantime it is impossible to fill any orders and buyers are not in a position to satisfy their requirements. Under the circumstances prices are quite nominal. Most of the metal houses are not quoting spelter at all.

An Improvement Here.

Plates and Sheets.—The shortage in plates and sheets has not been relieved by any means. The settlement of the mining strike in England, however, has cleared up all anxiety as to the future and it is believed that it will be possible to secure supplies before long. In the meantime, the stocks on hand are being used conservatively so that the situation is not likely to get any worse.

A firm tone is noted in pig iron. The advances of from 25 to 50 cents per ton have been closely maintained. There is a large demand.

Weekly Market Report --- Hardware

TRADE IS GOOD.

Despite the handicaps of unseasonable weather and bad freight service, the hardware wholesalers are experiencing an extremely heavy demand. The promises held out earlier of a record year's trade are being amply borne out.

MONTREAL.

Montreal, April 11.—Though the small floods which are reported on all sides are undoubtedly going to have a harmful influence upon trade, there has not been any evidence of this yet. The wholesale houses have been exceedingly busy this week. Orders for spring goods have been coming from all sides, and the problem has been to make deliveries. The freight troubles have improved somewhat since last week, but still the roads are heavy, making trucking difficult, and still the railway cars are none too plentiful.

The small floods, which will make some roads practically impassable, will certainly keep many farmers away from the stores, but the stop in ordering which will result will hardly be of long duration.

Collections Fairly Good.

Collections for the most part are reported as good, but in some sections there is a delay in settling; why this should be the wholesalers and manufacturers find hard to understand, for the dealers themselves are getting payment from their customers rather better than usual.

Spring Goods.—From the West especially come orders for these lines. Lawn hose is being bought largely there, as are sprinklers and lawn mowers. These goods are moving in the east too, but hardly as rapidly as in the far West, where a retail demand has already sprung up.

Garden tools are being ordered, while from the farm districts the dealers are laying in good supplies of wire fencing and barb wire. In the next few weeks there will be a good deal of repair work done on the farm, and the hardwaremen who supply the farmers are preparing to meet their orders.

A Good Time to Buy.

Kitchen ware of all kinds is moving well. There have not been any changes in prices, but these may be expected in some lines. If a fresh stock is needed shortly, the immediate present would seem a good time to buy tinware.

Builders' Hardware.—The call for this class of goods is increasing from week to week. Dealers in all parts of the country are laying in their stock. All have read the signs of the times, and are confidently expecting a large building year; those, therefore, whose stores are situated in a district where the building will take place, are preparing to supply the various hardware lines needed.

Is Bicycle Coming Back?

Sporting Goods.—These are now finding their way into the windows of the retailers, and also into the hands of the sporting enthusiasts. The snow has largely disappeared from the streets and yards, and in these the boys are playing ball. It will be a little later before the older players take the field, but they are now preparing for the season, and the retailers have felt the need of keeping their stock well assorted.

Bicycles are being carried in a number of hardware stores now. The bicycle, it would seem, is not convinced that it can not come back. Wheeling was a sensible pastime, as well as a fad, and seems likely to become popular once more.

TORONTO.

Toronto, April 11.—There have been serious handicaps to trade during the past week, to wit, the extremely bad weather and the inability of the railroads to handle freight. But the effect on the wholesale hardware business has not been marked. Trade is flowing along in such a steady stream that it would take a much more serious obstacle to create any serious loss.

The freight situation is causing a great deal of trouble, however. Not only are the dealers complaining about the delay in receiving shipments, but the jobbers are finding it hard to keep stocked up. "We have had shortages all along the line," said one wholesaler. "In fact, we have been running out of goods right along because the railroads have not been in a position to deliver us shipments which we ordered, and, in some cases, paid for long ago. The situation is very serious indeed."

Manufacturers Doing Well.

The manufacturers are grappling with the situation well this year. Despite the fact that the demand in most lines is better than ever before, they are turning out sufficiently large supplies to meet it.

Collections are reported to be only fair. The spring retail trade is being held back by the weather. As soon as an improvement is noted in this respect the collections will improve.

Seasonable Lines.—There has been a good demand for spring articles. The season is not yet far advanced for a big demand in such summer lines as mosquito netting, ice cream freezers, etc., but advance booking has begun.

Household Goods.—Business has been exceptionally brisk in household lines. Graniteware and tinware have been moving in large volume. Large sorting orders are being received for stepladders, mops, brooms, tacks, hammers, carpet stretchers and beaters, vacuum cleaners and the countless other articles needed at house-cleaning time. It is quite apparent that a heavy retail trade is being done in these lines.

Builders' Hardware.—The demand for all kinds of builders' hardware and contractors' supplies has shown a large increase. The active resumption of building operations in the larger centres has had the effect of bringing trade along somewhat earlier than usual. Mechanics' tools are selling well, some large orders having been placed during the past week in addition to many of the sorting-up variety.

Heavy Hardware.—Goods are moving out briskly. The commencement of building work has created an early and brisk demand in most sections. Price quotations are:—Discounts on carriage bolts, 3-8 and less, 60 and 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

Sporting Goods.—There is now a first-class call for practically every line. While the weather has not been exactly conducive to sport, it is recognized that the conditions must change shortly, and the dealers are stocking up in anticipation of the early advent of warmer weather. Trap shooters' supplies bulk pretty largely in the demand at the present moment. Guns, canoes, paddles, tennis goods, golf sticks, all lines are moving in more or less large bulk.

ADHERE TO CANVASSING RULE.

Stratford, Ont.—At a recent meeting of the Retail Merchants Association the question of allowing representatives of the Salvation Army and Children's Aid Society to canvass members at their place of business was discussed. The merchants decided to adhere strictly to the anti-canvassing rule, recommending that all canvassing of this sort be done at their homes.

Weekly Western Market Report

Trade Conditions Are Flourishing—A Shortage Noted in Formaline Stocks—Building Operations Are Now in Full Swing but Railroad Work Is Still Held Up by Weather Conditions—Collections Are Reported Slow.

Winnipeg, April 10.—There are no particular developments to report. Trade is flourishing and on all hands an optimistic feeling is shown. Spring work is now pretty general. The farmers are busy, and in the cities and towns industrial activity is making itself felt. The hardware jobbing houses have been experiencing a heavy demand for spring goods for some time past, but the trade has now reached almost to record proportions. Shipments are heavy at the present time.

Formaline Scarce.

A considerable shortage is reported in formaline stocks. Some little difficulty is being experienced as a result in meeting the demand.

A heavy trade is expected in bluestone, which is being used for doctoring seed wheat.

Prices Are Steady.

Prices are remaining steady, although there is a pretty generally firm note all around. It is not likely that there will be any changes in quotations until after the opening of navigation.

Building operations are now in full swing in all parts of the West. It is believed that all records in extent of development will be broken this year. In most Western towns there is already a great deal of public and private building under way, and reports are to the effect that the amount of building done in practically every centre will be in excess of last year.

The railroad outfits have not yet started to work. It is expected that weather conditions will soon permit the start of construction gangs. It is understood that they are all pretty well stocked up for a start.

Heavy Trade Here.

Trade is so good all around in hardware lines that it is extremely difficult to particularize. It is noteworthy, however, that the demand in carpenters' tools and cutlery has been particularly heavy. Business in these two lines has shown quite a remarkable increase.

Collections are still pretty slow throughout the West. This is almost always the case in the spring, however, and money is no harder to obtain at the present time than is usually the case at this time. An improvement in money matters is commencing to manifest ieself.

Winnipeg Hardware Quotations.

Ax Handles—Oval and octagon, s.g. hickory, $3.50; No. 1, $2.40; 2, $1.95; p.g. oak, $2.90.

Augur Bits—"Irwin" bits, 47½; other lines 70 and 10 per cent.

Bolts—Carriage, ⅜ and smaller, 65; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3; small lots, 2½; stove bolts, 77½.

Bar Iron—Bar iron, $2.50; Swedish iron, $4.25; sleigh shoe steel, $2.65; spring steel, $3.40; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $8.50; Jessop, $15.

Blocks—Steel, 50 per cent.; wood, 60 per cent.

Cut Nails—$3.15 per keg base.

Wire nails, base, $2.80 Winnipeg; $2.35 Fort William.

Copper—Sheet and planished copper, 30c per lb. Tinned, 24c. Copper wire, 3-inch gage, 24c, to 20-inch gage, 29c.

Crowbars—4½c per lb.

Corrugated Iron and Roofing, etc.—Corrugated iron, 28 gauge, $3.87; 26 gauge, $4.18; pressed standing seamed roofing, 28, painted, $2.84; 26, $3.24.

Canada Plates—Firm. Half polish, 6 and 7-inch, $3.65; 8-inch, $3.90; full polish, 6 and 7-inch, $4.40; 8-inch, $4.65.

Clevices—7½c per lb.

Enamelware—Canada, 50; Imperial, 60; Premier, 50; Colonial, 60; white, 70 and 5; diamond, 50; granite, 60 per cent.

Files—American, 75; Black Diamond, 60; Nicholson's, 65 per cent.

Galvanized Iron—Apollo, 16 gauge, $3.80; 18, $3.85; 20, $3.90; 22 and 24, $4; 6, $4.20; 28, $4.60; 30 gauge or 10¾ oz., $4.80; Queen's Head, 20, $4; 24, $4.20; 26, $4.60; 28, $4.80.

Galvanized Iron Pipe—⅜ in., $3.25; ½ in., $4.05; ¾ in., $5.00; 1 in., $7.20; 1¼ in., $9.80; 1½ in., $11.80; 2 in., $15.30.

Galvanized Ware.—37½ p.c.

Grindstones—Per 100 lbs., $1.65.

Horseshoes—"M.R.M." and "Bell" iron, No. 0 to 1, $4.90; No. 2 and larger, $4.65; snowshoes, No. 0 to No. 1, $5.15; No. 2 and larger, $4.90; steel No. 0 to 1, $5.35; No. 2 and larger, $5.10; featherweight, $6.50.

Horse Nails—"M.R.M." cold process —No. 3, $4.30; 4, $3.80; 5, $2.75; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

Harvest Tools—50, 5 and 5 per cent.

Hinges—Light T and strap, 65 per cent.

Hooks—Brush, heavy, per dozen, $8.75; grass, $1.70.

Iron Washers—Full box, 40 per cent.; smaller lots, 35 per cent.

Iron Pipe, Black—⅛ in., $3.15; ¼ in., $2.30; ⅜ in., $2.35; ½ in., $3.15; ¾ in., $3.80; 1 in., $5.45; 1¼ in., $7.45; 1½ in., $8.95; 2 in., $11.55; 2½ in., $18.40; 3 in., $24.15; 3½ in., $32.25; 4 in., $36.75; 4½ in., $42.50; 5 in., $47.50; 6 in., $61.50; 7 in., $95.50; 8 in., $118.

Logging Chain—¼ in., $7.50; 5-16 in., $6; ⅜ in., $5.50.

Lanterns—Cold blast, per dozen, $7; coppered, $9; dash, $9.

Poultry Netting—57½ per cent.

Pig Lead—$4.75. Lead Pipe—$5.75.

Lead Waste—$6.75.

Rivets and Burrs—Iron rivets, 55 per cent.; copper, No. 8, 30c; 10, 32c; 12, 34c; copper burrs, No. 8, 40c; 13, 43c; 12, 46; copper rivets and burrs, No. 8, 31c; 9, 32c; 10, 33c; coppered, No. 8, 17c; 9, 17½c; 10, 18c.

Rope — Sisal, 8¾; Pure Manilla, 10¾c; British Manilia, 9c; lath yard, 9¼c.

Staples.—Bright wire, $2.50 F.O.B. Fort William; $2.90, Winnipeg.

Steel Squares—40 off new list.

Shovels—Discounts on No. 1, No. 2, 60 and 2½ p.c.; No. 3, No. 4, 50 and 2½ p.c.; No. 1 scoops, 50 and 6 p.c.; all other grades, 45 and 5 p.c.; fifty cents per dozen net is added to equalize eastern freights.

Solder—Half and half, $28 per cwt.

Screws—Flat head, iron, 87½, brass, 77½; round head, iron, 82½; brass, 72½; coach, 67½ per cent.

Staples—Bright wire per cwt., $2.50 at Fort William, $2.90, Winnipeg.

Stove Pipe—6 inch., $8.70 per 100 lengths; 7 inch., $9.30 per 100.

Terne Plate—I.C., $9.75; I.X., $11.75.

Tin Plate—I.C., charcoal, 20x28, full box, $10.25; ½ box, $5.50; IX., full box, $13.50; ½ box, $8; IXX., full box, $15.50; ½ box, $9.

Tinware, Etc.—Pressed, retinned and plain, 75 and 2½; pieced, 25; japanned ware, 35.

Wrenches Agricultural—70 with 10 p.c. discount.

Methods of Retailing Paints and Varnishes

Paint's Place in Conservation of Lumber

The Need Of Increasing The Life Of Lumber Has Increased The Demand For Paint—It Is More Than An Insurance, It Guards Wood Against Destructive Forces Which Are At Work Every Day—The Difference Which A Decade Has Shown.

Of late years the number of paint houses in Canada have increased, yet despite this the output of these houses has had to be increased greatly to meet the demand. At this season, indeed, so busy are the manufacturers that it is necessary for many to work nights, and a large number of the factories did not close down on Good Friday. Paint is needed, and the manufacturers are naturally anxious to see that they have the goods with which to supply the need.

But what is it that has caused this increased demand? Is it the natural growth in population? Partially that. The great exodus to the North-West has opened a new field for sales; yet in the East, where the population has not increased rapidly—in some districts where it has not increased at all—there has been a great growth in the demand for paint.

Increase in population, therefore, can not be accepted as the explanation for the better condition of affairs.

Paint Not a Luxury.

When the various causes which have had something to do with creating this increased demand are considered, it becomes very evident that the influence which has been most far reaching and most effective has been that of education—general education which has established higher standards, for one thing, and particular paint education. Paint is no longer regarded as a luxury — a beautifier. Paint is now a stern necessity — an insurance which costs something but which saves many times more than its cost. Paint, indeed, is more than an insurance, and people are coming to regard it so. Insurance guards the purchaser against something which may come—damage by fire or water, or destruction by wind storm. Paint, on the other hand, guards against something which is bound to come—the sun, the rains, the storms of winter, and the disintegrating influences of the changing atmosphere. A man buys a insurance policy, and he is taking a wide step. For a small sum he is guarding against something which may happen. A householder buys paint and he is taking a much wiser step. He is guarding against a sure thing — something which he knows is in force—something which is working every day and every night, quietly, but none the less steadily.

Paint Means a Saving.

It is this knowledge which has been brought home to people the country through. The work is not completed yet. There are many still to be convinced that an expenditure on paint is not really an expenditure but a saving. Still the splendid advertising work which has been in progress for the past decade is now showing results. It is not necessary to go far from home to see these. In the province of Quebec, for instance, it was almost a rare thing a decade ago, to see a painted house. A painted barn was a still greater rarity. A visitor to a town or village might almost have counted the painted houses upon his fingers. One hand would have been more than sufficient to tabulate the painted barns in any community. The people had not awakened to the need of protecting their structures against the wind and rain.

What was true in Quebec was doubtless true of practically every other district in Canada. Now, however, in Quebec as in Ontario, the Maritimes, and the West, a visitor to a village or town is able to count upon the fingers of his two hands the houses which are not painted. In the country a less satisfactory state of affairs is noted. The houses there are painted too, yet there are many barns which still raise their gaunt walls unadorned and unprotected.

Need To Increase Life Of Lumber.

But there has been a great change. The idea of using paint to protect is being very generally realized. It is little wonder that this should be so too, for so rapid has been the advance in the price of lumber that the need of increasing its life is becoming exceedingly apparent.

Ten years ago, timber such as would be used is barns, could be bought for about $15 or $16 a thousand. Now the roughest timber, such as is used for the framework, costs about $22 a thousand, while $28 to $30 a thousand is cheap for the class of wood needed for finishing.

On all hands is heard talk of conservation. The forests must be preserved, it is said. There has been a great deal said, and some little done, along the lines of reforestration. That is the way when there begins to appear the possibility of a shortage. At once a shout is raised to conserve the output, while not for some time is much said about increasing the life of the output.

Increases Life of Wood.

This is exactly what paint does. It increases the longevity of the wood. It beautifies the wood too, and for that reason alone would sell largely. But even of greater importance in this practical age is paint's preserving properties.

Suppose a house 60 by 30 and 30 feet in height is built. It will have a total wall area of 5,400 square feet. A con-

A Splendid Window Display in the Store of W. J. Robinson, Royce Avenue, Toronto.

servative estimate of the covering qualities of paint allows one gallon to cover 300 square feet. It would, therefore, take 18 gallons to give this house its proper two coats. Paint varies in price. But supposing $2.00 is paid per gallon, there is an expenditure for material of $36.00. For $36.00, therefore, the material could be purchased which would enable this house to resist the heat and the rain. The wood would last for many years more than it would were no paint applied. At the present cost of lumber, therefore, it will easily be seen that the $36.00 outlay would quickly be saved.

Work For The Future.

Travelers are talking the conserving qualities of paint. The advertising departments are bring this phase of the subject home to the people. Much good has already resulted, yet there is much which yet remains to be done. People have short memories, and there is need to keep harping on such a point. Dealers, moreover, need to explain something of paint as an insurance when talking to their customers. This is the way the present paint demand has been built up, and this is the way a greater demand may be built up in the future.

Keeping Tab on the Paint Stock

A Method Suggested by which Dealers Can Make Sure That They Have an Ample Stock of All Lines on Hand—Sales Are Recorded Without Any Trouble.

Every dealer tries to keep stocked up in good selling lines. Nothing is so indicative of business slackness as the admission that there is none in stock of a certain line. Dealers try to avoid this in every way.

It applies to every department, and it is quite as necessary for a dealer to have his paint stock complete as to have a full line of builders' hardware on the shelves. As spring is the heaviest paint season, it follows that the dealer must pay particular attention during the spring to seeing that he has an ample supply of all lines in his store.

In some lines it is possible to get customers to wait for an article which is "just sold out." If a woman asks for a meat chopper, say, which the clerk finds is not in stock, she may be persuaded to wait until the new supply arrives. But it is not so with paint. A sale delayed is a sale lost. When a man makes up his mind to paint, he wants to go right at it. If he delays, his enthusiasm may wane. If it is a brush he needs he needs it at once. In all probability he has the the can of paint at home ready and, if one dealer can't supply him, he goes to the next store. All stores look alike to him at such a time. If it is a supplementary supply of paint or varnish which is needed, but which the dealer cannot supply, the customer not only goes elsewhere but feels annoyed at the carelessness of the dealer.

There is a great amount of running back and forth between house and hardware store during the spring painting time. The average person has little idea of how much material they will need to do the painting they have in view. As it is most likely that they "err on the side of economy," a second trip to the store is generally necessary. It is equally true, that the average man knows practically nothing about what

L. R. Greene, Who Has Been Moved From Cleveland to Montreal, as Head of Advertising Department of the Sherwin-Williams Co., of Canada, and the Canada Paint Co.

supplies will be needed. One paint dealer estimates that he gets an average of three calls for every job undertaken by a householder.

It follows that the dealer has to be in a position to meet all demands if he desires to hold his custom; and the demands are likely to be a varied nature.

A method for keeping track of stock in the paint department is suggested by a writer in the American Paint and Oil Dealer.

The first part of this plan is a stock "tab" or card to record the sale of goods from original packages, stock boxes and shelves. It is easily applicable to the sale of turpentine and oils, by a little modification to suit the dealer's convenience.

Get from the printer a supply of cards 3 by 5 inches printed with blank lines for the entry of information, such as "article," "stock or invoice number," "bought of," "invoice cost," "freight," "cost to sell," "cost," "how many bought" and "date." Also in a marked off space have numbers printed running from 1 to 12, as most lines are bought in dozen lots.

When a shipment of goods is receivel, and checked into the store as correct and acceptable, one of these cards will accompany the goods when put into stock. It gives information at a glance which would otherwise require some time to gather up, if it becomes necessary to learn anything about what has been done, either in sales, market variation or other matters.

When a sale is made, the salesman will draw a line through the highest number shown within the square. As a good many goods in stock comes in dozens, the card is designed to make a record of dozens. But if there are only ten articles bought, the numbers 12 and 11 may be obliterated when the goods are put into stock, or the whole top line, if only half a dozen of anything is stocked.

When a number is canceled, of course, the next uncanceled number on the card represents the quantity left in active stock. The date shows how active the goods are, and the uncanceled numbers indicate how close to the danger mark of shortage.

If a very close tab on sales is wanted the dealer can require each salesman to use a different colored pencil for canceling the numbers. This will show the activity of the salesman in moving the stock, and would serve as a guide to discover price cutting or other irregularity.

When the last number on the carl is canceled the card will, of course, be turned into the office of having completed its mission. From it the final record in perpetual inventory will be made.

Toronto, Ont.—W. R. Tait, hardware merchant, began suit in the Jury County Court, before Judge Morgan, against the Toronto Railway Company for the recovery of $500. An employee was leading a horse down Yonge street, when it was struck by a car and so badly injured that it had to be shot. Mr .Tait alleges that the motorman could have stopped the car, as he saw the beast from some distance. The company claims that the accident was caused by the animal becoming unruly.

Weekly Market Report --- Paints

FIRMNESS NOTED.

Firmness has been noted in practically all lines. Glass is to be advanced and it seems practically assured that white lead will be put up. There is great firmness noted in linseed oil and lower quotations during the summer months are not deemed possible.

MONTREAL.

Montreal, April 11.—When it is remembered that a number of the paint manufacturies were so busy that they could not close down their works on Good Friday, it will be seen that all the indications are for a banner paint year. That the month of April so far shows a great increase of business over the first part of April, 1911, is not of any great significance, for last year the weather was cold and wet, entirely unsuitable for the sale of paint. But the great increase in the buying this year does indicate that paint dealers are getting off to an early start. The weather is yet a little cold and the floods which have arisen in various low-lying localities have interfered with business to some extent. Yet the retailers are experiencing a good demand. They are selling quite largely and are preparing for still larger sales in the future.

Glass Does the Expected.

The predicted advance in glass has come. This was to be expected. It was only a question of how long the handlers would be able to sell at the old rate. Many retailers have acted upon the suggestions given and have laid in a good part of their stock. Others will have to pay the new rate.

Lead has not advanced as yet, but there is a general feeling that there will shortly come a rise here. Turpentine and linseed oil remain at the old figures.

Linseed Oil.—The general return to work of the miners in England gives a greater feeling of security to the linseed market. There is now little likelihood of the English market advancing greatly, so there will hardly be such an advance here. Prices generally asked are still .91 for raw and .94 for boiled oil. The demand is not great.

Big Early Sales of Paints.

Turpentine.—No scarcity of the supply is reported, and prices remain steady at .70. Ordering fair as is usual at this time of the year.

Mixed Paints.—Here is where the heavy ordering is noticed. The demand is not confined to any one part of the country. Generally there is evidenced a desire for a good supply of paint. The dealers are working well to secure sales. They are securing them too and are necessarily preparing to meet future demands.

White Lead.—Here there is a certain price interest. The demand now is good and there is evidenced a desire to book orders well in advance. This does not suit the manufacturers any too well, for they foresee a necessary advance. Owing to the strike, pig lead has gone up considerably in price. The natural result will be an advance in the white lead. Indeed, it is freely stated that 7 cent lead is confidently expected.

Paris Green.—Since this product was first put upon the market, about a month ago, there has been a large and steady demand. This has hardly decreased. Dealers are now selling to the farmers, and are seeing very clearly that they will be called upon largely for this material.

TORONTO.

Toronto, April 11.—Despite the fact that the weather has been far from satisfactory, business continues exceptionally brisk. There is a steady call for goods. The volume of business all around is largely in excess of last year. Considerable difficulty is being experienced, however, in the matter of shipments. Complaints are received continuously from customers about goods being delayed. Every jobber and manufacturer is experiencing the same thing. The chief difficulty, however, is in getting supplies in. Shipments due weeks ago are still on the road somewhere between point of shipment and destination. The jobbers are being seriously hampered as a result.

Linseed Oil. There seems to be no doubt now that linseed oil will remain firm. Future quotations are going up all the time. It is significant that one quotation for July was made at an advance over the present price.

This tendency is general and points to the continuance of the present price at least. No hints of lower quotations during the summer are now heard. The fact that seed is in most sections scarce and that the Argentine crops has fallen below expectations have been strong factors in creating the present situation.

The price locally remains firm at 94 cents for raw and 97 cents for boiled.

Turpentine Lower.

Turpentine.—A slightly lower tendency is noted in turpentine. The price has been going down at Savannah and the local quotation has been reduced 2 cents, making the price 70 cents.

The shortage in local stocks has been relieved somewhat although there is still great difficulty being experienced in getting supplies. Orders placed some weeks ago are being filled piecemeal and in this way the jobbers have been able to supply all pressing demands. The local market was practically denuded last week and it will be some time before stocks are up to the normal.

An Advance Pending.

White Lead.—It seems practically assured that white lead will advance. The continued increases in the price of pig lead and the firmness of linseed oil make it only a matter of time when white lead will be given another boost. The opinion here seems to be that the grinders will make a larger advance than the last one when they finally decide to act.

Glass.—It is believed that there will be developments in the price of glass before next week and rumors of advances are heard. It is understood that a meeting is being held in Montreal to consider the price problem.

Putty.—The demand continues heavy and prices are quite firm. Present prices are:—Standard bulk in casks, $2.20; in 100-lb. drums, $2.25; in 25-lb. drums, $2.65; bladder, in barrels, $2.75. Pure putty prices remain the same. Bulk, in casks, $2.50; in 100-lb. drums, $2.80; in 25-lb. drums, $2.90; bladder in barrels, $3.

Prepared Paints.—Shipments are now extremely heavy. The spring trade in prepared paints has already broken all records and there is every reason to believe that the volume of business throughout the whole year will be in proportion.

In rosins the demand among the soap makers has been very brisk, consequently, the prices have been maintained at the highest point with very little probability of any reduction as the supply of rosin is not expected to be greater than the demand for the next few months.

NEW INDUSTRY FOR CHATHAM.

Chatham, Ont.—The ratepayers of Chatham, on April 8, approved the granting of assistance to the St. Mary's Machine Co. of St. Mary's, Ohio, which is taking over the property of the Swift Motor Car Co. (formerly the Defiance Iron Works), and will establish a Canadian branch here. The city grants a fixed assessment and agrees to release to the company the outstanding mortgage of $15,000, against the present property. Operations will be commenced at once. The concern manufactures gas, gasoline and steam engines.

TWO WHITE LEADS

BRANDRAM'S B.B. GENUINE WHITE LEAD

Made by the Brandram's process for practically two centuries.

It is the standard White Lead of the world.

By it others are judged.

It combines all the good points of the Old Dutch process, with scientific improvements by which the body and color are perfected.

ANCHOR DECORATORS' PURE WHITE LEAD

The base of which is made by the Old Dutch Process.

It is the best White Lead that can be produced by that method.

Next to the Brandram's process of corroding White Lead, there is none equal to the Old Dutch Process.

We sell you the goods. Then we help sell the goods for you.

MINERVA

PAINT AND PAINT SPECIALTIES

Don't be indifferent to this fact.

After 78 years of endeavor, we could not change the quality—so we still sell you the same "MINERVA" in cans of Full Imperial Measure.

Your customers buy "MINERVA" because of the forceful advertising helps supplied you. We teach them to know the truth about "MINERVA" and what it will do,

Talk to the "MINERVA" Paint man—if he hasn't called, write us.

Pinchin, Johnson & Co. (Canada) Limited

377/387 Carlaw Avenue, - TORONTO

Established in England in 1834.

K44

Steel Tanks and Self-Measuring Pumps for Paint Oils

They avoid all the loss and inconvenience sustained under the old method. The steel tanks are air-tight and will not permit the oil to gum or stick. The pumps measure the oil according to the Imperial Standard, directly into the customer's can. They count the gallons pumped and compute the charge for fractional gallons.

THE BOWSER PAINT OIL SYSTEM

will put every cent of profit into your pocket, where it belongs. With a Bowser your paint oil department will be as clean and inviting as your shelf hardware department. It draws trade.

Why not investigate now and be ready for spring. Your fellow merchants are using them. They'll help you. Ask for book No. 15.

S. F. BOWSER & COMPANY, INC., TORONTO

66-68 FRASER AVENUE

For Twenty-seven Years Manufacturers of Self-measuring Pumps, Tanks, Gasoline and Oil Storage Systems, Self-registering Pipe Line Measures, Dry Cleaning Systems, etc.

MISCELLANEOUS

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

ACCURATE COST KEEPING IS EASY IF you have a Dey Cost Keeper. It automatically records actual time spent on each operation down to the decimal fraction of an hour. Several operations of jobs can be recorded on one card. For small firms we recommend this as an excellent combination—employes' time register and cost keeper. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for catalogue. International Time Recording Company of Canada, Ltd., office and factory, 29 Alice Street, Toronto.

BUSINESS GETTING TYPEWRITTEN LETters and real printing can be quickly and easily turned out by the Multigraph in your own office—actual typewriting for letter-forms —real printing for stationery and advertising, saving 25% to 75% of average annual printing cost. American Multigraph Sales Co., Ltd., 129 Bay Street, Toronto.

COPELAND - CHATTERSON SYSTEMS — Short, simple. Adapted to all classes of business. Copeland-Chatterson Co., Ltd., Toronto and Ottawa. (tf)

COUNTER CHECK BOOKS—WRITE US to-day for samples. We are manufacturers of the famous Surety Non-Smut Duplicating and Triplicating Counter Check Books, and Single Carbon Pads in all varieties. Dominion Register Co., Ltd., Toronto.

COUNTER CHECK BOOKS — ESPECIALLY made for the hardware trade. Not made by a trust. Send us samples of what you are using, we'll send you right prices. Our holder with patent carbon attachment has no equal on the market. Supplies for binders and monthly account systems. Business Systems, Limited, Manufacturing Stationers, Toronto. (tf)

YOU CAN BUY A REBUILT TYPEWRITER from us. We have about seventy-five typewriters of various makes, which we have rebuilt and which we will sell at $10.00, $15.00 and $20.00 each. We have also a large stock of better rebuilts at slightly higher figures. Write for details. The Monarch Typewriter Co., Ltd., 46 Adelaide St. West, Toronto, Canada. (tf)

MISCELLANEOUS

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis-Fensom Elevator Co., Traders Bank Building, Toronto.

EGRY BUSINESS SYSTEMS ARE DEVISED to suit every department of every business. They are labor and time savers. Produce results up to the requirements of merchants and manufacturers. Inquire from our nearest office. Egry Register Co., Dayton, Ohio; 123 Bay St., Toronto; 258½ Portage Ave., Winnipeg; 308 Richards St., Vancouver. (tf)

FIRE INSURANCE — INSURE IN THE Hartford. Agencies everywhere in Canada.

MODERN FIREPROOF CONSTRUCTION. Our system of reinforced concrete work—as successfully used in any of Canada's largest buildings—gives better results at lower cost "A strong statement," you will say. Write us and let us prove our claims. That's fair. Leach Concrete Co., Limited, 100 King St. West, Toronto.

MOORE'S NON-LEAKABLE FOUNTAIN pens. If you have fountain pen troubles of your own, the best remedy is to go to your stationer and purchase from him a Moore's Non-Leakable Fountain Pen. This is the one pen that gives universal satisfaction, and it costs no more than you pay for one not as good. Price, $2.50 and upwards. W. J. Gage & Co., Limited, Toronto, sole agents for Canada.

PENS—THE VERY BEST PENS MADE ARE those manufactured by William Mitchell Pens, Limited, London, England. W. J. Gage & Co., Limited, Toronto, are sole agents for Canada. Ask your stationer for a 25c. assorted box of Mitchell's Pens and find pen to suit you.

THE NATIONAL CASH REGISTER COMpany guarantee to sell a better register for less money than any other house on earth. We can prove it. Make us. The National Cash Register Co., 285 Yonge Street, Toronto.

THE "KALAMAZOO" LOOSE LEAF BINDER holds just as many sheets as you actually require and no more. Back is flexible, writing surface flat, alignment perfect. Cannot get out of order. No exposed metal parts or complicated mechanism. Write for booklet. Warwick Bros. & Rutter, Ltd., King and Spadina, Toronto. (tf)

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

Keep in mind the dominant fact that mankind from its first appearance on the earth has been schooled by nature to look for signs; for invitations to taste; for suggestions as to what to wear. Tell your story briefly, forcibly, truthfully, and address it through the proper media and you can successfully apply advertising as a means to increased distribution.

Hardware & Metal,
Toronto, Ont.

Gentlemen :—

We are pleased to announce that we were to-day favored with a visit from Mr. Bert Hamilton of Hamilton & Stott, of St. Thomas.

While here Mr. Hamilton on behalf of the firm of Hamilton & Stott completed arrangements whereby they purchased from the Jones Register Co., of Toronto, their entire stock of Jones Registers, floor registers, borders and faces, wall pipes and fittings, and everything connected with the heating business formerly owned by the Jones Register Co., of Toronto. From this date Hamilton & Stott will be successors to the Jones Register Co., of Toronto, and all Jones Registers furnished to the trade in the Province of Ontario will be furnished by Hamilton & Stott, of St. Thomas.

The Jones Register Co. still retain the book accounts, and all collections of the Jones Register Co.'s book accounts will be made by the Jones Register Co.

Yours very truly,

THE JONES REGISTER CO.

A. O. Jones, Sec'y.

SHERWIN-WILLIAMS PAINTS & VARNISHES

¶ Every year in the past has shown a splendid increase over previous years in the sale of S-W Paints and Varnishes. The beginning of each year has seen our list of successful S-W agents and dealers grow larger. This year of 1912 is beginning to break all previous sales records. Canada is enjoying the greatest prosperity in her history, and it's natural that one of her largest and most substantial industrial organizations should reflect these favorable conditions. Unmistakable evidence of the splendid business outlook in general, and the prospects for a record-breaking paint and varnish year in particular, make us want to urge our dealers to use every possible means to make the most of this opportunity. ¶ No other line of paints and varnishes in the Dominion has the reputation of S-W products. This splendid reputation is your most powerful selling force, and you can turn it into bigger sales and better profits if you will use it well. All our advertising is designed to make your store conspicuous as the local distributing centre for the best-known paints and varnishes in the world. Use our advertising and selling helps to the limit of your local possibilities. We know from past experience that your work will pay dividends, and remember, we are ready and anxious to co-operate to make the season a successful one for you. We want you to feel free to use our help as much as you can.

Glidden

Challenges Comparison

Our terms are Sixty Days—some varnish houses give four months.

Why should you deal with Glidden?

There's just one answer, Mr. Merchant: The quality of the goods and the profits to you.

The Glidden discount is so much more generous than the discounts made by other varnish houses that *the discount discounts the terms.*

The discount we offer the trade on Green Label Varnishes, Stains and Specialties makes it possible for you to *make more money* absolutely regardless of four months' five months'—or six months' terms, and Glidden's Green Label Varnishes are in a class by themselves.

Have you been reading our advertising in the painters' publications?

We challenge any painter in the land to send us a sample of any exterior varnish equal in quality to Glidden's M.P. Durable Exterior, or any interior varnish equal to Glidden's M.P. Durable Interior, or any floor varnish equal to Glidden's M.P. Durable Floor.

We are giving this challenge bold advertisement in the Master Painter, The Painter and Decorator, The Modern Painter, Practical Decorator, Painters' Magazine, Cement World, American Carpenter and Builder, etc.

That is the sort of challenge that shows *faith* in the quality of our goods, and the painters know it.

Write for our New and Most Generous Proposition to the Trade on Green Label Varnishes, Endurance Wood Stains, Colorspar, and Specialties. Use the attached coupon.

GREATER SALES-GREATER-SATISFACTION-GREATER—PROFIT

It is the quality the manufacturer puts into his paint that gives the greater satisfaction — that makes greater sales possible, and returns the greater profits to the paint dealer. The dealer who handles

Martin-Senour Paint
100% Pure

finds his business growing as a result of the presence of the quality of *lasting service, non-fading color, luster, free flowing, surface covering capacity* put into paint by its makers. If you want the greater sales and the greater profits that come as a reward for greater satisfaction, sell Martin-Senour Paints. Don't put off writing for the agency

WILL YOU LISTEN?

We want to tell you one or two little things about DOUGALL VARNISH.

It is made in the best equipped factory in Canada, which possesses the most up-to-date machinery and facilities.

It is made from none but the very finest of materials, and none but the most expert labor is used in its manufacture.

It is thoroughly aged, and not a can is allowed to leave the factory unless it comes right up to the Dougall standard.

The result is that it is the best varnish made, and we are perfectly justified in calling it

The Varnish That Lasts Longest

The Varnish that Sells without Argument

The easiest way to sell varnish is to sell the Berry Brothers' Trade-Mark Label.

When you offer that label to a customer no explanation or arguments need accompany it.

It's so well known and widely advertised that the customer doesn't require any other evidence of quality.

Your trade can't see or feel or taste or smell the goods themselves when they come to you for varnish. They have to trust to the label.

That's why it's natural for them to trust most the label they know best.
And that's Berry Brothers'.

Berry Brothers' Business Builders

The Big-4 with which every dealer can most easily satisfy the quality-demands of his trade.

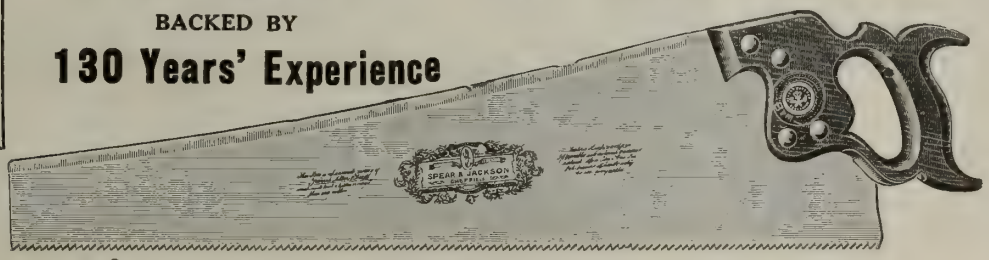
"THE NAME'S THE GUARANTEE"

BACKED BY
130 Years' Experience



LEAP-FROG

171-A Secret Process VANADIUM Steel
(Also Straight Back)

Extract from The LONDON DAILY TELEGRAPH
WHICH SPEAKS FOR ITSELF

As a matter of fact, the trade of which Sheffield is the centre has in the last year or two fought—and won—a notable fight. Germany was a formidable competitor; America a yet more serious one, in the matter of tools, and especially SAWS. The English makers set themselves to meet this sharp rivalry, availing themselves of a superior position alike in materials and highly specialized skill. They took full advantage of the technical schools, with their scientific teaching as to metals and the treatment of steel, and paid more attention than they have ever done before to design and finish. Their energy and enterprise won prompt recognition from the buyers for the retail trade, and within very recent days they have enjoyed the spectacle of seeing the agent of one of the most noted firms of tool-makers in the United States coming over to make a tour of inquiry as to what had come over English trade that they had lost it so entirely. The British manufacturers had, moreover, proved conclusively that, quality for quality, their products had nothing whatever to fear on the important matter of retail selling price, and their victory was complete.

IF you are not handling our Saws and Edge Tools, you are paying more for inferior goods. Does it pay you ?

The "IDEAL" LAWN FENCE

"An Attractive FENCE Which Pays An Attractive PROFIT"

The Ideal Fence appeals to the public because it is neat and ornamental, very strong and not expensive. Has a close mesh which keeps chickens and small animals out of the yard.

The Ideal Fence not only affords protection to the lawn, but adds greatly to the appearance of any place in which it is erected.

One very important feature about Ideal Lawn Fence is that it is made of No. 9 hard steel evenly galvanized wire. No soft or cabled wire is used, so that when once erected it does not stretch, but maintains its original appearance without bagging or sagging.

This fence can be put up quickly, and at a small cost, by anyone, and will accomplish the same result of efficiency and appearance as an iron fence costing many times as much.

Write for our catalogue and prices now and catch the Spring trade.

For Increased Business
Sell the

SHELF LOCK STEP LADDER

This is the lowest priced step ladder we make. Galvanized steel ears fasten the legs and risers to the top.

The lock that holds the ladder from opening and closing when in use is made by using strips of steel to form a hinge with the arms that support the shelf.

The shelf is always up when the ladder is closed and horizontal when in use. This is a very convenient and practical house ladder where short lengths are used and it is certain to appeal to the public.

Made regularly 4 to 10 ft.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure the information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

THE "WANT AD."

The "want ad." has grown from a little used force in business life, into one of the great necessities of the present day.

Business men nowadays turn to the want ad." as a matter of course for a hundred small services.

The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The w ant ad." is the great force in the small affairs and incidents of daily life.

Jardine Universal Ratchet Clamp Drill

The ROSS

"High Velocity" Sporting Rifle

justifies itself on every occasion where absolute dependability is required.

Where danger is met face to face its superiority is shown—

RETAIL PRICE, $70.00

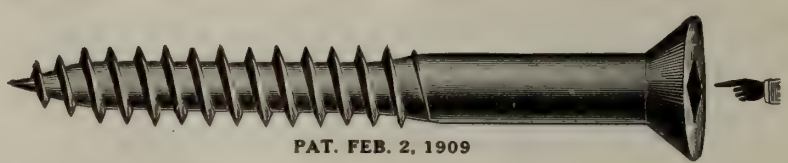
Other Ross Rifles from $25.00 up

The prestige of the Ross Rifle increases from month to month, and there are demands in every town in Canada for them.

Dealers will find them the most satisfactory to carry —no trouble with duties, no delay in securing parts. Liberal discounts and satisfied customers.

Send for Catalogue and Trade Discounts.

THE ROSS RIFLE CO., QUEBEC, QUE.



PAT. FEB. 2, 1909

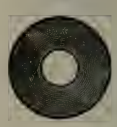
ROBERTSON

SOCKET HEAD

WOOD SCREWS

have a new and very important feature in the square hole. It is a feature that wood workers are quick to notice, as it not only preserves the screw, but also saves much of their valuable time, as it does away with all possibility of the screw driver slipping. It is certain to create a large demand in your vicinity after once introduced.

We also manufacture Hand Drivers, Yankee Bits, Brace Bits, Rivets, Burrs, Washers, Nails, Wire and other high-grade products.



The P. L. Robertson Manufacturing Co., Limited, - Milton, Ont.

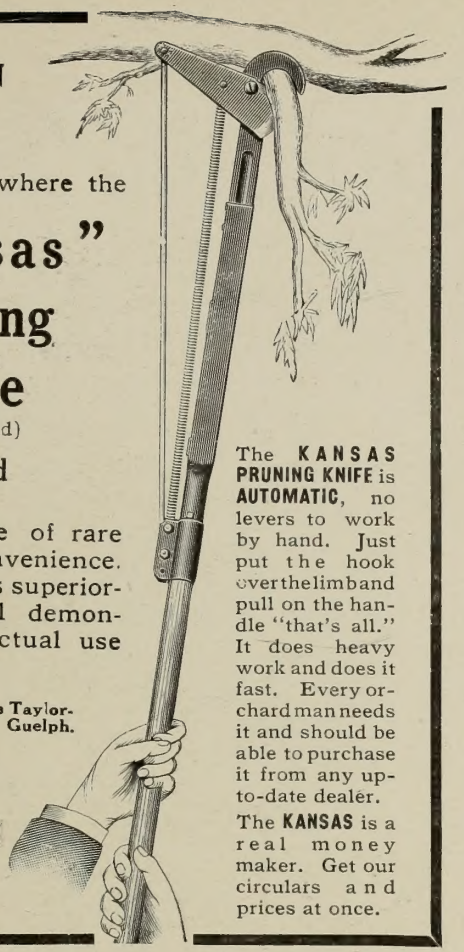
SATISFACTION PREVAILS

In every store where the

"Kansas" Pruning Knife

(Improved)

Is Sold



This is a knife of rare quality and convenience. It has proved its superiority by practical demonstrations and actual use for years.

Made in Canada by the Taylor-Forbes Co., Limited, Guelph.

Write for circular and prices.

International Tool Co.

Detroit, - Michigan

The **KANSAS PRUNING KNIFE** is **AUTOMATIC**, no levers to work by hand. Just put the hook over the limb and pull on the handle "that's all." It does heavy work and does it fast. Every orchardman needs it and should be able to purchase it from any up-to-date dealer.

The **KANSAS** is a real money maker. Get our circulars and prices at once.

Supply Your Farm Trade

WITH

STILL'S

Hay Fork Handles

These handles will prove to be a very profitable addition to your stock as they are the kind the farmers want---the durable, service-giving kind.

Made from the best Northern White Ash and cannot be excelled in quality or finish. You will get excellent results from handling them.

Get our circulars and discounts at once.
